|   |           |
|---|-----------|
| <b>Preface</b>  | <b>xi</b> |
| <b>1 Introduction</b>   | <b>1</b>  |
| <b>I Static Models</b>  | <b>5</b>  |
| <b>2 Unobserved Heterogeneity</b>   | <b>7</b>  |
| 2.1 Overview  | 7         |
| 2.2 Fixed Effects Models  | 11        |
| 2.2.1 Assumptions   | 11        |
| 2.2.2 Within-Group Estimation   | 14        |
| 2.3 Heteroskedasticity and Serial Correlation   | 18        |
| 2.3.1 Robust Standard Errors for Within-Group Estimators  | 18        |
| 2.3.2 Optimal GLS with Heteroskedasticity and Autocorrelation of Unknown Form                                   | 20        |
| 2.3.3 Improved GMM and Minimum Distance Estimation under Heteroskedasticity and Autocorrelation of Unknown Form | 20        |
| 2.4 Likelihood Approaches   | 23        |
| 2.4.1 Joint Likelihood  | 24        |
| 2.4.2 Conditional Likelihood  | 24        |
| 2.4.3 Marginal (or Integrated) Likelihood   | 25        |
| 2.5 Nonlinear Models with Additive Effects  | 27        |
| 2.5.1 Nonlinear Regression  | 27        |
| 2.5.2 Linear Structural Equation  | 28        |
| 2.5.3 Nonlinear Simultaneous Equations  | 29        |
| <b>3 Error Components</b>   | <b>31</b> |
| 3.1 A Variance Decomposition  | 31        |
| 3.2 Error-Components Regression   | 34        |
| 3.2.1 The Model   | 34        |

|           |   |           |
|-----------|---|-----------|
| 3.2.2     | GLS and ML Estimation   | 35        |
| 3.2.3     | GLS, Within-Groups, and Between-Groups                                    | 36        |
| 3.3       | Testing for Correlated Unobserved Heterogeneity                           | 37        |
| 3.3.1     | Specification Tests   | 38        |
| 3.3.2     | Robust Alternatives   | 41        |
| 3.4       | Models with Information in Levels   | 42        |
| 3.5       | Estimating the Error Component Distributions                              | 44        |
| <b>4</b>  | <b>Error in Variables</b>   | <b>47</b> |
| 4.1       | An Introduction to the Standard Regression Model with Errors in Variables | 47        |
| 4.2       | Measurement Error Bias and Unobserved Heterogeneity Bias                  | 49        |
| 4.3       | Instrumental Variable Estimation with Panel Data                          | 51        |
| 4.4       | Illustration: Measuring Economies of Scale in Firm Money Demand           | 53        |
| <b>II</b> | <b>Time Series Models with Error Components</b>                           | <b>55</b> |
| <b>5</b>  | <b>Covariance Structures for Dynamic Error Components</b>                 | <b>57</b> |
| 5.1       | Introduction  | 57        |
| 5.2       | Time Effects  | 60        |
| 5.3       | Moving Average Autocovariances  | 64        |
| 5.4       | Estimating Covariance Structures  | 67        |
| 5.4.1     | GMM/MD Estimation   | 68        |
| 5.4.2     | Using Transformations of the Original Moments                             | 70        |
| 5.4.3     | Relationship between GMM and Pseudo ML                                    | 71        |
| 5.4.4     | Testing Covariance Restrictions   | 73        |
| 5.5       | Illustration: Testing the Permanent Income Hypothesis                     | 75        |
| <b>6</b>  | <b>Autoregressive Models with Individual Effects</b>                      | <b>81</b> |
| 6.1       | Assumptions   | 82        |
| 6.2       | The Within-Group Estimator  | 84        |
| 6.3       | Instrumental Variable Estimation  | 88        |
| 6.4       | Initial Conditions and Heteroskedasticity                                 | 91        |
| 6.4.1     | Estimation under Stationarity   | 91        |
| 6.4.2     | Unrestricted Initial Conditions   | 96        |
| 6.4.3     | Time Series Heteroskedasticity  | 107       |
| 6.4.4     | Time Effects in Autoregressive Models                                     | 108       |
| 6.5       | Mean Stationarity   | 110       |
| 6.6       | Unit Roots  | 113       |
| 6.7       | Estimating and Testing VARs for Firm Employment and Wages                 | 116       |

