

# Contents

<b>Contents</b>	
<b>Prefaces</b>	7
<b>General Introduction</b>	13
<b>I Fundamentals</b>	27
1 Dielectric, Ferroelectric, and Optical Properties	33
2 Electronic Properties and Quantum Effects	63
3 Mesoscopic Electron Transport	91
4 Spintransfer Phenomena in Layered Structures	109
5 Organic Molecules – Structures and Electronic Properties	131
6 Neurons – The Molecular Basis of Their Electrical Excitability	155
7 Logic Gates and Digital Circuits	175
<b>II Technology and Analysis</b>	189
8 Advanced Optical and Particle Beam Lithography	199
9 Nanoimprint Lithography	219
10 Structural and Chemical Characterization on the Nanoscale	233
11 Scanning Probe Analysis	255
12 Atomic and Molecular Manipulation	283
13 Bottom-Up Approaches by Self-Organization Techniques	303
<b>III Logic Devices</b>	321
14 Metal-Oxide-Semiconductor Field-Effect Transistors: Novel Materials and Alternative Concepts	341
15 Nanoelectromechanical Logic Gates	375
16 Single-Electron Devices for Logic Applications	389
17 Electron Waveguide Devices	409
18 Superconductor Digital Electronics	419
19 Spin-Based Logics – Principles and Concepts	431
20 Carbon Nanotubes and Graphene for Data Processing	453
21 Molecular Electronics – Functions and Features Arising from Tailor-Made Molecules	477
<b>IV Computational Concepts and Architectures</b>	499
22 Performance Estimates for Microprocessors: at Technology Limits and in Practice	519
23 Reconfigurable Nano-Crossbar Architectures	543
24 Cognitive Computing	563
25 Quantum Computing – Fundamentals and Solid-State Realizations	575

<b>V Memory Devices and Storage Systems</b>	601
<b>26 Flash Memories</b>	621
<b>27 Capacitor-based Random Access Memories</b>	635
<b>28 Magnetic Random Access Memories</b>	655
<b>29 Information Storage Based on Phase Change Materials</b>	669
<b>30 Redox-based Resistive Switching Memories</b>	683
<b>31 Scanning Probe Storage</b>	711
<b>32 Holographic Data Storage</b>	725
<b>VI Data Transmission and Interfaces</b>	751
<b>33 Metal Interconnects</b>	765
<b>34 Three-Dimensional Integration</b>	777
<b>35 Photonic Networks</b>	795
<b>36 RF and Microwave Communication – Systems, Circuits and Devices</b>	815
<b>37 From RFID Tags to Nanomorphiс Systems</b>	835
<b>38 Neuroelectronic Interfacing with Semiconductor Chips</b>	847
<b>VII Sensor Arrays and Imaging Systems</b>	869
<b>39 Optical 3-D Time-of-Flight Imaging System</b>	879
<b>40 Micromachined Thermal Detector Arrays for Infrared Imaging</b>	891
<b>41 Electronic Noses and Tongues</b>	901
<b>42 2-D Tactile Sensors and Tactile Sensor Arrays</b>	915
<b>VIII Displays</b>	929
<b>43 Liquid Crystal Displays</b>	939
<b>44 Organic Light Emitting Devices</b>	957
<b>45 Plasma Displays</b>	973
<b>46 Micromirror Displays</b>	985
<b>47 Electronic Paper</b>	1001
<b>Abbreviations</b>	1011
<b>Symbols</b>	1019
<b>Authors</b>	1025
<b>Index</b>	1031
