
Contents

Preface xiii

Chapter 1

THE EARTH'S ATMOSPHERE 2

- Overview of the Earth's Atmosphere 4
 - Composition of the Atmosphere 5
 - The Early Atmosphere 9
- Vertical Structure of the Atmosphere 9
 - A Brief Look at Air Pressure and Air Density 9
 - Layers of the Atmosphere 11

Focus on an Observation

The Radiosonde 12

The Ionosphere 14

Weather and Climate 15

A Satellite's View of the Weather 15

Storms of All Sizes 16

A Look at a Weather Map 17

Focus on a Special Topic

Meteorology—A Brief History 18

Weather and Climate in Our Lives 20

Focus on a Special Topic

What Is a Meteorologist? 23

Summary 24

Key Terms 24

Questions for Review 24

Questions for Thought and Exploration 25

Chapter 2

WARMING THE EARTH AND THE ATMOSPHERE 26

Temperature and Heat Transfer 28

Temperature Scales 29

Latent Heat—The Hidden Warmth 30

Conduction 31

Convection 32

Focus on a Special Topic

Rising Air Cools and Sinking Air Warms 33

Radiation 34

Focus on an Environmental Issue

Sun Burning and UV Rays 36

Balancing Act—Absorption, Emission,
and Equilibrium 37Selective Absorbers and the Atmospheric
Greenhouse Effect 38

Enhancement of the Greenhouse Effect 40

Warming the Air from Below 41

Shortwave Radiation Streaming from the
Sun 42**Focus on an Environmental Issue**Ozone and the Ozone Hole: Their Influence on Climate
Change 42

