

Wiley Series in Biomedical Engineering and
Multi-Disciplinary Integrated Systems • Kai Chang, Series Editor

INTRODUCTION TO NANOMEDICINE AND NANOBIOENGINEERING

Paras N. Prasad

CONTENTS

PREFACE	xiii
ACKNOWLEDGMENTS	xv
1 INTRODUCTION	1
1.1. Nanomedicine: A Global Vision / 1	
1.2. The Nanotechnology Revolution: Realization of Asimov's Fiction / 3	
1.3. Nanomedicine: A New Era in Personalized Medicine / 7	
1.4. Nanomedicine: A Promise or Reality? / 9	
1.5. A New Frontier: Multidisciplinary Challenges and Opportunities / 10	
1.6. Scope of the Book: Multidisciplinary Education, Training, and Research / 12	
References / 13	
2 THE HUMAN BODY	15
2.1. Introductory Concepts / 16	
2.2. Cellular Structure / 18	
2.3. Various Types of Cells / 23	
2.4. Biochemical Makeup of Cells / 25	
2.5. Other Important Cellular Components / 29	
2.6. Cellular Processes / 30	

- 2.7. Organization of Cells into Tissues / 37
- 2.8. Types of Tissues and Their Functions / 39
- 2.9. Various Organs and Organ Systems in the Body / 40
- 2.10. Tumors and Cancers / 45
- Highlights of the Chapter / 46
- Exercises / 48
- References / 49

3 NANOCARRIERS

51

- 3.1. Nanocarriers: Delivering Payloads to Needed Sites / 52
- 3.2. The Various Nanoformulations for Nanomedicine / 53
- 3.3. Viruses as Nanocarriers / 55
- 3.4. Polymeric Nanocarriers / 56
- 3.5. Lipid-Based Nanocarriers / 58
- 3.6. Dendrimers / 59
- 3.7. Carbon Nanostructures / 61
- 3.8. Inorganic Nanoparticles / 63
- 3.9. PEBBLE / 65
- 3.10. Nanoclinics / 66
- 3.11. Nanoplexes / 68
- 3.12. New-Generation Nanocarriers / 69
- Highlights of the Chapter / 70
- Exercises / 72
- References / 73

4 NANOCHEMISTRY OF NANOCARRIERS

77

- 4.1. Nanochemistry and Nanomedicine / 78
- 4.2. Top-Down Approaches / 78
 - 4.2.1. Mechanical Milling / 79
 - 4.2.2. Dip-Pen Nanolithography / 79
 - 4.2.3. PRINT Process / 81
 - 4.2.4. Laser Ablation / 81
- 4.3. Bottom-Up Approaches / 83
 - 4.3.1. Dendrimers / 83
 - 4.3.2. Microemulsion Chemistry / 86
 - 4.3.3. Hot-Colloidal Synthesis / 87
 - 4.3.4. Seed-Mediated Synthesis of Anisotropic Metallic Nanostructures / 90
 - 4.3.5. Reprecipitation Method / 90

4.4.	Combination of Bottom-Up and Top-Down Approaches / 92	
4.5.	Nanoparticle Surface Modification / 93	
4.6.	Functionalization and Bioconjugation / 95	
	Highlights of the Chapter / 97	
	Exercises / 99	
	References / 100	
5	MULTIFUNCTIONALITIES FOR DIAGNOSTICS AND THERAPY	103
5.1.	The Various Functionalities / 104	
5.2.	Optical Functionalities / 105	
5.3.	Optical Nanoprobes / 110	
5.4.	Magnetic Functionality / 116	
5.5.	Thermal Functionality / 120	
5.6.	Radioactive Functionality / 121	
5.7.	Biological Functionality / 124	
5.8.	Multifunctionality / 125	
	Highlights of the Chapter / 128	
	Exercises / 130	
	References / 131	
6	CROSSING THE BIOLOGICAL BARRIERS	135
6.1.	Various Delivery Pathways / 135	
6.2.	Various Biological Barriers / 137	
6.3.	Stealth Nanoparticles / 140	
6.4.	The Various <i>In Vitro</i> Barrier Models / 141	
	Highlights of the Chapter / 144	
	Exercises / 145	
	References / 146	
7	BIOTARGETING	149
7.1.	Biotargeting: Why We Need It / 149	
7.2.	Targeted Biological Sites / 150	
7.3.	Intracellular Uptake / 151	
7.4.	Targeting Strategies / 153	
7.5.	Targeting Groups / 155	
	Highlights of the Chapter / 159	
	Exercises / 160	
	References / 161	

