Preface xv

About the Authors xxiii

1 Overview of Nutrition and Health 1

Food Choices 3

The Nutrients 6

Six Classes of Nutrients 7

kCalories: A Measure of Energy 7

Nutrient Recommendations 8

Dietary Reference Intakes 8

Acceptable Macronutrient Distribution Ranges (AMDR) 10

National Nutrition Surveys 11

Coordinating Nutrition Survey Data 11

National Health Goals 11

Dietary Guidelines and Food Guides 12

Dietary Ideals 12

Dietary Guidelines for Americans 13

The USDA Food Guide 15

MyPyramid 21

Food Labels 22

The Ingredient List 22

Nutrition Facts Panel 23

Claims on Labels 24

NUTRITION IN PRACTICE: FINDING THE TRUTH ABOUT NUTRITION 30

2 Carbohydrates 33

The Chemist's View of Carbohydrates 34

Monosaccharides 34

Disaccharides 35

Polysaccharides 35

Health Effects of Sugars and Alternative Sweeteners 38

Sugars 38

Alternative Sweeteners 42

Artificial Sweeteners and Weight Control 44

Health Effects of Starch and Dietary Fibers 45

Carbohydrates: Disease Prevention and Recommendations 46

Carbohydrates: Food Sources 49

Carbohydrates: Food Labels and Health Claims 51

NUTRITION IN PRACTICE: THE GLYCEMIC INDEX IN NUTRITION PRACTICE 55

3 Lipids 59

Roles of Body Fat 60

The Chemist's View of Lipids 61

Triglycerides 61

Fatty Acids 61

Phospholipids 64

Sterols 65

Health Effects and Recommended Intakes of Fats 66

Fats and Heart Health 66

Recommendations 69

Fats in Foods 70

Finding the Fats in Foods 71

Cutting Fat Intake and Choosing Unsaturated Fats 72

NUTRITION IN PRACTICE: FIGURING OUT FATS 80

4 Protein 86

The Chemist's View of Proteins 87

The Structure of Proteins 87

Essential Amino Acids 88

Protein Turnover and Nitrogen Balance 89

Protein Turnover 89

Nitrogen Balance 89

Roles of Body Proteins 90

Protein and Health 93

Protein-Energy Malnutrition 93

Protein Excess 95

Protein and Amino Acid Supplements	96
Protein Recommendations and Intakes	97
Protein in Foods	97
Protein Quality	97
Protein Sparing	99
NUTRITION IN PRACTICE: VEGETARIAN DIETS	102
 5 Digestion and Absorption	 106
Anatomy of the Digestive Tract	107
The Digestive Organs	107
The Involuntary Muscles and the Glands	110
The Process of Digestion	112
Digestion in the Mouth	113
Digestion in the Stomach	113
Digestion in the Small and Large Intestines	114
The Absorptive System	115
The Small Intestine	115
Absorption of Nutrients	117
Transport of Nutrients	118
The Vascular System	118
The Lymphatic System	118
Transport of Lipids: Lipoproteins	118
The System at Its Best	121
NUTRITION IN PRACTICE: FOOD SAFETY	123

6 Metabolism, Energy Balance, and Body Composition 131

The Organs and Their Metabolic Roles	132
The Principal Organs	132
The Body's Metabolic Work	133
The Body's Use of Fuels	134
Energy Metabolism	134
Glucose Production	137
Energy Imbalance	138
Feasting	138
Fasting	138
Energy Balance	141
Energy In	141
Energy Out	141
Estimating Energy Requirements	143
Body Weight, Body Composition, and Health	145
Defining Healthy Body Weight	145
Body Composition	146

Health Risks Associated with Body Weight and Body Fat	148
---	-----

NUTRITION IN PRACTICE: EATING DISORDERS	153
---	-----

7 Weight Management: Overweight and Underweight 160

Causes of Obesity	161
Genetics and Weight	161
Environmental Stimuli	163
Obesity Treatment: Who Should Lose?	165
Inappropriate Obesity Treatments	165
Over-the-Counter Weight-Loss Supplements	166
Other Gimmicks	166
Aggressive Treatments of Obesity	167
Obesity Drugs	168
Surgery	168
Reasonable Strategies for Weight Loss	169
A Healthful Eating Plan	169
Physical Activity	172
Behavior and Attitude	174
Strategies for Weight Gain	178
NUTRITION IN PRACTICE: FAD DIETS	184