The Earth's Annual Energy Balance 44

Why the Earth Has Seasons 46

Focus on an Observation

The Aurora—A Dazzling Light Show 47

Seasons in the Northern Hemisphere 49

Focus on a Special TopicIs December 21 Really the First Day
of Winter? 51

Seasons in the Southern Hemisphere 53

Local Seasonal Variations 53

Summary 54

Key Terms 54

Questions for Review 54

Questions for Thought and Exploration 55

Chapter 3

AIR TEMPERATURE 56

Warming and Cooling Air near the Ground 58

Daytime Warming 58

Nighttime Cooling 59

Cold Air Near the Surface 60

Focus on a Special Topic

Record High Temperatures 60

Protecting Crops from the Cold Night Air 62

Daily Temperature Changes 65

Focus on a Special Topic

Record Low Temperatures 66

Regional Temperature Changes 67

Focus on a Special Topic

When It Comes to Temperature, What's Normal? 68

Applications of Temperature Data 71

Air Temperature and Human Comfort 74

Measuring Air Temperature 76

Focus on a Special Topic

A Thousand Degrees and Freezing to Death 76

Focus on an Observation

Why Should Thermometers Be Read in the Shade? 78

Summary 79

Key Terms 80

Questions for Review 80

Questions for Thought and Exploration 81

Chapter 4

HUMIDITY, CONDENSATION, AND CLOUDS 82

Circulation of Water in the Atmosphere 84

Evaporation, Condensation, and Saturation 85

Humidity 86

Vapor Pressure 87

Relative Humidity 87

Relative Humidity and Dew Point 89

Relative Humidity and Human Discomfort 92

Measuring Humidity 94

Focus on a Special Topic

Humid Air and Dry Air Do Not Weigh the Same 95

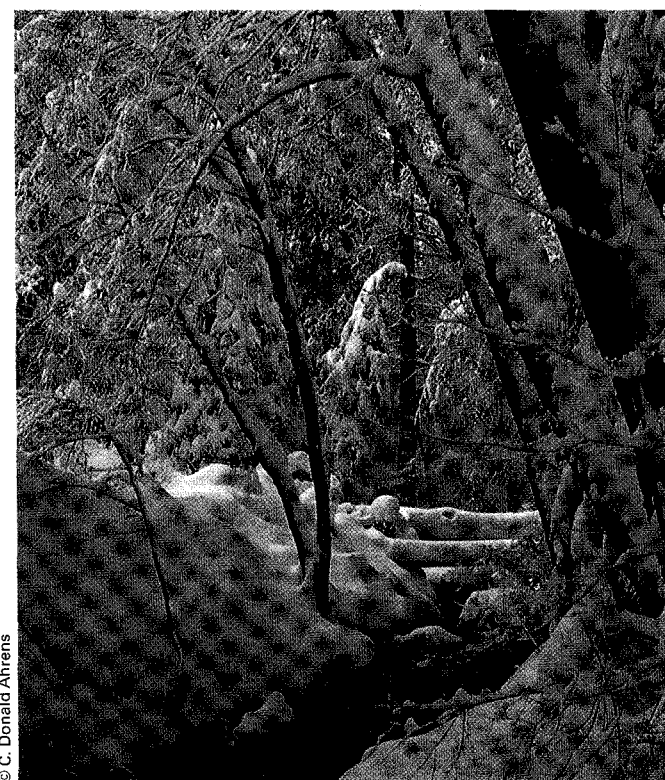

Dew and Frost 96

Fog 97

Foggy Weather 100

Focus on an Environmental Issue

Fog Dispersal 101

Clouds	102
Classification of Clouds	103
Cloud Identification	103
<i>High Clouds</i>	103
<i>Middle Clouds</i>	104
<i>Low Clouds</i>	105
<i>Clouds with Vertical Development</i>	107
Some Unusual Clouds	109
Summary	113
Key Terms	113
Questions for Review	113
Questions for Thought and Exploration	114

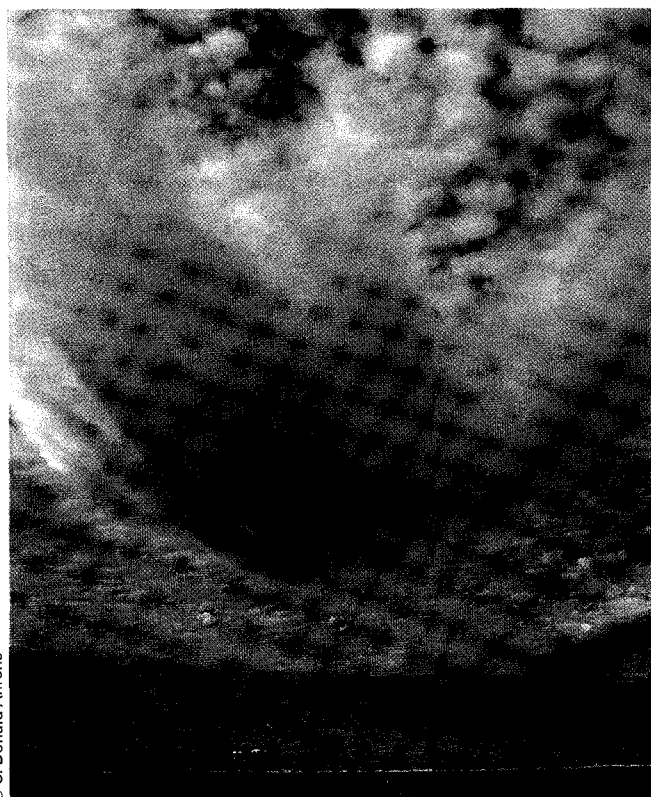

Chapter 5

CLOUD DEVELOPMENT AND PRECIPITATION	116
Atmospheric Stability	118
Determining Stability	119
A Stable Atmosphere	119
An Unstable Atmosphere	120
A Conditionally Unstable Atmosphere	122
Cloud Development and Stability	124
Convection and Clouds	124
Topography and Clouds	125
Focus on a Special Topic	
Atmospheric Stability and Windy Afternoons—Hold on to Your Hat	126
Precipitation Processes	128
Collision and Coalescence Process	128
Ice-Crystal Process	130
Cloud Seeding and Precipitation	132
Precipitation in Clouds	133
Focus on an Environmental Issue	
Does Cloud Seeding Enhance Precipitation?	134
Precipitation Types	135
Rain	135
Snow	136
Focus on a Special Topic	
Are Raindrops Tear-Shaped?	136
Sleet and Freezing Rain	138
Snow Grains and Snow Pellets	139
Hail	140
Focus on an Observation	
Aircraft Icing	141
Measuring Precipitation	143
Instruments	143
Doppler Radar and Precipitation	144
Measuring Precipitation from Space	145