8	MULTIMODAL BIOMEDICAL IMAGING	163
8.1.	Biomedical Imaging Techniques / 164	
8.2.	Optical Bioimaging / 170	
8.2.1.	Fluorescence Microscopy / 170	
8.2.2.	Quantitative FRET Microscopy / 172	
8.2.3.	Technical Challenges for <i>In Vitro</i> Imaging / 175	
8.2.4.	<i>In Vivo</i> Optical Imaging / 177	
8.2.5.	Optical Coherence Tomography / 177	
8.2.6.	Super-Resolution Fluorescence Microscopy / 181	
8.3.	Magnetic Resonance Imaging / 185	
8.4.	X-Ray CT Imaging / 188	
8.5.	Radio Imaging / 190	
8.6.	Ultrasound Imaging / 190	
8.7.	Photoacoustic Imaging / 191	
8.8.	Multimodal Imaging / 192	
	Highlights of the Chapter / 193	
	Exercises / 200	
	References / 201	
9	BIOSENSING	207
9.1.	Principles of Biosensing / 208	
9.2.	Optical Biosensors / 211	
9.2.1.	Fluorescences Sensors / 211	
9.2.2.	Plasmonic Sensors / 218	
9.2.3.	Photonic Crystal Sensors / 227	
9.3.	Magnetic Biosensors / 228	
9.4.	Electrical Biosensing / 234	
9.5.	Electrochemical Biosensing / 236	
9.6.	Electrochemiluminescence Biosensing / 238	
9.7.	<i>In Vivo</i> Bioelectronic Sensors / 239	
	Highlights of the Chapter / 241	
	Exercises / 245	
	References / 247	
10	HIGH-THROUGHPUT MULTIPLEXED DIAGNOSTICS	253
10.1.	Comprehensive Diagnostic Strategy / 254	
10.2.	Flow Cytometry / 255	
10.3.	Enzyme-Linked Immunosorbent Assay (ELISA) / 264	

10.4.	Microarrays Technology / 269	
10.5.	Suspension Bead Assay / 277	
	Highlights of the Chapter / 281	
	Exercises / 285	
	References / 286	
11	NANOPHARMACOTHERAPY	291
11.1.	Nanopharmacotherapy: An Overview / 292	
11.2.	Modes of Nanoformulation for Nanopharmacotherapy / 294	
11.3.	Pharmacokinetics / 296	
11.4.	Biodistribution / 297	
11.5.	Pharmacodynamics / 298	
11.6.	Controlled Release by External Activation / 299	
	Highlights of the Chapter / 300	
	Exercises / 302	
	References / 303	
12	THE HUMAN CIRCULATORY SYSTEM AND THERANOSTICS	305
12.1.	Blood Fluidics and Cardiovascular System / 306	
12.2.	Circulatory-System-Based Disease Profiling / 309	
12.3.	Methods to Monitor Blood Flow / 312	
12.4.	Therapeutic Approaches Utilizing Manipulation of Blood Flow / 318	
12.5.	Lymph Node Mapping / 320	
12.6.	Lymphatic Drug Delivery / 322	
	Highlights of the Chapter / 322	
	Exercises / 326	
	References / 327	
13	NANOTECHNOLOGY FOR CANCER	331
13.1.	Benefits of Cancer Nanotechnology / 332	
13.2.	Chemotherapy / 335	
13.3.	Cancer Gene Therapy / 339	
13.4.	Photodynamic Therapy / 340	
13.5.	Magnetic Therapy / 349	
13.6.	Photothermal Therapy / 353	
13.7.	Neutron Capture Therapy / 357	

- 13.8. Circulating Tumor Cells / 359
- 13.9. NCI Alliance for Cancer Nanotechnology / 360
- Highlights of the Chapter / 360
- Exercises / 362
- References / 364

