Foreword .....	xiii
Preface .....	xv
Acknowledgments .....	xvii
<b>1 Ultra-Wideband Antenna Arrays .....</b>	<b>1</b>
1.1 Introduction .....	1
1.1.1 Grating Lobes in Periodic Arrays .....	2
1.1.2 Dense Wideband Antenna Arrays .....	5
1.1.3 Early Aperiodic Design Methods .....	6
1.2 Foundations of Multiband and UWB Array Design .....	7
1.2.1 Fractal Theory and Its Applications to Antenna Array Design .....	8
1.2.2 Aperiodic Tiling Theory .....	18
1.2.3 Optimization Techniques .....	24
1.3 Modern UWB Array Design Techniques .....	27
1.3.1 Polyfractal Arrays .....	27
1.3.2 Arrays Based on Raised-Power Series Representations .....	29
1.3.3 Arrays Based on Aperiodic Tilings .....	31
1.4 UWB Array Design Examples .....	40
1.4.1 Linear and Planar Polyfractal Array Examples .....	40
1.4.2 Linear RPS Array Design Examples .....	47
1.4.3 Planar Array Examples Based on Aperiodic Tilings .....	53
1.4.4 Volumetric Array Based on a 3D Aperiodic Tiling .....	59
1.5 Full-Wave and Experimental Verification of UWB Designs .....	61
1.5.1 Full-Wave Simulation of a Moderately Sized Optimized RPS Array .....	62
1.5.2 Full-Wave Simulation of a Planar Optimized Aperiodic Tiling Array .....	65
1.5.3 Experimental Verification of Two Linear Polyfractal Arrays .....	68
References .....	72
<b>2 Smart Antennas .....</b>	<b>77</b>
2.1 Introduction .....	77
2.2 Background on Smart Antennas .....	79
2.2.1 Beamforming .....	79
2.2.2 Direction-of-Arrival Estimation Techniques .....	83

2.3	Evolutionary Signal Processing for Smart Antennas .....	86
2.3.1	Description of Algorithms .....	89
2.3.2	Adaptive Beamforming and Nulling in Smart Antennas .....	96
2.3.3	Extensions to Algorithms for Smart Antenna Implementation .....	102
2.4	Wideband Direction-of-Arrival Estimation .....	104
2.4.1	Test of Orthogonality of Projected Subspaces (TOPS) .....	107
2.4.2	Test of Orthogonality of Frequency Subspaces (TOFS) .....	109
2.4.3	Improvements to TOPS .....	109
2.5	Knowledge Aided Smart Antennas .....	111
2.5.1	Terrain Information .....	111
2.5.2	Analysis Tools .....	114
2.6	Conclusion .....	124
	Acknowledgments .....	125
	References .....	125
<b>3</b>	<b>Vivaldi Antenna Arrays .....</b>	<b>127</b>
3.1	Background and General Characteristics .....	127
3.1.1	Introduction .....	127
3.1.2	Background .....	128
3.1.3	Applications .....	128
3.1.4	Physical and Mechanical Description .....	129
3.1.5	Fabrication .....	133
3.1.6	General Discussion of Vivaldi Array Performance .....	136
3.2	Design of Vivaldi Arrays .....	140
3.2.1	Background .....	140
3.2.2	Infinite Array Element Design for Wide Bandwidth .....	143
3.2.3	Infinite $\times$ Finite Array Truncation Effects .....	152
3.2.4	Finite Array Truncation Effects .....	156
	Acknowledgments .....	165
	References .....	166
<b>4</b>	<b>Artificial Magnetic Conductors/High-Impedance Surfaces .....</b>	<b>169</b>
4.1	Introduction .....	169
4.2	Historical Background .....	170
4.3	Fundamental Theory, Analysis, and Simulation .....	171
4.3.1	Equivalent Circuit Model .....	171
4.3.2	Effective Media Model .....	173
4.3.3	CEM Simulation of AMC Structures .....	175
4.4	New Technologies and Applications .....	177
4.4.1	Magnetically Loaded AMC .....	177
4.4.2	Reconfigurable AMC .....	185
4.4.3	Novel AMC Constructs .....	190
	References .....	198

