<i>Introduction: from R&D to RID</i>	<i>xix</i>

PART I From innovation to innovative design

1	What do we know about innovation? Testing the economic and social sciences	3
	1.1 Contemporary innovation: received ideas versus facts	3
	1.2 Innovation seen by the different disciplines	9
	1.3 Innovation: from a phenomenon to a new management object	20
2	Management sciences and innovation: identity of objects and innovation capability	23
	2.1 Innovation capability: transforming the identity of objects	24
	2.2 The conflict between transforming identity and controlling resources	32
	2.3 Building innovation capability: which model for collective action?	45
3	The design activity and innovation capability	51
	3.1 Design: an activity underlying all innovations	53
	3.2 Design: few studies and limited representations	57
	3.3 Innovative design: a fruitful approach for transforming the identity of objects	61
	3.4 Conclusion: design, an analytical framework for innovation capability	63

PART II Design capacities in innovative firms

4	Highly innovative firms – Tefal 1974–1997: the wizards of Rumilly	69
	4.1 What is a ‘model’ firm?	70
	4.2 Non-traditional recipes for growth by innovation	73
	4.3 A surprising ‘metabolism’	83
	4.4 Conclusion: can Tefal be considered a ‘model’ of growth by innovation?	94
5	A model of the innovative firm: design strategy, metabolism and growth regime	97
	5.1 Introduction: Tefal, from the firm to the model?	97
	5.2 The combined dynamics of competencies and products	100
	5.3 A new management object: product lineages	104
	5.4 A new performance criterion: to maximize learning rents	111
	5.5 Ring-based organization	116
	5.6 Conclusion	119
6	Grafting the Tefal model: astonishing performance from an innovative start-up	122
	6.1 Innovative design: a key growth factor for start-ups	122
	6.2 Grafting the Tefal model: selected principles	125

PART III Rebuilding innovation capabilities

7	Large firms and intensive innovation: the recurring R&D crises	139
	7.1 Traditional R&D: initial domestication of innovations	140
	7.2 First crisis: R&D threatened by suffocation in the 1960s	145
	7.3 Second crisis: R&D on the critical path of innovative projects	150
	7.4 Conclusion: the limits of R&D as a means of innovation	157
8	From R&D to RID: missions and organizations of innovative design	160
	8.1 The origins: what is <i>R</i> , what is <i>D</i> ?	162
	8.2 Innovation: the missing structures and processes	177
	8.3 <i>R</i> , <i>D</i> and <i>I</i> as a triadic system	183
	8.4 Conclusion: organizing RID in large companies	189

9	Learning from experience: expansions from an innovative windscreen at Saint-Gobain Sekurit	192
9.1	The unexpected emergence of an innovative design function	193
9.2	Steering the transformation from R&D to RID	201
9.3	Conclusion: a pioneer example?	219

PART IV Innovative design: tools and organizations

10	The methodologies of innovative design: C-K theory, innovation fields and design spaces	225
10.1	From creativity to innovative design reasoning	227
10.2	The innovation function: organizing collective innovative design	238
10.3	Conclusion: using the model to manage typical innovation fields	253
11	Type 1 innovation fields: design in the search for new values – the innovative forms of user involvement	256
11.1	Examples of creations of new product lineages in large firms	256
11.2	Innovation field exploration strategy: ‘depth first’	258
11.3	Example of ΔC - δK reasoning: the Avanti nail-holder	261
11.4	Renewing design spaces by involving users – reverse engineering of users’ ideas	264
11.5	Value of the innovation: the impact on R and on D and the evaluation of I	270
12	Type 2 innovation fields: design by drastic technological change and by regenerating functions	273
12.1	Taking advantage of new techniques: examples of δC - ΔK situations	274
12.2	Innovation field exploration strategy: ‘width first’	276
12.3	Case study of the regeneration of a function: tempered automotive glass	279
13	Type 3 innovation fields: combining scientific research and conceptual innovation	288
13.1	Eventful innovation paths: examples of ΔC - ΔK situations in large firms	290
13.2	Innovation field exploration strategy: dual expansion	292
13.3	Value management: how Schlumberger managed complex design spaces	293

Contents

14	The inevitable return to rule-based design	300
14.1	From the exploration of an innovation field to rule-based design	300
14.2	An extreme case: from a science-based product exploration to a rule-based design process	302
15	Innovative design, platforms and open innovation: the management of exploratory partnerships	312
15.1	What has to be managed in open innovation and platforms: coordination and cohesion in exploratory partnerships	313
15.2	How collaborative devices shape the exploration of innovation fields	319
15.3	Conclusion: towards new spaces for exploratory partnerships?	326
	<i>Conclusion: the governance of innovative design, a third era of modern management?</i>	328
	<i>Bibliographical appendix. Innovation viewed by the different disciplines: an extended survey of the literature</i>	340
	<i>Afterword by Jacques Lacambre and Dominique Levent</i>	401
	<i>Innovative design glossary</i>	403
	<i>Bibliography</i>	413
	<i>Index</i>	438
