Preface	xiii
1 Introduction	1
1.1 Summary	4
References	4
2 Thermoplastics and Thermosets	5
2.1 Benefits/Advantages of Plastics	5
2.2 Classification	7
2.3 Thermoplastics	7
2.3.1 Polyolefins	8
2.3.2 Polystyrene	11
2.3.3 Polyvinylchloride (PVC)	12
2.3.4 Acrylonitrile-Butadiene-Styrene (ABS)	12
2.3.5 Poly(methyl methacrylate) (PMMA)	14
2.3.6 Polyesters	15
2.3.7 Nylons	18
2.3.8 Polycarbonate	19
2.3.9 Polyoxymethylene (POM)	20
2.3.10 Biodegradable Plastics	21
2.4 Thermosets	22
2.4.1 Phenol-formaldehyde	23
2.4.2 Melamine-formaldehyde (MF)	24
2.4.3 Epoxies	25
References	26

3	Types of Additives	35
3.1	Selection of Additives	36
3.2	Surface Property Modifiers	36
3.2.1	Antiblocking Agents	37
3.2.2	Antifogging Agents	37
3.2.3	Antistatic Agents	38
3.2.4	Coupling Agents	39
3.2.5	Release Agents	40
3.3	Chemical Property Modifiers	40
3.3.1	Antioxidants	41
3.3.2	Biocides	43
3.3.3	Flame Retardants	43
3.3.4	UV Stabilizers	44
3.4	Processing Modifiers	45
3.4.1	Blowing Agents	46
3.4.2	Crosslinking Agents	46
3.4.3	Heat Stabilizers	47
3.4.4	Plasticizers	49
3.4.5	Processing Aids	51
3.4.6	Lubricants	52
3.5	Mechanical Property Modifiers	53
3.5.1	Fillers	54
3.5.2	Impact Modifiers	57
3.5.3	Nucleating Agents	58
3.5.4	Reinforcing Fibers	58
3.6	Aesthetic Property Modifiers	59
3.6.1	Coloring Agents	60
3.6.2	Odorants	61
3.7	Other Additives	61
3.7.1	Curing Agents	61
3.7.2	Clarifying Agents	62
3.7.3	Chain Extenders	62
3.7.4	Accelerators	63
3.7.5	Slip Additive or Antislip Agents	63
3.7.6	Anti-Plate-Out Additives	63
3.7.7	Antiplasticizers	64
3.8	Additives from Natural Sources	64
	References	65

4	Plastics Additive and Chemistry	73
4.1	Properties of Plastics	74
4.2	Chemistry of Additives	74
4.3	Chemical Properties of Additives	75
4.3.1	Antioxidants	76
4.3.2	Stabilizers	79
4.3.3	Surface Active Additives	82
4.3.4	Static Charge and Antistatic Additive	82
4.3.5	Antifogging Agents	82
4.3.6	Anti-blocking Agents	83
4.3.7	Nucleating Agents	83
4.3.8	Lubricants	84
4.3.9	Impact Modifiers	85
4.3.10	Processing Aids	86
4.3.11	Biocides	86
4.3.12	Plasticizers	87
4.3.13	Foaming Agents	89
4.3.14	Organic Peroxides	92
4.3.15	Flame Retardants	92
4.3.16	Fillers	93
4.3.17	Colorants	94
	References	94
5	Organic Additives	101
5.1	Antioxidants	102
5.2	Antistatic Agents	102
5.3	Antifogging Agents	103
5.4	Antiblocking Agents	104
5.5	Slip Additives	105
5.6	UV Stabilizers	105
5.6.1	Radical Scavengers and Quenchers	106
5.7	Nucleating Agents	107
5.8	Flame Retardants	107
5.9	Lubricants	110
5.9.1	Metal Soaps	111
5.10	Plasticizers	112
5.11	Impact Modifiers	113

