Preface XI

The Editor XIII

List of Contributors XV

Abbreviations XIX

1	Introduction: An Intuitive Approach to Surface and Interface Science	1
	<i>Klaus Wandelt</i>	
1.1	Peculiarities of Surfaces	1
1.2	Importance of Surfaces and Interfaces	9
1.3	Summary	12
2	An Introduction to the Theory of Crystalline Elemental Solids and their Surfaces	13
	<i>Angelos Michaelides and Matthias Scheffler</i>	
2.1	Introduction	13
2.2	Some Basics	14
2.2.1	Crystalline Solids are Crystalline	14
2.2.2	Cohesive Energies	15
2.2.3	The “Types” of Bonds in Solids	16
2.3	The ABC of DFT	18
2.3.1	Theoretical Framework	18
2.3.2	Approximations for Exchange and Correlation	21
2.3.3	Other Approximations and Practicalities of Condensed Phase DFT Calculations	24
2.4	Bonding in Solids	26
2.4.1	Bonding in Metals	26
2.4.2	Simple Metals and Jellium	28
2.4.3	Transition Metals and Tight Binding	29
2.4.4	DFT for the Cohesive Properties of Metals?	31
2.4.5	Semiconductors and Covalent Bonding	33
2.4.6	DFT for the Cohesive Properties of Elemental Covalent Solids?	35

2.5	Surface Structure	37
2.5.1	Surface Relaxation	39
2.5.2	Surface Reconstruction	40
2.5.2.1	Reconstructions of Elemental Metal Surfaces	41
2.5.2.2	Reconstructions of Elemental Semiconductor Surfaces	43
2.5.3	Surface Structure Summary	49
2.6	Surface Energetics	49
2.6.1	Introduction and Experimental Considerations	49
2.6.2	Theoretical Considerations of Surface Energies	52
2.6.3	Phenomenological Theories of Surface Energies	53
2.6.3.1	Surface Energies and Cohesive Energies	53
2.6.3.2	Surface Energy Anisotropy	55
2.7	Surface Electronic Structure	57
2.7.1	Jellium Surfaces: Electron Spillout, Surface Dipole, and Work Function	57
2.7.2	Transition Metal Surfaces: Band Narrowing and Surface Core Level Shifts	61
2.7.3	Surface States	63
2.8	Conclusions and Perspectives	65
	Acknowledgments	67
	Further Reading	67
	References	68
3	Experimental Methods	73
3.1	Experimental Basics	73
	<i>Marko Kralj and Klaus Wandelt</i>	
3.1.1	The “Surface Science Approach”	73
3.1.2	Physical Background of Vacuum	74
3.1.2.1	Introduction	74
3.1.2.2	The Ideal Gas	75
3.1.2.3	Gas Exposure	76
3.1.2.4	Pumping Concept	78
3.1.3	Technical Background of Vacuum Technology	80
3.1.3.1	Ultrahigh Vacuum Materials	80
3.1.3.2	Pumping Systems	81
3.1.3.3	Pressure Measurements	85
3.1.4	Sample Preparation	87
3.1.4.1	Preparation of Clean Surfaces	87
3.1.4.2	Controlled Adsorption and Deposition	89
3.1.5	Surface Analytical Methods	90
	References	92

3.2	Electron Based Methods	93
3.2.1	Low-Energy Electron Diffraction (LEED)	93
	<i>Klaus Heinz</i>	
3.2.1.1	Historical Development	93
3.2.1.2	Basic Experimental LEED Equipment	96
3.2.1.3	Intensity Measurement	98
3.2.1.4	Surface Sensitivity	100
3.2.1.5	The LEED Pattern and Intensity – its Formation and Information	101
3.2.1.6	Multiple Scattering and Dynamical Intensities	118
3.2.1.7	Tensor LEED	130
3.2.1.8	Structure Determination	136
3.2.1.9	Practical Limitations and Direct Methods	145
	References	149
3.2.2	Photoelectron Spectroscopy and Diffraction	151
	<i>Jürg Osterwalder</i>	
3.2.2.1	Introduction	151
3.2.2.2	Instrumentation	161
3.2.2.3	X-Ray Photoelectron Spectroscopy/Auger Electron Spectroscopy	166
3.2.2.4	Ultraviolet Photoelectron Spectroscopy (UPS)/Angle-Resolved Photoemission Spectroscopy (ARPES)	189
3.2.2.5	Spin-Polarized Photoelectron Spectroscopy	204
	References	210
	Further Reading	214
3.2.3	Spectroscopic Databases and Standardization for Auger-Electron Spectroscopy and X-Ray Photoelectron Spectroscopy	215
	<i>Aleksander Jablonski and Cedric J. Powell</i>	
3.2.3.1	Introduction	215
3.2.3.2	NIST Databases Relevant to Surface Sensitivity of AES and XPS	218
3.2.3.3	Other NIST Databases	238
3.2.3.4	Additional Data and Software for AES and XPS	241
3.2.3.5	Standards for AES and XPS	243
3.2.3.6	Summary	247
	References	248
3.2.4	Two-Photon Photoelectron Spectroscopy	253
	<i>Thomas Fauster</i>	
3.2.4.1	Image-Potential States	253
3.2.4.2	Energy-Resolved Spectroscopy	256
3.2.4.3	Time-Resolved Measurements	258
3.2.4.4	Experimental Setup	262

