Preface	xvii
1 Steam and Its Importance	1
1.1 Introduction	1
1.2 The Use of Steam	7
1.3 The Steam-Plant Cycle	9
1.4 The Power Plant	10
1.5 Utility Boilers for Electric Power	15
1.5.1 Coal-Fired Boilers	20
1.5.2 Oil- and Gas-Fired Boilers	25
1.5.3 Steam Considerations	25
1.5.4 Boiler Feedwater	25
1.6 Industrial and Small Power Plants	26
1.6.1 Fluidized Bed Boilers	29
1.6.2 Combined Cycle and Cogeneration Systems	30
1.7 Solar Power	34
1.8 Wind Power	36
1.9 Power Plant Costs	38
1.10 Summary	40
Questions and Problems	40
2 Boilers	43
2.1 The Boiler	43
2.2 Fundamentals of Steam Generation	45
2.2.1 Boiling	45
2.2.2 Circulation	45
2.2.3 Steam-Water Separation	47
2.3 Fire-Tube Boilers	47
2.4 Water-Tube Boilers	53
2.4.1 High-Temperature Water (HTW) Boilers	59
2.4.2 Comparison of Fire- and Water-Tube Boilers	60
2.5 Steam-Water Separation	61
2.6 Principles of Heat Transfer	64
2.7 Superheaters	65
2.8 Superheat Steam Temperature Control	68
2.8.1 Attemperation	68
2.8.2 Flue Gas Bypass	69
2.8.3 Flue Gas Recirculation	69
2.9 Heat-Recovery Equipment	70

2.10	Furnace Design Considerations	76
2.11	Furnace Construction	78
2.12	Industrial and Utility Boilers	85
2.13	Considerations for Coal Firing	100
2.13.1	Spreader Stokers	101
2.13.2	Pulverized-Coal Firing	101
2.13.3	Stoker versus Pulverized-Coal Firing	102
2.14	Pressurized versus Balanced-Draft Boiler Designs	102
2.15	Fluidized Bed Boilers	103
2.15.1	The Process	104
2.15.2	Comparison with Pulverized-Coal and Stoker Firing	104
2.15.3	Advantages of Fluidized Bed Combustion	105
2.15.4	Descriptions of Fluidized Bed Boilers	106
2.15.5	Emissions Control with Fluidized Bed Boilers	117
2.15.6	Bed Material	119
2.15.7	Heat Transfer	119
2.16	Boiler Applications for Biomass Fuels	120
2.17	Modern Coal-Fired Plants—Summary	121
2.18	Process Steam and Its Application	122
2.19	Combined Cycle and Cogeneration Systems	122
2.20	Nuclear Steam Generation	128
	Questions and Problems	137
3	Design and Construction of Boilers	139
3.1	Materials Used in Boiler Construction	139
3.2	Stresses in Tubes and Drums	142
3.3	Drum Construction	146
3.4	Welded Construction	148
3.5	Structural Support Components	152
3.6	Manholes, Handholes, and Fittings	153
3.7	Boiler Assembly	154
3.8	Heating Surface and Capacity	156
3.9	Boiler Capacity Calculation	158
	Questions and Problems	164
4	Combustion of Fuels	167
4.1	The Combustion Process	167
4.2	The Theory of Combustion	171
4.3	The Air Supply	182
4.4	Coal	188
4.5	Fuel Oil	201
4.6	Gas	206
4.6.1	Gas Hydrates	208
4.7	By-Product Fuels	208

4.8	Control of the Combustion Process	210
	Questions and Problems	217
5	Boiler Settings, Combustion Systems, and Auxiliary Equipment	219
5.1	Boiler Settings	219
5.2	Hand Firing	221
5.3	Stokers	223
5.3.1	Underfeed Stokers	224
5.3.2	Overfeed Stokers	225
5.4	Pulverized Coal	243
5.4.1	Contact Mills	246
5.4.2	Ball Mills	253
5.4.3	Impact Mills	254
5.4.4	Mill Feeders	256
5.4.5	Gravimetric Feeders	256
5.4.6	Burners	258
5.4.7	Lighters	263
5.4.8	Flame Safety System	263
5.4.9	Operation	265
5.5	Fuel Oil	270
5.5.1	Steam- or Air-Atomizing Burners	273
5.5.2	Pressure-Type Burners	275
5.5.3	Oil Burning Characteristics	276
5.6	Gas	281
5.7	Oil- and Gas-Firing Safety Precautions	285
5.8	Automatic Operation of Boilers	285
5.9	Stacks	289
5.10	Mechanical Draft: Fans	291
5.11	Steam and Air Jets	299
5.12	Flues and Ducts	299
5.13	Ash Handling Systems	300
	Questions and Problems	303
6	Boiler Accessories	307
6.1	Water Columns	307
6.2	Pressure Measurement	314
6.3	Temperature Measurement	316
6.4	Feedwater Control System	316
6.5	Safety Valves	324
6.6	Blowdown Equipment	333
6.7	Nonreturn Valves	337
6.8	Steam Piping	339
6.9	Sootblowers	339
6.10	Valves	345
6.11	Instruments and Power Plant Automation	349
	Questions and Problems	359

