

Contents

Volume 1		Pinch Technology	705
Symbols and Units.....	IX	Combustion	719
Conversion Factors	XI	Part 3: Process Development	
Abbreviations.....	XII	and Intensification.....	747
Country Codes	XVII	Process Development, 1. Fundamentals	
Periodic Table of Elements	XVIII	and Standard Course	749
Part 1: Chemical Reaction Engineering		Process Development, 2. Evaluation.....	773
and Reactor Types	1	Process Intensification, 1. Fundamentals	
Principles of Chemical Reaction		and Molecular Level.....	793
Engineering	3	Process Intensification, 2. Phase Level ...	817
Biochemical Engineering	83	Process Intensification, 3. Process	
Reaction Engineering in Metallurgical		Unit Level	845
Processing	153	Process Intensification, 4. Plant Level	869
Model Reactors and their Design		Part 4: Plant and Process Safety	899
Equations.....	179	Plant and Process Safety, 1. Introduction	901
Bubble Columns	227	Plant and Process Safety, 2. Hazardous	
Chromatographic Reactors	249	Materials and Process Conditions	905
Electrochemical Reactors	277	Plant and Process Safety, 3. Occupational	
Catalytic Fixed-Bed Reactors.....	305	Hazards and Personnel Protection.....	955
Fluidized-Bed Reactors	371	Plant and Process Safety, 4. Chemical	
Membrane Reactors.....	419	Process Safety Regulation	969
Metallurgical Furnaces	439	Plant and Process Safety, 5. Engineered	
Microalgae Reactors	483	Safety Measures	983
Micro Process Technology,		Plant and Process Safety, 6. Risk Analysis	1011
1. Introduction.....	495	Plant and Process Safety, 7. Risk	
Micro Process Technology, 2. Processing	507	Calculations.....	1095
Microreactors – Modeling and Simulation	571	Plant and Process Safety, 8. Management	
Reactive Distillation	609	of Safety in the Chemical and	
Stirred Tank Reactors.....	623	Petrochemical Industry	1103
Thin-Film Reactors.....	641	Plant and Process Safety, 9. Risk	
Three-Phase Trickle-Bed Reactors.....	651	Communication.....	1139
Tubular Reactors.....	665	Author Index	1151
Volume 2		Subject Index	1155
Part 2: Energy Management	683		
Energy Management in Chemical			
Industry	685
