List of Tables	xxix
Preface.....	xxxiii

Chapter 1 Nutrients and Their Effects on the Environment

1.0 OVERVIEW.....	2
2.0 BIOGEOCHEMICAL CYCLES OF NITROGEN AND PHOSPHORUS. . . 2	
2.1 Nitrogen	3
2.1.1 <i>Nitrogen Forms and Oxidation States</i>	3
2.1.2 <i>Nitrogen Global Cycle</i>	5
2.2 Phosphorus.....	5
2.2.1 <i>Phosphorus Forms and Oxidation States</i>	5
2.2.2 <i>Phosphorus Global Cycle</i>	6
3.0 NITROGEN AND PHOSPHORUS TRANSFORMATIONS IN THE ENVIRONMENT	7
3.1 Biotic Transformation Processes	7
3.1.1 <i>Ammonia and Nitrite Oxidation</i>	7
3.1.2 <i>Denitrification</i>	11
3.1.3 <i>Ammonification</i>	12
3.1.4 <i>Phosphorus Accumulating Organisms</i>	12
3.1.5 <i>Algal Transformations</i>	13
3.2 Abiotic Transformations.....	15
3.2.1 <i>Photochemical</i>	15
3.2.2 <i>Salinity Effects</i>	15

Contents

4.0 EFFECTS OF NITROGEN AND PHOSPHORUS IN THE AQUATIC ENVIRONMENT	16
4.1 Eutrophication and Water Quality	16
4.2 Gaseous Nitrogen Emissions and Atmospheric Quality	17
4.3 Domestic Wastewater Treatment	19
4.3.1 Influent Characteristics	19
4.3.2 Effluent Characteristics	20
5.0 REFERENCES	21
6.0 SUGGESTED READINGS	32

Chapter 2 Regulation of Nutrients in the Effluents of Wastewater Treatment Plants

1.0 INTRODUCTION	34
2.0 SUMMARY OF WATER QUALITY AND NUTRIENT REGULATION IN THE UNITED STATES	34
2.1 Clean Water Act	34
2.2 National Pollutant Discharge Elimination System Permit Program	35
2.3 Water Quality Criteria	37
2.4 Total Maximum Daily Load Regulation of Nutrients	38
2.5 Development of Water-Quality-Based Effluent Limits	39
3.0 CURRENT SURFACE WATER QUALITY AND GROUNDWATER STANDARDS FOR NITROGEN AND PHOSPHORUS	41
3.1 Surface Water Quality Standards Related to Eutrophication and Dissolved Oxygen	41
3.2 Regional Regulation of Nutrients	45
3.2.1 Great Lakes Watershed	45
3.2.2 Chesapeake Bay Watershed	46
3.2.3 Mississippi River/Gulf of Mexico Watershed	47
3.2.4 Long Island Sound	48
3.3 Surface Water Quality Criteria Related to Ammonia	48
3.4 Drinking Water Criteria	50

