<i>Foreword</i>	xxv
<i>Preface</i>	xxix
<i>List of Contributors</i>	xxxiii

Part - I

1. Principles of epidemiology and epidemiologic methods	1
<i>Sanjay P. Zodpey</i>	
1.1 Introduction	1
1.2 What is epidemiology?	1
1.3 Development in epidemiologic methods	2
1.4 Epidemiological reasoning	3
1.5 Classifying epidemiologic study methods	4
References	24
2. Nutrition epidemiology for developing countries	25
<i>Usha Ramakrishnan and Ines G. Casanova</i>	
2.1 Introduction	25
2.2 Epidemiological studies	26
2.3 Nutritional epidemiology – measurement	33
2.4 Importance of nutrition epidemiology in developing countries	43
2.5 Nutrition epidemiology and public health nutrition	44
References	47
3. Undernutrition in children	50
<i>Sheila C. Vir</i>	
3.1 Undernutrition, child survival and millennium development goals	50
3.2 Undernutrition in children – stunting, underweight and wasting	52

3.3	Undernutrition and age trend	52
3.4	Stunting, underweight and wasting – an overview of the global situation	56
3.5	Determinants of undernutrition	61
3.6	Maternal and child undernutrition - evidence for actions	68
3.7	Addressing undernutrition in children – a life cycle approach	75
	References	80
4.	Dual nutrition burden in women: causes, consequences, and control measures	86
	<i>Prema Ramachandran</i>	
4.1	Introduction	86
4.2	Emergence of dual nutrition burden in India	87
4.3	Nutritional status of pregnant and lactating women	90
4.4	Interventions to improve dietary intake and nutritional status in women	95
4.5	Factors responsible for the emerging problem of overnutrition	97
4.6	Undernutrition – overnutrition linkages	101
4.7	Summary and conclusion	104
	References	106
5.	Measuring undernutrition and overnutrition in children	108
	<i>Dheeraj Shah and H.P.S. Sachdev</i>	
5.1	Introduction	108
5.2	Anthropometric techniques	109
5.3	Comparison of indices with references	131
5.4	Cut-offs	135
5.5	Growth references	136
5.6	Undernutrition	145
	References	149
6.	Essential new-born care and child survival	151
	<i>Richa Singh Pandey and Sheila C. Vir</i>	
6.1	Neonatal period – a risky start to childhood	151
6.2	Millennium development goal 4 (MDG-4) and neonatal mortality	153
6.3	Neonatal mortality – an Indian perspective	154
6.4	Neonatal mortality – direct and underlying determinants	155
6.5	Continuum of care – a comprehensive approach to saving newborn lives	156

6.6	Essential newborn care interventions	157
6.7	Delivering essential newborn care (ENBC) interventions through public health systems – opportunities and challenges	166
6.8	Addressing neonatal health in India – initiatives by Government of India	168
6.9	Integrated Management of Childhood Illnesses (IMCI) – the global strategy	170
6.10	Integrated Management of Neonatal Care and Childhood Illnesses (IMNCI)	171
6.11	Conclusion	172
	References	173
7.	Integrating breastfeeding in public health programming – scientific facts, current status and future directions	175
	<i>Kajali Paintal</i>	
7.1	Introduction	175
7.2	Breastfeeding – the science for integrating scientific facts into programming	178
7.3	Trends in exclusive breastfeeding practices	187
7.4	Integrating breastfeeding into public sector programmes	190
7.5	Programme design – community based	207
7.6	Large scale community-based programmes – lessons learned	211
	References	215
8.	Complementary feeding of infants and young children	223
	<i>Veenu Seth and Aashima Garg</i>	
8.1	Complementary feeding practices – a critical determinant of undernutrition in young children	223
8.2	Optimal infant and young child feeding	225
8.3	Complementary feeding – issues and guidelines	226
8.4	Initiating complementary feeding	227
8.5	Adequacy and frequency of complementary feeding	228
8.6	Energy and other nutrient intake from complementary foods	228
8.7	Causes of faulty complementary feeding practices	232
8.8	Desirable features of satisfactory complementary feeding	235
8.9	Measuring the status of complementary feeding	238
8.10	Complementary feeding status – global and India	240
8.11	Low-cost complementary feeding	241
8.12	Different ‘home based’ complementary foods	242

