| Contributors .....   | xv   |
| Preface .....  | xvii |
| <b>1 Decontamination Using Nanotechnology</b>  |      |
| <i>Manoj K. Ram and Ashok Kumar</i> .....  | 1    |
| 1.1 Introduction .....   | 1    |
| 1.2 Drinking Water Decontamination .....   | 2    |
| 1.2.1 Water Decontamination Using Carbon Filters .....   | 3    |
| 1.2.2 Carbon Nanotube as Filter Material .....   | 5    |
| 1.2.3 Functionalization of Carbon Nanotubes for Adsorption .....   | 6    |
| 1.3 Photocatalytic ( $TiO_2$ ) Interaction with Organic and Inorganic Compounds .....  | 6    |
| 1.4 Enzymatic Decontamination .....  | 8    |
| 1.5 Nanomaterial for Chemical Warfare Agents .....   | 10   |
| 1.5.1 Decontamination due to Zero Valent Ions .....  | 11   |
| References .....   | 14   |
| <b>2 Preparation and Application of Inner-Skin Hollow Fiber Nanoporous Membrane</b> <i>Guojun Zhang, Shulan Ji, Zhongzhou Liu, and Maohong Fan</i> ..... |      |
| 2.1 Introduction .....   | 21   |
| 2.2 Preparation of an Inner-Skin Hollow Fiber Nanoporous Membrane .....  | 22   |
| 2.3 Application of Inner-Skin Hollow Fiber Nanoporous Membrane in Treating Banknote Printing Wastewater .....  | 25   |
| 2.3.1 Technological Process .....  | 26   |
| 2.3.2 Full-Scale Systems .....   | 27   |
| 2.3.3 Plant Operation Status .....   | 27   |
| 2.3.4 Analyses of Economic Benefit .....   | 31   |
| 2.4 Application of Inner-Skin Hollow Fiber Nanoporous Membrane in Self-Assembly of Polyelectrolyte Multilayer Membranes (PEMMs) .....                    | 33   |

|          |  |    |
|----------|--|----|
| 2.4.1    | Self-Assembly of an Inner-Skin<br>Hollow Fiber Polyelectrolyte<br>Multilayer Membrane .....  | 34 |
| 2.4.2    | Application of an Inner-Skin<br>Hollow Fiber Polyelectrolyte<br>Multilayer Membrane .....  | 39 |
|          | Acknowledgments .....  | 41 |
|          | References .....   | 41 |
| <b>3</b> | <b>Photocatalytic Inactivation: Air-Water</b>  |    |
|          | <i>Hanming Ding</i> .....  | 43 |
| 3.1      | Introduction .....   | 43 |
| 3.2      | TiO <sub>2</sub> -Based Photocatalysis .....   | 45 |
| 3.2.1    | Metal Ion Doping and<br>Implantation .....   | 47 |
| 3.2.2    | Nonmetal Ion Doping .....  | 47 |
| 3.2.3    | Photosensitization .....   | 50 |
| 3.2.4    | TiO <sub>2</sub> -Carbon Nanocomposites .....  | 51 |
| 3.3      | Other Visible-Light Activated<br>Photocatalysts .....  | 51 |
| 3.3.1    | Bi-Related Compounds .....   | 51 |
| 3.3.2    | Fe-Based Oxides .....  | 53 |
| 3.3.3    | Ag-Containing Compounds .....  | 54 |
| 3.4      | Photocatalytic Applications for Water<br>Purification and Air Cleaning .....   | 55 |
| 3.4.1    | Disinfection of Pathogenic<br>Microorganisms .....   | 55 |
| 3.4.2    | Dye Decomposition .....  | 59 |
| 3.4.3    | Photodegradation of Other Typical<br>Organic Pollutants in Water .....   | 63 |
| 3.4.4    | Transformation of Soluble Heavy<br>Metal Ions .....  | 66 |
| 3.4.5    | Elimination of Indoor Air<br>Pollutants .....  | 67 |
| 3.5      | Summary .....  | 69 |
|          | References .....   | 70 |
| <b>4</b> | <b>Application of a Nano TiO<sub>2</sub> Catalyst in Wastewater<br/>Treatment</b> <i>Zhemin Shen, Yangming Lei,<br/>Wenhua Wang, and Maohong Fan</i> ..... | 85 |
| 4.1      | Introduction .....   | 85 |
| 4.2      | Materials and Methods .....  | 87 |
| 4.2.1    | Electrolysis Apparatus .....   | 87 |
| 4.2.2    | Preparation and Characteristics of a<br>Nanocomposite TiO <sub>2</sub> Catalyst .....  | 88 |

