

EDITED BY

Erik Hollnagel,
Jean PARIÈS, David D. Woods
and John Wreathall

Resilience Engineering in Practice

A GUIDEBOOK

Ashgate Studies in Resilience Engineering

Contents

<i>List of Figures</i>	<i>xiii</i>
<i>List of Tables</i>	<i>xv</i>
<i>List of Contributors</i>	<i>xvii</i>
<i>Prologue: The Scope of Resilience Engineering by Erik Hollnagel</i>	<i>xxix</i>

PART I DEALING WITH THE ACTUAL

Chapter 1	Resilience and the Ability to Respond	3
	<i>Jean Pariès</i>	
	Resilience in 'Real Time'	3
	Readiness and Anticipation	4
	Being Prepared to Be Unprepared	6
	Adapted or Adaptive?	8
Chapter 2	Lessons from the Hudson	9
	<i>Jean Pariès</i>	
	Miracle on the Hudson River?	10
	The Bird Hazard	10
	Bird Strike Protection Strategy	11
	From Anticipated Emergency to Real Time Response	14
	From 'Satisficing' to 'Sacrificing' Decisions	17
	From Safety Strategies to Resilience Engineering at the System Level	19
	When Systemic Resilience Efforts Undermine Resilience at the Sharp End	22
	In Conclusion: Two Lessons and a Wish	26
Chapter 3	Coping with Uncertainty. Resilient Decisions in Anaesthesia	29
	<i>Lucie Cuvelier and Pierre Falzon</i>	
	States of Resilience and Uncertain Events	30
	Describing How Anaesthesiologists Manage Uncertainty	31
	Unforeseen Situations: Potential Variability and Unthought-of Variability	34

	Resilience as the Ability to Define an Envelope of Potential Variability	36
	Resilience as the Ability to Diagnose that the System Leaves the Envelope of Potential Variability	40
	Enhancing Resilience: Paths for Progress	42
	Acknowledgements	43
Chapter 4	Training Organisational Resilience in Escalating Situations	45
	<i>Johan Bergström, Nicklas Dahlström, Sidney Dekker and Kurt Petersen</i>	
	Introduction	45
	Generic Competencies in Management of Unexpected and Escalating Situations	46
	Scenario Design	48
	Training Generic Competencies	50
	Discussion	56
PART II	DEALING WITH THE CRITICAL	
Chapter 5	Monitoring – A Critical Ability in Resilience Engineering	61
	<i>John Wreathall</i>	
	The Role of Indicators in Measurement	62
	Selection and Basis for Indicators	65
	Nature of Indicators	66
	Leading and Lagging Indicators	67
Chapter 6	From Flight Time Limitations to Fatigue Risk Management Systems – A Way Toward Resilience	69
	<i>P. Cabon, S. Deharvenget, I. Berechet, J.Y. Grau, N. Maille and R. Mollard</i>	
	Introduction	70
	Fatigue and Safety	71
	The Development of Fatigue Risk Management System	73
	Safety Policy and Objectives	74
	Fatigue Risk Management	74
	Safety Assurance	79
	Monitoring Process	83
	Safety Promotion	84
	Conclusion	85
	Acknowledgements	86
	Disclaimer	86

Chapter 7	Practices for Noticing and Dealing with the Critical. A Case Study from Maintenance of Power Plants	87
	<i>Elizabeth Lay</i>	
	Introduction	88
	Business Background	88
	Loss Control Philosophy	88
	Highly Resilient Organizations	90
	Anticipate	92
	Notice	93
	Planning	96
	Adapting	97
	Conclusion	99
Chapter 8	Cognitive Strategies in Emergency and Abnormal Situations Training – Implications for Resilience in Air Traffic Control	101
	<i>Stathis Malakis and Tom Kontogiannis</i>	
	Introduction	102
	Method	104
	T ² EAM Model	106
	Results	111
	T ² EAM Model and Cognitive Task Analysis	112
	Conclusion	115
PART III	DEALING WITH THE POTENTIAL	
Chapter 9	Resilience and the Ability to Anticipate	121
	<i>David D. Woods</i>	
	Patterns of Anticipation	121
Chapter 10	Basic Patterns in How Adaptive Systems Fail	127
	<i>David D. Woods and Matthieu Branlat</i>	
	The Optimist-Pessimist Divide on Complex Adaptive Systems	127
	Assessing Future Resilience from Studying the History of Adaptation (and Maladaptation)	129
	Patterns of Maladaptation	130
	Illustration of the Basic Patterns	136
	Urban Fire-fighting and the Dynamics of Decompensation	138
	Urban Fire-fighting and Coordination over Multiple Groups and Goals	139
	Urban Fire-fighting and the Risk of Getting Stuck in Outdated Behaviours	140

