

Edited by Jürgen Popp, Valery V. Tuchin,
Arthur Chiou, and Stefan H. Heinemann

 WILEY-VCH

Handbook of Biophotonics

Volume 2:
Photonics for Health Care

Contents

Preface XXXIII

List of Contributors XXXV

Part 1 Laboratory Medicine 1

- 1 Microscopic and Spectroscopic Methods 3**
Brent D. Cameron
 - 1.1 Bright Field Microscopy 3
 - 1.2 Dark Field Microscopy 3
 - 1.3 Phase Contrast Microscopy 4
 - 1.4 Differential Interference Contrast Microscopy 4
 - 1.5 Confocal Microscopy 5
 - 1.6 Fluorescence Spectroscopy 5
 - 1.7 Infrared Spectroscopy 6
 - 1.8 Raman Spectroscopy 7
 - References 8

- 2 Glucose Sensing and Glucose Determination Using Fluorescent Probes 11**
Mark-Steven Steiner, Axel Duerkop, and Otto S. Wolfbeis
 - 2.1 Why Glucose Sensing? 11
 - 2.2 Classification of Sensors According to the Recognition Scheme 12
 - 2.3 Glucose Sensing via the Optical Properties of Oxidative or Reductive Enzymes 13
 - 2.3.1 Nonlabeled Enzymes 13
 - 2.3.2 Labeled Enzymes 13
 - 2.4 Fluorescent Sensing of Glucose via Measurement of the Consumption of Oxygen Caused by the Action of GOx 14
 - 2.4.1 Planar and Fiber-Optic Sensors 14
 - 2.4.2 Sensors Based on the Use of Microparticles (μ Ps) and Nanoparticles (NPs) 16

2.5	Fluorescent Sensing of Glucose via Measurement of the Formation of Hydrogen Peroxide Caused by the Action of GOx	18
2.6	Enzymatic Sensing of Glucose via Changes of pH	20
2.7	Fluorescent Sensing of Glucose via Synthetic Boronic Acids	20
2.8	Fluorescent Sensing of Glucose via Concanavalin A	23
2.9	Fluorescent Sensing of Glucose using Glucose-Specific Apoenzymes	26
2.10	Fluorescent Sensing of Glucose via Glucose-Binding Proteins	27
2.11	Conclusion and Outlook	30
	References	30
3	Biochips as Novel Bioassays	35
	<i>Bettina Rudolph, Karina Weber, and Robert Möller</i>	
3.1	Introduction	35
3.2	Types of Microarrays	36
3.2.1	DNA Microarrays	36
3.2.2	Protein Microarrays	37
3.2.3	Tissue Microarrays	38
3.2.4	Cell-Based Microarrays (Transfection Microarrays)	39
3.3	Principle Steps of an Experimental Microarray Process	40
3.3.1	Basics	41
3.3.1.1	Surface Biofunctionalization	41
3.3.2	Preparation of Biomolecules (Sample Preparation)	42
3.3.2.1	DNA	42
3.3.2.2	RNA	43
3.3.2.3	Proteins	43
3.3.3	Target Amplification and Labeling	43
3.3.3.1	PCR – Polymerase Chain Reaction	44
3.3.3.2	<i>In Vitro</i> Transcription – cDNA/IVT	44
3.3.3.3	Bio-Barcode Amplification of Nucleic Acids and Proteins	44
3.3.3.4	Radioactive and Fluorophore Labeling	45
3.3.3.5	Enzymes	46
3.3.3.6	Nanoparticles	47
3.3.4	Readout/Detection	47
3.3.4.1	Radioactivity	48
3.3.4.2	Fluorescence/Absorbance	49
3.3.4.3	Surface Plasmon Resonance	51
3.4	Examples of Biochip Applications in Biology and Medicine	51
3.4.1	Genomic Research	51
3.4.1.1	SNP Detection	52
3.4.1.2	Gene Expression Profile Analysis	54
3.4.1.3	Pharmacogenomics and Toxicogenomics	55
3.4.2	Pathogen Detection and Clinical Diagnosis	56
3.4.2.1	Pathogen Detection	56
3.4.2.2	Clinical Diagnosis	57