14 GENE THERAPY 371

- 14.1. The Principles, Steps, and Impact of Gene Therapy / 372
- 14.2. Methods of Gene Delivery / 374
- 14.3. Gene Augmentation Therapy / 381
- 14.4. Gene Silencing Therapy / 381
- 14.5. Indirect Gene Therapy Modulating Innate Immune Response / 384
- 14.6. Transmucosal Gene Delivery / 385
- Highlights of the Chapter / 386
- Exercises / 388
- References / 390

15 NANOTECHNOLOGY FOR INFECTIOUS DISEASES 393

- 15.1. Pathogen Infections and Nanoparticle-Based Approaches / 394
- 15.2. HIV / 401
 - 15.2.1. Diagnosis / 402
 - 15.2.2. Vaccines and Antimicrobial Drugs / 404
 - 15.2.3. Therapy / 405
- 15.3. Influenza / 408
 - 15.3.1. Diagnosis / 408
 - 15.3.2. Vaccines / 409
 - 15.3.3. Therapy / 409
- 15.4. Tuberculosis / 410
 - 15.4.1. Diagnosis / 410
 - 15.4.2. TB Vaccine / 412
 - 15.4.3. Therapy / 412
- 15.5. Malaria / 416
 - 15.5.1. Vaccines / 418
 - 15.5.2. Therapy / 420
- Highlights of the Chapter / 422
- Exercises / 424
- References / 426

16	REJUVENATION THERAPY	433
16.1.	Rejuvenation Therapy: <i>Fantasy or Reality?</i> / 433	
16.2.	Free Radical Scavenging / 436	
16.3.	Chelation Therapy / 439	
16.4.	Hormone Therapy / 441	
	Highlights of the Chapter / 442	
	Exercises / 443	
	References / 444	
17	STEM CELL BIOTECHNOLOGY	447
17.1.	Stem Cell Biotechnology: Overview / 448	
17.2.	Cell Reprogramming / 449	
17.3.	Gene Transfection / 452	
17.4.	Somatic Cell Transdifferentiation / 453	
17.5.	Stem Cell Sorting / 454	
17.6.	Stem Cell Tracking / 454	
	Highlights of the Chapter / 456	
	Exercises / 456	
	References / 457	
18	TISSUE ENGINEERING	461
18.1.	Tissue Engineering: Overview / 462	
18.2.	Tissue Regeneration / 464	
18.3.	Nanotechnology in Tissue Engineering / 467	
18.4.	Nanofibers for Tissue Engineering / 472	
18.5.	Nanoparticle Delivery of Biomolecules / 473	
18.6.	Magnetically Assisted Tissue Engineering / 474	
18.7.	Tissue/Organ Printing / 475	
18.8.	Tissue Bonding / 477	
	Highlights of the Chapter / 479	
	Exercises / 482	
	References / 484	
19	NANODERMATOLOGY AND NANOCOSMETICS	487
19.1.	Delivery Through Skin / 487	
19.2.	Skin Care and Nanotechnology / 488	
19.3.	Various Nanoparticles for Dermatology and Cosmetics / 491	
19.4.	Nanodermatology / 492	

- 19.5. Nanocosmetics / 494
- 19.6. Nanotoxicology of the Skin / 497
- Highlights of the Chapter / 497
- Exercises / 498
- References / 499

20 NANODENTISTRY 503

- 20.1. Nanotechnology for Dental Care / 504
- 20.2. Nanoparticles for Preventive Dentistry / 507
- 20.3. Nanomaterials for Restorative Dentistry / 509
- 20.4. Regenerative Dentistry / 516
- 20.5. Nanoparticle-Enhanced Dental Imaging and Oral Diagnostics / 519
- 20.6. Nanorobotics for Dentistry / 522
- Highlights of the Chapter / 522
- Exercises / 524
- References / 525

21 NANOTOXICITY 529

- 21.1. Toxicity of Nanoparticles / 529
- 21.2. Cytotoxicity / 533
- 21.3. *In Vitro* Cytotoxicity Assays / 535
- 21.4. *In Vivo* Toxicity / 539
- 21.5. *In Vivo* Toxicity Evaluation / 542
- 21.6. Nanotoxicity Studies on Selected Nanoparticles / 542
- Highlights of the Chapter / 547
- Exercises / 550
- References / 551
