Preface	xiii
Acknowledgements	xv
List of units, prefixes and symbols	xvii
1 Using a scientific calculator	1
1.1 Introduction	1
1.2 Keys of a scientific calculator	1
References/Further reading	8
2 Units and their conversion	9
2.1 Introduction	9
2.2 Length	10
2.3 Mass	11
2.4 Area, volume and capacity	12
2.5 Temperature	14
References/Further reading	15
3 Introduction to physics	17
3.1 Speed and velocity	17
3.2 Acceleration	18
3.3 Mass	18
3.4 Gravitation	18
3.5 Weight	20
3.6 Volume	20
3.7 Density	20
3.8 Specific gravity	22
3.9 Newton's first law of motion	23
3.10 Newton's second law of motion	23
3.11 Newton's third law of motion	24
3.12 Friction	24
3.13 Work	26
3.14 Energy	26
3.14.1 Potential energy	27
3.14.2 Kinetic energy	27
3.15 Power	29
References/Further reading	31

4	Introduction to chemistry	33
4.1	Introduction	33
4.2	Electrovalency and covalency	36
4.2.1	Covalent bond	36
4.3	Elements and compounds	38
4.4	Symbols and formulae	40
4.5	Acids and bases	40
4.5.1	Acids	41
4.5.2	Bases	42
	References/Further reading	43
5	Effects of chemicals and atmosphere on materials	45
5.1	Introduction	45
5.2	Oxidation	45
5.2.1	Experiment: To show that oxygen (or air) and water are necessary for the rusting of iron	46
5.3	Electrolysis	47
5.4	Electrolytic corrosion	49
5.4.1	Examples of electrolytic corrosion	50
5.4.2	Protection of steel from corrosion	51
5.5	Applications of electrolysis	52
5.5.1	Electroplating	52
5.5.2	Extraction of aluminium	53
5.6	Acid rain	53
	References/Further reading	54
6	Electricity	55
6.1	Introduction	55
6.2	Coulomb's law	55
6.3	Electric current	56
6.4	Potential difference	57
6.5	Electromotive force (e.m.f.)	57
6.6	Ohm's law	57
6.7	Electrical resistivity and conductivity	59
6.8	Resistors in series/parallel	60
6.8.1	Resistors in series	60
6.8.2	Resistors in parallel	61
6.9	Transformers	64
6.10	Power generation	66
6.11	Power distribution	67
6.12	Supply to small buildings	68
	References/Further reading	70
7	Introduction to construction technology	71
7.1	Introduction	71
7.2	Substructure and superstructure	71
7.2.1	Soil investigation	72

7.3	Foundations	73
7.3.1	Settlement	73
7.4	Forms of construction	75
7.5	The external envelope	77
7.5.1	Ground floors	78
7.5.2	Cavity walls	78
7.5.3	Suspended timber upper floors	79
7.5.4	Roofs	80
	References/Further reading	82
8	Thermal energy 1	83
8.1	Introduction	83
8.2	Temperature	83
8.2.1	Temperature scales	84
8.3	Units of heat	85
8.4	States of matter	85
8.4.1	Changes in the physical state	85
8.4.2	Experiment: The physical states of water	86
8.5	Expansion and contraction of solids	87
8.5.1	Linear expansion	88
8.5.2	Experiment: Determination of coefficient of linear expansion	89
8.5.3	Practical examples of expansion and contraction	90
8.6	Heat transfer	93
8.6.1	Conduction	93
8.6.2	Experiment: To compare the thermal conductivity of metals	95
8.6.3	Convection	96
8.6.4	Practical examples of convection	96
8.6.5	Radiation	96
	References/Further reading	98
9	Thermal energy and humidity	99
9.1	Introduction	99
9.2	Thermal insulation	100
9.2.1	Experiment: To compare the thermal insulation values of expanded polystyrene, vermiculite, mineral wool, glass fibre and cork	101
9.3	Heat transmission	103
9.3.1	Thermal conductivity	103
9.3.2	Thermal resistivity (r)	103
9.3.3	Thermal resistance (R)	103
9.4	Thermal transmittance	105
9.5	Heat loss from buildings	110
9.6	Temperature drop through materials	113

9.7	Humidity	115
9.7.1	Measurement of relative humidity	115
9.8	Condensation	118
9.8.1	The psychrometric chart	119
9.8.2	Prevention of surface condensation	119
9.8.3	Interstitial condensation	122
9.8.4	Prevention of interstitial condensation	127
	References/Further reading	130
10	Forces and structures 1	131
10.1	Introduction	131
10.2	Force	132
10.2.1	Internal and external forces	133
10.3	Bending	133
10.3.1	Deflection	134
10.4	Types of loading	135
10.4.1	Dead load	135
10.4.2	Imposed load	136
10.4.3	Wind load	136
10.4.4	Loading from other effects	136
10.4.5	Point load	136
10.4.6	Uniformly distributed load	136
10.4.7	Triangular load	136
10.5	Stress and strain	140
10.5.1	Stress	140
10.5.2	Strain	140
10.6	Elasticity	141
10.6.1	Experiment 1: Proof of Hooke's law	142
10.6.2	Experiment 2: Proof of Hooke's law	143
10.6.3	Factor of safety	146
	References/Further reading	148
11	Forces and structures 2	149
11.1	Moment of a force	149
11.1.1	Sign convention	150
11.2	Laws of equilibrium	154
11.3	Analysis of beams	154
11.3.1	Beam reactions	154
11.3.2	Shear force (S.F.)	159
11.3.3	Bending moment (B.M.)	165
11.4	Triangle of forces	172
11.4.1	Bow's notation	176
11.4.2	Frames and roof trusses	178
	References/Further reading	186

