Preface	ix
PART 1: OXIDATIVE AND NITROSATIVE STRESS	
1 Oxidative and Nitrosative Stress Defence Systems in <i>Escherichia coli</i> and <i>Pseudomonas aeruginosa</i>: A Model Organism of Study Versus a Human Opportunistic Pathogen	3
<i>James A. Imlay and Daniel J. Hassett</i>	
2 Coordinated Regulation of Stress and Virulence Adaptations in Stages of <i>Haemophilus</i> Pathogenesis	33
<i>Sandy M.S. Wong and Brian J. Akerley</i>	
3 Nitric Oxide Stress in <i>Escherichia coli</i> and <i>Salmonella</i>	48
<i>Stephen Spiro</i>	
4 Nitric Oxide and Gram-positive Pathogens: Host Triggers and Bacterial Defence Mechanisms	68
<i>Glen Ulett and Adam Potter</i>	
PART 2: NOVEL GENE REGULATION IN RESPONSE TO HOST DEFENCES	
5 Novel Regulation in Response to Host-generated Stresses: The MerR Family of Regulators in Pathogenic Bacteria	93
<i>Stephen P. Kidd</i>	
6 Stress Responses in the Pathogenic <i>Neisseria</i>: Overlapping Regulons and sRNA Regulation	115
<i>Stuart A. Hill</i>	
PART 3: ACID STRESS, pH CONTROL AND SURVIVAL IN THE HUMAN HOST	
7 Acid Survival Mechanisms of Bacterial Pathogens of the Digestive Tract	135
<i>Hanan Gancz and D. Scott Merrell</i>	

8	Urease and the Bacterial Acid Stress Response	167
	<i>Peter T. Chivers</i>	

PART 4: NUTRIENT STRESS

9	Secretion Systems and Metabolism in the Pathogenic Yersiniae	185
	<i>Matthew S. Francis</i>	
10	Response of <i>Neisseria gonorrhoeae</i> to Oxygen Limitation and Excess	221
	<i>Jeffery A. Cole</i>	

PART 5: METAL IONS AND PATHOGENIC BACTERIA

11	Copper and Zinc Stress in Bacteria	245
	<i>Selina R. Clayton, Karin Heurlier, Taku Oshima and Jon L. Hobman</i>	
12	Metal Ion Sensing in <i>Mycobacterium tuberculosis</i>	266
	<i>Jennifer S. Cavet</i>	
13	<i>Salmonella</i> and the Host in the Battle for Iron	283
	<i>Elisa Deriu, Janet Z. Liu and Manuela Raffatellu</i>	

Index	297
