# SENSORS FOR MECHATRONICS

PAUL P.L. REGTIEN

# Contents

<b>Preface</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Sensors in Mechatronics	1
1.1.1 Definitions	1
1.1.2 Sensor Development	3
1.1.3 Sensor Nomenclature	4
1.1.4 Sensors and Information	6
1.2 Selection of Sensors	13
<b>2 Sensor Fundamentals</b>	<b>19</b>
2.1 Physical Quantities	19
2.1.1 Classification of Quantities	19
2.1.2 Relations Between Quantities	23
2.2 Sensor Classifications	26
2.2.1 Classification Based on Measurand and Application Field	26
2.2.2 Classification Based on Port Models	26
2.2.3 Classification Based on Conversion Principles	30
2.2.4 Classification According to Energy Domain	31
<b>3 Uncertainty Aspects</b>	<b>35</b>
3.1 Sensor Specification	35
3.1.1 Sensitivity	36
3.1.2 Non-linearity and Hysteresis	36
3.1.3 Resolution	37
3.1.4 Accuracy	38
3.1.5 Offset and Zero Drift	38
3.1.6 Noise	38
3.1.7 Response Time	39
3.1.8 Frequency Response and Bandwidth	39
3.1.9 Operating Conditions	39
3.2 Sensor Error Reduction Techniques	40
3.2.1 Compensation	41
3.2.2 Feedback Methods	44
3.2.3 Filtering	47
3.2.4 Modulation	48
3.2.5 Demodulation	51
3.2.6 Correction Methods	53

<b>4</b>	<b>Resistive Sensors</b>	<b>57</b>
4.1	Resistivity and Resistance	57
4.2	Potentiometric Sensors	58
4.2.1	Construction and General Properties	58
4.2.2	Electrical Characteristics	59
4.2.3	Interfacing	61
4.2.4	Contact-Free Potentiometers	64
4.2.5	Applications of Potentiometers	66
4.3	Strain Gauges	67
4.3.1	Construction and Properties	67
4.3.2	Interfacing	71
4.3.3	Applications of Strain Gauges	73
4.4	Piezoresistive Sensors	77
4.4.1	Piezoresistivity	77
4.4.2	Micromachined Piezoresistive Sensors	81
4.4.3	Applications of Piezoresistive Sensors	83
4.5	Magnetoresistive Sensors	87
4.5.1	Magnetoresistivity	87
4.5.2	Applications of Magnetoresistive Sensors	91
4.6	Thermoresistive Sensors	91
4.6.1	Thermoresistivity	91
4.6.2	Resistance Thermometer	92
4.6.3	Thermistors	93
4.7	Optoresistive Sensors	95
<b>5</b>	<b>Capacitive Sensors</b>	<b>101</b>
5.1	Capacitance and Permittivity	101
5.2	Basic Configurations of Capacitive Sensors	105
5.2.1	Flat-Plate Capacitive Sensors	105
5.2.2	Multiplate Capacitive Sensors	109
5.2.3	Silicon Capacitive Sensors	110
5.3	Interfacing	113
5.4	Applications	116
5.4.1	Capacitive Sensors for Position- and Force-Related Quantities	116
5.4.2	Particular Applications	118
<b>6</b>	<b>Inductive and Magnetic Sensors</b>	<b>125</b>
6.1	Magnetic and Electromagnetic Quantities	125
6.1.1	Magnetic Field Strength, Magnetic Induction and Flux	125
6.1.2	Permeability	127
6.1.3	Eddy Currents	128
6.1.4	Magnetic Resistance (Reluctance) and Self-Inductance	128
6.1.5	Magnetostriction	129