Summary	146
Key Terms	146
Questions for Review	146
Questions for Thought and Exploration	147

Chapter 6

AIR PRESSURE AND WINDS	148
Atmospheric Pressure	150
Horizontal Pressure Variations—A Tale of Two Cities	150
Measuring Air Pressure	152
Focus on a Special Topic	
The Atmosphere Obeys the Gas Law	153
Pressure Readings	154
Surface and Upper-Air Charts	156
Focus on a Special Topic	
Isobaric Maps	157
Why the Wind Blows	158
Newton's Laws of Motion	158
Forces That Influence the Wind	158
<i>Pressure Gradient Force</i>	159
<i>Coriolis Force</i>	160
Straight-Line Flow Aloft	162
Curved Winds Around Lows and Highs Aloft	163
Winds on Upper-Level Charts	164

Surface Winds 165

Focus on an Observation

Winds Aloft in the Southern Hemisphere 166

Winds and Vertical Air Motions 167

Focus on an Observation

Estimating Wind Direction and Pressure Patterns Aloft by Watching Clouds 167

Determining Wind Direction and Speed 169

The Influence of Prevailing Winds 170

Wind Instruments 170

Focus on a Special Topic

Wind Power 173

Summary 173

Key Terms 174

Questions for Review 174

Questions for Thought and Exploration 175

Chapter 7

ATMOSPHERIC CIRCULATIONS 176

Scales of Atmospheric Motion 178

Eddies—Big and Small 180

Local Wind Systems 180

Thermal Circulations 180

Focus on an Observation

Eddies and “Air Pockets” 181

Sea and Land Breezes 182

Seasonally Changing Winds—The Monsoon 184

Mountain and Valley Breezes 186

Katabatic Winds 187

Chinook (Foehn) Winds 188

Focus on a Special Topic

Snow Eaters and Rapid Temperature Changes 189

Santa Ana Winds 190

Desert Winds 191

Global Winds 193

General Circulation of the Atmosphere 193

Single-Cell Model 193

Three-Cell Model 194

Average Surface Winds and Pressure: The Real World 197

The General Circulation and Precipitation Patterns 199

Westerly Winds and the Jet Stream 199

Global Wind Patterns and the Oceans 202

Winds and Upwelling 203

El Niño and the Southern Oscillation 204

Other Atmosphere-Ocean Interactions 207

Summary 209

Key Terms 210

Questions for Review 210

Questions for Thought and Exploration 211

Chapter 8

AIR MASSES, FRONTS, AND MIDDLE-LATITUDE CYCLONES 212

Air Masses 214

Source Regions 214

Classification 215

Air Masses of North America 216

Continental Polar (cP) and Continental Arctic (cA) Air Masses 216

Focus on a Special Topic

Lake-Effect (Enhanced) Snows 218

Maritime Polar (mP) Air Masses 219

Focus on a Special Topic

The Return of the Siberian Express 220