8 The Vitamins 188

Vitamins—An Overview	189
The Fat-Soluble Vitamins	190
Vitamin A and Beta-Carotene	190
Vitamin D	195
Vitamin E	198
Vitamin K	199
The Water-Soluble Vitamins	202
The B Vitamins	202
Thiamin	203
Riboflavin	204
Niacin	204
Pantothenic Acid and Biotin	205
Vitamin B ₆	205
Folate	206
Vitamin B ₁₂	208
Non-B Vitamins	209
Vitamin C	209
NUTRITION IN PRACTICE: PHYTOCHEMICALS AND FUNCTIONAL FOODS	217

9 Water and the Minerals 224

Water and Body Fluids 225

Water Balance 225

Fluid and Electrolyte Balance 227

Acid–Base Balance 228

The Major Minerals 228

Sodium 229

Chloride 231

Potassium 231

Calcium 232

Phosphorus 236

Magnesium 236

Sulfate 237

The Trace Minerals 239

Iron 239

Zinc 242

Selenium 244

Iodine 245

Copper 246

Manganese 246

Fluoride 246

Chromium 247

Other Trace Minerals 247

NUTRITION IN PRACTICE: VITAMIN AND MINERAL
SUPPLEMENTS 252

10 Fitness and Nutrition 256

Fitness 257

Benefits of Fitness 257

The Essentials of Fitness 260

The Active Body's Use of Fuels 263

Glucose Use during Physical Activity 263

Fat Use during Activity 266

Protein Use during Activity 268

Vitamins and Minerals to Support Activity 269

Supplements 269

Nutrients of Special Concern 270

Fluids and Electrolytes in Physical Activity 271

Temperature Regulation 271

Fluid Needs during Physical Activity 272

Sports Drinks 273

Enhanced Water 274

Other Beverages 275

Diets for Physically Active People 275

NUTRITION IN PRACTICE: SUPPLEMENTS AND
ERGOGENIC AIDS ATHLETES USE 282

11 Nutrition through the Life Span: Pregnancy and Lactation 286

Pregnancy: The Impact of Nutrition on the Future 287

Nutrition Prior to Pregnancy 287

Prepregnancy Weight 287

Healthy Support Tissues 288

The Events of Pregnancy 289

Nutrient Needs during Pregnancy 290

Food Assistance Programs 296

Weight Gain 297

Weight Loss after Pregnancy 298

Physical Activity 298

Common Nutrition-Related Concerns
of Pregnancy 299

Problems in Pregnancy 301

Practices to Avoid 302

Adolescent Pregnancy 305

Breastfeeding 305

Nutrition during Lactation 306

Contraindications to Breastfeeding 307

NUTRITION IN PRACTICE: ENCOURAGING
SUCCESSFUL BREASTFEEDING 313

12 Nutrition through the Life Span: Infancy, Childhood, and Adolescence 316

Nutrition of the Infant 317

Nutrient Needs during Infancy 317

Breast Milk 319

Infant Formula 321

The Transition to Cow's Milk 322

Introducing First Foods 323

Looking Ahead 325

Mealtimes 325

Nutrition during Childhood 326

Energy and Nutrient Needs 326

Hunger and Malnutrition in Children 330

Lead Poisoning in Children 331

Food Allergy 332

Hyperactivity 334

Childhood Obesity 335

Mealtimes at Home 338

Nutrition at School 340

Nutrition during Adolescence 341

Growth and Development during
Adolescence 342

Energy and Nutrient Needs 342
Food Choices and Health Habits 343
**NUTRITION IN PRACTICE: CHILDHOOD OBESITY
AND THE EARLY DEVELOPMENT OF CHRONIC
DISEASES 350**

13 Nutrition through the Life Span: Later Adulthood 355

Nutrition and Longevity 356

Slowing the Aging Process 357
Nutrition and Disease Prevention 359

Nutrition-Related Concerns during Late Adulthood 360

Cataracts and Macular Degeneration 360
Arthritis 360
The Aging Brain 361

Energy and Nutrient Needs during Late Adulthood 363

Energy and Energy Nutrients 363
Water 365
Vitamins and Minerals 365
Nutrient Supplements for Older Adults 366
The Effects of Drugs on Nutrients 366