|          |   |            |
|----------|---|------------|
| 4.2.3    | Operation .....   | 88         |
| 4.2.4    | Analytical Measurement .....  | 88         |
| 4.3      | Characteristics of Nano TiO <sub>2</sub> .....  | 90         |
| 4.4      | Electrolysis Catalyzed by Rutile-TiO <sub>2</sub> .....   | 91         |
| 4.4.1    | Electrolysis Results of Doped TiO <sub>2</sub> ...  | 93         |
| 4.4.2    | Optimization of Preparation Condition .....   | 93         |
| 4.4.3    | Catalysis and Oxidation Mechanism .....   | 97         |
| 4.5      | Conclusions .....   | 104        |
|          | References .....  | 105        |
| <b>5</b> | <b>Photoelectrocatalytic Degradation of Organic Contaminants in Nanosemiconductor Film Electrodes under Visible Light Irradiation</b> |            |
|          | <i>Hongjie Wang, Bin Zhou, and Xu Zhao</i> .....  | <b>107</b> |
| 5.1      | Introduction .....  | 107        |
| 5.2      | Materials and Methods .....   | 108        |
| 5.2.1    | Fabrication and Characterization of γ-Bi <sub>2</sub> MoO <sub>6</sub> and BiVO <sub>4</sub> Films .....                              | 108        |
| 5.2.2    | Degradation Experiment .....  | 109        |
| 5.3      | Photoelectrocatalysis of Dyes at Bi <sub>2</sub> MoO <sub>6</sub> Film Electrodes .....   | 110        |
| 5.3.1    | Characterization of γ-Bi <sub>2</sub> MoO <sub>6</sub> Film .....   | 110        |
| 5.3.2    | Degradation of the Dyes .....   | 112        |
| 5.3.3    | Effect of Applied Bias Potential ....   | 115        |
| 5.3.4    | Involved Active Species in PEC Degradation of K-2G .....  | 118        |
| 5.3.5    | Analysis of PEC Degradation Intermediates .....   | 120        |
| 5.4      | Photoelectrocatalysis of Organic Contaminants at BiVO <sub>4</sub> Film Electrodes .....  | 123        |
| 5.4.1    | Characteristics of BiVO <sub>4</sub> Thin Film .....  | 123        |
| 5.4.2    | Photoelectrocatalytic Activity of BiVO <sub>4</sub> Thin Films .....  | 128        |
| 5.5      | Conclusions .....   | 133        |
|          | Acknowledgment .....  | 135        |
|          | References .....  | 135        |
| <b>6</b> | <b>Disinfection by Nanoparticles</b> <i>Christian O. Dimkpa, David W. Britt, and Anne J. Anderson</i> .....                           | <b>139</b> |
| 6.1      | Introduction .....  | 139        |

