

DECONTAMINATION OF HEAVY METALS

Processes, Mechanisms, and Applications

JIAPING PAUL CHEN

CRC Press
Taylor & Francis Group

Contents

Preface.....	xv
Author.....	xvii

1. Occurrence and Importance of Heavy Metal Contamination.....	1
1.1 Introduction	1
1.2 Economy and Metals	3
1.3 Environmental Importance	5
1.3.1 Essential Light Metals	6
1.3.2 Essential Heavy Metals.....	7
1.3.3 Toxic Heavy Metals	8
1.4 Toxicity of Heavy Metals	10
1.5 Guidelines and Standards for Heavy Metals in Drinking Water.....	10
1.6 Sources of Heavy Metal Contamination.....	13
1.6.1 Natural Sources.....	13
1.6.2 Industrial Sources	14
1.6.3 Domestic Sources.....	15
1.6.4 Atmospheric Sources.....	15
1.7 Important Heavy Metals.....	15
1.7.1 Arsenic.....	15
1.7.2 Cadmium	18
1.7.3 Chromium.....	19
1.7.4 Copper	21
1.7.5 Lead.....	22
1.7.6 Mercury	24
1.7.7 Molybdenum	25
1.7.8 Nickel.....	25
1.7.9 Selenium.....	26
1.7.10 Silver	26
1.7.11 Zinc	26
References	26
2. Pollution Prevention: Principles and Applications	29
2.1 Introduction	29
2.2 Motivation and Concept of P2.....	31
2.2.1 Motivation.....	31
2.2.2 Principles.....	32
2.2.3 Concepts.....	32
2.3 P2 Laws and Regulations.....	33
2.4 P2 Technologies	38
2.5 P2 Benefits	39

- 2.6 Pollution Prevention Feasibility 40
 - 2.6.1 Technical Feasibility 40
 - 2.6.2 Environmental Feasibility 41
 - 2.6.3 Economic Feasibility..... 43
- 2.7 P2 Implementation and Revision..... 44
 - 2.7.1 Project Implementation..... 44
 - 2.7.2 Review and Revision of Project 45
- 2.8 Key Points in P2 Applications 45
 - 2.8.1 Material Handling and Storage 45
 - 2.8.2 Process Modification 46
 - 2.8.2.1 Process Variable Controls..... 46
 - 2.8.2.2 Replacement with Cleaning Processes..... 46
 - 2.8.2.3 Chemical Catalysts..... 47
 - 2.8.2.4 Segregation and Separation..... 47
 - 2.8.3 In-Process Recycling..... 47
 - 2.8.4 Materials and Product Substitutions 48
 - 2.8.4.1 Materials Substitution 48
 - 2.8.4.2 Product Substitution 48
 - 2.8.5 Materials Separation..... 49
- 2.9 Case Studies 50
 - 2.9.1 33/50 Program..... 50
 - 2.9.2 Water Reduction in Pulp Mill 50
 - 2.9.3 P2 Plan in LBNL..... 50
- References 51
- 3. Precipitation Technology 53**
 - 3.1 Introduction 53
 - 3.2 Theory 54
 - 3.2.1 Calculation of Precipitation Reaction..... 54
 - 3.2.2 Typical Treatment Reagents 63
 - 3.2.2.1 Hydroxide..... 63
 - 3.2.2.2 Carbonate 64
 - 3.2.2.3 Sulfide 65
 - 3.2.3 Important Operational Parameters..... 67
 - 3.2.4 Treatability of Individual Metals..... 70
 - 3.2.4.1 Arsenic 70
 - 3.2.4.2 Cadmium..... 72
 - 3.2.4.3 Chromium 73
 - 3.2.4.4 Copper..... 74
 - 3.2.4.5 Nickel 74
 - 3.2.4.6 Mercury 74
 - 3.2.4.7 Lead..... 74
 - 3.3 Pretreatment 74
 - 3.4 Posttreatment..... 75
 - 3.5 Key Devices in Pre- and Posttreatment Steps..... 75