## Contents

<b>5 Metamaterial Antennas .....</b>	<b>203</b>
5.1 Introduction .....	203
5.2 Negative Refractive Index (NRI) Metamaterials .....	204
5.3 Metamaterial Antennas Based on NRI Concepts .....	207
5.3.1 Leaky-Wave Antennas (LWAs) .....	207
5.3.2 Miniature and Multiband Patch Antennas .....	208
5.3.3 Compact and Low-Profile Monopole Antennas .....	212
5.4 High-Gain Antennas Utilizing EBG Defect Modes .....	216
5.5 Antenna Miniaturization Using Dispersion Properties of Layered Anisotropic Media .....	218
5.5.1 Realizing DBE and MPC Modes via Printed Circuit Emulation of Anisotropy .....	220
5.5.2 DBE Antenna Design Using Printed Coupled Loops .....	222
5.5.3 Improving DBE Antenna Performance: Coupled Double-Loop (CDL) Antenna .....	225
5.5.4 Varactor Diode Loaded CDL Antenna .....	227
5.5.5 Microstrip MPC Antenna Design .....	228
5.6 Platform/Vehicle Integration of Metamaterial Antennas (Irci, Sertel, Volakis) .....	228
5.7 Wideband Metamaterial Antenna Arrays (Tzanidis, Sertel, Volakis) .....	231
5.7.1 What Are Metamaterial Antenna Arrays? .....	231
5.7.2 Schematic Representation of a Metamaterial Array .....	233
5.7.3 An MTM Interwoven Spiral Array with 10:1 BW .....	234
References .....	236
<b>6 Biological Antenna Design Methods .....</b>	<b>241</b>
6.1 Introduction .....	241
6.2 Genetic Algorithm .....	241
6.2.1 Components of a Genetic Algorithm .....	242
6.2.2 Successful GA Strategies .....	250
6.2.3 Examples .....	252
6.3 Genetic Programming .....	258
6.4 Efficient Global Optimization .....	260
6.4.1 The DACE Stochastic Process Model .....	261
6.4.2 Estimation of the Correlation Parameters .....	262
6.4.3 Selecting the Next Design Point .....	263
6.4.4 Convergence .....	264
6.4.5 Comparison of EGO and GA Design Optimization .....	264
6.5 Particle Swarm Optimization .....	264
6.6 Ant Colony Optimization .....	266
References .....	267
<b>7 Reconfigurable Antennas .....</b>	<b>271</b>
7.1 Introduction .....	271
7.1.1 Physical Components of a Reconfigurable Antenna .....	272

# **Frontiers in Antennas: Next Generation Design & Engineering**

7.1.2 Qualitative Description .....	273
7.1.3 Topology .....	275
7.2 Analysis .....	276
7.2.1 Transmission Line, Network, and Circuit Models .....	276
7.2.2 Perturbational Techniques .....	277
7.2.3 Variational Techniques .....	277
7.3 Overview of Reconfiguration Mechanisms for Antennas .....	277
7.3.1 Electromechanical .....	277
7.3.2 Ferroic Materials .....	288
7.3.3 Solid State Mechanisms .....	290
7.3.4 Fluidic Reconfiguration .....	294
7.3.5 Switching Speeds and Other Parameters .....	296
7.4 Control, Automation, and Applications .....	297
7.5 Review .....	301
7.6 Final Remarks .....	301
References .....	302
<b>8 Antennas in Medicine: Ingestible Capsule Antennas .....</b>	<b>305</b>
8.1 Introduction .....	305
8.2 Planar Meandered Dipoles .....	308
8.2.1 Balanced Planar Meandered Dipoles—Theory .....	309
8.2.2 Balanced Planar Meandered Dipoles— Simulation and Measurement .....	311
8.2.3 Offset Planar Meandered Dipoles— Simulation and Measurement .....	312
8.3 Antenna Design in Free Space .....	315
8.3.1 Conformal Chandelier Meandered Dipole Antenna .....	315
8.4 Antenna Design in the Human Body .....	322
8.4.1 Tuned Antenna for the Human Body .....	322
8.4.2 Effect of Electrical Components on the Antenna Performance .....	323
8.5 SAR Analysis and Link Budget Analysis .....	326
8.5.1 Simple Human-Body Model .....	326
8.5.2 Specific Absorption Rate Analysis .....	327
8.5.3 Link Budget Characterization .....	328
8.5.4 Link Budget for Free Space—Friis vs. HFSS .....	330
8.5.5 Comparison Between Three Wireless Communication Links .....	330
References .....	337
<b>9 Leaky-Wave Antennas .....</b>	<b>339</b>
9.1 Introduction .....	339
9.1.1 Motivation .....	339
9.1.2 Organization of the Chapter .....	339
9.1.3 Principle and Characteristics .....	340
9.1.4 Classification .....	342

