Contents

Part I Scanning Probe Microscopy Techniques

1 Dynamic Force Microscopy and Spectroscopy Using the Frequency-Modulation Technique in Air and Liquids
Hendrik Hölscher, Daniel Ebeling, Jan-Erik Schmutz, Marcus M. Schäfer, and Boris Anczykowski 3
1.1 Introduction 3
1.2 Basic Principles of the FM Technique 4
  1.2.1 The Equation of Motion 4
  1.2.2 Oscillation Behavior of a Self-Driven Cantilever 6
  1.2.3 Theory of FM Mode Including Tip–Sample Forces 7
  1.2.4 Measuring the Tip–Sample Interaction Force 9
  1.2.5 Experimental Comparison of the FM Mode with the Conventional Amplitude-Modulation-mode in Air 11
1.3 Mapping of the Tip–Sample Interactions on DPPC Monolayers in Ambient Conditions 12
1.4 Force Spectroscopy of Single Dextran Monomers in Liquid 15
1.5 Summary 18
References 19

2 Photonic Force Microscopy: From Femtonewton Force Sensing to Ultra-Sensitive Spectroscopy
O.M. Maragò, P.G. Gucciardi, and P.H. Jones 23
2.1 Introduction 24
2.2 Principles of Optical Trapping 24
  2.2.1 Theoretical Background 24
2.3 Experimental Implementation 29
  2.3.1 Optical Tweezers Set-up 29
  2.3.2 Brownian Motion and Force Sensing 31
  2.3.3 Optical Trapping of Linear Nanostructures 33

2.4 Photonic Force Microscopy 39
  2.4.1 Bio-Nano-Imaging 39
  2.4.2 Bio-Force Sensing at the Nanoscale 42
2.5 Raman Tweezers 45
  2.5.1 The Raman Effect 45
  2.5.2 Experimental Configuration 46
  2.5.3 Applications 48
2.6 Conclusions 53
References 53

3 Polarization-Sensitive Tip-Enhanced Raman Scattering
Pietro Giuseppe Gucciardi, Marc Lamy de La Chapelle, Jean-Christophe Valmalette, Gennaro Picardi, and Razvigor Ossikovski 57
3.1 Introduction 57
3.2 Tip-Enhanced Raman Spectroscopy 58
  3.2.1 Concept and Advantages 58
  3.2.2 Experimental Implementations of TERS with Side Illumination Optics 60
  3.2.3 Probes for Tip-Enhanced Raman Spectroscopy 61
3.3 Polarized Raman Scattering from Cubic Crystals 64
  3.3.1 Model for Backscattering Raman Emission in c-Silicon ... 64
  3.3.2 Selection Rules 67
3.4 Tip-Enhanced Field Modeling 67
  3.4.1 Phenomenological Model 67
  3.4.2 Numerical Models and Results 70
3.5 Depolarization of Light Scattered by Metallic Tips 73
3.6 Polarized Tip-Enhanced Raman Spectroscopy of Silicon Crystals . 75
  3.6.1 Background Suppression 75
  3.6.2 Selective Enhancement of the Raman Modes Induced by Depolarization 80
  3.6.3 Evaluation of the Field Enhancement Factor 84
3.7 Conclusions 85
References 86

4 Electrostatic Force Microscopy and Kelvin Force Microscopy as a Probe of the Electrostatic and Electronic Properties of Carbon Nanotubes
Thierry Mélin, Mariusz Zdrojek, and David Brunel 89
4.1 Introduction 89
4.2 Electrostatic Measurements at the Nanometer Scale 90
  4.2.1 Electrostatic Force Microscopy 90
  4.2.2 Kelvin Force Microscopy 93
  4.2.3 Lateral Resolution in EFM and KFM 94