	Recognising what is Maladaptive Depends on Perspective Contrasts	141
Chapter 11	Measuring Resilience in the Planning of Rail Engineering Work	145
	<i>P. Ferreira, J.R. Wilson, B. Ryan and S. Sharples</i>	
	Introduction	145
	Measuring Resilience Factors	146
	Questionnaire Design	147
	Questionnaire Implementation	148
	Principal Components Analysis	148
	Interpretation of the Extracted Components	150
	Extracted Factors and the Potential for Resilience	154
	Acknowledgements	156
Chapter 12	The Art of Balance: Using Upward Resilience Traits to Deal with Conflicting Goals	157
	<i>Berit Tjørhom and Karina Aase</i>	
	Introduction	157
	The Art of Balance	159
	Downward and Upward Resilience	160
	Traces of Balancing Within the Norwegian Aviation Transport System	162
	Conclusion	168
Chapter 13	The Importance of Functional Interdependencies in Financial Services Systems	171
	<i>Gunilla A Sundström and Erik Hollnagel</i>	
	Introduction	171
	The Financial Services System 2007–2009	172
	What is the Financial Services System?	176
	What Creates the Dynamic Interactions?	179
	The Modelling Steps	180
	Identifying the Core Functions	181
	Identifying Potential for Functional Resonance	183
	Identifying How Performance Variance can be Monitored and Controlled	186
	Example: The Demise of Northern Rock	187
	Concluding Remarks	189

PART IV	DEALING WITH THE FACTUAL	
Chapter 14	To Learn or Not to Learn, that is the Question	193
	<i>Erik Hollnagel</i>	
	The Conditions for Learning	193
	The Impact of Learning	195
	What Should Be Learned?	196
Chapter 15	No Facts, No Glory	199
	<i>John Stoop</i>	
	Introduction	199
	Case 1: Before, During and After the Event; the Boeing 747 Case Study	201
	The Reason for Building such Aircraft	202
	The Bijlmermeer Crash	203
	Case 2: ERTMS. An Inquiry into the Safety Architecture of High Speed Train Safety	209
	Emergent Properties	211
	Transparency	212
	Towards a New Train Control Concept	213
	Lessons Learned	214
	Discussion	214
	What Do We Need to Design Resilient Systems?	215
	What has Created Opportunities for Resilience in these two Cases?	216
Chapter 16	From Myopic Coordination to Resilience in Socio-technical Systems. A Case Study in a Hospital	219
	<i>Anne Sophie Nyssen</i>	
	Introduction	220
	Coordination as a Component of Resilience in Socio-Technical Systems like Hospitals	221
	The Organisation's Approach to Coordination	223
	Vertical Coordination Tools	225
	Lateral Coordination Tools	226
	Longitudinal Coordination Tools	226
	A Catastrophic Experience	227
	Case Analysis: An Emergence-through-use Approach of Coordination	228
	Discussion	231
	Conclusions – 'Enhancing Projection outside the Local Immediate'	233

Chapter 17	Requisites for Successful Incident Reporting in Resilient Organisations	237
	<i>Alberto Pasquini, Simone Pozzi, Luca Save and Mark-Alexander Sujan</i>	
	Introduction	238
	A Success and a Failure Story: Reporting Systems in Aviation and Healthcare	239
	Handle with Care: All Reporting System are Different	246
	The Pass Criterion	247
	Degree of Standardisation	248
	Visibility	249
	Understand the Characteristics of your Community	250
	Assess Safety Culture	251
	What Happens When Key Structural Properties are Missing?	252
	Proactive Risk Monitoring	253
	Conclusion	254
Chapter 18	Is the Aviation Industry Ready for Resilience? Mapping Human Factors Assumptions across the Aviation Sector	257
	<i>Kyla Zimmermann, Jean Pariès, René Amalberti and Daniel H. Hummerdal</i>	
	Paradigms in Safety and Human Factors	257
	Diversity in Aviation	259
	The Safety Assumptions and Resilient Attitudes (SARA) Survey	260
	The Business of (not) Measuring Resilience	260
	Developing the SARA Survey	261
	The Survey Respondents and Interview Participants	261
	Analysis of the SARA Survey Results	262
	Differences between National and Occupational Cultures	263
	Discussion of Differences between National/ Societal Cultures	265
	Discussion of the Differences between Occupational Cultures	268
	Cultural Bias in Culture Research	269
	Ambiguity and Contradictions	270
	Discussion: Integrating and Interpreting Ambiguity and Contradictions	270
	The Limitations of Attitude Measurement	271

Contents

xi

Two Explanations, One Conclusion	272
Is Resilience Ready for the Aviation Industry?	273
Acknowledgements	274

<i>Epilogue: RAG – The Resilience Analysis Grid by Erik Hollnagel</i>	275