12	Fluid mechanics	187
12.1	Introduction	187
12.2	Pressure of fluids at rest	187
12.2.1	Why do the liquids flow?	190
12.2.2	Centre of pressure	191
12.3	The flow of a fluid	193
12.3.1	Flow rate	194
12.3.2	Bernoulli's theorem	195
12.3.3	The venturimeter	198
12.3.4	Flow in pipes: energy loss	200
12.4	Flow in open channels	200
	References/Further reading	205
13	Sound	207
13.1	Introduction	207
13.2	Frequency, wavelength and velocity of sound	208
13.2.1	Frequency (f)	208
13.2.2	Wavelength (λ)	208
13.2.3	Velocity (v)	208
13.3	Measurement of sound	210
13.3.1	Threshold values of sound	211
13.3.2	The decibel scale	211
13.4	Addition of sound levels	214
13.4.1	Approximate addition of sound levels	214
13.5	Transmission of sound in buildings	216
13.5.1	Noise	217
13.5.2	Requirements of sound insulation	217
13.5.3	Sound-insulation techniques	218
13.5.4	Noise in a workplace	221
13.5.5	Measurement of sound insulation	222
13.6	Sound absorption	223
13.6.1	Reverberation	224
13.6.2	Reverberation time	225
13.6.3	Types of sound absorbers	228
13.7	Sound level meter	230
	References/Further reading	231
14	Light	233
14.1	Introduction	233
14.2	Additive and subtractive colours	234
14.3	Units for measuring light	235
14.3.1	Angular measure	235
14.3.2	Solid angle	236
14.3.3	Luminous intensity (I)	237
14.3.4	Luminous flux (F)	237

14.3.5	Illuminance (E)	237
14.3.6	Luminance	238
14.4	Inverse square law of illuminance	238
14.5	Lambert's cosine law of illuminance	240
14.6	Lamps and luminaires	242
14.7	Design of interior lighting	244
14.7.1	Light output ratio	245
14.7.2	Direct ratio	246
14.7.3	Room index	246
14.7.4	Reflection of light	246
14.7.5	Level of illuminance	247
14.7.6	Utilisation factor (UF)	247
14.7.7	Maintenance factor (MF)	247
14.7.8	Lumen design method	252
14.7.9	SHR	252
14.8	Light meter	257
14.9	Daylighting	257
14.9.1	Uniform sky	257
14.9.2	CIE standard overcast sky	257
14.9.3	Daylight factor	258
14.9.4	Components of daylight factor	258
14.9.5	Prediction of daylight factors	260
	References/Further reading	262
15	Human comfort	263
15.1	Introduction	263
15.2	Temperature	263
15.2.1	Air temperature	264
15.2.2	Mean radiant temperature	264
15.2.3	Environmental temperature	265
15.2.4	Dry resultant temperature	265
15.2.5	Activity	266
15.2.6	Clothing	266
15.3	Air movement	267
15.4	Humidity	267
15.5	Ventilation	267
15.6	Noise	268
15.7	Lighting	269
	References/Further reading	270
16	Construction materials	271
16.1	Bricks	271
16.1.1	Clay bricks	271
16.1.2	Size	271
16.1.3	Classification	272

16.1.4	Manufacture	272
16.1.5	Properties	272
16.1.6	Deterioration of brickwork	274
16.1.7	Environmental implications	276
16.1.8	COSHH	276
16.2	Aerated concrete blocks	276
16.2.1	Manufacture	276
16.2.2	Sizes	277
16.2.3	Properties	277
16.2.4	Environmental implications	278
16.3	Cement	278
16.3.1	Raw materials	278
16.3.2	Manufacture	279
16.3.3	Setting and hardening of cement	279
16.3.4	Constituents of portland cement	280
16.3.5	Types of cement	280
16.3.6	Compressive strength	282
16.3.7	Environmental implications	282
16.3.8	COSHH	283
16.4	Concrete	283
16.4.1	Raw materials	283
16.4.2	Manufacture of concrete	283
16.4.3	Concrete mix	284
16.4.4	Properties of fresh concrete	285
16.4.5	Properties of hardened concrete	286
16.4.6	Deterioration of concrete	287
16.4.7	Environmental implications	289
16.5	Metals	289
16.5.1	Ferrous metals	289
16.5.2	Raw materials	290
16.5.3	Manufacturing process	290
16.5.4	Iron and its alloys	291
16.5.5	Properties of steel	291
16.5.6	Corrosion of iron/steel	293
16.5.7	Environmental implications	293
16.5.8	Non-ferrous metal: aluminium	294
16.5.9	Raw materials	294
16.5.10	Properties	294
16.5.11	Environmental implications	295
16.6	Timber	295
16.6.1	Seasoning	296
16.6.2	Properties	297
16.6.3	Deterioration	298
16.6.4	Preservation	300
16.6.5	Environmental implications	300

16.7	Plastics	300
16.7.1	Raw materials and manufacture	301
16.7.2	Classification	301
16.7.3	Properties and uses	302
	References/Further reading	303
17	Assignments	305
17.1	Assignments for Level 2 courses	305
17.1.1	Assignment No. 1	305
17.1.2	Assignment No. 2	305
17.1.3	Assignment No. 3	306
17.2	Assignments for Level 3/4 courses	306
17.2.1	Assignment No. 1	306
17.2.2	Assignment No. 2	308
17.2.3	Assignment No. 3	308
	Appendix 1: Formulae for Example 9.2	311
	Appendix 2: Solutions for Example 13.10	313
	Appendix 3: Answers to Exercises	315
	Index	327

A colour plate section can be found between pages 130 and 131