5.12	Fillers	113
5.12.1	Starch	114
5.12.2	Natural Fibers	114
5.12.3	Wood Fibers	114
5.13	Organic Colorants	115
5.13.1	Phthalocyanine Pigments	115
5.13.2	Anthraquinone Pigments	116
5.13.3	Azo Pigments	116
5.13.4	Other Pigments	116
5.14	Foaming Agents	117
5.15	Chain Extenders	118
5.16	Organic Peroxides	118
5.17	Accelerators	119
5.18	Activators	119
	References	120
6	Inorganic Additives	125
6.1	Heat Stabilizers	126
6.2	Flame Retardants	127
6.3	Fillers	128
6.3.1	Calcium Carbonate	129
6.3.2	Nanofillers	130
6.3.3	Silica	131
6.3.4	Mica	131
6.3.5	Solid Glass Spheres	132
6.3.6	Talc	133
6.3.7	Asbestos	133
6.3.8	Zinc Oxide	133
6.3.9	Barium Sulfate	134
6.3.10	Calcined Alumina	134
6.3.11	Aluminum Trihydrate (ATH)	134
6.3.12	Zirconia and Zirconium Silicate	134
6.3.13	Reinforcing Fillers	135
6.3.14	Glass Fiber	135
6.3.15	Other Applications of Fillers	136
6.4	Blowing Agents	137
6.5	Inorganic Colorants	138
6.6	Antimicrobial Agents	139
	References	140

7 Additives and Processing	145
7.1 Plastics Processing	145
7.2 Nature of Plastics	146
7.3 Nature of Additives	148
7.4 Plastics Processing Technology	149
7.5 Injection Molding	150
7.5.1 Basic Operations	150
7.5.2 Mold	151
7.5.3 Problems and Solutions	151
7.6 Extrusion	153
7.6.1 Basic Operations	153
7.6.2 Pipe Extrusion	154
7.6.3 Film Extrusion	154
7.6.4 Problems and Solutions	155
7.6.5 Pipe Extrusion	156
7.6.6 Foam Extrusion	156
7.6.7 Plate-Out	156
7.7 Blow Molding	157
7.7.1 Extrusion Blow Molding	157
7.8 Thermoforming	157
7.9 Role of Additive	158
7.9.1 Injection Molding	159
7.9.2 Extrusion	159
7.10 Rotational Molding	159
7.11 Calendering	160
7.11.1 Problems and Solutions	161
7.12 Thermosets and Processing	161
7.12.1 Problems and Solutions	163
References	163
8 Identification of Additives	167
8.1 Melting and Boiling Point	168
8.2 Organic Additives	168
8.2.1 Elemental Analysis	168
8.2.2 Flame Retardants	170
8.2.3 Plasticizers	170
8.2.4 Phenolic Additives	170
8.2.5 Amides Additives	170

8.3	Inorganic Additives	171
8.3.1	Elemental Analysis	171
8.4	Morphology	173
8.5	Mass Spectrometry	173
8.6	Scanning Electron Microscopy (SEM)	173
8.7	Benefits	174
	References	174
9	Testing of Additives	177
9.1	Plastics and Additives in Analysis	178
9.2	Properties of Additives	178
9.3	Testing of Additives	179
9.4	Brabender Plastographs	179
9.5	Extraction of Polymer Additives Systems	181
9.5.1	Dissolution Technique	181
9.5.2	Digestion with Microwave	182
9.5.3	Extraction with Supercritical Fluid	183
9.6	Liquid Chromatography	184
9.7	Gas Chromatography	186
9.8	Thermal Analysis	188
9.8.1	Thermogravimetric Analysis	190
9.9	Thermogravimetric-Mass Spectrometry	192
9.10	FTIR Spectroscopy	194
9.11	Quantitative Analysis of Additives	196
9.11.1	Oxirane Oxygen Present in Epoxidized Soya Oil and Tin Stabilizer as Mercaptide or Carboxylate	196
9.11.2	Lead Present in Stabilizer	197
9.11.3	Phosphates	197
9.11.4	Aluminum	198
9.11.5	Barium and Cadmium	198
9.11.6	Calcium	198
9.12	Quality Control	198
	References	199
10	Future Trends	203
10.1	In Plastics Packaging	204
10.2	In Medicine	204

10.3 In Electrical and Electronics Industries	205
10.4 In Building	205
10.5 In Engineering	205
10.6 Present Trends	206
10.7 Future Requirements	208
References	209
Index	211