|       |   |     |
|-------|---|-----|
| 6.2   | Nanoparticle–Bacterial Cell Interactions:<br>The Mechanisms .....   | 140 |
| 6.2.1 | Surface Charge, Agglomeration, and<br>Cell–NP Contact .....   | 142 |
| 6.2.2 | NP Formulations .....   | 143 |
| 6.2.3 | Ag NPs: Composites and Activity ...   | 145 |
| 6.2.4 | Formulations of Other<br>Metal-Containing NPs with<br>Antimicrobial Activities .....  | 146 |
| 6.3   | Problems Associated with NP Treatments ...  | 151 |
| 6.4   | Degradation of Chemicals .....  | 154 |
|       | References .....  | 155 |
| 7     | <b>Water Disinfection and Wastewater<br/>Decontamination by Solar Photocatalysis Using<br/>Nanomaterials</b> <i>S. Malato, P. Fernández-Ibáñez,<br/>M. I. Maldonado, and I. Oller</i> ..... | 161 |
| 7.1   | Introduction .....  | 162 |
| 7.2   | Solar Heterogeneous Photocatalysis Main<br>Parameters .....   | 162 |
| 7.2.1 | Initial Concentration of Reactant ...   | 165 |
| 7.2.2 | Mass of Catalyst .....  | 166 |
| 7.2.3 | pH .....  | 166 |
| 7.2.4 | Temperature .....   | 168 |
| 7.2.5 | Radiant Flux .....  | 169 |
| 7.2.6 | Concentration of Oxygen .....   | 170 |
| 7.3   | Enhancing Solar Semiconductor<br>Nanophotocatalysis .....   | 171 |
| 7.3.1 | Use of Chemical Oxidants .....  | 171 |
| 7.3.2 | Use of Doped and Modified TiO <sub>2</sub> ...  | 174 |
| 7.3.3 | Coupling of TiO <sub>2</sub> Photocatalysis with<br>Photosensitizers .....  | 177 |
| 7.3.4 | Coupling of Semiconductor<br>Photocatalysis with Other AOPs ...   | 178 |
| 7.4   | Solar Photocatalysis Hardware .....   | 179 |
| 7.4.1 | Solar Collectors .....  | 180 |
| 7.4.2 | Photocatalyst Issues .....  | 181 |
| 7.5   | Solar Photocatalytic Disinfection .....   | 183 |
| 7.5.1 | Damaging Effects of Light on<br>Microorganisms .....  | 184 |
| 7.5.2 | Water Disinfection with TiO <sub>2</sub><br>Photocatalysis .....  | 186 |
|       | Acknowledgments .....   | 189 |
|       | References .....  | 190 |

|  |            |
|--|------------|
| <b>8 The Role of Nanotechnology for Decontamination of Chemical Warfare Agents G.K. Prasad .....</b>                         | <b>193</b> |
| 8.1 Introduction .....   | 194        |
| 8.2 Brief Description of Synthetic Methods of Nanoscale Metal Oxides .....   | 197        |
| 8.2.1 Particle Synthesis by Chemical Routes .....  | 197        |
| 8.2.2 Nucleation and Growth from Solutions .....   | 198        |
| 8.2.3 Metallic and Intermetallic Nanoparticles by Chemical Reduction .....   | 198        |
| 8.2.4 Combustion Synthesis .....   | 199        |
| 8.2.5 The Sol–Gel Method .....   | 199        |
| 8.2.6 Aerogel Process .....  | 200        |
| 8.3 Stabilization of Fine Particles against Agglomeration .....  | 201        |
| 8.4 Properties and Functionalities That Facilitate Chemical Warfare Decontamination .....                                    | 201        |
| 8.5 Reactions of Chemical Warfare Agents and Respective Decontamination Mechanisms on Nanosized Metal Oxides .....           | 210        |
| 8.5.1 Reactions of VX, GD, GB, and HD with Nanosized AP-MgO, AP-Al <sub>2</sub> O <sub>3</sub> , and AP-CaO .....            | 210        |
| 8.5.2 Detoxification Reactions of Sulfur Mustard on the Surface of Zinc Oxide Nanosized Rods .....                           | 212        |
| 8.5.3 Nanocrystalline Zinc Oxide for Decontaminating Sarin and Dimethyl Methyl Phosphonate .....                             | 214        |
| 8.5.4 Decontamination of Sulfur Mustard and Sarin on Titania Nanotubes .....   | 217        |
| 8.5.5 Modified Titania Nanotubes for Decontaminating Sulfur Mustard .....  | 221        |
| 8.5.6 Reactions of Sulfur Mustard and Sarin on V <sub>1.02</sub> O <sub>2.98</sub> Nanotubes .....                           | 223        |
| 8.5.7 Mesoporous Manganese Oxide Nanobelts for Decontamination of Sarin, Sulfur Mustard, and Chloroethyl Ethyl Sulfide ..... | 226        |
| 8.6 Catalytic Degradation of a Chemical Warfare Stimulant on Au-TiO <sub>2</sub> .....                                       | 229        |
| 8.6.1 Mechanism .....  | 230        |