3.5	Trends in Biochip Research	58
3.5.1	Metal Nanoparticles	58
3.5.2	Quantum Dots	59
3.5.3	Enzymes	61
3.6	Conclusion	63
	References	64
4	Microstructure Fibers in Biophotonics	77
	<i>Aleksei M. Zheltikov</i>	
4.1	Introduction: From Early Concepts of Fiber-Based Bioimaging to Biophotonics with Specialty Fibers	77
4.2	Microstructure Fiber Sensors	78
4.3	Designing Specialty Fibers for High-Resolution Imaging	80
4.4	Fiber-Based Imaging of Diffusively Scattering Tissues	82
4.5	Enhancement of Guided-Wave Two-Photon-Excited Luminescence Response with a Photonic-Crystal Fiber	84
4.6	Microstructure Fibers for Nonlinear Optical Microspectroscopy	90
4.7	Microstructure Fibers for Neurophotonics	94
4.8	Toward Fiber-Based Multicolor Imaging	98
	References	100
5	Identification and Characterization of Microorganisms by Vibrational Spectroscopy	105
	<i>Stephan Stöckel, Angela Walter, Anja Boßecker, Susann Meisel, Valerian Ciobotă, Willem Schumacher, Petra Rösch, and Jürgen Popp</i>	
5.1	Introduction	105
5.2	Sample Preparation Techniques	106
5.3	Statistical Analysis of Vibrational Spectroscopic Data	107
5.4	Monitoring of Biofilms	116
5.5	Role of Vibrational Spectroscopy in Epidemiological Studies	120
5.6	Effect of Antibiotics on Microorganisms	127
5.7	Detection and Identification of Food-Borne Pathogens	131
5.8	Conclusion	135
	References	136
	Part 2 Pathology	143
6	Cell Sorting	145
	<i>Jochen Guck</i>	
6.1	Conventional Techniques in Cell Sorting	145
6.2	Photonic Techniques in Single-Cell Sorting	145
6.3	Photonic Techniques in Bulk Sorting	147
	References	148

7	Laser Microtomy	151
	<i>Holger Lubatschowski, Fabian Will, Sabine Przemeck, and Heiko Richter</i>	
7.1	Cutting by Optical Breakdown	151
7.2	The Laser Microtome at a Glance	151
7.3	Preparing and Sectioning the Tissue Samples	152
7.4	OCT Controlled 3D Processing	154
7.5	Tissue Samples	155
7.6	Not for Routine but for Special Cases	155
	References	157
8	Classical Microscopy	159
	<i>Kerstin Roeser, Dietlind Zuehlke, Martin Gluch, Gernoth Grunst, Markus Sticker, Klaus Bendrat, and Axel Niendorf</i>	
8.1	Appearance	159
8.2	Application	159
8.3	Pathology	159
8.4	Materials	160
8.5	Methods (Tissue Processing)	160
8.6	Histological Staining	163
8.7	Microscopy	165
8.8	Diagnostics	167
8.8.1	Context-Dependent Aspects in Morphological Diagnostics	167
8.8.2	Cognitive Aspects of Digital Microscopy	167
	References	174
9	Virtual Microscopy	175
	<i>Thorsten Heupel</i>	
9.1	Introduction	175
9.2	Principles	176
9.3	Applications	177
9.3.1	Telepathology	177
9.3.2	Routine Pathology	177
9.3.3	Education	178
9.3.4	Tissue Microarrays	178
9.3.5	Research	179
9.4	Outlook	179
	References	180
10	In Vitro Instrumentation	181
	<i>Sergio Coda, Rakesh Patalay, Christopher Dunsby, and Paul M.W. French</i>	
10.1	Introduction	181
10.2	Autofluorescence of Biological Tissue	181
10.2.1	Fluorescence Contrast	183
10.2.2	Spectroscopic Techniques for Fluorescence Imaging and Metrology	184
10.2.2.1	Spectral Techniques	184

10.2.2.2	Fluorescence Lifetime Techniques	184
10.2.3	Single-Point Spectroscopic Techniques	185
10.2.4	Fluorescence Microscopy	186
10.2.4.1	Laser Scanning Confocal/Multiphoton Microscopy	186
10.2.4.2	Wide-Field Fluorescence Imaging	187
10.2.4.3	Multidimensional Fluorescence Microscopy	187
10.3	<i>Ex Vivo</i> Tissue Spectroscopy and Imaging: Application to Cancer	189
10.3.1	Oral Cavity	190
10.3.2	Gastrointestinal Tract	190
10.3.3	Bladder	191
10.3.4	Breast	192
10.3.5	Brain	192
10.3.6	Skin	193
10.4	Conclusion	194
	References	194
11	<i>In Vivo</i> Instrumentation	201
	<i>Herbert Schneckenburger, Michael Wagner, Petra Weber, and Thomas Bruns</i>	
11.1	Introduction	201
11.2	Microscopy	201
11.3	Endoscopy	202
11.4	Imaging Techniques	203
	References	205
12	Fluorescent Probes (Fluorescence Standards, Green Protein Technology)	207
	<i>Markus Sauer</i>	
	References	212
13	Optical Coherence Imaging for Surgical Pathology Assessment	215
	<i>Wladimir A. Benalcazar and Stephen A. Boppart</i>	
13.1	Structural Contrast Imaging	217
13.2	Molecular Contrast Imaging	218
13.3	Conclusion	222
	References	222
14	Diffuse Optical Imaging	225
	<i>Jeremy C. Hebden</i>	
14.1	Introduction	225
14.2	Optical Topography	226
14.2.1	Evoked Response to Sensory Stimulation	227
14.2.2	Cognitive Activity and Language Processing	229
14.2.3	Epilepsy	229
14.3	Optical Tomography	229
14.3.1	Optical Mammography	230