---

6.2	Magnetic Field Sensors	130
6.2.1	Coil	131
6.2.2	Hall Plate Sensors	131
6.2.3	Fluxgate Sensors	134
6.3	Magnetic and Induction Based Displacement and Force Sensors	136
6.3.1	Magnetic Proximity Switches	137
6.3.2	Inductive Proximity and Displacement Sensors	138
6.3.3	Eddy Current Displacement Sensors	139
6.3.4	Variable Differential Transformers	141
6.3.5	Resolvers and Synchros	143
6.3.6	Magnetostrictive or Elastomagnetic Sensors	145
6.4	Applications	147
6.4.1	Interfacing Inductive Sensors	148
6.4.2	Contact-Free Sensing Using Magnetic and Inductive Sensors	149
6.4.3	Applications of Variable Reluctance and Eddy Current Sensors	150
6.4.4	Applications of Other Inductive Sensors	153
<b>7</b>	<b>Optical Sensors</b>	<b>161</b>
7.1	Electro-Optical Components	161
7.1.1	Light Emitters	162
7.1.2	Light Sensors	165
7.1.3	Position Sensitive Diode	167
7.2	Optical Displacement Sensors	170
7.2.1	Intensity Measurement	170
7.2.2	Triangulation	173
7.2.3	Optical Encoders	176
7.2.4	Interferometry	182
7.2.5	Time-of-Flight	188
7.3	Interfacing	188
7.3.1	LEDs and Photo Diodes	188
7.3.2	Interfacing PSDs	190
7.4	Applications	191
7.4.1	Linear Displacement Sensing	192
7.4.2	Angular Displacement Sensing	199
7.4.3	Object Tracking	201
7.4.4	Object Shape	204
7.4.5	Navigation	208
7.4.6	Force, Torque and Strain Sensing	211
<b>8</b>	<b>Piezoelectric Sensors</b>	<b>219</b>
8.1	Piezoelectricity	219
8.1.1	Piezoelectric Materials	219
8.1.2	Piezoelectric Parameters	221

8.2	Force, Pressure and Acceleration Sensors	228
8.2.1	Construction	228
8.2.2	Characteristics of Accelerometers	230
8.3	Interfacing	232
8.4	Applications	234
8.4.1	Stress and Pressure	235
8.4.2	Acceleration	235
8.4.3	Tactile Sensors	236
<b>9</b>	<b>Acoustic Sensors</b>	<b>241</b>
9.1	Properties of the Acoustic Medium	241
9.1.1	Sound Intensity and Pressure	242
9.1.2	Sound Propagation Speed	242
9.1.3	Acoustic Damping	243
9.1.4	Acoustic Impedance	244
9.2	Acoustic Sensors	245
9.2.1	General Properties	245
9.2.2	Electrostatic Transducers	248
9.2.3	Piezoelectric Transducers	249
9.2.4	Arrays	251
9.3	Measurement Methods	252
9.3.1	Burst	253
9.3.2	Continuous Sine Wave (CW)	255
9.3.3	Frequency-Modulated Continuous Waves (FMCW)	256
9.3.4	Other Signal Types	259
9.4	Applications	259
9.4.1	Navigation	259
9.4.2	Inspection	264
<b>Appendix A</b>	<b>Symbols and Notations</b>	<b>275</b>
A.1	The Electrical Domain	275
A.2	The Thermal Domain	277
A.3	The Mechanical Domain	277
A.4	The Optical Domain	280
A.4.1	Optical Quantities	280
A.4.2	Radiant Energy from a Unit Surface with Lambertian Emission	283
A.4.3	Derivation of Relations Between Intensity and Distance	284
<b>Appendix B</b>	<b>Relations Between Quantities</b>	<b>287</b>
B.1	Generalized Equations	287
B.2	Application to Four Domains	289
B.3	Heckmann Diagrams	292

---

<b>Appendix C</b>	<b>Basic Interface Circuits</b>	<b>295</b>
C.1	Operational Amplifier	295
C.2	Current-to-Voltage Converter	297
C.3	Non-Inverting Amplifier	298
C.4	Inverting Amplifier	300
C.5	Comparator and Schmitttrigger	301
	C.5.1 Comparator	301
	C.5.2 Schmitttrigger	302
C.6	Integrator and Differentiator	303
	C.6.1 Integrator	304
	C.6.2 Differentiator	304
C.7	Filters	307