3.5.1	Coagulation and Flocculation	75
3.5.2	Sedimentation.....	76
3.5.3	Filtration	81
3.5.4	Dissolved Air Flotation	82
3.5.5	Sludge Thickening and Dewatering	82
3.5.5.1	Pressure Filter	84
3.5.5.2	Vacuum Filter	84
3.5.5.3	Compression Filter	85
3.5.5.4	Centrifuge Device	85
3.6	Case Studies.....	85
3.6.1	Treatment of Heavy Metals in Wastewater from Electroplating Operation	85
3.6.2	Metal Removal by Insoluble Sulfide Precipitation.....	87
3.6.3	Hybrid System for Metal Removal	88
3.6.4	Segregated Treatment of Difficult-To-Treat Metal.....	89
3.6.5	Treatment of Arsenic by Precipitation–Coagulation	90
3.7	Limitations and Solutions.....	91
3.7.1	Presence of Chelating Agents	91
3.7.2	Production of Solids	92
3.7.3	Importance of Process Control	93
	References	93
4.	Precipitation–Crystallization Technology	95
4.1	Introduction	95
4.2	Description of Technology.....	96
4.3	Theoretical Background.....	97
4.3.1	Surface Precipitation.....	97
4.3.2	Crystallization Kinetics	98
4.3.2.1	Crystal Nucleation	100
4.3.2.2	Crystal Growth.....	100
4.3.2.3	Secondary Changes.....	100
4.3.3	Degree of Crystal Dispersion.....	101
4.4	Important Control Factors	101
4.4.1	Total Carbon Concentration versus Metal Concentration	103
4.4.2	Start-Up of the System.....	103
4.4.3	Recycle Ratio and Hydraulic Loading	105
4.4.4	pH Effect.....	107
4.4.5	Lead Loading and Supersaturation	107
4.4.6	Bed Height	108
4.4.7	Properties of Sand Grains and Suspended Solids	110
4.4.7.1	Metal Contents on Sand Grains	111
4.4.7.2	Microscopic Examination of Lead-Coated Sand Grains.....	111
4.4.7.3	Suspended Solids in FBR	111

4.5	Case Studies.....	112
4.5.1	Recovery of Silver	112
4.5.2	Recovery of Ni-Bearing Electroplating Wastewater	112
4.5.3	Removal of Iron from Acid Mine Drainage	112
4.5.4	Removal of Multispecies Heavy Metals	113
4.5.5	Removal of Phosphate.....	116
4.5.6	Copper Removal and Recovery	117
4.5.7	Fluoride Removal and Recovery.....	118
4.5.8	Arsenic Removal.....	120
	References	123
5.	Reduction-Oxidation Processes.....	125
5.1	Introduction	125
5.2	Chemical-Induced Reduction Processes.....	140
5.2.1	Sodium Borohydride	140
5.2.2	Hydrazine	141
5.2.2.1	Effect of pH	143
5.2.2.2	Effect of Humic Acid	147
5.2.2.3	Effect of DO.....	148
5.2.2.4	Competition in Metal Reduction.....	149
5.2.2.5	Effect of Seeding and Aging Process	150
5.2.3	HCHO.....	153
5.2.4	Iron.....	153
5.2.5	Other Reducing Reagents	155
5.3	Biological Reduction of Metal Sulfate	156
5.3.1	Importance of Sulfate Removal.....	156
5.3.2	Mechanisms and Controlling Factors.....	157
5.3.2.1	Thermodynamics	162
5.3.2.2	Type of Electron Donors.....	165
5.3.2.3	Kinetics	172
5.3.3	Bioreactors.....	172
5.4	Reduction of Hexavalent Chromium	175
5.4.1	Solution Chemistry of Chromium.....	175
5.4.1.1	Hexavalent Chromium	175
5.4.1.2	Trivalent Chromium	176
5.4.2	Activated Sludge Process.....	176
5.4.3	Membrane Bioreactor	178
5.4.3.1	Effect of Metal on Membrane Flux	179
5.4.3.2	Effect of Metal on Sludge Production.....	181
5.4.3.3	Effect of Metal on Carbonaceous Pollutant Removal	181
5.4.3.4	Effect of Metal on Removal of Nutrient	184
5.4.4	Inactive Biomass.....	192
5.5	Reduction and Oxidation of Arsenic Species.....	200