Food Choices and Eating Habits of Older Adults 368

Individual Preferences 368
Meal Setting 368
Depression 368
Food Assistance Programs 369
Meals for Singles 370

**NUTRITION IN PRACTICE: HUNGER AND
COMMUNITY NUTRITION 376**

14 Illness and Nutrition Care 381

Nutrition in Health Care 382

Effects of Illness on Nutrition Status 382
Responsibility for Nutrition Care 383
Nutrition Screening 383
The Nutrition Care Process 385

Nutrition Assessment 386

Historical Information 386
Food Intake Data 387
Anthropometric Data 390
Biochemical Analyses 393
Physical Examinations 395
Determining Energy Requirements 396

Implementing Nutrition Care 397

Dietary Modifications 398

Approaches to Nutrition Care 400
Documenting Nutrition Care 401
Improving Food Intake 402
**NUTRITION IN PRACTICE: NUTRITIONAL
GENOMICS 406**

15 Medications, Diet-Drug Interactions, and Herbal Supplements 410

Medications in Disease Treatment 411

Risks from Medications 411
Patients at High Risk of Adverse Effects 412

Diet-Drug Interactions 414

Drug Effects on Food Intake 414
Drug Effects on Nutrient Absorption 414
Dietary Effects on Drug Absorption 416
Drug Effects on Nutrient Metabolism 416
Dietary Effects on Drug Metabolism 417
Drug Effects on Nutrient Excretion 418
Dietary Effects on Drug Excretion 418
Diet-Drug Interactions and Toxicity 418

Herbal Supplements 419

Effectiveness and Safety of Herbal Products 420
Use of Herbal Products in Illness 422
**NUTRITION IN PRACTICE: COMPLEMENTARY AND
ALTERNATIVE THERAPIES 425**

16 Specialized Nutrition Support: Enteral and Parenteral Nutrition 429

Enteral Nutrition Support 430

Enteral Formulas 430
Enteral Nutrition in Clinical Care 433
Administration of Tube Feedings 436
Medication Delivery through Feeding Tubes 440
Tube Feeding Complications 441
Transition to Table Foods 441

Parenteral Nutrition Support 443

Candidates for Parenteral Nutrition 443
Venous Access 444
Parenteral Solutions 445
Administering Parenteral Nutrition 447
Managing Metabolic Complications 449

Nutrition Support at Home 450

Candidates for Home Nutrition Support 451
Planning Home Nutrition Care 451
Quality-of-Life Issues 451