4.3 Electrostatic Imaging of Carbon Nanotubes 97
  4.3.1 Capacitive Imaging of Carbon Nanotubes in Insulating Layers 98
  4.3.2 EFM Imaging of Carbon Nanotubes and DNA 100
  4.3.3 Imaging of Native Charges in Carbon Nanotube Loops ... 102
4.4 Charge Injection Experiments in Carbon Nanotubes 103
  4.4.1 Charge Injection and Detection Techniques 103
  4.4.2 Experimental Illustration of EFM Signals 104
  4.4.3 Inner-Shell Charging of CNTs 112
  4.4.4 Electrostatic Interactions in SWCNTs 115
4.5 Probing the Band Structure of Nanotubes on Insulators 116
  4.5.1 Imaging the Semiconductor/Metal Character of Carbon Nanotubes 116
  4.5.2 Imaging the Density of States of Carbon Nanotubes 118
4.6 KFM Studies of Nanotube Devices 119
  4.6.1 Charge Transfers at Nanotube–Metal Interfaces 119
  4.6.2 Diffusive and Ballistic Transport in Carbon Nanotubes ... 121
  4.6.3 Kelvin Force Microscopy of CNTFETs 121
4.7 Conclusion 125
References 126

5 Carbon Nanotube Atomic Force Microscopy with Applications to Biology and Electronics
Edward D. de Asis, Jr., You Li, Alex J. Austin, Joseph Leung, and Cattien V. Nguyen 129
5.1 Carbon Nanotube Introduction 129
5.2 Carbon Nanotube Synthesis 134
5.3 Fabrication of Carbon Nanotube Atomic Force Microscopy Probes 135
  5.3.1 Fabrication of Carbon Nanotube Atomic Force Microscopy Probes by Gluing 135
  5.3.2 Mechanical Attachment in Scanning Electron Microscopy . 135
  5.3.3 Fabrication of Carbon Nanotube Atomic Force Microscopy Probes by In Situ Pick-Up 137
  5.3.4 Miscellaneous Methods for Post-Growth Attachment of Carbon Nanotube to Atomic Force Microscopy Tips ... 137
  5.3.5 Metal Catalyst-Assisted Direct-Growth of Carbon Nanotube Atomic Force Microscopy Probes 137
  5.3.6 Post-Growth Attachment is Currently the Most Optimal Fabrication Process 139
5.4 Characteristics and Characterization of Carbon Nanotube Atomic Force Microscopy Tips 141
5.5 Applications of Carbon Nanotube Scanning Probe Microscopy ... 148
  5.5.1 Functionalization of Carbon Nanotube Tips for Chemical Force Microscopy 148
  5.5.2 Carbon Nanotube Friction Force Microscopy 152

5.5.3 Carbon Nanotube Electric Force Microscopy 152
5.5.4 Carbon Nanotube Scanning Tunneling Microscopy 154
5.5.5 Carbon Nanotube Magnetic Force Microscopy 155
5.5.6 Carbon Nanotube Scanning Near-Field Optical Microscopy 158
5.5.7 Biological Applications of Carbon Nanotube Atomic Force Microscopy 159
References 165

6 Novel Strategies to Probe the Fluid Properties and Revealing its Hidden Elasticity
Laurence Noirez 169
6.1 Introduction 170
6.2 Basic Theoretical Considerations: Conciliating Simple Liquid Approach to the Viscoelasticity Theory? 172
6.2.1 Simple Liquid Description 172
6.2.2 The Viscoelastic Approach 173
6.3 Conventional Procedure to Determine the Dynamic Properties of Fluids 174
6.3.1 Linear Rheology 174
6.3.2 Non-Linear Rheology 176
6.4 Unpredicted Phenomena and Unsolved Questions: Flow Instabilities, Non-Linearities, Shear Induced Transitions, Extra-Long Relaxation Times, Elasticity in the Liquid State 177
6.5 From Macro to Micro and Nanofluidics 181
6.6 Analysis of the Viscoelasticity Scanning Method 183
6.7 The Question of the Boundary Conditions: Surface Effects, Wetting, and Slippage 186
6.8 Novel Description of Conventional Fluids: from Viscous Liquids, Glass Formers to Entangled Polymers. Experiments in Narrow Gap Geometry: Extracting the Shear Elasticity in Viscous Fluids 187
6.9 Tribology Meets Rheology. Novel Methods for the Determination of Bulk Dynamic Properties of a Soft Solid or a Fluidic Material 188
6.10 Elasticity and Dimensionality in Fluids 192
6.11 General Summary and Perspectives 192
References 194

