	Preface	ix	4	Foundations of the Manufacturing Process	55
1	Development of Glass and Optic Production	1	4.1	Development and Manufacturing Process	55
2	Basics of Optics	9	4.1.1	Development Stages	55
2.1	Refraction, Reflection, and Total Reflection	9	4.1.2	Development Cycle	56
2.2	Polarization, Interference, and Diffraction	10	4.1.2.1	Development Phases	56
2.3	Birefringence and Pleochroism	15	4.1.2.2	Risk Analysis	57
2.4	Image Forming Optical Elements	16	4.1.2.3	Release	57
2.4.1	Transmitting Optical Components ...	16	4.1.2.4	Documentation	57
2.4.1.1	Optical Fibers	19	4.2	Production Types	57
2.4.2	Reflective Optical Components	19	4.2.1	Production in Batches	58
2.4.2.1	Mirrors	20	4.3	Production Principles	59
2.4.2.2	Reflecting Prisms	20	4.3.1	Variant A	59
2.4.3	Partially Transmissive Optical Components	21	4.3.2	Variant B	59
2.4.4	Diffractive Optical Elements	22	4.4	Classification of Production Processes ...	61
2.5	Aberrations	23	4.5	Technological Basics	61
2.6	Evaluation of Imaging Performance of an Optical System	25	5	Primary Forming of Optical Glass ...	69
2.7	Designation of Optical Elements	27	5.1	Primary Forming Methods for Mineral Glasses	69
2.7.1	Material Information	28	5.1.1	Manufacturing Gobs and Pressed Blanks	69
2.7.2	Form Identification	28	5.1.2	Manufacturing of Glass Blocks	70
2.7.3	Surface Identification	28	5.1.3	Manufacturing Flat Glass	72
3	Optical Materials	33	5.1.3.1	Casting Method	73
3.1	Classification of Optical Materials	33	5.1.3.2	Pulling Method	73
3.2	Mineral Glass	33	5.1.3.3	Floating Process	74
3.2.1	Definition and Structure	33	5.2	Primary Forming Methods for Organic Glass	76
3.2.2	Manufacture of Mineral Glass	34	5.2.1	Casting	77
3.2.3	Properties of Mineral Glass	37	5.2.1.1	Reaction Injection Molding (RIM) ...	77
3.2.3.1	Mechanical Properties	37	5.2.1.2	Vacuum Casting	78
3.2.3.2	Optical Properties	41	5.2.2	Injection Molding	80
3.2.3.3	Chemical Properties	43	5.2.2.1	Microinjection Molding	83
3.2.4	Delivery Forms of Mineral Glass ...	43	5.2.2.2	Multicomponent Injection Molding ...	85
3.3	Organic Glass	44	5.2.3	Hot Embossing	86
3.3.1	Definition and Structure	44	5.2.3.1	Tool Manufacturing	87
3.3.2	Selected Properties	47	5.2.3.2	Hot Embossing Process	88
3.3.3	Applications and Available Forms ...	49	5.2.4	Injection Embossing	91
3.4	Crystals	50	5.3	Primary Forming Procedures for Crystals	92
3.4.1	Design and Structure	50	5.3.1	Growing from the Gas Phase	94
3.4.2	Selected Properties	52	5.3.2	Crystal Growth from a Solution	95
			5.3.2.1	Hydrothermal Growth	95
			5.3.3	Growing out of the Melt	97

5.3.3.1	The Pulling Process according to Nacken and Kyropoulos	97	7.5	Polishing	178
5.3.3.2	The Pulling Process according to Czochralsky	98	7.5.1	Process Basics	179
6	Transforming Optical Glass	103	7.5.1.1	Ablation Hypothesis	180
6.1	Basics	103	7.5.1.2	Flow Hypothesis	180
6.2	Pressing (Molding)	106	7.5.1.3	Chemical Hypothesis	180
6.2.1	Process Principle	106	7.5.1.4	Wear-Friction Hypothesis	180
6.2.2	Tool Form—Manufacture and Requirements	109	7.5.1.5	Combination of the Hypotheses	181
6.2.2.1	Tool Correction	109	7.5.2	Machines and Tools	183
6.2.3	Molding Process	110	7.5.3	Consumables for Polishing	184
6.2.4	Application Areas	111	7.5.4	Influencing Factors	187
6.3	Sagging	113	7.5.5	Polishing Processes	189
6.4	Drawing	113	7.5.5.1	Polishing with Surface Conforming	189
6.4.1	Preform Manufacture	113	7.5.5.2	Tool Contact	189
6.4.2	Fiber Drawing	116	7.5.5.2	Polishing with Point or Line-Shaped Tool Contact (Zonal Polishing)	200
7	Cutting	121	7.5.5.3	Correction Polishing	205
7.1	Dividing	121	7.5.6	Polishing Errors	210
7.1.1	Mechanical Breaking	122	7.5.7	Performance and Accuracy	212
7.1.2	Special Processes for Trimming	123	7.6	Centering	219
7.1.2.1	Mechanical Cutting by Sawing	123	7.6.1	Centering Methods	221
7.1.2.2	Thermal Laser Cutting	126	7.6.1.1	Single-Spindle Centering	221
7.1.2.3	Water Jet Cutting	127	7.6.1.2	Bell Chucking	222