**NUTRITION IN PRACTICE: INBORN ERRORS OF
METABOLISM 456**

17 Foods and Food Consistency for Upper GI Disorders 460

Modifications in Food Texture and Consistency 461

Mechanically Altered Diets 461

Clear Liquid Diet 461

Conditions Affecting the Mouth and Esophagus 463

Dry Mouth 463

Dysphagia 464

Gastroesophageal Reflux Disease 466

Conditions Affecting the Stomach 469

Dyspepsia 469

Nausea and Vomiting 470

Gastritis 470

Peptic Ulcer Disease 471

Gastric Surgery 473

Gastrectomy 473

Bariatric Surgery 476

**NUTRITION IN PRACTICE: NUTRITION AND ORAL
HEALTH 481**

18 Fiber-Modified Diets for Lower Gastrointestinal Tract Disorders 484

Modifying Fiber Intake 485

Disorders of Bowel Function 485

Constipation 486

Diarrhea 487

Irritable Bowel Syndrome 488

Inflammatory Bowel Diseases 490

Diverticular Disease of the Colon 493

Colostomies and Ileostomies 494

**NUTRITION IN PRACTICE: PROBIOTICS AND
INTESTINAL HEALTH 499**

19 Carbohydrate- and Fat- Modified Diets for Malabsorption Disorders 502

Malabsorption Syndromes 503

Evaluating Malabsorption 503

Fat Malabsorption 504

Bacterial Overgrowth 506

Lactose Intolerance 507

Disorders of the Pancreas 508

Pancreatitis 508

Cystic Fibrosis 509

Disorders of the Small Intestine 510

Celiac Disease 511

Short Bowel Syndrome 513

NUTRITION IN PRACTICE: ANEMIA IN ILLNESS 517

20 Nutrition Therapy for Liver and Gallbladder Diseases 521

Fatty Liver and Hepatitis 522

Fatty Liver 522

Hepatitis 523

Cirrhosis 524

Consequences of Cirrhosis 525

Treatment of Cirrhosis 527

Nutrition Therapy for Cirrhosis 528

Liver Transplantation 531

Gallbladder Disease 532

Types of Gallstones 532

Consequences of Gallstones 533

Risk Factors for Cholesterol Gallstones 534

Treatment of Gallstones 535

**NUTRITION IN PRACTICE: ALCOHOL IN HEALTH
AND DISEASE 539**

21 Carbohydrate-Controlled Diets for Diabetes Mellitus 542

Overview of Diabetes Mellitus 543

Symptoms of Diabetes 543

Diagnosis of Diabetes 543

Types of Diabetes 544

Acute Complications of Diabetes 546

Chronic Complications of Diabetes 547

Treatment of Diabetes Mellitus 548

Treatment Goals 549

Evaluating Diabetes Treatment 549

Body Weight Concerns 550

Nutrition Therapy: Nutrient Recommendations 551

Nutrition Therapy: Meal-Planning Strategies 552

Insulin Therapy 555

Antidiabetic Drugs 557

Physical Activity and Diabetes Management 558

Sick-Day Management 559

Diabetes Management in Pregnancy 560

Pregnancy in Type 1 or Type 2 Diabetes 560

Gestational Diabetes 561

**NUTRITION IN PRACTICE: THE METABOLIC
SYNDROME 565**

22 Fat-Controlled, Mineral-Modified Diets for Cardiovascular Diseases 568

Atherosclerosis 569

Consequences of Atherosclerosis 570

Causes of Atherosclerosis 571

Coronary Heart Disease (CHD) 572

Evaluating Risk for Coronary Heart Disease 572

Therapeutic Lifestyle Changes for Lowering CHD Risk 574

Lifestyle Changes for Hypertriglyceridemia 576

Vitamin Supplementation and CHD Risk 578

Drug Therapies for CHD Prevention 578

Treatment for Heart Attack 580

Stroke 581

Stroke Prevention 581

Stroke Management 581

Hypertension 581

Factors That Influence Blood Pressure 582

Factors That Contribute to Hypertension 583

Treatment of Hypertension 583

Heart Failure 586

Consequences of Heart Failure 586

Medical Management of Heart Failure 587

NUTRITION IN PRACTICE: HELPING PEOPLE WITH FEEDING DISABILITIES 591

23 Protein-, Mineral-, and Fluid-Modified Diets for Kidney Diseases 594

Nephrotic Syndrome 596

Consequences of the Nephrotic Syndrome 596

Treatment of the Nephrotic Syndrome 596

Acute Kidney Injury 599

Causes of Acute Kidney Injury 599

Consequences of Acute Kidney Injury 599

Treatment of Acute Kidney Injury 600

Chronic Kidney Disease 602

Consequences of Chronic Kidney Disease 602

Treatment of Chronic Kidney Disease 603

Kidney Transplants 609

Kidney Stones 610

Formation of Kidney Stones 610

Consequences of Kidney Stones 611

Prevention and Treatment of Kidney Stones 611

NUTRITION IN PRACTICE: DIALYSIS 616

