

CONTENTS

PREFACE	ix
1 INTRODUCTION	1
1.1 Background on UWB Technology / 2	
1.2 UWB Regulations / 3	
1.2.1 FCC Radiation Masks / 3	
1.2.2 ECC Radiation Masks / 4	
1.2.3 UWB Definition and Bandwidth / 7	
1.3 UWB Bandpass Filters / 8	
1.4 Organization of the Book / 11	
References / 13	
2 TRANSMISSION LINE CONCEPTS AND NETWORKS	18
2.1 Introduction / 18	
2.2 Transmission Line Theory / 19	
2.2.1 Basic Transmission Line Model / 19	
2.2.2 Lossless Terminated Transmission Lines / 21	
2.3 Microwave Network Parameters / 26	
2.3.1 Scattering Parameters for Two-Port Network / 26	
2.3.2 $[Z]$ and $[Y]$ Matrices / 30	

CONTENTS

2.3.3	<i>ABCD</i> Parameters / 33	
2.3.4	Conversions between <i>S</i> -, <i>Z</i> -, <i>Y</i> -, and <i>ABCD</i> -Matrix Parameters / 38	
2.4	Relative Theories of Network Analysis / 42	
2.4.1	Even- and Odd-Mode Network Analysis / 42	
2.4.2	Image Parameter Method / 47	
2.5	Summary / 52	
	References / 52	
3	CONVENTIONAL PARALLEL-COUPLED LINE FILTER	53
3.1	Introduction / 53	
3.2	Lumped-Element Lowpass Filter Prototype / 54	
3.2.1	Maximally Flat and Chebyshev Characteristics / 54	
3.2.2	Lumped-Element Ladder Network / 56	
3.3	Impedance and Frequency Transformation / 65	
3.3.1	Lowpass to Lowpass Transformation / 66	
3.3.2	Lowpass to Highpass Transformation / 66	
3.3.3	Lowpass to Bandpass Transformation / 67	
3.3.4	Lowpass to Bandstop Transformation / 68	
3.4	Immittance Inverters / 70	
3.5	Lowpass Prototype Filter with Immittance Inverter / 71	
3.6	Parallel-Coupled Line Bandpass Filter / 76	
3.7	Summary / 84	
	References / 84	
4	PLANAR TRANSMISSION LINE RESONATORS	85
4.1	Introduction / 85	
4.2	Uniform Impedance Resonator / 87	
4.2.1	Short-Circuited $\lambda_g/2$ Transmission Line / 87	
4.2.2	Open-Circuited $\lambda_g/2$ Transmission Line / 89	
4.2.3	Short-Circuited $\lambda_g/4$ Transmission Line / 91	
4.2.4	Open-Circuited $\lambda_g/4$ Transmission Line / 93	
4.3	Stepped Impedance Resonators / 94	
4.3.1	Fundamental Properties of SIR / 95	
4.3.2	Slope Parameters of SIR / 101	

- 4.3.3 Design of the Parallel-Coupled Line Bandpass Filters with SIR / 102
- 4.4 Multiple-Mode Resonator / 104
 - 4.4.1 Open-Circuited Multiple-Mode Resonator / 104
 - 4.4.2 Short-Circuited Multiple-Mode Resonator / 108
 - 4.4.3 Design of the Parallel-Coupled Line Bandpass Filters with MMRs / 109
- 4.5 Summary / 113
- References / 114

5 MMR-BASED UWB BANDPASS FILTERS 116

- 5.1 Introduction / 116
- 5.2 An Initial MMR-Based UWB Bandpass Filter / 118
- 5.3 UWB Bandpass Filters with Varied Geometries / 121
 - 5.3.1 Aperture-Backed PCML / 121
 - 5.3.2 Broadside Microstrip/CPW / 122
 - 5.3.3 Inductive Coupling Element on CPW / 125
- 5.4 UWB Filters with Improved Out-of-Band Performance / 130
 - 5.4.1 Capacitive-Ended Interdigital Coupled Lines / 130
 - 5.4.2 Coupling between Two Feed Lines / 134
 - 5.4.3 Stub-Loaded MMR / 136
 - 5.4.4 Lowpass Embedded MMR / 140
- 5.5 UWB Bandpass Filter with a Notch Band / 142
- 5.6 Summary / 146
- References / 146

6 SYNTHESIS APPROACH FOR UWB FILTERS 149

- 6.1 Introduction / 149
- 6.2 Transfer Function / 150
- 6.3 Transmission Line Network with Pure Shunt/Series Stubs / 152
- 6.4 Transmission Line Network with Hybrid Series and Shunt Stubs / 163
- 6.5 MMR-Based UWB Filter with Parallel-Coupled Lines / 178
- 6.6 Summary / 187
- References / 187

7	OTHER TYPES OF UWB FILTERS	188
7.1	Introduction / 188	
7.2	UWB Filters with Highpass and Lowpass Filters / 188	
7.3	UWB Filters with Optimum Shunt Short-Circuited Stubs / 191	
7.3.1	UWB Filter with Extended Upper Stopband / 192	
7.3.2	UWB Filter with Enhanced Selectivity / 194	
7.4	UWB Filters with Quasi-Lumped Elements / 195	
7.4.1	UWB Filter Implemented with Suspended Strip Line / 195	
7.4.2	UWB Filter Implemented on Liquid Crystal Polymer (LCP) / 195	
7.5	UWB Filters with Composite CPW and Microstrip Structure / 197	
7.6	UWB Filter with Microstrip Ring Resonator / 199	
7.7	UWB Filter using Multilayer Structures / 203	
7.8	UWB Filter with Substrate Integrated Waveguide (SIW) / 205	
7.9	UWB Filter with Notch Band / 207	
7.10	Summary / 210	
	References / 210