7 Combining Atomic Force Microscopy and Depth-Sensing Instruments for the Nanometer-Scale Mechanical Characterization of Soft Matter
Davide Tranchida and Stefano Piccarolo 199
7.1 Introduction 199
7.2 Determining Elastic Modulus of Compliant Materials from Nanoindentations 201

7.3 Determining Elastic Modulus of Compliant Materials from Nanoindentations 206
7.4 Modulus Estimate of a Challenging Set of Samples 211
References 220

8 Static and Dynamic Structural Modeling Analysis of Atomic Force Microscope

Yin Zhang and Kevin D Murphy 225
8.1 Introduction 226
8.2 Working Principle and Modes 227
8.3 Statics of Atomic Force Microscope Cantilever: Effective Stiffness Approach 230
8.4 Electrostatic, Surface and Residual Stress Influence on the Atomic Force Microscope Initial Deflection 234
8.5 Modeling Tip–Sample Contact 237
8.6 Non-Contact Atomic Force Microscope Dynamics: Damping and Influence of Tip–Surface Interaction 242
8.7 Dynamics of Intermittent Contact 248
8.8 Summary 252
References 253

9 Experimental Methods for the Calibration of Lateral Forces in Atomic Force Microscopy

Martin Munz 259
9.1 Introduction 260
9.2 Basic Definitions and Relationships 264
  9.2.1 The Calibration Constants Involved in a Lateral Force Measurement 264
  9.2.2 Basic Relationships Involving the Calibration Constants . . 266
  9.2.3 The Lateral and the Normal Spring Constant of a Rectangular CL 268
  9.2.4 The Case of In-Plane Deformations 270
9.3 Calibration of the Lateral Sensitivity of the PSD 271
  9.3.1 Available Methods 271
  9.3.2 Optical Crosstalk 275
9.4 Methods Relying on a Scanning Motion 277
  9.4.1 The Wedge Method 277
  9.4.2 Methods Involving the Normal Spring Constant 283
9.5 Methods Relying on a Force Balance upon Contact with a Rigid Structure 284
  9.5.1 Normal Loading upon Contact with a Sloped Substrate . . 284
  9.5.2 Normal Loading with the Contact Point off the CL Long Axis 286
  9.5.3 Lateral Loading of a Horizontal Surface 288
  9.5.4 Lateral Loading of a Vertical Surface 290
  9.5.5 Mechanical Crosstalk 290

9.6 Methods Relying on a Force Balance Upon Contact with a Compliant Structure 294
  9.6.1 The Case of a Vertical Reference Beam 294
  9.6.2 The Case of a Horizontal Reference Beam 298
  9.6.3 The Case of a Mechanically Suspended Platform 299
  9.6.4 The Case of a Magnetically Suspended Platform 302
9.7 Methods Relying on Torsional Resonances of the CL 304
9.8 Discussion 306
9.9 Concluding Remarks 318
References 319

Part II Characterization

10 Simultaneous Topography and Recognition Imaging
A. Ebner, L.A. Chtcheglova, J. Preiner, J. Tang, L. Wildling, H.J. Gruber, and P. Hinterdorfer 325
10.1 Introduction 326
10.2 AFM Tip Chemistry 328
10.3 Operating Principles of TREC 331
  10.3.1 Half-Amplitude Versus Full-Amplitude Feedback 334
  10.3.2 Adjusting the Amplitude 337
  10.3.3 Adjusting the Driving Frequency 340
  10.3.4 Proofing the Specificity of the Detected Interactions 342
10.4 Applications of TREC: Single Proteins, Membranes, and Cells 344
  10.4.1 Antibiotin Antibodies Adsorbed to an Organic Semiconductor 344
  10.4.2 Bacterial S-Layer Lattices 346
  10.4.3 RBC Membranes 349
  10.4.4 Cells 351
10.5 Conclusion 357
References 357