9.2	Theory of Leaky Waves .....	345
9.2.1	Physics of Leaky-Waves .....	345
9.2.2	Radiation from 1D Unidirectional Leaky-Waves .....	350
9.2.3	Radiation from 1D Bidirectional Leaky-Waves .....	351
9.2.4	Radiation from Periodic Structures .....	353
9.2.5	Broadside Radiation .....	357
9.2.6	Radiation from 2D Leaky-Waves .....	360
9.3	Novel Structures .....	362
9.3.1	Full-Space Scanning CRLH Antenna .....	362
9.3.2	Full-Space Scanning Phase-Reversal Antenna .....	366
9.3.3	Full-Space Scanning Ferrite Waveguide Antenna .....	370
9.3.4	Full-Space Scanning Antennas Using Impedance Matching .....	374
9.3.5	Conformal CRLH Antenna .....	377
9.3.6	Planar Waveguide Antennas .....	379
9.3.7	Highly-Directive Wire-Medium Antenna .....	383
9.3.8	2D Metal Strip Grating (MSG) Partially Reflective Surface (PRS) Antenna .....	387
9.4	Novel Systems .....	391
9.4.1	Enhanced-Efficiency Power-Recycling Antennas .....	391
9.4.2	Ferrite Waveguide Combined Du/Diplexer Antenna .....	394
9.4.3	Active Beam-Shaping Antenna .....	398
9.4.4	Distributed Amplifier Antenna .....	400
9.4.5	Direction of Arrival Estimator .....	402
9.5	Conclusions .....	405
	References .....	406
10	<b>Plasma Antennas .....</b>	<b>411</b>
10.1	Introduction .....	411
10.2	Fundamental Plasma Antenna Theory .....	412
10.3	Plasma Antenna Windowing (Foundation of the Smart Plasma Antenna Design) .....	413
10.3.1	Theoretical Analysis with Numerical Results .....	413
10.3.2	Geometric Construction .....	414
10.3.3	Electromagnetic Boundary Value Problem .....	415
10.3.4	Partial Wave Expansion (Addition Theorem for Hankel Functions) .....	415
10.3.5	Setting Up the Matrix Problem .....	416
10.3.6	Far-Field Radiation Pattern .....	417
10.4	Smart Plasma Antenna Prototype .....	421
10.5	Plasma Frequency Selective Surfaces .....	421
10.5.1	Introduction .....	421
10.5.2	Theoretical Calculations and Numerical Results .....	423
10.5.3	Scattering from a Partially-Conducting Cylinder .....	425

10.6	Experimental Work .....	432
10.7	Other Plasma Antenna Prototypes .....	435
10.8	Plasma Antenna Thermal Noise .....	436
10.9	Current Work Done to Make Plasma Antennas Rugged .....	438
10.10	Latest Developments on Plasma Antennas .....	439
10.10.1	Theory for Polarization Effect .....	439
10.10.2	Generation of Dense Plasmas at Low Average Power Input by Power Pulsing .....	439
10.10.3	Fabry-Perot Resonator for Faster Operation of the Smart Plasma Antenna .....	440
	References .....	440
<b>11</b>	<b>Numerical Methods in Antenna Modeling .....</b>	<b>443</b>
11.1	Time-Domain Modeling .....	443
11.1.1	FDTD and FETD: Basic Considerations .....	443
11.1.2	UWB Antenna Problems in Complex Media .....	445
11.1.3	PML Absorbing Boundary Condition .....	446
11.1.4	A PML-FDTD Algorithm for Dispersive, Inhomogeneous Media .....	446
11.1.5	A PML-FETD Algorithm for Dispersive, Inhomogeneous Media .....	450
11.1.6	Examples .....	451
11.1.7	Dual-Polarized UWB-HFBT Antenna .....	453
11.1.8	Time-Domain Modeling of Metamaterials .....	456
11.2	Frequency-Domain FEM .....	458
11.2.1	Weak Formulation of Time-Harmonic Wave Equation .....	458
11.2.2	Geometry Modeling and Finite-Element Representations .....	461
11.2.3	Vector Finite Elements .....	465
11.2.4	Computation of FEM Matrices .....	467
11.2.5	Feed Modeling .....	472
11.2.6	Calculation of Radiation Properties of Antennas .....	475
11.2.7	An FEM Example: Broadband Vivaldi Antenna .....	475
11.3	Conformal Domain Decomposition Method .....	480
11.3.1	Notation .....	480
11.3.2	Interior Penalty Based Domain Decomposition Method .....	482
11.3.3	Discrete Formulation .....	485
11.3.4	Numerical Results .....	487
	Reference .....	500
	<b>Index .....</b>	<b>503</b>