8.13	Promoting improved complementary feeding practices – programs, strategies and challenge ahead	246
	References	249
9.	Options and strategies to reach under-two children through complementary feeding with ARF in the South Asian countries	252
	<i>Tara Gopaldas</i>	
9.1	Introduction	252
9.2	Nutritional needs, deficiencies and the role of complementary foods in the age group of under twos	253
9.3	Options for providing nutrition to overcome deficiencies	259
9.4	Technology for development of premixes and complementary foods	261
9.5	Mechanisms to improve acceptability, palatability, utilization and outreach of the donated complementary food in the public sector	266
	References	271
10.	Diarrhea and undernutrition	274
	<i>Shariqua Yunus</i>	
10.1	Introduction	274
10.2	Definition of diarrhea	274
10.3	Types of diarrhea	275
10.4	Causes of diarrhea	276
10.5	Diarrhea, morbidity, malnutrition and mortality	276
10.6	Management of diarrhea	280
10.7	Prevention of diarrhea	285
	References	290
11.	Prevention and management of protein energy malnutrition	292
	<i>Siddarth Ramji</i>	
11.1	Introduction	292
11.2	Clinical syndromes of malnutrition	292
11.3	Prevention of malnutrition	293
11.4	Managing malnutrition	301
11.5	Guidelines for management of mild-moderate malnutrition	307
11.6	Conclusion	307
	References	308

12. Severe acute malnutrition in children	310
<i>Kamal Raj</i>	
12.1 An overview	310
12.2 Clinical features	311
12.3 Severe acute malnutrition and mortality	311
12.4 Management of severe acute malnutrition (SAM)	313
12.5 Monitoring and evaluation of SAM management program	336
References	338
13. Prevention and management of overweight and obesity in children	341
<i>Anura Kurpad and Sumathi Swaminathan</i>	
13.1 Introduction	341
13.2 Maintenance of energy balance	342
13.3 The epidemic of obesity in children	343
13.4 Developmental aspects of growth, weight gain and later obesity	345
13.5 Assessment of overweight and obesity in children	348
13.6 Risk factors for overweight and obesity	350
13.7 Consequences of overweight or obesity	355
13.8 Children at special risk of obesity	356
13.9 Prevention	357
13.10 Management and treatment	360
References	362
14. Human immunodeficiency virus (HIV) and nutrition	372
<i>Minnie Mathew</i>	
14.1 Introduction	372
14.2 The clinical course of infection, immune system and infection	374
14.3 Treatment for HIV infection	375
14.4 HIV and implications on nutrition status	377
14.5 Nutritional requirements for People Living with HIV (PLHIV)	383
14.6 HIV and appropriate support	391
References	403
15. Vitamin A metabolism	405
<i>Ravinder Chadha</i>	
15.1 Introduction	405

