SECOND EDITION

SOLID WASTE ENGINEERING

WILLIAM A. WORRELL

P. AARNE VESILIND

Contents

PREFACE	xv
ABOUT THE AUTHORS	xix
FOREWORD	xxi

CHAPTER 1

INTEGRATED SOLID WASTE MANAGEMENT 1

1-1 Solid Waste in History	1
1-1-1 Economics and Solid Waste	4
1-1-2 Legislation and Regulations	6
1-2 Materials Flow	8
1-2-1 Reduction	11
1-2-2 Reuse	13
1-2-3 Recycling	13
1-2-4 Recovery	15
1-2-5 Disposal of Solid Waste in Landfills	18
1-2-6 Energy Conversion	21
1-3 The Need for Integrated Solid Waste Management	23
1-4 Special Wastes	24
1-5 Final Thoughts	25
Problems	27

CHAPTER 2

MUNICIPAL SOLID WASTE CHARACTERISTICS AND QUANTITIES 30

2-1 Definitions	30
2-2 Municipal Solid Waste Generation	33
2-3 Municipal Solid Waste Characteristics	38
2-3-1 Composition by Identifiable Items	38

- 2-3-2 Moisture Content 44
- 2-3-3 Particle Size 46
- 2-3-4 Chemical Composition 47
- 2-3-5 Heat Value 50
- 2-3-6 Bulk and Material Density 52
- 2-3-7 Mechanical Properties 53
- 2-3-8 Biodegradability 54
- 2-4 Final Thoughts 56
- 2-5 Appendix Measuring Particle Size 57
 - Problems 60

CHAPTER 3

COLLECTION 63

- 3-1 Refuse Collection Systems 63
 - 3-1-1 Phase 1: House to Can 64
 - 3-1-2 Phase 2: Can to Truck 65
 - 3-1-3 Phase 3: Truck from House to House 68
 - 3-1-4 Phase 4: Truck Routing 72
 - 3-1-5 Phase 5: Truck to Disposal 75
- 3-2 Commercial Wastes 76
- 3-3 Transfer Stations 76
- 3-4 Collection of Recyclable Materials 80
- 3-5 Litter and Street Cleanliness 86
- 3-6 Final Thoughts 90
- 3-7 Appendix Design of Collection Systems 91
 - Problems 96

CHAPTER 4

LANDFILLS 102

- 4-1 Planning, Siting, and Permitting of Landfills 103
 - 4-1-1 Planning 103
 - 4-1-2 Siting 108
 - 4-1-3 Permitting 110
- 4-2 Landfill Processes 110
 - 4-2-1 Biological Degradation 110
 - 4-2-2 Leachate Production 113
 - 4-2-3 Gas Production 119
- 4-3 Landfill Design 123
 - 4-3-1 Liners 123
 - 4-3-2 Leachate Collection, Treatment, and Disposal 125

4-3-3	Landfill Gas Collection and Use	133
4-3-4	Geotechnical Aspects of Landfill Design	139
4-3-5	Stormwater Management	140
4-3-6	Landfill Cap	140
4-4	Landfill Operations	143
4-4-1	Landfill Equipment	143
4-4-2	Filling Sequences	143
4-4-3	Daily Cover	145
4-4-4	Monitoring	146
4-5	Post-closure Care and Use of Old Landfills	149
4-6	Landfill Mining	151
4-7	Final Thoughts	151
	Problems	156

CHAPTER 5

PROCESSING OF MUNICIPAL SOLID WASTE 160

5-1	Refuse Physical Characteristics	160
5-2	Storing MSW	162
5-3	Conveying	162
5-4	Compacting	169
5-5	Shredding	171
5-5-1	Use of Shredders in Solid Waste Processing	171
5-5-2	Types of Shredders Used for Solid Waste Processing	173
5-5-3	Describing Shredder Performance by Changes in Particle-Size Distribution	176
5-5-4	Power Requirements of Shredders	182
5-5-5	Health and Safety	186
5-5-6	Hammer Wear and Maintenance	187
5-5-7	Shredder Design	188
5-6	Pulping	191
5-7	Roll Crushing	192
5-8	Granulating	195
5-9	Final Thoughts	195
5-10	Appendix The PI Breakage Theorem	196
	Problems	204

