

Environmental Health and Hazard Risk Assessment

Principles and
Calculations

Louis Theodore
R. Ryan Dupont

Contents

Preface.....	xvii
Introduction.....	xxiii

Part I Introductory Comments

1 About the Book	3
1.1 Introduction.....	3
1.2 Why Use Risk-Based Decision Making?.....	4
1.3 Book Contents.....	6
1.4 Definitions.....	7
1.5 Risk Terms.....	13
1.6 Financial Risk	16
References	22
2 History of Environmental Health Problems.....	23
2.1 Introduction.....	23
2.2 First Humans	25
2.3 Development of Agriculture	26
2.4 Colonization of the New World	28
2.5 Industrial Revolution.....	29
References	33
3 History of Environmental Hazard Problems.....	35
3.1 Introduction.....	35
3.2 Early Accidents.....	36
3.2.1 Great Chicago Fire.....	36
3.2.2 South Fork Dam: Johnstown, Pennsylvania	37
3.2.3 Oppau, Germany	37
3.2.4 East Ohio Gas Company: Cleveland, Ohio	38
3.2.5 Texas City, Texas.....	39
3.3 Recent Major Accidents.....	40
3.3.1 Flixborough, England.....	40
3.3.2 Seveso, Italy	41
3.3.3 Three Mile Island, Pennsylvania	42
3.3.4 Chernobyl, Russia	43
3.3.5 Bhopal, India.....	45
3.3.6 Ashland Oil, Pennsylvania.....	47
3.3.7 Trans World Airlines: Long Island, New York	48

- 3.4 Major Accidents in the Twenty-First Century..... 53
 - 3.4.1 Y2K..... 54
 - 3.4.2 The Indian Ocean Earthquake and Tsunami 54
 - 3.4.3 Katrina..... 54
 - 3.4.4 2010 Earthquakes 55
 - 3.4.5 Chilean Mine Accident 56
 - 3.4.6 BP Disaster 56
- 3.5 Advances in Safety Features 60
- References 63

- 4 Health Risk versus Hazard Risk 65**
 - 4.1 Introduction 65
 - 4.2 Introduction to the Health Risk Assessment Process..... 67
 - 4.3 Introduction to the Hazard Risk Assessment Process 68
 - 4.4 Qualitative Risk Scenarios..... 70
 - 4.5 What Are the Differences?..... 72
 - 4.6 Uncertainty Factors..... 73
 - 4.7 Future Trends in Environmental Risk Assessment 74
 - References 75

- 5 Environmental Regulatory Framework 77**
 - 5.1 Introduction 77
 - 5.2 Regulatory System 78
 - 5.3 Laws and Regulations: The Differences 81
 - 5.4 Role of the States 83
 - 5.5 Resource Conservation and Recovery Act..... 83
 - 5.6 Major Toxic Chemical Laws Administered by the U.S. EPA 85
 - 5.7 Legislative Tools for Controlling Water Pollution..... 89
 - 5.7.1 Clean Water Act 89
 - 5.7.2 Safe Drinking Water Act..... 92
 - 5.7.3 Marine Protection, Research, and Sanctuaries Act (Title 1)..... 94
 - 5.8 Oil Pollution Act..... 94
 - 5.9 Superfund Amendments and Reauthorization Act (SARA) of 1986 95
 - 5.10 Clean Air Act..... 99
 - 5.10.1 Provisions for Attainment and Maintenance of National Ambient Air Quality Standards..... 100
 - 5.10.2 Provisions Relating to Mobile Sources 101
 - 5.10.3 Air Toxics 101
 - 5.10.4 Acid Deposition Control..... 102
 - 5.10.5 Operating Permits..... 103
 - 5.10.6 Stratospheric Ozone Protection 103

5.10.7	Provisions Relating to Enforcement.....	103
5.10.8	Provisions Relating to Chemical Accidents and Hazards	105
5.11	Occupational Safety and Health Act.....	106
5.12	EPA's Risk Management Program	108
5.13	Pollution Prevention Act of 1990.....	113
	References	114
6	Emergency Planning and Response	117
6.1	Introduction	117
6.2	Need for Emergency Response Planning.....	118
6.3	Planning Committee	119
6.4	Hazards Survey	123
6.5	Plan for Emergencies	126
6.6	Training of Personnel	130
6.7	Notification of Public and Regulatory Officials	131
6.8	Plan Implementation	133
6.8.1	General Questions	134
6.8.2	Emergency Organization.....	134
6.8.3	Emergency Action.....	135
6.8.4	Alarms.....	135
6.8.5	Communications.....	135
6.8.6	Evacuation.....	135
6.8.7	Accounting for Personnel	135
6.8.8	First Aid.....	136
6.8.9	Transportation.....	136
6.8.10	Security.....	136
6.8.11	Firefighting	136
6.8.12	Outside Agencies	136
6.8.13	Training.....	136
6.9	Other State Regulatory Initiatives	137
6.9.1	New Jersey Toxic Catastrophe Prevention Act	138
6.10	Illustrative Examples	140
	References	148