15.2	Discovery of vitamin A	405
15.3	Occurrence and sources	406
15.4	Metabolism and storage of vitamin A	409
15.5	Functions of vitamin A and carotenoids	414
15.6	Recommended Dietary Allowances (RDA)	420
15.7	Assessment of vitamin A status	422
	References	428
16.	Vitamin A deficiency: prevention and control	432
	<i>Sheila C. Vir</i>	
16.1	Vitamin A – an essential micronutrient	432
16.2	Consequences of vitamin A deficiency	432
16.3	Epidemiology of vitamin A deficiency	435
16.4	Vitamin A deficiency (VAD) – a public health problem	441
16.5	Public health significance of vitamin A deficiency disorders	443
16.6	International focus on prevention of vitamin A deficiency	446
16.7	Intervention strategies for preventing vitamin A deficiency disorders (VADD)	447
	References	466
17.	Vitamin A prevention and control programme in India – past efforts and current status	473
	<i>Sheila C. Vir and Richa Singh Pandey</i>	
17.1	Vitamin A deficiency status in India	473
17.2	Measures taken for prevention and control of VAD	476
17.3	Vitamin A supplementation programme	477
17.4	Establishment of the biannual fixed month strategy – an overview of a state initiative	487
17.5	Elimination of vitamin A deficiency – future direction	498
	References	499
18.	Iodine metabolism and indicators of iodine status	502
	<i>Madan M. Godbole and Rajan Sankar</i>	
18.1	Introduction	502
18.2	Metabolism – iodine absorption and transport	503
18.3	Iodine requirement and intake	504
18.4	Iodide trapping, organification, coupling, TH synthesis and release (Figure 18.1)	504
18.5	Storage and availability of thyroid hormones (TH)	505
18.6	Iodine metabolism and their mechanism of action	507

18.7	Role of iodine in biological functions	509
18.8	Importance of iodine nutrition for human populations	510
18.9	Iodine requirement	511
18.10	Assessment of iodine status (Impact indicator)	514
18.11	Conclusion	518
	References	519
19.	Sustaining iodine deficiency disorders (IDD) control programme	523
	<i>Chandrakant S. Pandav</i>	
19.1	Introduction	523
19.2	Controlling of IDD – a three prong strategy	524
	References	533
20.	Iodine deficiency and iodine deficiency disorders (IDD) control program	535
	<i>Sheila C. Vir</i>	
20.1	Epidemiology of iodine deficiency	535
20.2	Iodine deficiency disorders – a public health problem	537
20.3	Elimination of iodine deficiency disorders (IDD) – international focus	542
20.4	Fortification of salt with iodine	542
20.5	Universal salt iodization (USI)	545
20.6	Monitoring IDD control programme	549
20.7	Monitoring progress towards sustainable elimination of IDD as a public health problem	556
20.8	Supplementation with iodised oil in special situations of insufficient access to iodized salt	558
	References	559
21.	Universal salt iodization (USI)	562
	<i>M.G. Venkatesh Mannar</i>	
21.1	Introduction	562
21.2	Taking universal salt iodization to scale	563
21.3	Components of effective USI programmes	567
21.4	USI – An example of successful fortification	572
21.5	Conclusions	572
	References	573

22. National iodine deficiency disorders control programme of india	575
<i>Sheila C. Vir</i>	
22.1 History and current policy	575
22.2 Universal salt iodization (USI) – an integral part of NIDDCP	579
22.3 Increasing production of iodized salt for edible purposes	579
22.4 Advocacy and demand creation for increased production, universal access and consumption of adequately iodized salt	590
22.5 Innovative efforts to accelerate USI	592
22.6 Elimination of IDD – impact and progress	597
22.7 Elimination of IDD – challenges ahead	602
References	603

Part - II

23. Metabolism of iron, folic acid and vitamin B ₁₂	607
<i>K. Madhavan Nair</i>	
23.1 Introduction	607
23.2 Iron	607
23.3 Distribution	608
23.4 Functional compartment	609
23.5 Heme proteins	609
23.6 Heme enzymes	610
23.7 Non-heme iron proteins	611
23.8 Storage compartment	613
23.9 Transport compartment	614
23.10 Recycling of iron in the body	614
23.11 Iron losses	614
23.12 Dietary iron bioavailability	616
23.13 Other factors influencing iron absorption	617
23.14 Recommended daily allowance (RDA)	617
23.15 Iron homeostasis	618
23.16 Mechanism of intestinal absorption of iron at the enterocyte	619
23.17 Mechanism of iron uptake in cells other than enterocytes	621
23.18 Molecular regulation of cellular iron	621
23.19 Assessment of iron status	623
23.20 Stages in the development of iron deficiency and iron status parameters	623
23.21 Iron toxicity	625

