

# CONTENTS

## **Chapter 1 INTRODUCTION TO SOLAR ENERGY 1**

- 1.0 Overview of This Chapter 1
- 1.1 Modern Solar Energy Systems 2
- 1.2 Producing Electricity from Solar Energy 6
- 1.3 Types of Photovoltaic Cells 8
- 1.4 History of Photovoltaic Cells 10
- 1.5 Factors that Affect the Amount of Solar Energy Reaching the Earth 13
- 1.6 How Weather Affects How Much Solar Energy Can Be Converted. 14
- 1.7 Other Terms for Solar Energy Systems 14
- 1.8 Storing Solar Energy 15
- 1.9 Grid-Tied Solar Photovoltaic System 16
- 1.10 Parabolic Trough Systems That Generate Electricity 16
- 1.11 Dish/Engine Systems for Generating Electricity 17
- 1.12 Federal and State Departments That Provide Research for Solar Energy 18
- 1.13 Political Implications 19
- 1.14 Financial Implications and Return on Investment 19
- 1.15 Other Ways to Get Income from Solar Energy 20
- 1.16 Green Energy Payback Calculations 20
- 1.17 Online Payback Calculators 21
- 1.18 Tax Considerations for Solar Power 22
- 1.19 Additional U.S. Investment Tax Credit 22
- 1.20 Examples of State Programs 23
- 1.21 Checking Out the Latest Offer 23
- 1.22 Skills Needed for Green Technology Jobs 23

## **Chapter 2 ELECTRICAL AND ENERGY DEMANDS FOR THE UNITED STATES AND THE WORLD 27**

- 2.0 Overview of This Chapter 27
- 2.1 The Need for an Uninterrupted and Continuous Power Supply 28
- 2.2 Ways to Work Around Varying Amounts of Electricity Generated by Solar Energy 28
- 2.3 Transmission Limitations for Electricity 28
- 2.4 The Electrical Demand for the United States 29
- 2.5 Total Installed Electrical Generation Capacity 31
- 2.6 Total Daily Demand for Electricity in the United States 31
- 2.7 Backup Power 34
- 2.8 Residential Demand 34
- 2.9 Grid-Tied Systems 34
- 2.10 Stand-Alone Remote Power Source 36
- 2.11 Environmental Assessment for Solar Power 36

**Chapter 3 TYPES OF SOLAR ENERGY SYSTEMS 38**

- 3.0 Overview of This Chapter 38
- 3.1 Modern Solar Energy Systems 39
- 3.2 Solar Lighting 39
- 3.3 Solar Heating Used to Provide Hot Water 42
- 3.4 Using a Solar Water Heating System to Heat a Swimming Pool 48
- 3.5 Passive Hot Water Heating Systems 48
- 3.6 Solar Heating Using Air 49
- 3.7 Solar Photovoltaic Panels 50
- 3.8 Solar Photovoltaic Cells and Modules 54
- 3.9 Types of Solar PV Panels 55
- 3.10 Mounting Solar Panels 62
- 3.11 Concentrated Solar Energy Systems and the Stirling Engine 67

**Chapter 4 SOLAR INSTALLATIONS AND SOLAR FARMS 69**

- 4.0 Overview of This Chapter 69
- 4.1 Project Development 70
- 4.2 Solar Energy Site Assessment 70
- 4.3 Site Issues 71
- 4.4 Visual and Landscape Assessment 72
- 4.5 Small Residential Solar Energy Systems 72
- 4.6 Homemade Solar Energy System Systems 75
- 4.7 Solar Energy Farms 80
- 4.8 Largest Solar Farms in the World 84
- 4.9 Electrical Energy Produced by Parabolic Trough Solar Collectors 85
- 4.10 Production of Solar Panels and Solar Equipment 86
- 4.11 Largest Solar Energy Companies Around the World 87

**Chapter 5 BASIC PHOTOVOLTAIC (PV) PRINCIPLES AND TYPES OF SOLAR PV CELLS (CONVERTING SOLAR ENERGY TO ELECTRICITY) 89**

- 5.0 Overview of This Chapter 89
- 5.1 Conductors, Insulators, and Semiconductors 90
- 5.2 Conductors, Insulators, and Semiconductors in the Periodic Table of Elements 93
- 5.3 Simplified Structure of a Conductor 94
- 5.4 Simplified Structure of an Insulator 94
- 5.5 Simplified Structure Of A semiconductor 94
- 5.6 Combining Silicon Atoms 95
- 5.7 Combining Phosphorous or Arsenic with Silicon to Make N-Type Material 95
- 5.8 Combining Boron and Silicon to Make P-Type Material 96
- 5.9 Creating a PN Junction 96
- 5.10 Connecting the PN Junction to an External Load 97
- 5.11 Basic Explanation Of How A Silicon PV Cell Produces Electrical Power When Light Strikes It 97
- 5.12 Gallium Arsenide (GaAs) Photovoltaic Cells 98
- 5.13 Cadmium Telluride (CdTe) Photovoltaic Cells 98