11 Structural and Mechanical Mechanisms of Ocular Tissues Probed by AFM
Noël M. Ziebarth, Felix Rico, and Vincent T. Moy 363
11.1 Introduction 363
11.2 Atomic Force Microscopy 364
  11.2.1 Principle of Operation 364
  11.2.2 Instrumentation 367
  11.2.3 Mechanical Measurements 368
11.3 Atomic Force Microscopy in Ophthalmology 370
  11.3.1 Cornea 370
  11.3.2 Contact Lenses 374

11.3.3 Lens ... 376
11.3.4 Retinal Tissue ... 381
11.4 Summary and Conclusions ... 383
References ... 383

12 Force-Extension and Force-Clamp AFM Spectroscopies in Investigating Mechanochemical Reactions and Mechanical Properties of Single Biomolecules

Robert Szoszkiewicz ... 395
12.1 Introduction ... 396
12.2 Experimental Techniques for Measuring Displacements and Forces at the Single Molecule Level ... 397
12.2.1 Centroid Tracking ... 397
12.2.2 Fluorescence Resonance Energy Transfer ... 398
12.2.3 Magnetic Tweezers ... 399
12.2.4 Optical Traps ... 399
12.2.5 Single Molecule AFM Force Spectroscopy ... 401
12.3 Displacement and Force as Control Parameters in Small Systems ... 402
12.3.1 Displacement Sensitivity and Resolution ... 402
12.3.2 Force Sensitivity and Resolution ... 404
12.4 AFM Force Spectroscopy with a Few Piconewton Sensitivity and at a Single Molecule Level ... 404
12.4.1 Fingerprinting the Biomolecules ... 405
12.4.2 Optimizing the AFM System ... 405
12.5 FX-AFM Probes Mechanical Stability of Proteins and Polysaccharides ... 406
12.5.1 Details of the FX Trace ... 406
12.5.2 What can be Inferred from the FX Trace? ... 407
12.5.3 Applications of FX Force Spectroscopy ... 408
12.6 FC-AFM Probes the Details of Protein (Un)folding and Force-Induced Disulfide Reductions in Proteins ... 409
12.6.1 Details of the FC Trace ... 409
12.6.2 What can be Inferred from the FC Trace? ... 410
12.6.3 Applications of the FC Spectroscopy ... 412
12.7 Some Shortcomings of the FX/FC-AFM Spectroscopies ... 413

15 Spin and Charge Pairing Instabilities in Nanoclusters and Nanomaterials

Armen N. Kocharian, Gayanath W. Fernando, and Chi Yang 507
15.1 From Atoms to Solids 507
  15.1.1 Discreteness of Spectrum 509
  15.1.2 Electron Spectroscopy 510
  15.1.3 Electron Correlations in Clusters 511
15.2 Transition Metal Oxides 513
  15.2.1 Spin-Charge Separation 513
  15.2.2 BCS Versus High T_c Superconductivity 518
  15.2.3 Localized Versus Itinerant Behavior 520
15.3 Scanning Tunneling Experiments 521
  15.3.1 Pseudogap and Gap 521
  15.3.2 Two Energy (Temperature) Scales 523
  15.3.3 Coherent Versus Incoherent Condensation 524
  15.3.4 Modulated Pairs in Cuprates 526
  15.3.5 Inhomogeneities 526
15.4 Bethe-Ansatz and GSCF Theories 528

