

Educational Research and Innovation

Connected Minds

TECHNOLOGY AND TODAY'S LEARNERS

Centre for **Educational Research and Innovation**

Table of contents

Executive summary	11
Introduction. Why connectedness matters	15
It's not about technology, it's about connectedness	16
Reasons for increased policy relevance	17
How this report is organised	19
References	20
Chapter 1. How connectedness is shaping the economy and society	21
Overall economic impact on growth and productivity	23
Implications for employment and skills	26
The social uses of technology	38
Beyond access: new digital divides	42
References	49
Chapter 2. How relevant connectedness is for young people	51
Most young people in OECD countries are fully connected	52
The intensity and variety of uses of technology and connectedness	56
Yet not all young people are equally connected.	59
References	65
Chapter 3. Contrasting views about the digital generation	69
Alternative views: evangelists, catastrophists and sceptics	75
Is there room for yet another approach?	84
References	88
Chapter 4. What are the effects of attachment to digital media and connectivity?	93
A research challenge	94

Cognitive skills development	95
Limits of available evidence	100
Social values and attitudes	101
Overall conclusion	106
References	108
Chapter 5. Are learners' expectations changing?	113
A rationale for evolving expectations	114
Teachers' estimates of students' expectations	115
Are students more reluctant than expected to adopt technology in teaching?	117
What works for students then?	122
References	125
Chapter 6. Emerging issues for education	129
Mapping out the issues	130
Entertainment	131
Information overload?	132
Knowledge and learning	133
Socialisation using digital tools	137
Psychological issues: new problems or new opportunities?	141
References	143
Chapter 7. Key findings	149
Knowledge economy and society is supported by technology	150
Young people already benefit from connectedness	150
What matters is what young people do while they are connected	151
Not enough research evidence yet to show critical effects on cognitive skills	151
Expectations and behaviours of learners are not changing dramatically	151
Stereotyped concepts can be misleading	154
References	156
Chapter 8. Implications for educational policy, research and practice.	159
The agenda for the public debate	160
Implications for policy makers	163
Implications for educational institutions and teachers	164
Implications for parents	166
Implications for research	167
Concluding remarks	168
References	169