5.14 Copper Indium Gallium (di)Selenide (CIGS) Photovoltaic Cells 99

5.15 Mass-Producing Silicon for PV Cells 99

## **Chapter 6 CONSTRUCTION AND MANUFACTURING OF SOLAR PV PANELS 101**

6.0 Overview of This Chapter 101

6.1 Panel Test Standards 101

6.2 Making a Rigid Frame Solar Panel 102

6.3 Making Solar Panels from Polycrystalline Cells 105

6.4 Creating Solar PV Panels Using Thin Film Amorphous Silicon 109

6.5 General Technology Used to Build a DuPont Solar Photovoltaic Panel 110

6.6 Technical Data Sheets 112

6.7 Other Types of Data Sheets for a Solar Panel 114

## **Chapter 7 ELECTRICITY FOR SOLAR ENERGY: BASIC ELECTRICAL PRINCIPLES USED FOR SOLAR PV SYSTEMS 116**

7.0 Overview of This Chapter 117

7.1 Basic Electricity and a Simple Electrical Circuit 117

7.2 Measuring Volts, Amps, and Ohms 121

7.3 Using Ohm's Law to Calculate Volts, Amps, and Ohms 125

7.4 Fundamentals of Electrical Circuits 127

7.5 Examples of Series Circuits 128

7.6 Parallel Circuits 131

7.7 Introduction to Magnetic Theory 133

7.8 Alternating Current 136

7.9 Resistance And Inductance in an AC Circuit 139

7.10 True Power and Apparent Power in an AC Circuit 140

7.11 Calculating the Power Factor 140

7.12 Theory and Operation of a Relay and Contactor 140

## **Chapter 8 PHOTOVOLTAIC (PV) CONTROLLERS AND INVERTERS 145**

8.0 Overview of This Chapter 146

8.1 Types of Applications That Need Charge Controllers 146

8.2 Basic Operation of a Solar Charger Controller 147

8.3 Basic Control Diagrams for Photovoltaic Systems 149

8.4 Power Distribution Diagram for a Larger Industrial Photovoltaic System 150

8.5 Anti-Islanding Circuits and Other Protection Circuits 154

8.6 Basic Operation of an Inverter 155

8.7 Overview Of DC-to-DC Voltage Conversion 159

## **Chapter 9 STORING ELECTRICAL ENERGY AND BATTERIES 165**

9.0 Overview of This Chapter 166

9.1 What a Battery Is and How It Stores Electrical Energy 166

9.2 Terms Used with Batteries 167

9.3 Primary and Secondary Battery Cells 170

9.4 Wet Cell and Dry Cell Batteries 170

9.5 Sealed Batteries 171

- 9.6 How a Lead Acid Battery Is Manufactured 172
- 9.7 How an Absorbed Glass Mat (AGS) Battery Is Manufactured 174
- 9.8 Theory of Operation and Advantages and Disadvantages of Different Types of Batteries 174
- 9.9 Batteries Designed and Used Specifically for Solar Energy Storage Applications 177
- 9.10 Solar High-Powered Flooded Battery 178
- 9.11 Advanced Gel Sealed Battery 178
- 9.12 Modular Racks for Solar Batteries 178
- 9.13 Connecting Batteries in Series and Parallel for Solar Banks 179
- 9.14 Periodic Maintenance for Solar Energy Storage Batteries 180
- 9.15 Troubleshooting Battery Problems in Solar Energy Systems 181
- 9.16 The Effects of Temperature on Batteries 183

## **Chapter 10 THE GRID AND INTEGRATION OF SOLAR-GENERATED ELECTRICITY INTO THE GRID 185**

- 10.0 Overview of This Chapter 186
- 10.1 Understanding the Grid 186
- 10.2 The Smart Grid 188
- 10.3 Transformers, Transmission, and Distribution Infrastructures 190
- 10.4 The Grid Code Rules and Regulations 195
- 10.5 National Electrical Code and Other Requirements for the Grid 195
- 10.6 Supplying Power for a Building or Residence 196
- 10.7 Switches and Connections for Power Distribution 196
- 10.8 Utility Grid-Tied Net Metering 197
- 10.9 Overview of Power Quality Issues 198
- 10.10 Frequency and Voltage Control 198
- 10.11 Voltage, True Power, and Reactive Power 198
- 10.12 Low Voltage Ride Through (LVRT) 199
- 10.13 Flicker and Power Quality 199
- 10.14 System Grounding 200
- 10.15 Underground Feeder Circuits 201
- 10.16 Cable Installation 202
- 10.17 Overhead Feeder Circuits 202
- 10.18 Solar Farm System Substation and Main Components 203
- 10.19 Connecting to Residential or Commercial Single-Source Power Systems 203

## **Chapter 11 INSTALLING, TROUBLESHOOTING, AND MAINTAINING SOLAR ENERGY SYSTEMS 205**

- 11.0 Overview of This Chapter 205
- 11.1 Installing Solar Panels at a Residential Location 206
- 11.2 Commercial Installation of Solar Panels 210
- 11.3 Installation of Ground Panels on a Large Solar Farm 225
- 11.4 Installing a Solar Panel on a Pole 227
- 11.5 Tracking Systems for Solar Panels 229
- 11.6 Theory of Servo Systems, Open- and Closed-Loop Feedback Systems 231

11.7 Stepper Motor Used to Drive Solar Panel Axis Controls 232

11.8 Troubleshooting Solar Photovoltaic Panels 235

**Chapter 12 ELECTRICITY AND ELECTRONICS FOR SOLAR ENERGY SYSTEMS 239**

12.0 Overview for This Chapter 240

12.1 Three-Phase Transformers 240

12.2 Introduction to DC Motors 243

12.3 AC Motors 254

12.4 Why Motor Starters Are Used 259

12.5 Fuses 262

12.6 Electronic Components Used in Inverters and Circuits 264

*Glossary 280*

*Acronyms 289*

*Index 291*