14.3.2	Optical Tomography of the Brain	230
14.4	Conclusion	232
	References	232

15 Raman Microscopy 235

Christoph Krafft and Jürgen Popp

15.1	Introduction	235
15.2	Application to Cell Characterization	236
15.3	Application to Tissue Characterization	239
15.4	Conclusions	240
	References	241

16 CARS Microscopy 243

Andreas Zumbusch

16.1	Introduction	243
16.2	Technical Background and Experimental Realizations	244
16.2.1	Excitation Geometry	245
16.2.2	Excitation Lasers	245
16.3	Applications	246
16.4	Outlook	248
	References	248

17 Detection of Viral Infection in Epithelial Cells by Infrared Spectral Cytopathology 251

Max Diem, Nora Laver, Kristi Bedrossian, Jennifer Schubert, Kostas Papamarkakis, Benjamin Bird, and Miloš Miljković

17.1	Introduction	251
17.2	Methods	252
17.3	Results and Discussion	252
17.4	Conclusions	256
	References	256

Part 3 Oncology 259

18 Clinical and Technical Aspects of Photodynamic Therapy – Superficial and Interstitial Illumination in Skin and Prostate Cancer 261

Katarina Svanberg, Niels Bendsoe, Sune Svanberg, and Stefan Andersson-Engels

18.1	Background – Cancer and Its Treatment	261
18.2	Phototherapy	261
18.3	Phototoxicity	263
18.4	Photodynamic Procedure	265
18.5	Photosensitizers	265
18.5.1	Laser-Induced Fluorescence for Tumor Detection	267
18.6	Light Sources	269

18.7	Photodynamic Therapy as a Clinical Procedure	271
18.8	Superficial PDT in Skin Lesions	271
18.9	Interstitial PDT for Prostate Cancer	274
18.10	Discussion	282
	References	283
19	Molecular Targeting of Photosensitizers	289
	<i>Hasan Tanyaba, Prakash R. Rai, Sarika Verma, and Yiang Zheng</i>	
19.1	Introduction	289
19.2	Molecular Modifications of Photosensitizers	290
19.2.1	Small Molecules, Peptides, and Aptamers	290
19.2.2	Proteins	291
19.3	Delivering Photosensitizers via Targeted Nanoconstructs	291
19.4	Target Modification/Cellular Activation	292
19.5	Conclusion	292
	References	293
20	Photodynamic Molecular Beacons	295
	<i>Pui-Chi Lo, Jonathan F. Lovell, and Gang Zheng</i>	
	References	303
21	Oxygen Effects in Photodynamic Therapy	305
	<i>Asta Juzeniene</i>	
21.1	Introduction	305
21.2	The Role of Oxygen in Photodynamic Therapy: $^1\text{O}_2$ Generation	305
21.3	Dependence of the Photosensitizing Effect on O_2 Concentration	306
21.4	The Oxygenation Status in Tumors and Normal Tissues	306
21.5	PDT-Induced Reduction of Tumor Oxygenation	307
21.5.1	O_2 Consumption (Primary Reduction)	307
21.5.2	Vascular Damage (Secondary Reactions)	307
21.5.3	Photosensitizer Photobleaching (Secondary Reactions)	307
21.6	Methods to Reduce Tumor Deoxygenation During PDT	308
21.6.1	Low Fluence Rates	308
21.6.2	Fractionated Light Exposure	308
21.6.3	Other Methods	309
21.7	Changes of Quantum Yields Related to Photosensitizer Relocalization	309
21.8	Changes of Optical Penetration Caused by Changes in O_2 Concentration	309
21.9	Conclusion	309
	References	310