4.0 NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMITS 50

 4.1 Water-Quality-Based Permit Limits 51

 4.2 Monitoring, Reporting, Compliance, and Enforcement Requirements 53

5.0 WASTEWATER REUSE AND SUBSURFACE DISPOSAL PERMITS . . . 54

6.0 REFERENCES 55

Chapter 3 Overview of Nutrient Removal Processes

1.0 NITROGEN REMOVAL 58

 1.1 Biological Nitrogen Removal. 60

 1.1.1 *Biological Nitrogen Transformations* 61

 1.1.1.1 *Organic Nitrogen* 61

 1.1.1.2 *Ammonia* 62

 1.1.1.3 *Nitrite* 63

 1.1.1.4 *Nitrate* 64

 1.1.2 *Nitrogen Removal in Nonbiological Nutrient Removal Processes*. 64

 1.1.3 *Suspended-Growth Processes* 65

 1.1.4 *Biofilm Processes*. 66

 1.1.5 *Hybrid Processes*. 67

 1.1.6 *High-Purity Oxygen Systems* 68

 1.1.7 *Biological Nitrogen Removal Schemes* 68

 1.2 Physical/Chemical Nitrogen Removal Processes 70

 1.2.1 *Breakpoint Chlorination* 70

 1.2.2 *Air Stripping* 71

2.0 PHOSPHORUS REMOVAL PROCESSES 72

 2.1 Chemical Phosphorus Removal 74

 2.2 Biological Phosphorus Removal 76

3.0 RETURN STREAM EFFECTS. 79

4.0 SELECTION OF NUTRIENT REMOVAL PROCESSES. 83

 4.1 Nutrient Removal Levels 84

 4.2 Level 1 Nutrient Removal 86

Contents

4.2.1 Level 1N Nitrogen Removal	86
4.2.2 Level 1P Phosphorus Removal	86
4.2.3 Level 1 Nitrogen and Phosphorus Removal	88
4.3 Level 2 Nutrient Removal	88
4.3.1 Level 2N Nitrogen Removal	88
4.3.2 Level 2P Phosphorus Removal	90
4.3.3 Level 2 Nitrogen and Phosphorus Removal	90
4.4 Level 3 Nutrient Removal	90
4.4.1 Level 3N Nitrogen Removal	91
4.4.2 Level 3P Phosphorus Removal	92
4.4.3 Level 3 Nitrogen and Phosphorus Removal	93
5.0 REFERENCES	93
6.0 SUGGESTED READINGS	100

Chapter 4 Principles of Biological Nitrogen Removal

1.0 INTRODUCTION	103
2.0 SOURCES AND SINKS OF NITROGEN IN WASTEWATER TREATMENT	105
2.1 Influent Nitrogen Species	105
2.2 Ammonification	106
2.3 Ammonia Assimilation	106
2.4 Stripping	106
2.5 Denitrification	107
3.0 NITRIFICATION	107
3.1 Biochemistry and Microbiology	107
3.2 Stoichiometry	110
3.3 Kinetics	110
3.4 Toxicity	111
3.5 Biofilm Systems	121
4.0 DENITRIFICATION	124
4.1 Biochemistry and Microbiology	124
4.2 Stoichiometry	127

4.3 Substrate Requirements	128
4.4 Alkalinity Production	131
4.5 Kinetics	131
4.6 Toxicity	138
4.7 Biofilm Systems	139
5.0 REFERENCES	140

Chapter 5 Nitrification

1.0 INTRODUCTION	154
2.0 ACTIVATED SLUDGE NITRIFICATION SYSTEMS	154
2.1 Single-Sludge Nitrification–Denitrification	154
2.2 Separate-Sludge Suspended Growth Nitrification	155
2.3 Attached Growth Nitrification	155
3.0 FUNDAMENTALS OF NITRIFICATION	156
3.1 Microbiology and Microbial Ecology	156
3.2 Biochemical Pathways and Reactions	158
3.3 Stoichiometry	158
3.4 Kinetics	160
3.5 Values of Biokinetic Coefficients	165
3.6 Nitrification Biokinetic Estimation Techniques	169
3.7 Estimating Maximum Specific Growth Rate Using Respirometry and Molecular Techniques	171
3.8 Calculation of Observed Biomass Yield Coefficient	173
3.9 Calculation of Autotrophic Biomass Decay Coefficient	173
4.0 SIMPLE STEADY-STATE SUSPENDED GROWTH DESIGN EQUATIONS	174
4.1 Effluent Ammonia	174
4.2 Nitrogen Incorporated to Waste Sludge	175
4.3 Nitrifier Sludge Mass	176
4.4 Oxygen Requirements	176
4.5 Alkalinity Consumption	177

Contents

5.0 CONSIDERATIONS FOR DIFFERENT NUTRIENT REMOVAL CONFIGURATIONS	177
5.1 Accounting for Unaerated Zones or Clarifiers	177
5.2 Single-Sludge versus Separate-Sludge Systems	178
6.0 DYNAMIC BEHAVIOR	178
6.1 Effluent Ammonia	178
6.2 Spatial and Time-Varying Oxygen Demand	179
7.0 REFERENCES	179

Chapter 6 Nitrogen Removal Processes, Configuration, and Process-Sizing Criteria for Combined Nitrification and Denitrification Processes