15.5 Hubbard Model 529
  15.5.1 GSCF Decoupling Scheme 529
  15.5.2 Canonical Transformation 531
  15.5.3 Order Parameter $\Delta_q^{(+)}$ 532
  15.5.4 Quasi-Particle Spectrum 534
  15.5.5 Chemical Potential 535
  15.5.6 Ground State Phase Diagram 537
  15.5.7 GSCF Phase Diagram at $T \neq 0$ 539
15.6 Bottom up Approach 540
  15.6.1 The Cluster Formalism 542
15.7 General Methodology 542
  15.7.1 The Canonical Charge and Spin Gaps 543
  15.7.2 Quantum Critical Points: Level Crossings 545
  15.7.3 Symmetry Breaking 546
  15.7.4 The Charge and Spin Instabilities 548
  15.7.5 The Charge and Spin Susceptibility Peaks 550
  15.7.6 Charge and Spin Inhomogeneities 551
  15.7.7 The Coherent Charge and Spin Pairings 553
15.8 Ground State Properties 554
  15.8.1 Bipartite Clusters 554
  15.8.2 Tetrahedrons 556
  15.8.3 Square Pyramids 559
15.9 Phase T-μ Diagram 560
  15.9.1 Tetrahedrons at $t = 1$ 560
15.10 Conclusion 563
References 565

16 Mechanical Properties of One-Dimensional Nanostructures
Gheorghe Stan and Robert F. Cook 571
16.1 Introduction 571
16.2 Mechanical Property Measurements of One-Dimensional Nanostructures 572
  16.2.1 Electric Field-Induced Mechanical Resonance of One-Dimensional Nanostructures 573
  16.2.2 Axial Tensile Loading of One-Dimensional Nanostructures 574
  16.2.3 Three-Point Bending Test of Bridge-Suspended One-Dimensional Nanostructures 575
  16.2.4 Beam-Bending of One-End-Clamped One-Dimensional Nanostructures 576
  16.2.5 Instrumented Indentation of One-Dimensional Nanostructures 577
  16.2.6 Contact Modulation AFM-Based Techniques 578

16.3 Contact-Resonance Atomic Force Microscopy 579
  16.3.1 Cantilever Dynamics in CR-AFM 580
  16.3.2 Contact Mechanics in CR-AFM 583
  16.3.3 Precision and Accuracy in CR-AFM Measurements (Dual-Reference Calibration Method for CR-AFM) 585
16.4 Contact-Resonance Atomic Force Microscopy Applied to Elastic Modulus Measurements of 1D Nanostructures 587
  16.4.1 Normal Contact Stiffness of the Tip–Nanowire Contact ... 588
  16.4.2 Lateral Contact Stiffness of the Tip–Nanowire Contact ... 589
16.5 Elastic Moduli of ZnO and Te Nanowires Measured by CR-AFM . 590
  16.5.1 CR-AFM Measurements on ZnO Nanowires 590
  16.5.2 CR-AFM Measurements on Te Nanowires 596
16.6 Surface Effects on the Mechanical Properties of 1D Nanostructures 601
16.7 How Important Are the Mechanical Properties of 1D Nanostructures in Applications? 604

25.2 Review of Atomic Force Microscope Capabilities Relevant to Manufacturing 869
  25.2.1 Evaluation of Mechanical Properties 869
  25.2.2 Friction/Lubricant Evaluation 882

25.3 Applications to Metal Forming 886
  25.3.1 Evaluation of Lubricants 886
  25.3.2 Bulk and Sheet Forming 887
  25.3.3 Powder Processing 894
25.4 Abrasive Machining Processes 896
  25.4.1 Grinding and Polishing 896
  25.4.2 Chemical Mechanical Polishing 897
  25.4.3 Miscellaneous Applications 901
25.5 Polymer Processing 902
25.6 Conclusions 904
References 905

26 Scanning Probe Microscopy as a Tool Applied to Agriculture
Fabio Lima Leite, Alexandra Manzoli, Paulo Sérgio de Paula Herrmann Jr, Osvaldo Novais Oliveira Jr, and Luiz Henrique Capparelli Mattoso 915
26.1 Applications of Nanotechnology in Agriculture 915
26.2 Applications of AFM in Agriculture 916
  26.2.1 Introduction 916
  26.2.2 Some Examples and Results of Agricultural Research 916
26.3 Conclusions and Perspectives 940