Maritime Tropical (mT) Air Masses 222

Continental Tropical (cT) Air Masses 224

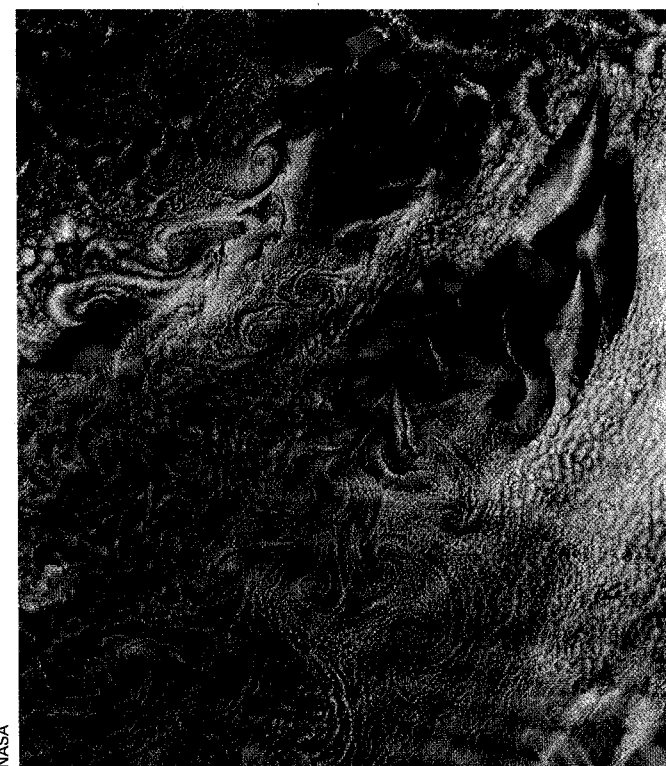

Fronts 225

Stationary Fronts 225

Cold Fronts 226

Warm Fronts 228

Occluded Fronts 231

Mid-Latitude Cyclonic Storms	233
Polar Front Theory	234
Where Do Mid-Latitude Cyclones Tend to Form?	235
Developing Mid-Latitude Cyclones and Anticyclones	237
Focus on a Special Topic	
Northeasters	237
Jet Streams and Developing Mid-Latitude Cyclones	239
Focus on a Special Topic	
A Closer Look at Convergence and Divergence	239
Focus on a Special Topic	
Waves in the Westerlies	240
Summary	242
Key Terms	242
Questions for Review	242
Questions for Thought and Exploration	243

Chapter 9

WEATHER FORECASTING	244
Acquisition of Weather Information	246
Weather Forecasting Tools	247
Focus on a Special Topic	
Watches, Warnings, and Advisories	248
Satellites and Weather Forecasting	250
Weather Forecasting Methods	254
The Computer and Weather Forecasting: Numerical Weather Prediction	254
Why NWS Forecasts Go Awry and Steps to Improve Them	255
Other Forecasting Methods	258
Focus on an Observation	
TV Weathercasters—How Do They Do It?	258
Types of Forecasts	260
Accuracy and Skill in Forecasting	261
Predicting the Weather from Local Signs	263
Weather Forecasting Using Surface Charts	264
Determining the Movement of Weather Systems	264
A Forecast for Six Cities	264
<i>Weather Forecast for Augusta, Georgia</i>	265
<i>Rain or Snow for Washington, D.C.?</i>	266
<i>Big Snowstorm for Chicago</i>	268
<i>Mixed Bag of Weather for Memphis</i>	268
<i>Cold Wave for Dallas</i>	268
<i>Clear but Cold for Denver</i>	269
Summary	270
Key Terms	270
Questions for Review	271
Questions for Thought and Exploration	271

Chapter 10

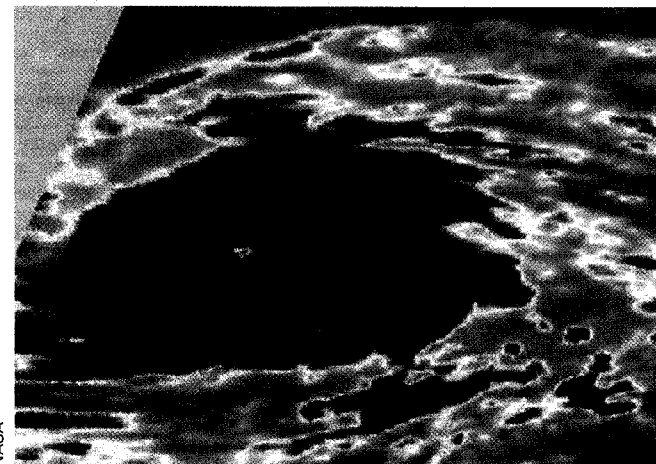

THUNDERSTORMS AND TORNADOES	272
Thunderstorms	274
Ordinary Cell Thunderstorms	275
Multicell Thunderstorms	277
<i>The Gust Front</i>	278
Microbursts	279
Squall-Line Thunderstorms	281
Mesoscale Convective Complexes	282
Supercell Thunderstorms	283
Thunderstorms and the Dryline	286
Thunderstorms and Flooding	287
Distribution of Thunderstorms	287
Focus on a Special Topic	
The Terrifying Flash Flood in the Big Thompson Canyon	288
Lightning and Thunder	290
<i>Electrification of Clouds</i>	290
<i>The Lightning Stroke</i>	291
Types of Lightning	293
Lightning Detection and Suppression	294
Tornadoes	295
Focus on an Observation	
Don't Sit Under the Apple Tree	296
Tornado Life Cycle	297
Tornado Occurrence and Distribution	297
Tornado Winds	299