1.0 NITROGEN REMOVAL PROCESSES	189
1.1 Heterotrophic Denitrification for Nitrogen Removal	189
1.2 Autotrophic Denitrification for Nitrogen Removal	190
2.0 SEPARATE-SLUDGE (SEPARATE-STAGE) DENITRIFICATION	190
2.1 Characteristics	191
2.2 Suspended Growth	191
2.2.1 <i>Process-Sizing Criteria</i>	193
2.2.2 <i>Design Equations</i>	194
2.3 Attached Growth Biofilm Reactors	197
2.3.1 <i>Process-Sizing Criteria for Attached Growth Biofilm Reactor</i>	199
2.3.2 <i>Design Equations</i>	200
3.0 SINGLE-SLUDGE NITRIFICATION–DENITRIFICATION	202
3.1 Characteristics	202
3.2 Process Kinetics-Based Equations	204
3.2.1 <i>Process Kinetics Equations for Predenitrification</i>	204
3.2.1.1 <i>Anoxic Zone Process Kinetics and Kinetics-Based Equations That Control the Nitrogen Removal Process</i>	206
3.2.1.2 <i>Oxygen Requirements</i>	211
3.2.1.3 <i>Alkalinity Requirements</i>	212
3.2.2 <i>Additional Equations for Enhanced Nitrogen Removal Configuration</i>	213

3.2.2.1	<i>Preanoxic and Aerobic Zone Calculations</i>	213
3.2.2.2	<i>Postanoxic Zone Calculations</i>	213
3.3	Extending Understanding of Integrated Fixed-Film Activated Sludge Systems	218
3.3.1	<i>Basics of Media</i>	218
3.3.2	<i>Addressing Limitations in the Current Generation of Integrated Fixed-Film Activated Sludge Simulators</i>	220
4.0	REFERENCES	222
5.0	SUGGESTED READINGS	227

Chapter 7 Chemical Phosphorus Removal

1.0	PRINCIPLES OF CHEMICAL PHOSPHORUS REMOVAL	229
2.0	PHOSPHORUS SPECIES IN WASTEWATER	232
3.0	CHEMICAL REMOVAL OF PHOSPHORUS	235
3.1	Chemicals Used in Phosphorus Removal	235
3.1.1	<i>Calcium</i>	235
3.1.2	<i>Magnesium</i>	236
3.1.3	<i>Ferrous Iron</i>	237
3.1.4	<i>Ferric Iron and Aluminum</i>	238
3.2	Design and Operating Variables Important for Phosphorus Removal	242
3.2.1	<i>Dose Requirements</i>	242
3.2.2	<i>Role of pH</i>	245
3.2.3	<i>Role of Other Counteranions</i>	245
3.2.4	<i>Role of Particulate or Colloidal Solids</i>	246
3.2.5	<i>Role of Mixing</i>	246
3.2.6	<i>Role of Contact Time</i>	247
3.2.7	<i>Role of Aging</i>	248
3.2.8	<i>Role of Alkalinity</i>	249
3.3	Sludge Generation	256
3.4	Chemical Storage and Feed	256
3.5	Chemically Enhanced Separation Technologies	257

Contents

3.6 Separation Processes	259
3.7 Resource Recovery	260
4.0 DESIGN EXAMPLES	262
4.1 Chemical Phosphorus Removal Process Design.	262
4.1.1 <i>Phosphorus Removal by Alum Addition to Raw Wastewater and Aeration Basin</i>	263
4.1.1.1 Alum Dose Determination	264
4.1.1.2 Chemical Requirements and Storage	265
4.1.1.3 Sludge Generation	266
4.1.2 <i>Phosphorus Removal by Ferric Chloride Addition to Raw Wastewater before Primary Treatment.</i>	268
4.1.2.1 Ferric Iron Dose Determination	268
4.1.2.2 Chemical Requirements and Storage	268
4.1.2.3 Sludge Generation	269
5.0 REFERENCES	270
6.0 SUGGESTED READINGS	275