22	Organic Light-Emitting Diodes (OLEDs): Next-Generation Photodynamic Therapy of Skin Cancer	315
	<i>Ifor D.W. Samuel, James Ferguson, and Andrew McNeill</i>	
22.1	Introduction	315
22.2	PDT of Skin Cancer: Current Approach	315
22.3	Advances in Light Sources: Organic Light-Emitting Diodes	316
22.4	Transforming PDT with Wearable Light Sources	317
22.4.1	Developing OLEDs for PDT	317
22.4.2	Testing OLEDs for PDT	318
22.4.3	Ambulatory PDT: a New Paradigm	319
22.4.4	Commercialization of Ambulatory PDT	319
22.5	Conclusion	320
	References	320
23	Nanoparticles for Photodynamic Therapy	321
	<i>Wen-Tyng Li</i>	
23.1	Introduction	321
23.2	Active Nanoparticles for PDT	323
23.3	Nanoparticles as Photosensitizer Carriers for PDT	326
23.3.1	Biodegradable Nanoparticles for PDT	326
23.3.2	Nonbiodegradable Nanoparticles for PDT	330
23.4	Conclusion	332
	References	333
24	Optical Coherence Tomographic Monitoring of Surgery in Oncology	337
	<i>Elena V. Zagaynova, N.D. Gladkova, N.M. Shakhova, O.S. Streltsova, I.A. Kuznetsova, I.A. Yanvareva, L.B. Snopova, E.E. Yunusova, E.B. Kiseleva, V.M. Gelikonov, G.V. Gelikonov, and A.M. Sergeev</i>	
24.1	Introduction	337
24.2	OCT Technique	339
24.3	Urology	342
24.3.1	Accuracy of OCT in Endoscopic Detection of Early Cancer	343
24.3.2	Combined Use of OCT and Fluorescence Imaging for Cancer Detection	345
24.3.3	OCT Guided Surgery in Bladder Cancer (Open Surgery and Transurethral Resections)	346
24.3.3.1	Transurethral Resections	346
24.3.3.2	Open Surgery	348
24.4	Gastroenterology	348
24.4.1	OCT for Endoscopic Monitoring of Barrett's Esophagus Malignancy	348
24.4.1.1	Differentiation Between Normal Esophagus and Benign BE	350
24.4.1.2	Differentiation Between HGD and Benign BE	351

24.4.1.3	Differentiation Between IMAC and Benign BE	352
24.4.1.4	Differentiation Between Invasive Carcinoma and Benign BE	352
24.4.1.5	Malignant BE Versus Benign BE	353
24.4.2	OCT for Surgical Guidance of Colon Polyps	355
24.4.3	OCT in Guided Surgery of Gastrointestinal Cancer (Esophagectomy and Rectoectomy)	357
24.5	Gynecology	358
24.5.1	Methodology and Patient Selection	358
24.5.2	Guidance Biopsy During Colposcopy	359
24.6	Cross-Polarization OCT in Oncology	363
24.6.1	CP-OCT in Oncogynecology	364
24.6.2	CP-OCT in Oncourology	366
24.6.3	CP-OCT in Oncogastroenterology	369
24.7	Conclusion	370
	References	371
25	Intraoperative Optical Coherence Tomographic Monitoring	377

Part 4 Cardiology, Angiology 401

26	Microvascular Blood Flow: Microcirculation Imaging 403
	<i>Martin J. Leahy</i>
26.1	Introduction 403
26.2	Nailfold Capillaroscopy 406
26.2.1	Measurements 407
26.2.2	Experimental Considerations 409
26.2.3	Limitations and Improved Analysis 409
26.2.4	Conclusion 410
26.3	Laser Doppler Perfusion Monitoring 410
26.3.1	Light Sources 411
26.3.2	Laser Doppler Perfusion Imaging (LDPI) 411
26.3.3	Point Raster Technique 412
26.3.4	Line Scanning Technique 413
26.3.5	Full-Field Scanning Technique 414
26.3.6	Applications 414
26.4	Laser Speckle Perfusion Imaging 415
26.4.1	Full-Field Measurements 416
26.4.2	Limitations and Improved Analysis 417
26.4.3	Microcirculation 418
26.4.4	Agreement with Laser Doppler 420
26.5	Polarization Spectroscopy 421
26.5.1	Current Technology 422
26.5.2	Image and Data Processing 423
26.6	Photoacoustic Tomography 426
26.7	Optical Microangiography (OMAG) 427
26.8	Comparison of Planar Microcirculation Imagers TiVi, LSPI, and LDPI 429
26.8.1	Laser Doppler Imaging – Moor Instruments moorLDLS 430
26.8.2	Laser Speckle Imaging – Moor Instruments moorFLPI 431
26.8.3	Polarization Spectroscopy – WheelsBridge TiVi Imager 431
26.8.4	Results 432
26.8.5	Discussion 433
26.8.5.1	Depth of Measurement 436
26.8.6	Conclusions 437