## Contents

|   |            |
|---|------------|
| <b>III Dynamics and Predeterminedness</b>                                   | <b>127</b> |
| <b>7 Models with both Strictly Exogenous and Lagged Dependent Variables</b> | <b>129</b> |
| 7.1 The Nature of the Model   | 129        |
| 7.2 An Example: Cigarette Addiction   | 130        |
| 7.3 GMM Estimation  | 133        |
| 7.3.1 2SLS Estimation from a Large $T$ Perspective                          | 133        |
| 7.3.2 Optimal IV Estimation in a Small $T$ , Large $N$ Context              | 134        |
| 7.3.3 GMM with the Number of Moments Increasing with $T$                    | 135        |
| 7.3.4 Explanatory Variables Uncorrelated with the Effects                   | 137        |
| 7.3.5 Enforcing Restrictions in the Covariance Matrix                       | 137        |
| 7.4 Maximum Likelihood  | 138        |
| 7.4.1 Estimation with Unrestricted Covariance Matrix                        | 138        |
| 7.4.2 MLE with Covariance Restrictions                                      | 140        |
| 7.4.3 MLE with Correlated $xs$  | 141        |
| <b>8 Predetermined Variables</b>  | <b>143</b> |
| 8.1 Introduction and Examples   | 144        |
| 8.1.1 Partial Adjustment with Feedback                                      | 145        |
| 8.1.2 Euler Equation for Household Consumption                              | 145        |
| 8.1.3 Cross-Country Growth and Convergence                                  | 148        |
| 8.2 Large $T$ Within-Group Estimation                                       | 149        |
| 8.3 Small $T$ GMM Estimation  | 151        |
| 8.3.1 Moments and Weight Matrices   | 151        |
| 8.3.2 The Irrelevance of Filtering  | 152        |
| 8.4 Optimal Instruments   | 155        |
| 8.5 Instruments Uncorrelated with the Effects                               | 159        |
| 8.5.1 System Estimators   | 159        |
| 8.5.2 Stationarity Restrictions   | 161        |
| 8.5.3 Illustration: A Dynamic Evaluation of Job Training                    | 162        |
| 8.5.4 Time-Invariant Explanatory Variables                                  | 164        |
| 8.5.5 Levels Moments Implied by Lack of Serial Correlation                  | 164        |
| 8.6 Estimating the Effect of Fertility on Female Labour Participation       | 165        |
| 8.7 Other Estimation Methods  | 169        |
| <b>IV Appendices</b>  | <b>175</b> |
| <b>A Generalized Method of Moments Estimation</b>                           | <b>177</b> |
| A.1 Method of Moment Estimation Problems                                    | 177        |
| A.2 General Formulation   | 180        |
| A.3 Examples: 2SLS and 3SLS   | 181        |
| A.4 Consistency of GMM Estimators   | 184        |

## *Contents*

|  |            |
|--|------------|
| A.5 Asymptotic Normality                           | 185        |
| A.6 Estimating the Asymptotic Variance             | 188        |
| A.7 Optimal Weight Matrix                          | 190        |
| A.8 Testing the Overidentifying Restrictions       | 192        |
| <b>B Optimal Instruments in Conditional Models</b> | <b>199</b> |
| B.1 Introduction                                   | 199        |
| B.2 Linear Regression                              | 200        |
| B.3 Nonlinear Regression                           | 203        |
| B.4 Nonlinear Structural Equation                  | 204        |
| B.5 Multivariate Nonlinear Regression              | 206        |
| B.6 Nonlinear Simultaneous Equation System         | 208        |
| <b>References</b>                                  | <b>215</b> |
| <b>Index</b>                                       | <b>227</b> |