## X Contents

|          |  |            |
|----------|--|------------|
| 8.6.2    | Al <sub>2</sub> O <sub>3</sub> Nanoparticles Impregnated with Polyoxometalates as Reactive Sorbents for the Removal of Sulfur Mustard .....                      | 230        |
| 8.6.3    | Adsorption, Desorption, and Thermal Oxidation of 2-CEES on Nanocrystalline Zeolites .....  | 231        |
| 8.6.4    | Solar Light-Assisted Self-Cleaning Coatings Based on Layer-by-Layer (LbL) Nanostructured Films Composed of Titania Nanotubes .....                               | 231        |
| 8.6.5    | Future Directions .....  | 232        |
|          | References .....   | 233        |
| <b>9</b> | <b>Nanostructured Bioassemblies for Environmental Bioremediation</b> <i>Silvana Andreeșcu, Cristina R. Ispas, Anastasia C. H. Scangas, and Lia Stanciu</i> ..... | <b>237</b> |
| 9.1      | Introduction .....   | 237        |
| 9.2      | Biological Agents and Their Potential in Environmental Decontamination .....   | 239        |
| 9.3      | Fabrication of Biofunctionalized Nanostructures .....  | 243        |
| 9.3.1    | Benefit of Bioimmobilization in the Environmental Field: Enhancing Biological Activity and Stability through Immobilization on Nanostructures .....              | 243        |
| 9.3.2    | Microencapsulation Technology .....  | 244        |
| 9.3.3    | Bioimmobilization on Nanostructured Materials .....  | 247        |
| 9.4      | Environmental Bioremediation Using Biofunctionalized Nanostructures .....  | 251        |
| 9.4.1    | Environmental Bioremediation of Arsenic .....  | 251        |
| 9.4.2    | Enzymatic Degradation of Phenolics .....   | 254        |
| 9.4.3    | Biodegradation of Pesticides .....   | 257        |
| 9.4.4    | Biodesulfurization .....   | 260        |
| 9.5      | Conclusions .....  | 262        |
|          | References .....   | 263        |

|           |   |  |            |

| <b>10</b> | <b>Reactive Nanoparticles for the Treatment of Chlorinated Dense Nonaqueous Phase Liquids in Soil and Groundwater</b> | <i>Tanapon Phenrat, Michelle Crimi, Tissa Illanagasekare, and Gregory V. Lowry</i> | <b>271</b> |
| 10.1      | Introduction  | .....  | 272        |
| 10.1.1    | Groundwater and Soil Contamination by Chlorinated DNAPLs  | .....  | 272        |
| 10.1.2    | Nanotechnology for DNAPL Treatment: Evolution and Technical Challenges  | .....  | 278        |
| 10.2      | Dechlorination of Chlorinated Organics Using Zero-Valent Iron (ZVI)   | .....  | 280        |
| 10.3      | Synthesis Approaches of Bare nZVI   | .....  | 281        |
| 10.3.1    | Vapor-Phase Synthesis: Sputtering Gas Aggregation (SGA)   | .....  | 281        |
| 10.3.2    | Solution-Phase Synthesis  | .....  | 282        |
| 10.4      | Physicochemical Properties and Reactivity of Bare nZVI  | .....  | 284        |
| 10.5      | Modified nZVI   | .....  | 288        |
| 10.5.1    | Polymeric Surface Modification  | ....   | 288        |
| 10.5.2    | Emulsified nZVI   | .....  | 292        |
| 10.5.3    | nZVI Embedded in Carriers or Supports   | .....  | 292        |
| 10.6      | Physicochemical Properties and Performance of Modified nZVI   | .....  | 293        |
| 10.6.1    | Polymer-Coated nZVI   | .....  | 293        |
| 10.6.2    | Emulsified nZVI   | .....  | 298        |
| 10.6.3    | nZVI Entrapped in Carriers  | .....  | 299        |
| 10.7      | Environmental Factors Affecting Performance of nZVI Reactivity and Deliverability                                     | .....  | 300        |
| 10.7.1    | pH  | .....  | 301        |
| 10.7.2    | Ionic Species   | .....  | 303        |
| 10.7.3    | Metals  | .....  | 304        |
| 10.7.4    | Nonreactive Hydrophobic Hydrocarbons and NOM  | .....  | 305        |
| 10.7.5    | TCE Concentration and the Presence of DNAPL   | .....  | 307        |
| 10.7.6    | Microorganisms  | .....  | 308        |
| 10.7.7    | Subsurface Heterogeneity  | .....  | 309        |
| 10.8      | Considerations for nZVI Treatment System Design   | .....  | 310        |
| 10.8.1    | Applications of nZVI  | .....  | 310        |

