

INTRODUCTION TO THE DESIGN OF FIXED-WING MICRO AIR VEHICLES

INCLUDING THREE CASE STUDIES

Thomas J. Mueller
James C. Kellogg
Peter G. Ifju
Sergey V. Shkarayev

AMERICAN INSTITUTE OF
AERONAUTICS AND ASTRONAUTICS

AIAA EDUCATION SERIES
JOSEPH A. SCHETZ
EDITOR-IN-CHIEF

Table of Contents

Preface		xiii
1. Overview of Micro-Air-Vehicle Development		1
Thomas J. Mueller, <i>University of Notre Dame, Notre Dame, Indiana</i>		
1.1 Introduction		1
1.2 Historical Perspective		4
1.3 Conclusion		34
Acknowledgments		34
References		35
2. Elements of Aerodynamics, Propulsion, and Design		39
Thomas J. Mueller, Gabriel E. Torres, Donald W. Srull, <i>University of Notre Dame, Notre Dame, Indiana</i>		
Nomenclature		39
2.1 Introduction		41
2.2 Rigid Wings		46
2.3 Flexible and Adaptive Wings		65
2.4 Propulsion		67
2.5 MAV Design Using Experimental Database		97
2.6 Numerical Approach to MAV Design		99
2.7 Conclusion		101
Acknowledgments		102
References		103
3. Autopilot Integration into Micro Air Vehicles		109
Roman Krashanitsa, George Platanitis, Dmytro Silin, Sergey Shkarayev, <i>University of Arizona, Tucson, Arizona</i>		
Nomenclature		109
3.1 Introduction		110
3.2 MAV Designs and Specifications		115
3.3 Flight-Control System		118
3.4 Stability and Control Design for Micro Air Vehicles		121
3.5 Flight Testing		141
3.6 Conclusion		146
Appendix		147

Acknowledgments	148
References	148
4. Case Study: Micro Tactical Expendable Rigid-Wing Micro Air Vehicle	151
James C. Kellogg, <i>Tactical Electronic Warfare Division, Naval Research Laboratory, Washington, DC</i>	
Nomenclature	151
4.1 Introduction	152
4.2 NRL and DARPA MAV Programs	152
4.3 Development of the MITE Configuration	153
4.4 Detailed Design of the MITE	157
4.5 Flight Experimentation and Design Evolution	172
4.6 Stability and Flight Control	177
4.7 MITE Demonstrations and the Transition to the Dragon Eye UAV	181
4.8 Conclusion	181
Acknowledgments	184
References	184
5. Flexible-Wing Micro Air Vehicles	185
Peter G. Ifju, <i>University of Florida, Gainesville, Florida</i> ; and Roberto Albertani, <i>Research and Engineering Education Facility, Shalimar, Florida</i> ; and Bret K. Stanford, Daniel J. Claxton, Michael J. Sytsma, <i>University of Florida, Gainesville, Florida</i>	
Nomenclature	185
Acronyms	185
5.1 Introduction	186
5.2 Description of the MAV	190
5.3 MAV Fabrication Methods	192
5.4 Wind-Tunnel Characterization of the Flexible Wing	199
5.5 Modeling of Flexible Wings	225
5.6 Flight Testing	236
5.7 Conclusion	239
Acknowledgments	239
References	239
6. Development of Micro Air Vehicles with in-Flight Adaptive Wing	241
Motoyuki Aki, <i>University of Arizona, Tucson, Arizona</i> ; and Martin Waszak, <i>NASA Langley Research Center, Hampton, Virginia</i> ; and Sergey Shkarayev, <i>University of Arizona, Tucson, Arizona</i>	
Nomenclature	241
6.1 Introduction	242
6.2 Conceptual Design	245

6.3	Wind-Tunnel Testing	251
6.4	Design of Adaptive-Wing MAVs	261
6.5	Flight Testing	270
6.6	Conclusion	273
	Acknowledgments	274
	References	274
7.	Summary	277
	Index	281
	Supporting Materials	289