3.2.4.5	Theoretical Aspects	264
	References	267
3.3	Ion Scattering Spectroscopy	269
	<i>D. John O'Connor</i>	
3.3.1	Introduction	269
3.3.2	Composition and Structure	270
3.3.2.1	Element Identification	270
3.3.2.2	Concentration	272
3.3.2.3	Structure	275
3.3.3	Equipment	276
3.3.4	Low-Energy Ion Scattering	278
3.3.4.1	Composition Analysis	278
3.3.4.2	Structure Analysis	283
3.3.5	Medium-Energy Ion Scattering	297
3.3.5.1	Composition Analysis	298
3.3.5.2	Thin Layer Analysis	298
3.3.5.3	Surface Crystal Structure, Reconstruction, and Relaxation	300
3.3.6	Issues for Consideration	304
3.3.6.1	Secondary Electron Emission	304
3.3.6.2	Radiation Damage and Sputtering	306
3.3.6.3	Macroscopic Damage	308
	References	308
3.4	Photon-Based Methods	311
3.4.1	Photon Spectroscopies	311
	<i>Steve D. Barrett, Christopher A. Lucas, and Rasmita Raval</i>	
3.4.1.1	Reflection–Absorption Infrared Spectroscopy (RAIRS)	311
3.4.1.2	Ultraviolet–Visible (UV–vis) Absorption Spectroscopy	343
3.4.1.3	Reflection Anisotropy Spectroscopy	348
3.4.1.4	Near-Edge X-Ray Absorption Fine Structure (NEXAFS)	357
	References	369
3.4.2	X-Ray Diffraction from Surfaces and Interfaces	375
	<i>Elias Vlieg</i>	
3.4.2.1	Introduction	375
3.4.2.2	Basics of Diffraction	376
3.4.2.3	Measuring Structure Factors	392
3.4.2.4	Reflection and Refraction of X-Rays	396
3.4.2.5	Data Analysis	404
3.4.2.6	Line Shapes	411
3.4.2.7	Trends	421
	Acknowledgments	423
	References	423

3.5	Scanning Probe Techniques	427
	<i>Angelika Kühnle and Michael Reichling</i>	
3.5.1	Introduction	427
3.5.2	Scanning Tunneling Microscopy	428
3.5.2.1	Basic Principles and Apparatus	428
3.5.2.2	Theory	431
3.5.2.3	Capabilities	435
3.5.2.4	Case Studies	437
3.5.3	Scanning Force Microscopy	444
3.5.3.1	Basic Principles and Apparatus	444
3.5.3.2	Theory	454
3.5.3.3	Capabilities	458
3.5.3.4	Case Studies	460
3.5.4	Outlook	472
	References	474

Volume 2

4	Surface Crystallography	489
	<i>Klaus Heinz and Ulrich Starke</i>	
5	The Electronic Structure of Metal Surfaces	561
	<i>Erminald Bertel, Norbert Memmel, and Alexander Menzel</i>	
6	Electron Dynamics at Surfaces	637
	<i>Thomas Fauster, Pedro M. Echenique and Evgueni V. Chulkov</i>	
7	Surface Magnetism	679
	<i>Marek Przybylski and Jürgen Kirschner</i>	
8	Dynamics at Surfaces	743
8.1	Thermal Dynamics at Surfaces	743
	<i>Harald Brune</i>	
8.2	Vibrations at Surfaces	773
	<i>Wolf Widdra</i>	
9	Surfaces of Elemental Semiconductors	815
	<i>Michael Horn-von Hoegen</i>	
10	Diamond Surfaces	889
	<i>Lothar Ley and Jürgen Ristein</i>	
	Index	941