7	Operation and Maintenance of Boilers	361
7.1	Boiler Startup	361
7.2	Normal Operation	364
7.2.1	Combustion Control	365
7.2.2	Ash Handling	365
7.2.3	Water Supply	366
7.2.4	Boiler Efficiency	376
7.2.5	Insulation and Lagging	379
7.3	Operating Characteristics of Fluidized Bed Boilers	379
7.3.1	Circulating Fluid Bed (CFB) Boilers	380
7.3.2	Bubbling Fluid Bed (BFB) Boilers	381
7.4	Abnormal Operation	381
7.5	Idle Boilers	384
7.6	Maintenance	387
7.7	Boiler Internal Inspection	394
7.8	Evaluating the Condition of a Boiler	396
7.9	Making Repairs	397
7.10	Inspection and Maintenance Requirements of Heat Recovery Steam Generators (HRSGs)	400
	Questions and Problems	401
8	Pumps	405
8.1	Pumps	406
8.2	Injectors	406
8.3	Duplex Pumps	407
8.4	Power Pumps	408
8.5	Vacuum Pumps	411
8.6	Rotary Pumps	412
8.7	Centrifugal Pumps	415
8.8	Facts about Fluids and Pumping	426
8.9	Factors Affecting Pump Operation	427
8.10	Considerations for Pump Selection	429
8.11	Pump Installation and Operation	430
8.12	Pump Testing and Calculations	432
8.13	Pump Maintenance	436
	Questions and Problems	440
9	Steam Turbines, Condensers, and Cooling Towers	443
9.1	Steam Turbines	443
9.1.1	Turbine Types and Applications	448
9.1.2	Turbine Stage Design	454
9.1.3	Major Components of a Turbine	455
9.2	Turbine Design and Construction	460
9.2.1	Thrust Bearing	469
9.2.2	Packing	470
9.2.3	Governors	471
9.2.4	Lubrication	475

9.2.5	Turbine Control	477
9.2.6	Erection of the Steam Turbine	477
9.2.7	Relief Valves for Turbines	480
9.2.8	Turbine Piping	481
9.3	Electric Generators	481
9.4	Condensers	484
9.4.1	Surface Condensers	485
9.4.2	Air-Cooled Condensers	488
9.4.3	Condenser Materials and Construction	489
9.5	Cooling Towers	491
9.5.1	Types of Cooling Towers	492
9.5.2	Design Considerations	499
9.5.3	Materials of Construction	500
9.6	Condenser Auxiliaries	500
	Questions and Problems	502
10	Operating and Maintaining Steam Turbines, Condensers, Cooling Towers, and Auxiliaries	505
10.1	Turbines	505
10.1.1	Turbine Operation	510
10.1.2	Turbine Maintenance	513
10.1.3	Turbine Performance	517
10.2	Condensers	518
10.2.1	Surface Condenser Operation	519
10.2.2	Surface Condenser Maintenance	520
10.2.3	Air-Cooled Steam Condenser Operation	522
10.3	Cooling Towers	523
10.3.1	Operation of Cooling Towers	524
10.3.2	Maintenance of Cooling Towers	527
10.4	Auxiliaries	528
10.4.1	Traveling Screens	528
10.4.2	Pumps	529
10.4.3	Steam-Jet Ejectors and Vacuum Pumps	529
10.4.4	Vacuum Gauges	530
	Questions and Problems	531
11	Auxiliary Steam-Plant Equipment	533
11.1	Condensate System	534
11.2	Feedwater Heaters	536
11.2.1	Closed Feedwater Heaters	536
11.2.2	Open Feedwater Heaters (Deaerators)	539
11.2.3	Operation and Maintenance of Feedwater Heaters	551
11.3	Condensate Polishing Systems	551
11.4	Raw Water Treatment	553
11.4.1	Ion-Exchange Water Conditioners	554
11.4.2	Evaporators	557
11.5	Boiler Blowdown	559

11.6	Piping System	561
11.7	Steam Traps	569
11.8	Pipeline Separators and Strainers	574
11.9	Lubricants and Lubricating Devices	576
	Questions and Problems	582
12	Environmental Control Systems	585
12.1	Introduction	585
12.2	Environmental Considerations	585
12.3	Sources of Plant Emissions	585
12.4	Available Technologies for the Control of Emissions	588
12.4.1	SO ₂ Control	588
12.4.2	NO _x Control	588
12.4.3	Particulate Control	589
12.4.4	Control of Carbon Dioxide (CO ₂)	590
12.5	Regulatory Requirements	592
12.6	Particulate and Sulfur Dioxide Removal Requirements	594
12.6.1	Particulate Removal	594
12.6.2	Sulfur Dioxide Removal	596
12.6.3	Industrial Boilers	597
12.7	Equipment for Particulate Emission Control	598
12.7.1	Mechanical Collectors	598
12.7.2	Electrostatic Precipitators	599
12.7.3	Bag Filterhouses	606
12.8	Equipment for Sulfur Dioxide Scrubber Systems	611
12.8.1	Wet Scrubbers	611
12.8.2	Dry Scrubbers	616
12.9	Systems for Control of Nitrogen Oxides (NO _x)	625
	Questions and Problems	626
13	Waste-to-Energy Plants	629
13.1	Introduction	629
13.2	Waste Disposal—A Worldwide Problem	632
13.3	Potential Energy from MSW	634
13.4	Landfills	635
13.5	Solid Waste Composition	636
13.6	Types of Energy-Recovery Technologies	639
13.7	Mass Burning	640
13.8	Refuse-Derived Fuel (RDF) Burning	649
13.9	Operation and Maintenance of Refuse Boilers	655
13.10	Recycling	658
13.10.1	Advantages and Disadvantages of Recycling	659
13.10.2	Economics and Quality Products from Recycling ..	660
13.11	Material Recovery Facilities (MRFs)	661
13.12	Waste-to-Energy Plants and Recycling	668
	Questions and Problems	669

A	Unit Conversions	671
B	Geometric Formulas	677
C	Steam Tables and Charts	679
D	Answers to Problems	691
	Glossary	693
	Index	701