Chapter 8 Biological Phosphorus Removal

1.0 INTRODUCTION	277
2.0 MECHANISM OF ENHANCED BIOLOGICAL PHOSPHORUS REMOVAL	278
2.1 Overall Mechanism	278
2.2 Microbiology	279
2.3 Biochemistry	281
3.0 FACTORS AFFECTING ENHANCED BIOLOGICAL PHOSPHORUS REMOVAL PERFORMANCE	282
3.1 Integrity of the Anaerobic Zone	282
3.2 Substrate Availability	284
3.3 Phosphorus versus Substrate Limitation	288
3.4 Adequate Amounts of Cations	290
3.5 Aerobic Zone	290
3.6 Hydraulic Considerations	291

Contents

3.7	Secondary Phosphorus Release	292
3.8	Solids Handling Considerations	295
3.9	Solids Capture	296
3.10	Primary Settling	296
3.11	Solids and Hydraulic Retention Times	298
3.12	Glycogen-Accumulating Organism Competition	302
3.13	pH	303
3.14	Temperature	304
3.15	Wet Weather Operations	307
4.0	FILAMENTOUS BULKING AND FOAMING	308
4.1	Filamentous Bulking	308
4.2	Filamentous Foaming	309
5.0	PREFERMENTATION	310
6.0	PROCESS CONFIGURATIONS	314
7.0	PROCESS MONITORING	316
7.1	Dissolved Oxygen	316
7.2	Oxidation-Reduction Potential	317
7.3	Nitrate-Nitrogen	317
7.4	Total Phosphorus	317
7.5	Orthophosphorus	318
7.6	Chemical Oxygen Demand	318
7.7	Volatile Fatty Acids	318
7.8	Soluble Biochemical Oxygen Demand	318
7.9	Biological Phosphorus Removal Potential Test	319
8.0	DESIGN CONSIDERATIONS	319
8.1	Anaerobic Zone	319
8.2	Aerobic Zone	320
8.3	Baffles	320
8.3.1	<i>Interzone Baffles</i>	321
8.3.2	<i>Intrazone Baffles</i>	321
8.4	Aeration Requirements	321

Contents

8.5	Mixing Requirements	323
8.6	Prefermentation	324
8.7	Supplemental Carbon Addition	326
8.8	Supplemental Metal Salt Addition	328
8.9	Final Clarifiers	329
9.0	REFERENCES	330
10.0	SUGGESTED READINGS	340

Chapter 9 Sidestream Nitrogen Removal

1.0	INTRODUCTION	341
2.0	SIDESTREAM NITROGEN REMOVAL TREATMENT PROCESSES	343
2.1	Bioaugmentation Processes	343
2.2	Nonbioaugmentation Processes	348
2.2.1	<i>Nitrification/Denitrification</i>	348
2.2.2	<i>Nitrification/Anammox Processes</i>	350
2.2.3	<i>Physiochemical Treatment</i>	352
3.0	REFERENCES	353

Chapter 10 Structured Process Models for Nutrient Removal

1.0	USE OF MODELS IN PROCESS ENGINEERING	358
1.1	A Note on Notation	359
1.2	Principles of Notation Used in This Chapter	359
1.3	What Is the Difference Between Empirical, Mechanistic, and Structured Models?	360
2.0	BACKGROUND ON STRUCTURED MODELS	362
2.1	A Steady-State Model for Sludge Production	364
2.2	Dynamic Models	366
2.3	Structure of Dynamic Models	369
2.4	Whole-Plant Modeling	370