Part II Health Risk Assessment

7	Introduction to Health Risk Assessment.....	153
7.1	Introduction	153
7.2	Health Risk Evaluation Process	155
7.3	Health Problem Identification	157
7.4	Toxicology and Dose-Response.....	158

7.5	Exposure Assessment.....	160
7.6	Health Risk Characterization.....	161
	References	164
8	Health Problem Identification	165
8.1	Introduction	165
8.2	Toxicology Principles.....	168
8.3	Epidemiology Principles.....	169
8.4	Molecular/Atomic Structural Analysis.....	171
8.5	Material Safety Data Sheets.....	172
8.6	Engineering Problem Solving	184
8.7	Fate of Chemicals in the Environment Related to Health Problems.....	185
8.8	Carcinogens versus Noncarcinogens.....	188
	8.8.1 Noncarcinogens	188
	8.8.2 Carcinogens	189
	References	189
9	Toxicity and Dose–Response	191
9.1	Introduction	191
9.2	Definitions.....	192
9.3	Toxicology	200
9.4	Epidemiology.....	203
9.5	Noncarcinogens.....	207
	9.5.1 Concept of Threshold	208
	9.5.2 Derivation of an Oral RfD	209
	9.5.3 Derivation of an Inhalation RfD.....	210
	9.5.4 Derivation of a Subchronic RfD.....	211
	9.5.5 Derivation of Developmental Toxicant RfD.....	212
	9.5.6 Calculation Scheme for Noncarcinogens	213
	9.5.7 Dose–Response Relationships	213
9.6	Carcinogens	214
	9.6.1 Concept of Nonthreshold Effects.....	215
	9.6.2 Assigning a Weight of Evidence.....	215
	9.6.3 Generating a Slope Factor	216
	9.6.4 Identifying the Appropriate Data Set	216
	9.6.5 Dose–Response Relationships	219
9.7	Uncertainties/Limitations	222
	9.7.1 Uncertainties Related to Toxicity Information	224
	References	233
10	Exposure Assessment	235
10.1	Introduction	235
10.2	Components of an Exposure Assessment	239
	10.2.1 Step 1: Characterization of Exposure Setting	239

10.2.2	Step 2: Identification of Exposure Pathways.....	239
10.2.3	Step 3: Quantification of Exposure.....	240
10.2.4	Step 4: Quantification of Intakes.....	241
10.3	Dispersion in Water Systems.....	242
10.3.1	Rivers and Estuaries.....	244
10.3.2	Lakes and Impoundments.....	246
10.3.3	Groundwater	247
10.4	Dispersion in Soils	250
10.5	Dispersion in the Atmosphere	253
10.5.1	Effective Height of Atmospheric Emissions	253
10.5.2	Atmospheric Dispersion Equations for Continuous Sources.....	258
10.5.3	Atmospheric Dispersion Equations for Instantaneous Sources	276
	References	282
11	Health Risk Characterization	283
11.1	Introduction	283
11.2	Qualitative Health Risk Scenarios.....	285
11.3	Quantitative Risk: Noncarcinogens	289
11.3.1	Risks for Multiple Substances	290
11.3.2	Noncarcinogenic Effects: Chronic Exposures	290
11.3.3	Noncarcinogenic Effects: Subchronic Exposures.....	291
11.3.4	Noncarcinogenic Effects: Less than 2 Week Exposures	291
11.3.5	Segregation of Hazard Indices.....	292
11.3.6	Combining Risks across Exposure Pathways.....	292
11.4	Quantitative Risk: Carcinogens	295
11.4.1	Risks for Multiple Substances	296
11.4.2	Combining Risk across Exposure Pathways.....	297
11.5	Risk Uncertainties/Limitations	301
11.5.1	Uncertainty and Variability.....	302
11.5.2	Assessment and Presentation of Uncertainty.....	304
11.6	Risk-Based Decision Making.....	305
11.7	Public Perception of Risk	306
11.7.1	Everyday Risks	307
11.7.2	Outrage Factors	307
	References	317