CHAPTER 6

MATERIALS SEPARATION 208

6-1	General Expressions for Materials Separation	208
6-1-1	Binary Separators	208

- 6-1-2 Polynary Separators 210
- 6-1-3 Effectiveness of Separation 211
- 6-2 Picking (Hand Sorting) 212**
- 6-3 Screens 213**
 - 6-3-1 Trommel Screens 215
 - 6-3-2 Reciprocating and Disc Screens 221
- 6-4 Float/Sink Separators 221**
 - 6-4-1 Theory of Operation 222
 - 6-4-2 Jigs 229
 - 6-4-3 Air Classifiers 230
 - 6-4-4 Other Float/Sink Devices 241
- 6-5 Magnets and Electromechanical Separators 242**
 - 6-5-1 Magnets 242
 - 6-5-2 Eddy Current Separators 245
 - 6-5-3 Electrostatic Separation Processes 246
- 6-6 Other Devices for Materials Separation 247**
- 6-7 Materials Separation Systems 250**
 - 6-7-1 Performance of Materials Recovery Facilities 253
- 6-8 Final Thoughts 256**
 - Problems 258

CHAPTER 7

COMBUSTION AND ENERGY RECOVERY 263

- 7-1 Heat Value of Refuse 264**
 - 7-1-1 Ultimate Analysis 264
 - 7-1-2 Compositional Analysis 265
 - 7-1-3 Proximate Analysis 267
 - 7-1-4 Calorimetry 268
- 7-2 Materials and Thermal Balances 273**
 - 7-2-1 Combustion Air 273
 - 7-2-2 Efficiency 274
 - 7-2-3 Thermal Balance on a Waste-to-Energy Combustor 276
- 7-3 Combustion Hardware Used for MSW 279**
 - 7-3-1 Waste-to-Energy Combustors 279
 - 7-3-2 Modular Starved-Air Combustors 284
 - 7-3-3 Pyrolysis and Gasification 287
 - 7-3-4 Mass Burn versus RDF 289
- 7-4 Undesirable Effects of Combustion 292**
 - 7-4-1 Waste Heat 292
 - 7-4-2 Ash 296

7-4-3 Air Pollutants	297
7-4-4 Dioxin	307
7-5 Final Thoughts	309
Problems	312

CHAPTER 8

BIOCHEMICAL PROCESSES 314

8-1 Methane Generation by Anaerobic Digestion	315
8-1-1 Anaerobic Decomposition in Mixed Digesters	316
8-1-2 Potential for the Application of Anaerobic Digesters	320
8-1-3 Methane Extraction from Landfills	323
8-1-4 Potential for the Application of Methane Extraction from Landfills	323
8-2 Composting	324
8-2-1 Fundamentals of Composting	324
8-2-2 Composting Municipal Solid Waste	328
8-2-3 Potential for Composting Municipal Solid Waste	330
8-2-4 Composting Organic Waste	333
8-3 Final Thoughts	334
Problems	337

CHAPTER 9

CURRENT ISSUES IN SOLID WASTE MANAGEMENT 339

9-1 Life Cycle Analysis and Management	339
9-1-1 Life Cycle Analysis	339
9-1-2 Life Cycle Management	342
9-1-3 Product Stewardship	343
9-2 Flow Control	345
9-3 Public or Private Ownership and Operation	346
9-4 Contracting for Solid Waste Services	347
9-5 Financing Solid Waste Facilities	350
9-5-1 Calculating Annual Cost	352
9-5-2 Calculating Present Worth	353
9-5-3 Calculating Sinking Funds	354
9-5-4 Calculating Capital Plus O&M Costs	354
9-5-5 Comparing Alternatives	355
9-6 Hazardous Materials	355
9-7 Environmental Justice	357
9-8 The Role of the Solid Waste Engineer	357

9-9 Final Thoughts 358
9-10 Epilogue 360
 Problems 361

APPENDIX A

THE LEWISBURG SOLID WASTE PROBLEM 363

A-1 Background 363
A-2 Useful Data 366
 A-2-1 Transportation 366
 A-2-2 Bucknell University 367
 A-2-3 Existing Solid Waste Collection Program and Method of Disposal 367
 A-2-4 Existing Recycling Program 368
 A-2-5 Borough Organization 368
A-3 Sources, Composition, and Quantities 368
A-4 Recycling 369
A-5 Collection 371
A-6 Siting the Sanitary Landfill 373
A-7 Design of the Sanitary Landfill 374
A-8 Materials Recovery Facility 375
A-9 Waste-to-Energy (Mass Burning) 377
A-10 Technical, Economic, and Environmental Evaluation 378

APPENDIX B

BULK DENSITIES OF REFUSE COMPONENTS 379

APPENDIX C

CONVERSIONS 391

INDEX 395
