Refrigerant Replacements and the Atmosphere	62
<b>Review Questions</b>	<b>63</b>

## 3 Voltage, Current, and Resistance

---

<b>Performance Objectives</b>	<b>66</b>
<b>Ohm's Law</b>	<b>66</b>
<b>Series Circuits</b>	<b>66</b>
<b>Parallel Circuits</b>	<b>68</b>
Current in a Parallel Circuit	68
Resistance in a Parallel Circuit	69
<b>AC and DC Power</b>	<b>69</b>
Phase	70
Power in DC Circuits	70
<b>Power Rating of Equipment</b>	<b>71</b>
<b>Capacitors</b>	<b>71</b>
How a Capacitor Works	72

Capacity of a Capacitor	73
Dielectric Failure	73
Basic Units of Capacitance	73
Working With Capacitive Values	73
Capacitor Types	74
Capacitor Tolerances	77
<b>The AC Circuit and the Capacitor</b>	<b>77</b>
Uses of Capacitors	79
<b>Inductance</b>	<b>79</b>
Four Methods of Changing Inductance	79
Self-Inductance	79
Mutual Inductance	80
Inductive Reactance	81
Uses of Inductive Reactances	81
<b>Transformers</b>	<b>81</b>
Transformer Construction	81
Turns Ratio	82
Transformer Applications	82
<b>Semiconductors</b>	<b>82</b>
Diodes	82
Transistors	83
Silicon-Controlled Rectifier	84
<b>Bridge Circuits</b>	<b>84</b>
Wheatstone Bridges	84
Variable Resistor	85
<b>Sensors</b>	<b>85</b>
Temperature Elements	86
Humidity Elements	86
<b>Controllers</b>	<b>87</b>
Single-Element Controllers	88
Dual-Element Controllers	90
<b>Actuators</b>	<b>90</b>
Electro-Hydraulic Actuators	90
Thermal Actuators	91

## 4 Solenoids and Valves

---

<b>Performance Objectives</b>	<b>98</b>
<b>Industrial Solenoids</b>	<b>98</b>
Tubular Solenoids	98
Frame Solenoids	98
<b>Applications</b>	<b>101</b>
Solenoids as Electromagnets	101
Solenoid Coils	101
Servicing Coils	101
<b>Solenoid Valves in Circuits</b>	<b>102</b>
Refrigeration Valve	103
<b>Review Questions</b>	<b>104</b>

## **5 Electric Motors: Selection, Characteristics, and Problems**

---

<b>Performance Objectives</b>	<b>106</b>
<b>Construction of an Induction Motor</b>	<b>106</b>
Single-Phase Motors	107
Shaded-Pole Motor	107
Split-Phase Motor	107
Capacitor-Start Motor	108
<b>Motors Sizes</b>	<b>108</b>
<b>Cooling and Mounting Motors</b>	<b>109</b>
<b>Direction of Rotation</b>	<b>110</b>
<b>Synchronous Motor</b>	<b>111</b>
Theory of Operation	111
Synchronous Motor Advantages	112
Properties of the Synchronous Motor	112
<b>Electric Motors</b>	<b>113</b>
Starting the Motor	113
<b>Repulsion-Induction Motor</b>	<b>114</b>
<b>Capacitor-Start Motor</b>	<b>115</b>
<b>Permanent Split-Capacitor Motor</b>	<b>116</b>
<b>Shaded-Pole Motor</b>	<b>116</b>
<b>Split-Phase Motor</b>	<b>118</b>
<b>Polyphase-Motor Starters</b>	<b>119</b>
<b>Reduced-Voltage Starting Methods</b>	<b>120</b>
Primary-Resistor Starting	120
Autotransformer Starting	123
Part-Winding Starting	124
Wye-Delta or Star-Delta Starters	125
Multispeed Starters	127
<b>Consequent-Pole Motor Controller</b>	<b>128</b>
<b>Full-Voltage Controllers</b>	<b>131</b>
Starting Sequence	133
Protection Against Low Voltage	133
Time-Delay Protection	133
<b>Electric Motors: Their Uses, Operation, and Characteristics</b>	<b>136</b>
Motor Rotation	137
Variable-Speed Drives	137
<b>Troubleshooting Electric Motors With a Volt-Ammeter</b>	<b>137</b>
<b>Split-Core AC Volt-Ammeter</b>	<b>138</b>
Testing for Grounds	139
Testing for Opens	139
Checking for Shorts	140
Testing Squirrel-Cage Rotors	140
Testing the Centrifugal Switch in a Split-Phase Motor	140
Test for Short Circuit Between Run and Start Windings	140
Test for Capacitors	140
<b>Using the Megohmmeter for Troubleshooting</b>	<b>142</b>
<b>Insulation-Resistance Testing</b>	<b>142</b>
Measuring Insulation Resistance	143
Power Tools and Small Appliances	143