Part III Hazard Risk Assessment

12	Introduction to Hazard Risk Assessment.....	321
12.1	Introduction	321
12.2	Risk Evaluation Process for Accidents	323

12.3	Hazard Identification.....	326
12.4	Probability and Causes of Accidents.....	329
12.5	Consequences of Accidents	331
12.6	Hazard Risk Characterization.....	331
	References	334
13	Hazard/Event Problem Identification.....	335
13.1	Introduction	335
13.2	Process Equipment.....	336
13.2.1	Reactors	336
13.2.2	Heat Exchangers	336
13.2.3	Mass Transfer Equipment.....	337
13.2.3.1	Distillation Columns.....	337
13.2.3.2	Adsorbers	337
13.2.3.3	Absorbers.....	338
13.2.4	Ancillary Equipment.....	339
13.2.5	Environmental Control Equipment.....	340
13.2.6	Utilities	341
13.2.7	Protective and Safety Systems	342
13.2.8	Process Diagrams	343
13.2.9	Plant Siting and Layout.....	344
13.3	Classification of Accidents.....	347
13.3.1	Equipment Failures.....	348
13.3.2	Human Errors and Occupational Mishaps	350
13.3.2.1	Human Element.....	350
13.3.2.2	Task Variables	351
13.3.2.3	Environmental Element.....	351
13.3.3	Transport Accidents.....	352
13.3.4	Electrical Failures.....	353
13.3.5	Nuclear Accidents.....	354
13.3.6	Natural Disasters	356
13.4	Fires, Explosions, Toxic Emissions, and Hazardous Spills	359
13.4.1	Fire Fundamentals.....	359
13.4.2	Plant Fires.....	363
13.4.3	Causes of Plant Fires	365
13.4.4	Explosion Fundamentals	366
13.4.5	Unconfined Vapor Cloud Explosions (UVCEs).....	370
13.4.6	Plant Explosions.....	370
13.4.7	Toxic Emissions.....	373
13.4.8	Hazardous Spills.....	374
13.5	Hazard Event Evaluation Techniques.....	377
13.5.1	System Checklists	380
13.5.2	Safety Reviews/Safety Audits	381
13.5.3	“What If” Analyses.....	382

13.5.4 Preliminary Hazard Analyses (PHAs).....	383
13.5.5 Hazard and Operability (HAZOP) Studies	384
References	392
14 Hazard/Event Probability	395
14.1 Introduction	395
14.2 Accident Causes	395
14.3 Series and Parallel Systems	398
14.4 Probability Distributions	403
14.4.1 Binomial Distribution	406
14.4.2 Poisson Distribution.....	408
14.4.3 Exponential Distribution	410
14.4.4 Normal Distribution.....	412
14.4.5 Log-Normal Distribution.....	416
14.5 Weibull Distribution.....	424
14.6 Fault Tree Analysis	430
References	438
15 Hazard/Event Consequences	439
15.1 Introduction	439
15.2 Accident Minimization/Prevention	440
15.3 Consequence Estimation.....	452
15.4 Failure Modes, Effects, and Criticality Analysis (FMECA)	458
15.5 Vulnerability Analysis	461
15.6 Event Tree Analysis	468
References	475
16 Hazard Risk Characterization	477
16.1 Introduction	477
16.2 Risk Characterization.....	480
16.3 Public Perception of Risk	482
16.4 Risk Communication.....	482
16.5 Cause–Consequence Analysis	487
16.6 Qualitative Hazard Risk Assessment	489
16.7 Uncertainties/Limitations	494
16.8 Quantitative Hazard Risk Assessment.....	497
References	507
 Part IV Case Studies	
17 The Case for Case Studies	511
17.1 Introduction	511
17.2 Case Study Criteria: Is It Logical, Relevant, and Reasonable?.....	512

17.3 Preparing a Case Study Solution 512
Reference 513

18 Monte Carlo Simulation 515
18.1 Introduction 515
18.2 Case Study 1: Time to Pump Failure 516
18.3 Case Study 2: Time to Failure of Two Electrical Components 518
18.4 Case Study 3: Nuclear Plant Temperature Gauge Lifetime 521
18.5 Case Study 4: Bus Section Failures in Electrostatic
Precipitators 525
References 528

19 Emergency Planning and Response 529
19.1 Introduction 529
19.2 Case Study 1: Terrorist Attack of a Pharmaceutical
Company’s Plant in Greenpoint, Brooklyn, New York 529
19.3 Case Study 2: Terrorist Attack of the Brooklyn
Navy Yard in Greenpoint, Brooklyn, New York 531
19.4 Case Study 3: Plans to Counter the Possibility of a Process
or Plant-Related Accident at the “Wedo” Chemical Facility
in Suffolk County, Long Island, New York 533
19.5 Case Study 4: Dilution Ventilation Models 538
References 548

20 Natural Disasters 549
20.1 Introduction 549
20.2 Case Study 1: Hurricanes 550
20.3 Case Study 2: Floods 559
20.4 Case Study 3: Earthquakes 562
20.5 Case Study 4: Meteorites 566
20.6 Case Study 5: Combined Hurricanes and Flooding 569
References 571

21 Industrial Accidents 573
21.1 Introduction 573
21.2 Case Study 1: Nanochemical Plant Accident 573
21.3 Case Study 2: Caustic Tank Preliminary Hazard Analysis 579
21.4 Case Study 3: Transportation of Hazardous Chemicals 583
21.5 Case Study 4: Offshore Rig Accident 586
References 589