Seeking Shelter 299
The Fujita Scale 300
Tornado Outbreaks 301
Tornado Formation 302
 Supercell Tornadoes 302
 Nonsupercell Tornadoes 305
Observing Tornadoes and Severe Weather 306
Waterspouts 308
Summary 309
Key Terms 309
Questions for Review 310
Questions for Thought and Exploration 310

Chapter 11

HURRICANES 312
Tropical Weather 314
Anatomy of a Hurricane 314
Hurricane Formation and Dissipation 316
 The Right Environment 317
 The Developing Storm 318
 The Storm Dies Out 319
 Hurricane Stages of Development 320
 Hurricane Movement 321
 Eastern Pacific Hurricanes 322
Focus on a Special Topic
How Do Hurricanes Compare with Middle-Latitude
Cyclones? 322
North Atlantic Hurricanes 324
Naming Hurricanes and Tropical Storms 325
 Devastating Winds, the Storm Surge, and
 Flooding 325
Focus on a Special Topic
Devastating Tropical Storms 329

Some Notable Hurricanes 331
 Camille, 1969 331
 Hugo, 1989 331
 Andrew, 1992 332
 Ivan, 2004 333
 Katrina, 2005 333
Focus on an Observation
The Record-Setting Atlantic Hurricane Seasons of
2004 and 2005 334
 Other Devastating Hurricanes 335
Hurricane Watches, Warnings, and Forecasts 337
Focus on an Environmental Issue
Hurricanes in a Warmer World 338
Modifying Hurricanes 339
Summary 340
Key Terms 340
Questions for Review 341
Questions for Thought and Exploration 341

Chapter 12

GLOBAL CLIMATE 342
A World with Many Climates 344
 Global Temperatures 345
 Global Precipitation 346
Climatic Classification—The Köppen System 348
Focus on a Special Topic
Precipitation Extremes 350
The Global Pattern of Climate 351
 Tropical Moist Climates (Group A) 351
 Dry Climates (Group B) 356
Focus on an Observation
A Desert with Clouds and Drizzle 359
Moist Subtropical Mid-Latitude Climates
 (Group C) 360
Moist Continental Climates (Group D) 362
Focus on a Special Topic
When Does a Dry Spell Become a Drought? 364
 Polar Climates (Group E) 368
 Highland Climates (Group H) 369
Summary 370
Key Terms 370
Questions for Review 370
Questions for Thought and Exploration 371

Chapter 13

THE EARTH'S CHANGING CLIMATE 372

Reconstructing Past Climates 374

Climate Throughout the Ages 377

Focus on a Special Topic

The Ocean's Influence on Rapid Climate Change 378

Temperature Trends During the Past 1000 Years 379

Temperature Trends During the Past 100-Plus Years 379

Climate Change Caused by Natural Events 380

Climate Change: Feedback Mechanisms 381

Climate Change: Plate Tectonics and Mountain Building 382

Climate Change: Variations in the Earth's Orbit 383

Climate Change: Variations in Solar Output 385

Climate Change: Atmospheric Particles 386

Particles Near the Surface 386

Volcanic Eruptions 386

Climate Change Caused by Human (Anthropogenic)

Activities 388

Climate Change: Aerosols Injected into the Lower Atmosphere 388

Climate Change: Increasing Levels of Greenhouse Gases 389

Climate Change: Land Use Changes 389

Focus on an Environmental Issue

Nuclear Winter, Cold Summers, and Dead Dinosaurs 390

Climate Change: Global Warming 391

Recent Global Warming: Perspective 391

Radiative Forcing Agents 391

Climate Models and Recent Temperature Trends 391

Focus on a Special Topic

The Sahel—An Example of Climatic Variability and Human Existence 392

Future Climate Change: Projections 393

Uncertainties about Greenhouse Gases 395

The Question of Clouds 396

The Ocean's Impact 397

Consequences of Climate Change:

The Possibilities 397

Climate Change: Efforts to Curb 400

Climate Change: A Final Note 401

Summary 401

Key Terms 401

Questions for Review 402

Questions for Thought and Exploration 402

Chapter 14

AIR POLLUTION 404

A Brief History of Air Pollution 406

Types and Sources of Air Pollutants 407

Principal Air Pollutants 408

Ozone in the Troposphere 412

Ozone in the Stratosphere 413

Air Pollution: Trends and Patterns 415

Focus on an Environmental Issue

The Ozone Hole 416

Factors That Affect Air Pollution 419

The Role of the Wind 419

The Role of Stability and Inversions 419

Focus on an Observation

Smokestack Plumes 422

The Role of Topography 423

Severe Air Pollution Potential 423

Air Pollution and the Urban Environment 424

Focus on an Observation

Five Days in Donora—An Air Pollution Episode 425

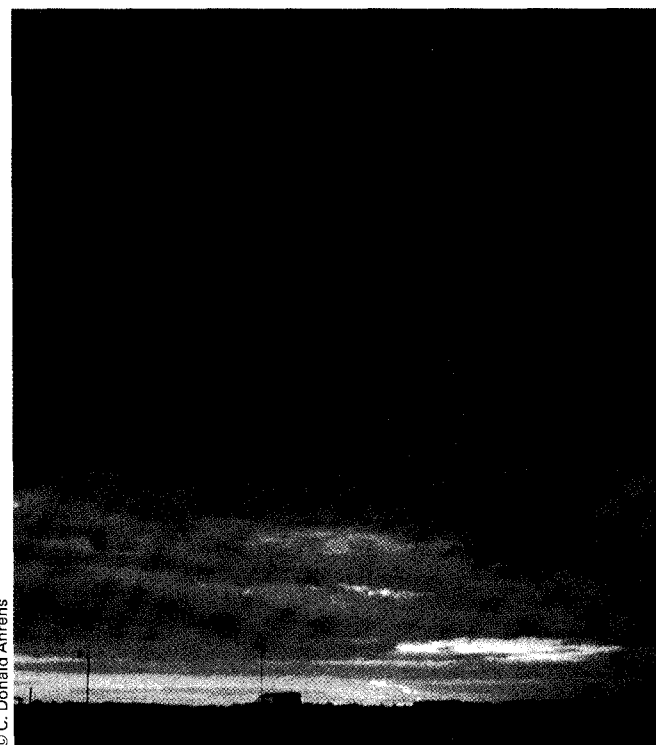

Acid Deposition 427

Summary 429

Key Terms 429

Questions for Review 430

Questions for Thought and Exploration 431

Chapter 15

LIGHT, COLOR, AND ATMOSPHERIC OPTICS 432

- White and Colors 434
- White Clouds and Scattered Light 435
- Blue Skies and Hazy Days 436
- Red Suns and Blue Moons 438
- Twinkling, Twilight, and the Green Flash 439
- The Mirage: Seeing Is Not Believing 442
- Halos, Sundogs, and Sun Pillars 443

Focus on an Observation

The Fata Morgana 444

- Rainbows 447
- Coronas and Cloud Iridescence 449

Focus on an Observation

Glories and the *Heiligenschein* 451

- Summary 452
- Key Terms 452
- Questions for Review 452
- Questions for Thought and Exploration 453

Appendixes

- A** Units, Conversions, Abbreviations, and Equations 455
 - B** Equations and Constants 458
 - C** Weather Symbols and the Station Model 461
 - D** Humidity and Dew-Point Tables [Psychrometric Tables] 463
 - E** Standard Atmosphere 467
 - F** Beaufort Wind Scale (Over Land) 468
 - G** Köppen's Climatic Classification System 469
 - H** Average Annual Global Precipitation 470
- Additional Reading Material 473
Glossary 475
Index 493