7.2	Grinding	129	7.6.2	Centering Machines and Tools	222
7.2.1	Process Basics	132	7.6.3	Manufacturing Process	224
7.2.2	Tools and Machines	133	7.7	Ultra-Precision Cutting with a Geometrically Determined Edge	227
7.2.2.1	Ring Tools	136	7.7.1	Process Basics	227
7.2.2.2	Pellet Tools	136	7.7.1.1	Influences on the Machining Quality	230
7.2.3	Cutoff Sawing	138	7.7.2	Process Classification	233
7.2.4	Form Grinding	141	7.7.3	Turning Processes	234
7.2.4.1	Round Cutting (Rounding)	142	7.7.3.1	Turning Rotation-Symmetrical Geometries	234
7.2.4.2	Plano Grinding	143	7.7.3.2	Turning Non-Rotation-Symmetrical Geometries	239
7.2.4.3	Grinding Spherical Surfaces	145	7.7.4	Milling	240
7.2.4.4	Grinding Aspheric Surfaces	152	7.7.5	Ultrasonic Supported Microcutting	244
7.3	Drilling	158	7.7.6	Capabilities and Precision	246
7.4	Lapping	163	7.8	Structuring	250
7.4.1	Process Basics	164	7.8.1	Engrave (Ablate)	250
7.4.2	Machines and Tools	165	7.8.2	Photolithographic Structuring	251
7.4.3	Consumables for Lapping	166	7.8.2.1	Etching	253
7.4.4	Influencing Factors	168	7.8.3	Structuring Deposited Metal and Lacquer Layers	254
7.4.5	Lapping Processes	169	7.8.4	Partial Layer Deposition	255
7.4.5.1	Plano Lapping	170	7.9	Cleaning	257
7.4.5.2	Lapping of Spherical Surfaces	171	7.9.1	Manual Cleaning	257
7.4.5.3	Fine Grinding with Lapping Kinematic	172	7.9.2	Mechanical Cleaning	257
7.4.5.4	Ultrasonic (US) Lapping	174	7.9.3	Laser Cleaning	260
7.4.5.5	Performance and Accuracy	176	7.9.4	Baking	260
			7.9.5	Cleaning Errors	260

8	Coating	263	10.2.2	Cementing	318
8.1	Protective Layers	263	10.2.3	Bonding	319
8.1.1	Painting	263	10.2.4	Soldering	324
8.1.2	Surface Hardening	264	10.2.5	Contacting	326
8.2	Optical Layers	266	10.2.6	Mounting Optics	327
8.2.1	Kinds of Layers	267	10.2.6.1	Mounting Round Optics	327
8.2.2	Layer Deposition	268	10.2.6.2	Mounting Prisms	331
8.2.2.1	Physical Vapor Deposition	268	10.2.7	Diffusion Welding	332
8.2.2.2	Chemical Vapor Deposition	273	10.2.8	Final Assembly	334
8.2.2.3	Wet Chemical Processes	274	10.2.8.1	Optical Assemblies	335
8.2.3	Applications	276	10.2.8.2	Assembly Processes	337
8.2.3.1	Antireflection Coatings	276	10.2.9	Microassembly	342
8.2.3.2	Front and Surface Mirror Coatings	278	10.2.9.1	TRIMO-SMD	344
8.2.3.3	Beam Splitter Mirror Coatings	281	10.2.9.2	Outsert Technology	344
8.2.3.4	Cold Light Mirror Coatings	281	10.2.9.3	Modular Assembly Concepts	344
8.2.3.5	Electrically Conductive Layers	281			
8.2.4	Layer Characterization	282	11	Selected Fabrication Technologies	349
9	Material Property Changes	287	11.1	Prism Production	349
9.1	Annealing	287	11.1.1	90° Prism Production	349
9.2	Strengthening	289	11.1.2	Penta Prism Production	351
9.3	Aging	291	11.2	Lens Production	351
9.4	Coloration	292	11.2.1	Lens Fabrication with CNC Technology	353
9.5	Phototropic Glass	293	11.2.2	LED Loupe Fabrication	356
10	Joining	295	11.2.2.1	Design	356
10.1	Joining in Fabrication	296	11.2.2.2	Fabrication of Lenses	357
10.1.1	Blocking	296	11.2.2.3	Optoelectronic Components	358
10.1.1.1	Button Blocking	296	11.2.2.4	Assembly	358
10.1.1.2	Flood Blocking	298	11.3	Manufacture of Aspherical Parts	361
10.1.1.3	Spot Blocking	298	11.4	Fabrication of Progressive Eyeglass Lenses	364
10.1.1.4	Alloy Blocking	299	11.5	Assembly of an Objective	368
10.1.1.5	Blocking of Stacks	300	11.5.1	Bonding of Individual Lenses and Doublets (Achromats)	369
10.1.2	Blocking of Prisms	301	11.5.1.1	Adjustment Bonding	369
10.1.2.1	Jig Blocking of Prisms	301	11.5.1.2	Undirected Bonding	370
10.1.2.2	Plaster Blocking	303	11.5.2	Alignment Turning	371
10.1.2.3	Optical Contacting	304	11.5.3	Subassembly	372
10.1.3	Blocking and Bonding Materials	308	11.5.4	Final Assembly	372
10.1.4	Clamping	308			
10.1.4.1	Mechanical Clamping	309			
10.1.4.2	Pneumatic Clamping	310			
10.2	Connecting Optical Elements/ Assembly	312		Bibliography	377
10.2.1	Center, Align, and Adjust	313		Index	387