5.5.1	Oxidation.....	200
5.5.1.1	Chemical Oxidation	201
5.5.1.2	Catalytic Oxidation	203
5.5.1.3	Biological Oxidation.....	206
5.5.2	Reduction	207
	References	208
6.	Electrochemical Technologies for Heavy Metal Decontamination	215
6.1	Introduction	215
6.2	Electrodeposition Technology.....	216
6.2.1	Typical Reaction at Electrodes	216
6.2.1.1	Reduction Reactions at Cathode	216
6.2.1.2	Oxidation Reactions at Anode.....	217
6.2.2	Factors Affecting Electrodeposition.....	217
6.2.2.1	Effect of Initial Concentration	218
6.2.2.2	Effect of Distance between Electrodes	220
6.2.2.3	Effect of Mixing	220
6.2.2.4	Effect of HA.....	220
6.2.2.5	Effect of EDTA	223
6.2.2.6	Effect of Ionic Strength.....	225
6.2.3	Recovery of Multicomponent Metal Ions	227
6.2.4	Industrial Application.....	230
6.3	Electrocoagulation and Electroflotation	232
6.3.1	Electrocoagulation.....	232
6.3.1.1	Conventional Coagulation	232
6.3.1.2	Definition of EC	233
6.3.1.3	Typical Electrode Connection.....	233
6.3.1.4	Electrode Reactions.....	234
6.3.1.5	Factors Influencing EC	234
6.3.2	Electroflotation	235
6.3.2.1	Selection of Electrodes.....	236
6.3.2.2	Typical EF Cell	236
6.3.2.3	Factors Affecting EF.....	237
6.3.3	Combination of EC and EF.....	237
6.3.3.1	Introduction	237
6.3.3.2	Electrodes	238
6.3.3.3	Cell Arrangements	239
6.3.4	Case Studies.....	241
6.3.4.1	Copper Removal.....	241
6.3.4.2	Zinc Removal	242
6.3.4.3	Chromium Removal	245
6.3.4.4	Cadmium Removal	248
6.3.4.5	Removal of Heavy Metals from Saline Leachate	248

6.3.4.6	Nickel and Zinc Removal.....	248
6.3.4.7	Arsenic Removal	249
6.3.4.8	A Hybrid EC/EF–Membrane Process	249
References		251
7.	Adsorption: Materials, Chemistry, and Applications.....	255
7.1	Introduction	255
7.2	Activated Carbon	257
7.2.1	Surface Properties.....	257
7.2.2	Effect of pH.....	261
7.2.3	Types of Metal Ions.....	263
7.2.4	Effect of Ionic Strength.....	265
7.2.5	Effect of Background Electrolyte.....	267
7.2.6	Effect of Initial Concentration and Dosage.....	268
7.2.7	Adsorption Isotherm.....	269
7.2.8	Presence of Industrial Organic Matters.....	269
7.2.9	Effect of Natural Organic Matters.....	278
7.2.10	Effect of Surfactant	286
7.2.11	Effect of Competing Ions	291
7.2.12	Temperature Effect	293
7.2.13	Effect of Carbon Type.....	294
7.2.14	Modification of Activated Carbon.....	295
	7.2.14.1 Chemical Approaches.....	296
	7.2.14.2 Physical Approaches.....	296
	7.2.14.3 Metal Performance of Modified Activated Carbons.....	297
7.3	Biosorbents.....	303
7.3.1	Preparation of Biosorbents	303
7.3.2	Biosorption Chemistry.....	313
7.3.3	Biosorption Performance	315
7.4	Metal Oxide.....	328
7.5	Adsorption Treatment System	338
7.5.1	Fluidized Bed Reactor	338
7.5.2	Stirred Tank Reactor.....	338
7.5.3	Fixed-Bed Reactor	339