2.5 Model Performance Evaluation.....	372
2.5.1 Terminology and Definitions	372
2.5.2 Sources of Uncertainty	374
2.5.3 Statistical Methods Used to Evaluate Model Performance	376
2.5.4 Calibration, Validation, and Relevance to Model Predictive Quality	378
2.5.5 Model Predictive Quality for Specific Model Applications	378
3.0 MODEL BLOCKS FOR WASTEWATER TREATMENT PROCESSES.....	381
3.1 Influent Fractions.....	382
3.1.1 Chemical Oxygen Demand, Volatile Suspended Solids, and Total Suspended Solids Components	382
3.1.2 Nitrogen and Phosphorus Components	385
3.2 Equilibrium Chemistry and pH Modeling	386
3.2.1 A General pH Model.....	387
3.2.2 Validation of the pH Model	393
3.3 Activated Sludge Models	395
3.4 Anaerobic Digestion Models	402
3.5 Biofilm Models.....	405
3.5.1 What Are Biofilms?	406
3.5.2 Why Should Biofilms Be Modeled?	407
3.5.3 Biofilm Components, Variables, Reactions, and Modeling Approaches	407
3.5.4 Basic Equations.....	409
3.5.4.1 Material Balance for Diffusion-Reaction Inside the Biofilm	409
3.5.4.2 Material Balance for External Mass Transfer Resistance	411
3.5.5 Biofilm Models in Practice	411
3.5.6 Implications of Biofilm Reactor Configuration and Hydrodynamics on Modeling at the Reactor Scale	414
3.5.7 Special Considerations in Biofilm Reactor Modeling.....	418
3.5.8 Biofilm Models for the Practitioner: Modules in Whole Wastewater Treatment Plant Simulators.....	421
3.5.9 Limitations of Biofilm Models for the Practitioner.....	422

Contents

3.5.10	<i>Examples of Biofilm Models Applied in Practice</i>	423
3.5.10.1	<i>MBBR System</i>	423
3.5.10.2	<i>IFAS System—Simulation of Full-Scale Performance Demonstration</i>	424
3.5.10.3	<i>Integrated Fixed-Film Activated Sludge System—Aerobic Batch Test</i>	426
3.6	Chemical Phosphorus Removal Models	427
3.6.1	<i>Phosphorus Removal through Iron and Aluminum Dosage</i>	427
3.6.2	<i>Phosphorus Removal through Calcium and Magnesium Salt Precipitation</i>	430
3.7	Phase Separation Models	432
3.7.1	<i>Mass-Balance-Based Models</i>	432
3.7.2	<i>One-Dimensional Models</i>	433
3.7.3	<i>Computational Fluid Dynamic Models</i>	434
3.8	Sidestream Modeling	434
3.8.1	<i>Process Kinetics and Control Strategies</i>	436
3.8.2	<i>Sidestream Treatment Examples</i>	439
4.0	USE OF MODELS IN PRACTICE—SIMULATION	442
4.1	Software	442
4.2	Data Required	444
4.3	Steady-State Simulations	445
4.4	Dynamic Simulations	446
4.5	Sensitivity Analysis	451
4.6	Optimization	456
4.7	Control Design	459
4.7.1	<i>Wastewater Treatment Plant Control Systems</i>	459
4.7.2	<i>Feedback Control</i>	460
4.7.3	<i>Controller Interaction</i>	464
4.7.4	<i>Model-Based Control</i>	464
4.7.5	<i>Modeling of Sensors and Actuators</i>	466
4.7.6	<i>Controller Performance Assessment</i>	467
4.7.7	<i>Practical Issues</i>	468
4.7.8	<i>Application Example</i>	469

4.8 Online Modeling472
 5.0 REFERENCES473

Chapter 11 Troubleshooting for Full-Scale Nutrient Removal Facilities

1.0 OVERVIEW489
 2.0 PROCESS ASSESSMENT490
 2.1 Wastewater Characterization490
 2.1.1 Sampling490
 2.1.2 Phosphorus Speciation494
 2.1.3 Nitrogen Speciation495
 2.1.4 Quantity and Quality of Carbon497
 2.1.5 Volatile Fatty Acid Preservation500
 2.2 Operating Parameters for Troubleshooting502
 2.2.1 Solids Retention Time502
 2.2.2 Mixed Liquor Recycle507
 2.2.3 Return Activated Sludge508
 2.2.4 Dissolved Oxygen510
 2.2.5 Alkalinity and pH513
 2.3 Microbiology and Kinetics515
 2.3.1 Nitrification515
 2.3.2 Denitrification517
 2.3.3 Biological Phosphorus Removal520
 2.3.3.1 Competing Organisms520
 2.3.3.2 Inhibition of Phosphorus-Accumulating Organisms521
 2.3.3.3 Secondary Release of Phosphorus522
 2.3.4 Analyzing Orthophosphorus Profiles through a Biological Nutrient Removal Plant523
 2.3.4.1 Plant A524
 2.3.4.2 Plant B527
 2.3.4.3 Plant C528
 2.3.5 Bulking, Foam, and Scum531

