UNIT 1

Basic Mathematics Review and Refresher 1

1 Preassessment Test: Mathematics Skills Review 3

2 Fractions 9

- The Denominator of a Fraction 10*
- The Numerator of a Fraction 11*
- Concept of Size 13*
- Types of Fractions and Value 15*
- Equivalent or Equal Fractions 16*
- Simplify or Reduce Fractions to Their Lowest Terms 19*
- Find the Least Common Denominator 21*
- Conversion 22*
- Addition of Fractions 26*
- Addition of Mixed Numbers 30*
- Subtraction of Fractions 31*
- Subtraction of Mixed Numbers 33*
- Multiplication of Fractions 38*
- Division of Fractions 40*
- End of Chapter Review 44*

3 Decimals 47

- Compare Decimal Values 51*
- Add of Decimals 52*
- Subtract of Decimals 53*
- Multiply of Decimals 55*
- Multiplication by 10, 100, or 1,000 56*
- Divide of Decimals 57*
- Division by 10, 100, or 1,000 59*
- Change Fractions to Decimals 61*
- Change Decimals to Fractions 63*
- Round Off Decimals 64*
- End of Chapter Review 66*

4 Percents, Ratio, and Proportion 69

- Percent 70*
- Fractions and Percents 71*
- Decimals and Percents 74*
- Ratio and Proportion 78*
- Use of Ratio and Proportion: Solving for x 81*
- End of Chapter Review 90*
- End of Unit 1 Review 95*

UNIT 2**Measurement Systems 99****5 The Metric, Household, and Apothecary Systems of Measurement 101***The Metric System 102**Meter—Length 104**Liter—Volume 104**Gram—Weight 104**The Apothecary System 105**Household Measurements 107**Converting Within the Same System: Metric System 111**Converting Within the Same System: Household and Apothecary 115**End of Chapter Review 118***6 Approximate Equivalents and System Conversions 121***Dosage Calculations: Converting Between Systems 122**End of Chapter Review 127**End of Unit 2 Review 130***UNIT 3****Dosage Calculations 133****7 Medication Labels 136***Reading and Interpreting a Drug Label 137**End of Chapter Review 144***8 Oral Dosage Calculations 147***Calculating Oral Dosages 149**Dosage Calculations for Medications in the Same System and the Same Unit of Measurement 157**Dosage Calculations for Medications in the Same System but with Different Units of Measurement 161**Dosage Calculations for Medications in Different Systems 164**End of Chapter Review 169***9 Parenteral Dosage Calculations 172***Packaging, Syringes, and Needles 173**Types of Injections 176**Dosage Calculations for Medications in the Same System and the Same Unit of Measurement 177**Dosage Calculations for Medications in the Same System but Having Different Units of Measurement 181*

Dosage Calculations for Medications in Different Systems 182
Penicillin 184
End of Chapter Review 186

10 Intravenous Therapy 191

Key Terms 192
Intravenous Fluids 193
Intravenous Infusion Sets and Lines 195
Infusion Devices 195
Calculate Intravenous Fluid Administration 197
Calculate Infusion Time in Hours and Minutes 198
Calculate Flow Rate in Milliliters per Hour for Gravity or Pump Infusions 199
Calculate Drip Rate or Drops per Minute 202
Constant Factors 207
Intermittent Intravenous Administration 208
End of Chapter Review 216

11 Intravenous Therapies: Critical Care Applications 219

Calculate Flow Rate (mL per hr) When Dosage Is Known. Use Ratio and Proportion, the Formula Method, or Dimensional Analysis 221
Calculate Dosage, per Hour or per Minute, When Flow Rate Is Known 226
Titrate IV Fluids 231
End of Chapter Review 233

12 Insulin 238

Insulin Preparation 239
Types of Insulin 240
Insulin Delivery Devices 242
Insulin Administration 246
Preparing Insulin for Injection 247
Mixing Two Types of Insulin in One Syringe 248
Continuous Intravenous Insulin Infusion 252
End of Chapter Review 254

13 Heparin Preparation and Dosage Calculations: Subcutaneous and Intravenous 258

Heparin for Subcutaneous Injection 261
Heparin for Intravenous Infusion 264
Calculate Heparin Flow Rate (mL/hr) When Units of Heparin per Hour Are Ordered 265
Calculate Heparin Dosage (units per hr) When Heparin Is Ordered in Milliliters per Hour 268

- Heparin Administration Based on Weight* 269
- Weight-Based Heparin Protocol* 271
- End of Chapter Review* 276

14 Pediatric Dosage Calculations and Intravenous Therapy 280

- Weight Conversions* 284
- Estimate Safe Total Daily Dosage* 287
- Calculate Oral and Parenteral Dosages Based on Body Weight (mg per kg)* 289
- Estimate Body Surface Area* 293
- Dosage Calculations Based on Body Surface Area* 294
- Calculate Intravenous Flow Rate* 300
- Calculate Intermittent Intravenous Medication Administration (Intravenous Piggyback: IVPB)* 302
- Calculate IV Push Medications* 308
- End of Chapter Review* 310

15 Solutions and Drug Reconstitution 317

- Reconstitution: Preparing Injection Packaged as Powders* 319
- Preparing an Oral or Enteral Feeding* 324
- Preparing a Topical Irrigating Solution* 326
- End of Chapter Review* 327
- End of Unit 3 Review* 329

Answers 337

Appendices

- A. Roman Numerals 361**
- B. Rounding Off Decimals 364**
- C. Abbreviations for Drug Preparation and Administration 366**
- D. Intradermal Injections 370**
- E. Subcutaneous Injections 372**
- F. Intramuscular Injections 374**
- G. Z-Track Injections 376**
- H. Pediatric Intramuscular Injections 379**
- I. Nursing Concerns for Pediatric Drug Administration 381**
- J. Nursing Considerations for Critical Care Drug Administration 383**

xvi Contents

- K. Nursing Concerns for Geriatric Drug Administration 385**
- L. Needleless Intravenous System 388**
- M. Temperature Conversions: Fahrenheit and Celsius Scales 390**

- Index 393**
