

# Social Network Analysis in Construction

Stephen Pryke

 WILEY-BLACKWELL

# Contents

About the author	ix
Preface	xi
Acknowledgements	xiii
<b>Chapter 1 Introduction</b>	<b>1</b>
Understanding the construction sector	1
Structure of the book	5
Summary	8
<b>Chapter 2 Rationale for a network approach to the analysis of project management systems</b>	<b>10</b>
Introduction	10
Review of approaches to the analysis of procurement and management systems	10
Presentation of analysis and implementation of recommendations	11
A social network analysis approach to the analysis and visualisation of organisational forms	30
Summary	33
<b>Chapter 3 Twenty-first century reform and emergent systems in construction</b>	<b>36</b>
Introduction	36
Collaborative relationships: partnering, strategic alliances, framework agreements	37
Supply chain management	47
Network clusters	57
Integrating systems and linkages	60
Summary	61
<b>Chapter 4 The construction project as a system of interdependent governance networks</b>	<b>63</b>
Introduction	63
Institutional economics and the governance of transactions	63
A model for analysis	67
Social network analysis in the study of reforms in procurement and management systems within the construction industry	70

	Some fundamental concepts in social network analysis	70
	Previous applications of SNA to the construction industry	72
	SNA and its application to the analysis of UK construction networks	73
	Propositions	75
	Summary	76
<b>Chapter 5</b>	<b>Social network analysis as a research method</b>	<b>77</b>
	Definition	78
	Origins and history	79
	Why choose social network analysis?	81
	Problems associated with the use of SNA in construction research	83
	Concepts and terminology	84
	Defining the population for the study	94
	Finally on SNA theory and techniques	95
	Software for the analysis of networks	96
	Getting started in social network analysis	97
	Conclusion	99
<b>Chapter 6</b>	<b>Network case studies</b>	<b>101</b>
	Criteria for the selection of case studies	103
	Essex project: traditional procurement, public sector – records office	104
	Uxbridge project: traditional procurement, private sector – commercial office building	111
	Aldershot project: collaborative procurement, public sector – sports facilities and office accommodation	123
	Slough project: collaborative procurement, private sector – commercial office building	129
	Summary of the case study selection criteria	139
<b>Chapter 7</b>	<b>Interpreting the network diagrams for the case studies</b>	<b>140</b>
	Essex project: non-collaborative public sector procurement	140
	Uxbridge project: non-collaborative private sector procurement	150
	Aldershot project: collaborative public sector procurement	160
	Slough project: collaborative private sector procurement	167
	Final thoughts	177
<b>Chapter 8</b>	<b>Data analysis for the case studies</b>	<b>179</b>
	Mathematical analysis of network data	179
	Networks of contractual relationships	180

Cost monitoring and control networks	185
Instruction networks	191
Progress monitoring networks	195
Performance incentives networks	197
Design development communication networks	199
Summary	201
Conclusions: using SNA to classify team roles in different procurement systems	202
Final thoughts	211
<b>Chapter 9 Managing networks</b>	<b>213</b>
Introduction	213
How did we understand and manage our organisations before SNA?	215
Managing networks	217
The key points in managing networks	236
Final thoughts	238
<b>Chapter 10 Summary, conclusions and final thoughts</b>	<b>239</b>
Summary	239
Conclusion	244
Final thoughts	245
Appendix: SNA questionnaire	247
References	252
Index	265