24 Energy- and Protein-Modified Diets for Metabolic and Respiratory Stress 619

The Body's Responses to Stress and Injury 620

Hormonal Responses to Stress 620

The Inflammatory Response 621

Nutrition Treatment of Acute Stress 623

Determining Nutritional Requirements 623

Approaches to Nutrition Care in Acute Stress 625

Nutrition and Respiratory Stress 626

Chronic Obstructive Pulmonary Disease 626

Respiratory Failure 629

NUTRITION IN PRACTICE: MULTIPLE ORGAN DYSFUNCTION SYNDROME 634

25 Energy- and Protein-Modified Diets for Cancer and HIV Infection 637

Cancer 638

How Cancer Develops 638

Nutrition and Cancer Risk 639

Consequences of Cancer 641

Treatments for Cancer 642

Nutrition Therapy for Cancer 644

HIV Infection 648

Consequences of HIV Infection 649

Treatments for HIV Infection 650

Nutrition Therapy for HIV Infection 652

NUTRITION IN PRACTICE: ETHICAL ISSUES IN NUTRITION CARE 657

APPENDICES

A Table of Food Composition A-3

B WHO: Nutrition Recommendations Canada: Guidelines and Meal Planning B-1

C Exchange Lists for Diabetes C-1

D Physical Activity and Energy Requirements D-1

E Nutrition Assessment: Supplemental Information E-1

F Aids to Calculations F-1

G Enteral Formulas G-1

H Answers to Self-Check Questions H-1

Glossary GL-1

Index IN-1

How To Features Appear on the Following Pages

Chapter 1

Calculate the Energy a Food Provides 8

Chapter 3

Make Heart-Healthy Choices—by Food Group 73

Chapter 6

Estimate Energy Requirements 144

Chapter 7

Apply Behavior Modification to Manage Body Fatness 176

Chapter 8

Estimate Dietary Folate Equivalents 207

Chapter 9

Cut Salt Intake 231

Add Calcium to Daily Meals 235

Add Iron to Daily Meals 243

Chapter 13

Turn Convenience Foods into Nutritious Meals 371

Plan Healthy, Thrifty Meals 378

Chapter 14

Measure Length and Height 390

Measure Weight 391

Estimate and Evaluate % UBW and % IBW 392

Estimate the Energy Needs of a Hospital Patient 397

Help Hospital Patients Improve Their Food Intakes 403

Chapter 15

Prevent Diet-Drug Interactions 419

Chapter 16

Help Patients Accept Oral Formulas 433

Help Patients Cope with Tube Feedings 438

Plan a Tube Feeding Schedule 439

Administer Medications to Patients Receiving Tube Feedings 441

Calculate the Macronutrient and Energy Content of a Parenteral Solution 447

Chapter 17

Improve Acceptance of Mechanically Altered Foods 466

Manage Gastroesophageal Reflux Disease 468

Alter the Diet to Reduce Symptoms of Dumping Syndrome 475

Alter Dietary Habits to Achieve and Maintain Weight Loss after Bariatric Surgery 477

Chapter 19

Follow a Fat-Controlled Diet 506

Chapter 20

Help the Cirrhosis Patient Eat Enough Food 529

Chapter 21

Use Carbohydrate Counting in Clinical Practice 553

Chapter 22

Assess a Person's Risk of Heart Disease 573

Implement a Heart-Healthy Diet 577

Reduce Sodium Intake 585

Chapter 23

Help Patients Comply with a Renal Diet 608

Chapter 25

Increase kCalories and Protein in Meals 645

Help Patients Handle Food-Related Problems 646

Case Study Features Appear on the Following Pages

Chapter 11

Woman in Her First Pregnancy 307

Chapter 12

Boy with Disruptive Behavior 335

Chapter 13

Elderly Man with a Poor Diet 369

Chapter 14

Nutrition Screening and Assessment 398

Implementing Nutrition Care 403

Chapter 16

Injured Hiker Requiring Enteral Nutrition Support 443

Patient with Intestinal Disease Requiring Parenteral Nutrition 450

Chapter 17

Woman with GERD 469

Nutrition Care for Patient after Gastric Surgery 475

Chapter 18

Young Adult with Irritable Bowel Syndrome 489

Chapter 19

Child with Cystic Fibrosis 510

Patient with Short Bowel Syndrome 514

Chapter 20

Man with Cirrhosis 531

Chapter 21

Child with Type 1 Diabetes 560

Woman with Type 2 Diabetes 562

Chapter 22

Patient with Cardiovascular Disease 586

Chapter 23

Woman with Acute Kidney Injury 601

Man with Chronic Kidney Disease 608

Chapter 24

Patient with a Severe Burn 625

Elderly Man with Emphysema 629

Chapter 25

Woman with Cancer 648

Man with HIV Infection 653
