

# Contents

<b>Preface</b>	<b>xiii</b>
<b>List of Contributors</b>	<b>xv</b>
<b>1. Protocols for Biomaterial Scaffold Fabrication</b>	<b>1</b>
<i>Azadeh Seidi and Murugan Ramalingam</i>	
1.1 Introduction	1
1.2 Scaffolding Materials	4
1.2.1 Naturally Derived Materials	4
1.2.2 Scaffolds Based on Synthetic Polymers	7
1.3 Techniques for Biomaterial Scaffolds Fabrication	7
1.3.1 Solvent Casting	8
1.3.2 Salt-leaching	8
1.3.3 Gas Foaming	11
1.3.4 Phase Separation	12
1.3.5 Electrospinning	13
1.3.6 Self-assembly	15
1.3.7 Rapid Prototyping	16
1.3.8 Membrane Lamination	18
1.3.9 Freeze Drying	18
1.4 Summary	19
Acknowledgements	20
References	20
<b>2. Ceramic Scaffolds, Current Issues and Future Trends</b>	<b>25</b>
<i>Seyed-Iman Roohani-Esfahani S.I and Hala Zreiqat H</i>	
2.1 Introduction	25
2.2 Essential Properties and Current Problems of Ceramic Scaffolds	27
2.3 Approaches to Overcome Ceramic Scaffolds Issues for the Next Generation of Scaffolds	30
2.4 Silk – a Bioactive Material	35
2.5 Conclusions and Future Trends	35

## CONTENTS

Acknowledgements	36
References	36
<b>3. Preparation of Porous Scaffolds from Ice Particulate Templates for Tissue Engineering</b>	<b>47</b>
<i>Guoping Chen and Naoki Kawazoe</i>	
3.1 Introduction	48
3.2 Preparation of Porous Scaffolds Using Ice Particulates as Porogens	48
3.3 Preparation of Funnel-like Porous Scaffolds Using Embossed Ice Particulate Templates	51
3.3.1 Overview of Protocol	51
3.3.2 Preparation of Funnel-like Collagen Sponges	51
3.3.3 Preparation of Funnel-like Chitosan Sponges	54
3.3.4 Preparation of Funnel-like Hyaluronic Acid Sponges	55
3.3.5 Preparation of Funnel-like Collagen-glycosaminoglycan Sponges	55
3.4 Application of Funnel-like Porous Scaffolds in Three-dimensional Cell Culture	56
3.5 Application of Funnel-like Collagen Sponges in Cartilage Tissue Engineering	57
3.6 Summary	60
References	60
<b>4. Fabrication of Tissue Engineering Scaffolds Using the Emulsion Freezing/Freeze-drying Technique and Characteristics of the Scaffolds</b>	<b>63</b>
<i>Naznin Sultana and Min Wang</i>	
4.1 Introduction	64
4.2 Materials for Tissue Engineering Scaffolds	65
4.3 Fabrication Techniques for Tissue Engineering Scaffolds	68
4.4 Fabrication of Pure Polymer Scaffolds via Emulsion Freezing/Freeze-drying and Characteristics of the Scaffolds	70
4.5 Fabrication of Polymer Blend Scaffolds via Emulsion Freezing/Freeze-drying and Characteristics of the Scaffolds	78
4.6 Fabrication of Nanocomposite Scaffolds via Emulsion Freezing/Freeze-drying and Characteristics of the Scaffolds	80

