<i>List of Figures</i>	xi
<i>List of Tables</i>	xix
<i>Preface</i>	xxi
<i>Nomenclature</i>	xxiii
1. Introduction	1
Part One	
2. Bubble Columns	5
2.1 Introduction	6
2.2 Types of Bubble Columns	6
2.3 Introduction of Gas	7
2.3.1 Methodology of Gas Injection	8
2.3.2 Bubble Formation and Size Change	11
2.3.3 Bubble Movement	16
2.3.3.1 Bubble Shape	16
2.3.3.2 Bubble Motion	17
2.3.3.3 Bubble Velocity	17
2.3.3.4 Effect of Multiple Bubbles	21
2.3.4 Void Fraction Prediction	22
2.3.5 Detailed Behaviour of the Flow	33
2.3.6 Gas-Liquid Mass Transfer	37
2.3.7 Design of Gas Introduction Arrangement	41
2.3.8 Worked Example	42
2.4 Disengagement of Liquid from Gas	43
2.4.1 Mechanisms of Drop Formation	43
2.4.2 Drop Capture	44
2.4.3 Wave Plate Mist Eliminators	47
2.4.4 Mesh Mist Eliminators	51
Questions	54
References	56
3. Sparged Stirred Vessels	61
3.1 Introduction	62
3.2 Flow Regimes	63
3.3 Variations	65
3.4 Spargers	65

3.5	Impellers	67
3.5.1	Disc Turbines	67
3.5.2	Pitched Blade Turbines	69
3.5.3	Hydrofoil Impellers	69
3.5.4	Multiple Impellers	72
3.6	Baffles	72
3.7	Power Requirements	73
3.7.1	Single Impellers	73
3.7.2	Multiple Impellers	75
3.7.3	Single-Phase Power	76
3.8	Gas Fraction	77
3.9	Mass Transfer	79
3.9.1	Bubble Size	79
3.9.2	Interfacial Area	80
3.9.3	Mass Transfer	81
3.10	Mixing Times	84
	Questions	85
	References	87
4.	Thin Film Reactors	91
4.1	Introduction	91
4.2	Falling Film Reactors	92
4.2.1	Film Thickness	96
4.2.2	Interfacial Waves	99
4.2.3	Heat and Mass Transfer	102
4.3	Rotating Disc Reactors	105
4.3.1	Film Thickness	105
4.3.2	Interfacial Waves	107
4.3.3	Mass Transfer	108
4.4	Two-Phase Tubular Reactors	109
4.5	Monolith Reactors	113
4.5.1	Micro-Channels	115
4.5.2	Flow Phenomena in Micro-Channels	115
4.5.3	Numerical Modelling	117
	Questions	119
	References	120
5.	Macroscale Modelling	125
5.1	Introduction	126
5.2	Eulerian Multiphase Flow Model	128
5.2.1	Definition	128
5.2.2	Transport Equations	128
5.2.2.1	Continuity Equation	129
5.2.2.2	Momentum Equation	129
5.2.2.3	Energy Equation	130

5.2.3	Interfacial Forces	130
5.2.3.1	Drag Force	130
5.2.3.2	Lift Force	132
5.2.3.3	Virtual Mass Force	132
5.2.3.4	Turbulent Drag Force	133
5.2.3.5	Basset Force	133
5.2.3.6	Wall Lubrication Force	133
5.2.4	Turbulence Models	134
5.2.5	Case Study – Cylindrical Bubble Column	135
5.2.6	Homogenous and Mixture Modelling	135
5.2.6.1	General Formulation	136
5.2.6.2	Mixture Model	137
5.3	Poly-Dispersed Flows	139
5.3.1	Methods of Moments	139
5.3.1.1	Breakup Model	140
5.3.1.2	Coalescence Model	141
5.3.2	Case Study – Hibiki’s Bubble Column	142
5.3.2.1	Numerical Solution Method	142
5.3.2.2	Results and Discussion	142
5.3.2.3	Summary of Case Study	148
5.4	Gassed Stirred Vessels	149
5.4.1	Impeller Model	149
5.4.2	Multiple Reference Frame	150
5.4.3	Multiple Impellers	150
5.5	Summary	154
	Questions	155
	References	156
6.	Mesoscale Modelling Using the Lattice Boltzmann Method	159
6.1	Introduction	159
6.2	Lattice Boltzmann Method and the Advantages	161
6.3	Numerical Simulation of Single-Phase Flow and Heat Transfer	163
6.3.1	LBM Model	164
6.3.2	Treatment for a Curved Boundary	166
6.3.3	Numerical Simulation and Results	167
6.4	Numerical Simulation of Two-Phase Flow	169
6.4.1	Two-Phase Lattice Boltzmann Model	169
6.4.2	Vortices Merging in a Two-Phase Spatially Growing Mixing Layer	175
6.4.3	Viscous Fingering Phenomena of Immiscible Two-Fluid Displacement	176
6.4.4	Bubbles/Drops Flow Behaviour	178
6.4.4.1	LBM Method	178
6.4.4.2	Correction of Pressure	181
6.4.4.3	Boundary Treatment	181

6.4.4.4	Results of Two Rising Bubbles Coalescence	183
6.4.4.5	Results of Droplet Spreading on Partial Wetting Surface	185
	References	187
Part Two		
7.	Upset Conditions	193
7.1	Introduction	193
7.2	Active Relief Methods	194
7.3	Passive Relief Methods	195
	References	199
8.	Behaviour of Vessel Contents and Outflow Calculations	201
8.1	Introduction	201
8.1.1	Physics of Venting Processes	201
8.1.2	Typical Reactions	202
8.1.3	Trends and Observations	203
8.1.4	Summary of Observations and Measurements of the Level Swell Process	210
8.2	Modelling of the Level Swell Process	212
8.3	Vent Sizing and Vent Performance Calculations	216
8.4	Computer Codes for Level Swell and Venting Calculations	220
8.5	Obtaining Necessary Data	222
8.6	Performance of Models and Codes	226
	Appendix 8.A	228
	Appendix 8.B	230
	Questions	233
	References	235
9.	Choked Flow	237
9.1	Introduction	237
9.2	Single-Phase Flow	239
9.3	Two-Phase Flow	241
9.4	Effect of Vent Pipework	250
	Questions	255
	References	256
Part Three		
10.	Measurement Techniques	259
10.1	Bubble Columns	260
10.1.1	Gas Hold-Up	260
10.1.2	Local Probes: Conductance or Refraction Index	261

10.1.2.1	Gas Fraction	261
10.1.2.2	Bubble Size and Velocity	263
10.1.3	Wire Mesh Sensors	264
10.1.4	Photographic Techniques	266
10.1.5	Laser Doppler Anemometry (LDA)	267
10.1.6	Particle Image Velocimetry (PIV)	268
10.1.7	Electrical Tomography Methods (ECT and ERT)	269
10.1.8	γ and X-Ray Tomography	273
10.1.9	CARPT and PEPT	277
10.1.10	Acoustic Methods	279
10.1.11	Mass Transfer Coefficient	281
10.2	Sparged Stirred Tanks	283
10.2.1	Power Draw	283
10.2.1.1	Strain Gauges	284
10.2.1.2	Measurement of Motor Power	285
10.2.1.3	Modified Rheometer Method	285
10.2.2	Velocity Field	285
10.2.3	Void Fraction	286
10.2.4	Mixing Time	286
10.2.5	Mass Transfer Coefficient	288
10.3	Falling Film Reactors	290
10.3.1	Film Thickness	290
10.3.2	Heat and Mass Transfer	296
	Questions	300
	References	302