<b>Hermetic Compressor Systems</b>	<b>144</b>
Circuit Breakers and Switches	144
Coils and Relays	144
<b>AC Motor Control</b>	<b>144</b>
Motor Controller	145
<b>AC Squirrel-Cage Motor</b>	<b>145</b>
Enclosures	146
Code	146

## 7 Refrigeration Compressors

<b>Performance Objectives</b>	<b>198</b>
<b>Compressors</b>	<b>198</b>
<b>Condensers</b>	<b>200</b>
Air-Cooled Condensers	200
Water-Cooled Condensers	200
Hermetic Compressors	200
Compressor Types	200
Newer Models Designations and	
Coding	208
<b>Hermetic Compressor Motor Types</b>	<b>211</b>
Resistance Start-Induction Run	212
Capacitor Start-Induction Run	212
Capacitor Start and Run	212
Permanent Split Capacitor	213
<b>Compressor Motor Relays</b>	<b>213</b>
Current-Type Relay	213
Potential-Type Relay	213
<b>Compressor Terminals</b>	<b>213</b>
Built-Up Terminals	214
Glass Quick-Connect Terminals	215
<b>Motor Mounts</b>	<b>215</b>
<b>Crankcase Heaters</b>	<b>215</b>
<b>Electrical Systems for Compressor</b>	
<b>Motors</b>	<b>218</b>
Normal Starting Torque Motors (RSIR)	
With a Current-Type Relay	218
High-Starting Torque Motors (CSIR)	
With a Current-Type Relay	221
High-Starting Torque Motors (CSIR) With	
a Two-Terminal External Overload and a	
Remote-Mounted Potential Relay	225

High-Starting Torque Motors (CSR) With Three-Terminal Overloads and Remote-Mounted Relays	228
PSC Motor With a Two-Terminal External Overload and Run Capacitor	229
PSC Motor With an Internal Overload (Line Breaker)	230
CSR or PSC Motor With the Start Components and an Internal Overload or Line Breaker	231
Compressors With Internal Thermostat, Run Capacitor, and Supplementary Overload	232
CSR or PSC Motor With Start Components, Internal Thermostat, and Supplementary External Overload	233
<b>Compressor Connections and Tubes</b>	<b>236</b>

# 12 Servicing and Safety

---

## Performance Objectives 342

## Safety 342

- Handling Cylinders 342
- Pressurizing 342
- Working With Refrigerants 343
- Lifting 343
- Electrical Safety 343

## Servicing the Refrigerator Section 343

- Sealed Compressor and Motor 344
- Condenser 344
- Filter Drier 344
- Capillary Tube 344
- Heat Exchanger 345
- Freezer Compartment and Provision
  - Compartment Assembly 345

## Compressor Replacement 345

## Troubleshooting Compressors 345

## Troubleshooting Refrigerator

### Components 345

- Compressor Will Not Run 345
- Compressor Runs, but There Is No Refrigeration 347
- Compressor Short Cycles 347
- Compressor Runs Too Much or 100 Percent 347
- Noise 348
- To Replace the Compressor 348

## Compressor Motor Burnout 349

## Cleaning System After Burnout 349

## Replacing the Filter Drier 349

## Replacing the Condenser 351

## Replacing the Heat Exchanger 351

## Repairing the Perimeter Tube (Fiberglass Insulated) 351

- Top-Freezer and Side-by-Side Models 351
- Foam-Insulated 12 and 14 ft<sup>3</sup>, Top-Freezer Models 353
- Foam-Insulated 19 ft<sup>3</sup> Side-by-Side Models 355

## Replacing the Evaporator-Heat Exchanger Assembly 356

- Top-Freezer, No-Frost Models 356
- Side-by-Side Models 356

## Adding Refrigerant 356

- Low-Side Leak or Slight Undercharge 357
- High-Side Leak or Slight Undercharge 357
- Overcharge of Refrigerant 357

## Testing for Refrigerant Leaks 357

## Service Diagnosis 358

- Thermostat Cut-Out and Cut-In Temperatures 359
- Freezer and Provision Compartment Air Temperatures 359