Contents

2.4 Instrumentation and Controls	535
2.4.1 Instrument Selection and Implementation	535
2.4.2 Data Presentation	536
2.4.3 Use of Online Monitoring Data for Troubleshooting	536
2.4.3.1 Flow	537
2.4.3.2 Dissolved Oxygen	538
2.4.3.3 Mixed Liquor Suspended Solids	539
2.4.3.4 Sludge Blanket Measurement	539
2.4.4 pH and Oxidation Reduction Potential	540
2.5 Process Modeling for Troubleshooting	542
2.5.1 Using Models to Understand and Troubleshoot Plant Performance	543
2.5.2 Dynamic Modeling	544
2.5.3 Sensitivity Analysis	545
2.5.4 Wet Weather	547
2.6 Process Assessment Troubleshooting Matrix	548
3.0 HYDRAULIC AND MECHANICAL EQUIPMENT ASSESSMENT	548
3.1 Overaeration of Influent	555
3.2 Flow Distribution	557
3.3 Intensive Mixing of Influent and Recycle Streams	558
3.4 Momentum and Density Gradients	559
3.4.1 Pelham, South Carolina	559
3.4.2 New York, New York	560
3.5 Anaerobic/Anoxic Zone Mixing Intensity	560
3.6 Mixing Energy in Aeration Basins	561
3.7 Scum Control	562
3.8 Selective Wasting	564
3.9 Final Clarifiers	565
4.0 CHEMICAL PHOSPHORUS REMOVAL IN ACTIVATED SLUDGE SYSTEMS	568
5.0 MEMBRANE BIOREACTORS	573
6.0 DENITRIFICATION FILTERS	575

6.1 Excess Backwashing	576
6.2 Gas (Nitrogen) Accumulation	576
6.3 Solids Breakthrough	576
6.4 Nitrate/Nitrite Breakthrough	577
6.5 Phosphorus Management	578
6.6 Carbon Breakthrough	579
6.7 Operation during Peak Flow Events	579
7.0 REFERENCES	580
8.0 SUGGESTED READINGS	582

Chapter 12 Aquatic Natural Treatment Systems

1.0 AQUATIC NATURAL TREATMENT SYSTEM DESCRIPTIONS	584
1.1 PONDS AND LAGOONS	584
1.2 Floating and Submerged Aquatic Plant Systems	585
1.3 Free Water Surface Constructed Wetland Systems	586
1.4 Combination Systems	589
2.0 MAIN COMPONENTS OF AQUATIC NATURAL TREATMENT SYSTEMS	589
2.1 Hydrology and Hydraulics	589
2.2 Vegetation	591
2.3 Soil and Substrate	595
3.0 NUTRIENT ENTRAPMENT, CONVERSION, STORAGE, AND REMOVAL MECHANISMS	596
3.1 Nutrient Entrapment	596
3.2 Nutrient Species Conversions	597
3.3 Nutrient Storage	597
3.3.1 <i>Long-Term Storage in Slowly Decaying Biomass</i>	597
3.3.2 <i>Storage on Soil and Substrate</i>	598
3.4 Nutrient Removal by Plant Harvesting and Removal of Slowly Decaying Biomass	598
3.5 Nutrient Removal by Gaseous Transport	599

Contents

3.5.1	<i>Gaseous Loss of Nitrogen Gas Following Denitrification</i>	599
3.5.2	<i>Ammonia Volatilization</i>	600
4.0	NUTRIENT REMOVAL CAPACITY AND DESIGN CONSIDERATIONS	601
4.1	Ponds and Lagoons	602
4.2	Floating and Submerged Aquatic Plant Systems	602
4.2.1	<i>Duckweed Systems</i>	602
4.2.2	<i>Water Hyacinth Systems</i>	603
4.2.3	<i>Periphyton Systems</i>	606
4.2.4	<i>Free Water Surface Systems</i>	608
4.2.5	<i>Subsurface Flow Constructed Wetlands</i>	614
4.2.6	<i>Combination Systems</i>	617
5.0	REFERENCES	618
	INDEX	623
