

TABLE OF CONTENTS

1.0 INTRODUCTION	
1.1 Background	1-1
1.2 Organization of the Manual	1-4
1.3 Use of the Manual	1-5
1.4 References	1-8
2.0 POLICIES, PROCESS, AND FUNDING	
2.1 Policy Development	2-2
2.2 Signal Timing Process	2-7
2.3 Performance Measures and National Perspective in Signal Timing	2-11
2.4 Funding Considerations	2-13
2.5 Examples of Programs	2-15
2.6 References	2-17
3.0 OPERATIONAL AND SAFETY ANALYSIS	
3.1 Terminology	3-1
3.2 Characteristics Affecting Signal Timing	3-2
3.3 Capacity and Critical Movement Analysis	3-5
3.4 Intersection-Level Performance Measures and Analysis Techniques	3-14
3.5 Arterial- and Network-Level Performance Measures and Prediction Techniques	3-18
3.6 Safety Assessment	3-25
3.7 Signal Warrants	3-27
3.8 References	3-29
4.0 TRAFFIC SIGNAL DESIGN CONCEPTS	
4.1 Overview	4-1
4.2 Phasing Overview	4-3
4.3 Left-Turn Display Options	4-7
4.4 Left-Turn Phase Sequence Options	4-14
4.5 Pedestrian Phasing	4-18
4.6 Right-Turn Phasing	4-20
4.7 Detection Fundamentals	4-20
4.8 Detection Applications	4-26
4.9 References	4-30
5.0 BASIC SIGNAL TIMING PROCEDURE AND CONTROLLER PARAMETERS	
5.1 Terminology and Key Definitions	5-1
5.2 Modes of Traffic Signal Operation and Their Use	5-2
5.3 Phase Intervals and Basic Parameters	5-4
5.4 Actuated Timing Parameters	5-17
5.5 Volume-Density Features	5-22
5.6 Detection Configuration and Parameters	5-26
5.7 Guidelines for Time-Base Controls	5-29
5.8 References	5-30
6.0 COORDINATION	
6.1 Terminology	6-1
6.2 Principles of Coordinated Operation	6-2
6.3 Coordination Mechanics	6-8
6.4 Time-Space Diagram	6-16
6.5 Transition Logic	6-22
6.6 Coordination Timing Plan Guidelines	6-27

6.7	Coordination Complexities	6-38
6.8	References	6-49
7.0 DEVELOPING SIGNAL TIMING PLANS		
7.1	Overview	7-1
7.2	Project Scoping	7-4
7.3	Data Collection	7-10
7.4	Model Development	7-16
7.5	Field Implementation and Fine Tuning	7-25
7.6	Evaluation of Timing	7-27
7.7	References	7-30
8.0 SIGNAL TIMING MAINTENANCE: OPERATIONS AND MONITORING		
8.1	Overview	8-1
8.2	Traffic Signal Operations	8-2
8.3	Day-to-Day Operations	8-4
8.4	Staffing Needs	8-9
8.5	References	8-13
9.0 ADVANCED SIGNAL TIMING CONCEPTS		
9.1	Traffic Signal Preemption	9-1
9.2	Traffic Signal Priority	9-4
9.3	Traffic Responsive Operation	9-7
9.4	Adaptive Traffic Signal Control	9-8
9.5	Planned Special Events, Incident, & Emergency Management	9-13
9.6	Weather-Related Factors that Influence Signal Timing	9-14
9.7	References	9-16
GLOSSARY		G-1