## CONTENTS

4.7	Surface Modification for PHBV-based Scaffolds	85
4.8	Concluding Remarks	87
	Acknowledgements	87
	References	88
<b>5.</b>	<b>Electrospun Nanofiber and Stem Cells in Tissue Engineering</b>	<b>91</b>
	<i>Susan Liao, Seeram Ramakrishna and Murugan Ramalingam</i>	
5.1	Introduction	92
5.2	Biodegradable Materials for Tissue Engineering	93
5.3	Nanofibrous Scaffolds	97
5.3.1	Technologies to Fabricate Nanofibers	98
5.3.2	In Vitro and In Vivo Studies of Nanofibrous Scaffold	103
5.4	Stem Cells: A Potential Tool for Tissue Engineering	108
5.4.1	Stem Cells in Tissue Engineering and Regeneration	108
5.4.2	Effect of Stem Cells on Electrospun Nanofibrous Scaffolds	111
5.5	Prospects	113
	Acknowledgement	115
	References	115
<b>6.</b>	<b>Materials at the Interface Tissue-Implant</b>	<b>119</b>
	<i>Antonio Peramo</i>	
6.1	Introduction	120
6.2	Description of the Tissue-Implant Interface	121
6.3	Expected Function of the Materials at the Interface and their Evaluation and Selection	123
6.3.1	General Purpose Non-biological Materials	127
6.3.2	General Purpose Natural Materials and Biopolymers	128
6.3.3	Other Regenerative Biomaterials and Techniques	129
6.3.4	Future Approaches	129
6.4	Experimental Techniques for the Tissue-Implant Interface	130
6.5	Conclusion	133
	References	133

## CONTENTS

<b>7. Mesenchymal Stem Cells in Tissue Regeneration</b>	<b>137</b>
<i>Kalpana S. Katti, Avinash A. Ambre, and Dinesh R. Katti</i>	
7.1 Introduction	137
7.2 Mesenchymal stem cells (MSCs)	140
7.2.1 Self-renewal of MSCs	142
7.2.2 Heterogeneity of MSCs	143
7.2.3 MSCs from Different Types of Tissues	144
7.2.4 MSCs, Progenitor Cells and Precursor Cells	144
7.2.5 Differentiation Potential of MSCs	145
7.2.6 Dedifferentiation and Transdifferentiation of hMSCs	146
7.3 Understanding the Mesenchymal Stem Cells (MSCs)	147
7.3.1 Integrins and Their Role in Mesenchymal Stem Cells (MSCs)	147
7.3.2 Mesenchymal Stem Cell (MSC) Niche	149
7.3.3 Immunomodulatory Effect of MSCs	150
7.4 Mesenchymal Stem Cell (MSC) Culture	150
7.4.1 Mesenchymal Stem Cell (MSC) Isolation	151
7.4.2 Mesenchymal Stem Cell (MSC) Expansion	151
7.4.3 Media for Inducing Osteogenic Differentiation in MSCs	152
7.5 Characterization of MSCs	153
7.5.1 Microscopy Techniques	154
7.5.2 Differentiation and Cell Proliferation Assays for MSCs	155
7.6 MSCs in Bone Remodeling, Fracture Repair and Their Use in Bone Tissue Engineering Applications	156
7.7 Influence of External Stimuli on MSC Behavior	157
7.7.1 Role of Mechanical Stimulus on hMSCs	158
7.7.2 Role of Electrical Stimulus on MSCs	159
7.8 Perspectives on Future of hMSCs in Tissue Engineering	159
References	160
 <b>8. Endochondral Bone Tissue Engineering</b>	 <b>165</b>
<i>Sanne K. Both, Fang Yang, and John A. Jansen</i>	
8.1 Introduction	165
8.2 Tissue Engineering and Stem Cells	169