30 Laser Therapy 491

Anant Mohan

30.1	Diagnostic Applications of Lasers	491
30.1.1	Autofluorescence Bronchoscopy (AFB)	491
30.2	Fibered Confocal Fluorescence Microscopy (FCFM)	494
30.3	Therapeutic Uses of Laser	495
30.3.1	Photodynamic Therapy (PDT)	495
30.3.2	Laser Therapy	496
30.4	Contraindications	498
30.5	Laser Bronchoscopy Procedure	498

- 30.5.1 Anesthesia 498
- 30.5.2 Technique 498
- 30.6 Complications 499
- 30.7 Outcome 499
- References 501

Part 6 Urology and Nephrology 503

31 Bladder Biopsy with Optical Coherence Tomography 505

Alexandre Douplik

- 31.1 Acknowledgments 507
- References 507

32 Advanced Laser Endoscopy in Urology: Laser Prostate Vaporization, Laser Surgery, and Laser Removal of Renal Calculi 509

Ronald Sroka, Michael Seitz, and Markus Bader

- 32.1 Introduction 509
- 32.2 High-Power Diode Laser for BPH-Treatment 509
 - 32.2.1 Preclinical Investigations 510
 - 32.2.2 Clinical Laser Application for BPH 511
 - 32.2.3 Summary 512
- 32.3 Laser Therapy for the Upper Urinary Tract Tumors 512
 - 32.3.1 Laser Interventions 513
 - 32.3.2 Complications 514
- 32.4 Laser-Assisted Lithotripsy 514
 - 32.4.1 Experience from Preclinical Investigations 514
 - 32.4.2 Laser Lithotripsy from the Clinical Point of View 515
- 32.5 Conclusion 516
- References 516

Part 7 Gastroenterology 521

33 Barrett's Esophagus and Gastroesophageal Reflux Disease – Diagnosis and Therapy 523

Jason M. Dunn, Steven G. Bown, and Laurence B. Lovat

- 33.1 Introduction 523
- 33.2 Diagnosis 524
 - 33.2.1 Spectroscopy 524
 - 33.2.1.1 Scattering (Reflectance) Spectroscopy 524
 - 33.2.1.2 Raman Spectroscopy 527
 - 33.2.1.3 Absorption Spectroscopy 527
 - 33.2.1.4 Fluorescence Spectroscopy 527
 - 33.2.1.5 Summary 529
- 33.3 Therapy 529

33.3.1	Argon Plasma Coagulation	529
33.3.2	Photodynamic Therapy	529
33.3.2.1	Photofrin	530
33.3.2.2	Levulan	531
33.3.2.3	Foscan	533
33.3.3	Radiofrequency Ablation	534
33.3.3.1	Clinical Studies	535
33.3.3.2	Adverse Events	535
33.3.4	Subsquamous specialized intestinal metaplasia SSIM	535
33.4	Conclusion	536
	References	536

Part 8 Rheumatology 545

34	Noninvasive Fluorescence Imaging in Rheumatoid Arthritis – Animal Studies and Clinical Applications	547
	<i>Andreas Wunder and Bernd Ebert</i>	
34.1	Introduction	547
34.2	Non-Invasive Fluorescence Imaging Techniques and Fluorescent Imaging Agents	547
34.3	Experimental Studies in Arthritis Models	548
34.3.1	Nonspecific Fluorescent Imaging Agents in Arthritis Models	549
34.3.2	Targeted Fluorescent Imaging Agents in Arthritis Models	551
34.3.3	Activatable Fluorescent Imaging Agents in Arthritis Models	553
34.3.4	Monitoring Cell Migration in Arthritis Models	554
34.4	Clinical Applications	555
34.5	Critical Overview of Fluorescence Imaging in Arthritis	555
	References	558
35	Diffuse Optical Tomography of Osteoarthritis	561
	<i>Zhen Yuan and Huabei Jiang</i>	
35.1	Motivation	561
35.2	Diffuse Optical Tomography Imaging of Osteoarthritis in the Hands	562
35.2.1	DOT and Hybrid X-Ray–DOT Systems	562
35.2.2	DOT Reconstruction Methods	564
35.2.3	Reconstructed Results	564
35.2.4	Diffuse Model Versus Transport Model	566
35.3	Image-Guided Optical Spectroscopy in Diagnosis of OA	567
35.4	Future Directions	568
	References	569