23.22	Folic acid	626
23.23	Chemistry	626
23.24	Dietary sources and recommended intake	627
23.25	Availability of food folate	627
23.26	Food folate – digestion and absorption	628
23.27	Functions	628
23.28	Folic acid and anemia	629
23.29	Assessment of folate status	630
23.30	Vitamin B ₁₂	630
23.31	Chemistry	630
23.32	Dietary sources and recommended intake	631
23.33	Absorption and transport	631
23.34	Bioavailability of dietary vitamin B ₁₂	632
23.35	Body content	632
23.36	Dietary deficiency of vitamin B ₁₂	632
23.37	Malabsorption of vitamin B ₁₂	633
23.38	Biochemical function	633
23.39	Neurological manifestations	635
23.40	Assessment of vitamin B ₁₂ status	635
	References	636
24.	Iron deficiency and iron deficiency anemia in young children	638
	<i>Sheila C. Vir and Prakash V. Kotecha</i>	
24.1	Iron deficiency and iron deficiency anemia in young children	638
24.2	Anemia, iron deficiency and iron deficiency anemia	643
24.3	Iron balance in children	645
24.4	Patho-physiology of anemia in children under three years of age	645
24.5	Consequences of iron deficiency and iron deficiency anemia in children	647
24.6	Measures for preventing iron deficiency and anemia	649
24.7	Conclusion	658
	References	658
25.	Iron and multiple micronutrient supplementation in children: evidence from systematic reviews	663
	<i>Tarun Gera</i>	
25.1	Introduction	663
25.2	Iron and multiple micronutrient supplementation and anemia	664

25.3	Effect of iron and multiple micronutrient supplementation on mental development in children	668
25.4	Iron and multiple micronutrient supplementation in children and growth	670
	References	672
26.	Nutritional anemia during pregnancy, early childhood and adolescence: the critical development periods	674
	<i>Subadra Seshadri</i>	
26.1	Introduction	674
26.2	Prevalence of anemia: global and the Indian population	677
26.3	Causes of nutritional anemia	680
26.4	Iron homeostasis	687
26.5	Iron requirements	689
26.6	Assessment of anemia	694
26.7	Functional effects of anemia	697
26.8	Approaches for the prevention and control of anemia	701
26.9	Summary	705
	References	707
27.	Iron deficiency and iron deficiency anemia in adolescent girls	713
	<i>Sheila C. Vir</i>	
27.1	Prevalence of iron deficiency and anemia among adolescent girls	713
27.2	Causes of iron deficiency and iron deficiency anemia in adolescent girls	715
27.3	Consequences of iron deficiency and iron deficiency anemia	721
27.4	Prevention and control of iron deficiency and iron deficiency anemia	723
27.5	Anemia in adolescent girls in India and efforts launched at state level	730
	References	732
28.	Zinc – an essential micronutrient for health and development	737
	<i>Sunil Sazawal and Pratibha Dhingra</i>	
28.1	Introduction	737

28.2	Biological functions of zinc	737
28.3	Public health significance	738
28.4	Zinc epidemiology	738
28.5	Clinical manifestations of zinc deficiency	739
28.6	Dietary sources, intake, absorption and bioavailability	739
28.7	Physiology of zinc	740
28.8	Evidence from zinc supplementation studies on child health	745
28.9	Zinc supplementation in pregnancy	753
28.10	Effect of zinc on immune response in the elderly	754
28.11	Zinc toxicity	754
28.12	Assessment of zinc status	755
28.13	Scaling up programs to improve zinc nutrition	758
28.14	Conclusion	763
	References	764
29.	Vitamin A and zinc supplements for child survival – experiences and challenges ahead	772
	<i>Anand Lakshman</i>	
29.1	Introduction	772
29.2	Magnitude of the problem	772
29.3	The challenge	774
29.4	Vitamin A and zinc deficiencies – implications on child mortality	775
29.5	Approaches to address vitamin A deficiency	777
29.6	Addressing zinc deficiency	785
29.7	Economic analysis of cost and benefit of vitamin A and zinc supplementation	790
29.8	Implications and conclusions	792
	References	792
30.	Addressing micronutrient malnutrition through food fortification	795
	<i>Saraswati Bulusu and Annie S. Wesley</i>	
30.1	Introduction	795
30.2	Micronutrient malnutrition – an overview	796
30.3	Complementary strategies to overcome micronutrient malnutrition	799
30.4	Food fortification	800
30.5	History of food fortification	800
30.6	Technical considerations	801
30.7	Technology for food fortification	803