|           |   |            |
|-----------|---|------------|
| 10.8.2    | Site-Specific Considerations for Screening Applicability of nZVI .....  | 310        |
| 10.8.3    | Delivery Approaches for Reactive Nanomaterials .....  | 312        |
| 10.8.4    | Handling nZVI .....   | 314        |
| 10.8.5    | Monitoring Considerations .....   | 314        |
| 10.8.6    | Regulatory and Health and Safety Considerations .....   | 315        |
| 10.8.7    | Cost .....  | 315        |
| 10.9      | Future Directions of nZVI .....   | 316        |
|           | Acknowledgments .....   | 316        |
|           | References .....  | 316        |
| <b>11</b> | <b>Persistent Pesticides: Detection and Control Using Nanotechnology</b> <i>Sunandan Baruah and Joydeep Dutta</i> .....   | <b>323</b> |
| 11.1      | Introduction .....  | 323        |
| 11.2      | Nanostructure Synthesis .....   | 325        |
| 11.2.1    | Top-Down Fabrication .....  | 325        |
| 11.2.2    | Bottom-Up Fabrication .....   | 326        |
| 11.3      | Persistent Pesticides .....   | 328        |
| 11.3.1    | Hexachlorocyclohexane (Lindane) .....   | 328        |
| 11.3.2    | DDT .....   | 328        |
| 11.3.3    | Cyclodienes .....   | 329        |
| 11.3.4    | Mirex and Chlordcone .....  | 329        |
| 11.4      | Photocatalysis .....  | 329        |
| 11.5      | Sensors .....   | 331        |
| 11.6      | Nanostructures for Sensing .....  | 331        |
| 11.6.1    | Biosensors .....  | 331        |
| 11.6.2    | Metal Ion Sensors .....   | 334        |
| 11.6.3    | Optical Sensors .....   | 338        |
| 11.7      | Nanostructures for Environmental Remediation .....  | 340        |
| 11.8      | Conclusions .....   | 342        |
|           | References .....  | 343        |
| <b>12</b> | <b>Nanomaterials as a Means of Decontamination of Chemical and Biological Warfare Agents and Related Toxins</b> <i>Liyana Wajira Ariyadasa and Sherine O. Obare</i> ..... | <b>347</b> |
| 12.1      | Introduction .....  | 347        |
| 12.1.1    | CWAs .....  | 349        |
| 12.1.2    | BWAs .....  | 349        |
| 12.1.3    | Common Methods for Remediating BWAs and CWAs .....  | 350        |

|        |   |            |
|--------|---|------------|
| 12.1.4 | Nanomaterials as Important Decontaminants for BWAs and CWAs .....   | 352        |
| 12.2   | Synthesis and Characterization of Nanoscale Materials Typically Used in Decontaminating BWAs and CWAs .....                           | 353        |
| 12.2.1 | Magnesium Oxide Nanoparticles .....   | 353        |
| 12.2.2 | Nanocrystalline TiO <sub>2</sub> .....  | 353        |
| 12.2.3 | Magnetite Nanoparticles .....   | 353        |
| 12.3   | Characterization of Nanoparticles .....   | 354        |
| 12.3.1 | XRD .....   | 354        |
| 12.3.2 | Raman Spectroscopy .....  | 354        |
| 12.3.3 | Electron Microscopy (EM) .....  | 354        |
| 12.3.4 | AFM .....   | 357        |
| 12.3.5 | XPS .....   | 357        |
| 12.4   | Applications toward Decontamination .....   | 357        |
| 12.4.1 | Decontamination of Organophosphorus (OP) Compounds via Reduction Pathways .....   | 357        |
| 12.4.2 | Decontamination of CWAs Using Metal Oxide Nanoparticles .....   | 363        |
| 12.4.3 | Visible-Light C–Heteroatom Bond Cleavage and Detoxification of CWAs Using Titania-Supported Gold Nanoparticles as Photocatalyst ..... | 366        |
| 12.4.4 | Nerve Agent Destruction Using Recyclable Catalytic Magnetic Nanoparticles .....   | 368        |
| 12.5   | Degradation of BWAs .....   | 372        |
| 12.5.1 | Nanotube-Assisted Protein Deactivation .....  | 372        |
| 12.5.2 | Photocatalytic Disinfection with Titanium Dioxide–Coated Multiwalled Carbon Nanotubes .....   | 373        |
| 12.6   | Conclusions and Future Perspectives .....   | 374        |
|        | References .....  | 374        |