## CONTENTS

8.2.1	Tissue Engineering	169
8.2.2	Stem Cells	170
8.2.3	Bone Tissue Engineering	171
8.2.4	Bone Tissue Engineering via the Endochondral Pathway	172
8.3	Scaffolds	173
8.3.1	General Requirements of Scaffolds	173
8.3.2	Scaffolds for Endochondral Tissue Engineering	175
8.3.2.1	Hydrogels	176
8.3.2.2	Synthetic Polymer Woven Structure	177
8.3.2.3	Calcium Phosphate (CaP) Ceramics	178
8.4	Summary	179
	References	180
<b>9.</b>	<b>Principles, Applications, and Technology of Craniofacial Bone Engineering</b>	<b>183</b>
	<i>Mona K. Marei, Mohamed A. Alkhodary, Rania M. Elbackly, Samer H. Zaky, Ahmed M. Eweida, Muhammad A. Gad, Naglaa Abdel-Wahed and Yasser M. Kadah</i>	
9.1	Introduction	184
9.1.1	Anatomy and Physiology of Craniofacial Bone	185
9.1.2	Functional Characteristics of Craniofacial Tissues	190
9.1.2.1	Bone Strength	190
9.1.2.2	Effect of Forces	191
9.1.2.3	Angiogenesis in Bone Physiology	192
9.1.3	Prevalence of Craniofacial Congenital Anomalies and Acquired Defects	192
9.1.3.1	Congenital Anomalies	192
9.1.3.2	Acquired Defects	193
9.2	Road Map for the Application of Tissue Engineering and Regenerative Medicine for Craniofacial Bone Regeneration	195
9.2.1	Vascularization and Its Strategies	197
9.3	Stem Cell-based Craniofacial Bone Engineering	199
9.3.1	The Stem Cell Concept: Recreating the Local Tissue Microenvironment	200

## CONTENTS

9.3.2	Applied Stem Cell-based Craniofacial Bone Engineering	201
9.3.3	Additional Viable Stem Cell Sources for Craniofacial Bone Engineering	204
9.4	Biomaterial-based Therapy in Craniofacial Bone Engineering	206
9.4.1	Surface Biomimetism	210
9.5	Principles of Imaging in Craniofacial Bone Regeneration	212
9.5.1	Modeling of, Preparation for, and Planning Tissue Engineering	212
9.5.2	Image Guided Design	215
9.5.3	Follow-up and Assessment	216
9.5.4	Medical Imaging Techniques for Craniofacial Bone Engineering	218
9.5.4.1	Plain X-rays	218
9.5.4.2	Computed Tomography (CT)-based Methods	218
9.5.4.3	Magnetic Resonance Imaging	219
9.5.4.4	Future Methods: High Frequency Ultrasound Imaging	220
9.6	Current Clinical Application and Future Direction in the Field of Craniofacial Bone Engineering	220
9.6.1	Current Treatments of Bone Defects	220
9.6.2	Modern Treatment of Bone Defects	221
9.6.3	Some Examples of Tissue Engineering Materials and Clinical Trials	223
9.7	Future Prospects	225
9.8	Economics and Marketing	225
9.9	Conclusions	226
	References	226
<b>10.</b>	<b>Functionally-Graded Biomimetic Vascular Grafts for Enhanced Tissue Regeneration and Bio-integration</b>	<b>235</b>
	<i>Vinoy Thomas and Vohra K. Vohra</i>	
10.1	Introduction	236
10.2	Approaches in Vascular Tissue Engineering	237
10.3	Nanostructured Scaffolds for Vascular Tissue Engineering	239
10.3.1	Electrospinning for Producing ECM-like Fibers	241

10.3.2	Biomimetic Electrospun Vascular Scaffolds	244
10.4	Functionally-Graded Tubular Scaffolds	247
10.4.1	Graded-Tissue Design in Native Vessels	247
10.4.1.1	Biomimetic Multi-layered Tubular Scaffolds	249
10.4.1.2	Mechanical Properties of Trilayered Tubular Grafts	251
10.4.2	Biodegradation Characteristics of Trilayered Grafts	255
10.4.3	<i>In Vitro</i> Cell Interactions and <i>In Vivo</i> Performance	260
10.5	Summary and Future Outlook	266
	Acknowledgements	267
	List of Abbreviations Used	268
	References	269
<b>11.</b>	<b>Vascular Endothelial Growth Factors in Tissue Engineering: Challenges and Prospects for Therapeutic Angiogenesis</b>	<b>275</b>
	<i>Ekaterina S. Lifirsu, Murugan Ramalingam, and Ziyad S. Haidar</i>	
11.1	Introduction	276
11.2	VEGF and Angiogenesis	276
11.3	VEGF Family	277
11.4	VEGF Therapy	279
11.5	VEGF Delivery Systems	280
11.6	Soft versus Hard Tissues	282
11.7	Concluding Remarks	287
	References	290