30.8	Fortificants	804
30.9	Planning food fortification intervention	809
30.10	Global experiences with food fortification	810
30.11	Food fortification in a developing country—Experiences from India	813
30.12	Fortification of selected food items	825
30.13	Innovative experiments with fortification	831
30.14	Public–private partnerships	835
30.15	Monitoring and evaluation	837
30.16	Regulations and standards	837
30.17	Conclusion	839
	References	839
31.	Agriculture, food and nutrition security	844
	<i>Deeksha Kapur</i>	
31.1	Introduction	844
31.2	Food and nutrition security: understanding the basic concepts	845
31.3	Agriculture: central to food and nutrition security	850
31.4	Food insecurity and vulnerability	852
31.5	Factors underlying the current state of food and nutrition security	858
31.6	Policies and programmes for reducing food insecurity and vulnerability in the Indian context	865
	References	876
32.	Food and nutrition situation in India	879
	<i>K. Vijayaraghavan</i>	
32.1	Introduction	879
32.2	Food security	881
32.3	Dietary consumption pattern in India	885
32.4	Trends in nutrient intake	886
32.5	Nutritional status – trends in children and adults	892
32.6	Conclusion	896
	References	896
33.	Food and nutrition in natural and manmade disasters	898
	<i>Deepti Gulati</i>	
33.1	Natural and manmade disasters	898

33.2	Understanding concepts of vulnerability disaster-preparedness and building capacities	903
33.3	Food insecurity and malnutrition – identification and measurement	908
33.4	Nutritional interventions	913
33.5	Nutritional requirements	921
33.6	Addressing food security	925
33.7	Types of disasters and disaster management in India	927
	References	929
34.	Nutrition for the aged	932
	<i>Kumud Khanna and Seema Puri</i>	
34.1	Introduction	932
34.2	Definition of old age	932
34.3	Greying of nations	933
34.4	Characteristic trends of ageing in India	934
34.5	Physiological ageing	939
34.6	Pathological ageing	942
34.7	Nutrition and ageing	943
34.8	Dietary guidelines for older persons	949
34.9	Ageing in the development agenda	950
34.10	Initiatives in old age care	953
34.11	Initiatives by the voluntary sector	953
	References	954
35.	Nutrition related non-communicable chronic disorders	956
	<i>Kamala Krishnaswamy and Avula Laxmaiah</i>	
35.1	Introduction	956
35.2	Prevalence of non-communicable diseases at global and national level	957
35.3	Cardiovascular diseases	957
35.4	Nutrition transition and NCDs	960
35.5	Macronutrients	960
35.6	Risk factors for diet related NCDs	963
35.7	Overweight and obesity and dietary factors	964
35.8	Blood lipids (Dyslipidaemia)	966
35.9	Metabolic syndrome	967
35.10	Hypertension	967
35.11	Fetal and childhood malnutrition	969
35.12	Vegetables and fruits in the diet	969

35.13	Prevention and control of NCDs	971
35.14	Actions	974
35.15	Childhood and adolescent nutrition	976
35.16	Community-based programmes for primary prevention	976
35.17	Health education and role of mass media	977
35.18	Secondary and tertiary prevention	977
35.19	Conclusions	977
	References	978
36.	Planning result-oriented public health nutrition programs: theory and practice	982
