A Guide to  
Financial Modelling  
Fundamentals

DANIELLE STEIN FAIRHURST

<b>Preface</b>	<b>xi</b>
<b>CHAPTER 1</b>	
<b><i>What Is Financial Modelling?</i></b>	<b>1</b>
What's the Difference between a Spreadsheet and a Financial Model?	3
Types and Purposes of Financial Models	4
Tool Selection	5
What Skills Do You Need to Be a Good Financial Modeller?	10
The Ideal Financial Modeller	16
Summary	19
<b>CHAPTER 2</b>	
<b>Building a Model</b>	<b>21</b>
Model Design	21
The Golden Rules for Model Design	22
Design Issues	24
The Workbook Anatomy of a Model	25
Project Planning Your Model	27
Model Layout Flow Charting	28
Steps to Building a Model	28
Information Requests	35
Version-Control Documentation	36
Summary	37
<b>CHAPTER 3</b>	
<b>Best Practice Principles of Modelling</b>	<b>39</b>
Document Your Assumptions	39
Linking, Not Hard Coding	39
<i>Only Enter Data Once</i>	40
Avoid Bad Habits	41
Use Consistent Formulas	41
Format and Label Clearly	41
Methods and Tools of Assumptions Documentation	42
Linked Dynamic Text Assumptions Documentation	48
What Makes a Good Model?	51
Summary	52

<b>CHAPTER 4</b>	
<b>Financial Modelling Techniques</b>	<b>53</b>
The Problem with Excel	53
Error Avoidance Strategies	54
How Long Should a Formula Be?	59
Linking to External Files	61
Building Error Checks	63
Avoid Error Displays in Formulas	66
Circular References	67
Summary	70
<b>CHAPTER 5</b>	
<b>Using Excel in Financial Modelling</b>	<b>71</b>
Formulas and Functions in Excel	71
Excel Versions	73
Handy Excel Shortcuts	74
Basic Excel Functions	76
Logical Functions	82
Nesting: Combining Simple Functions to Create Complex Formulas	84
Cell Referencing Best Practices	86
Named Ranges	89
Summary	92
<b>CHAPTER 6</b>	
<b>Functions for Financial Modelling</b>	<b>93</b>
Aggregation Functions	93
LOOKUP Formulas	100
Other Useful Functions	106
Working with Dates	115
Financial Project Evaluation Functions	121
Loan Calculations	126
Summary	131
<b>CHAPTER 7</b>	
<b>Tools for Model Display</b>	<b>133</b>
Basic Formatting	133
Custom Formatting	133
Conditional Formatting	139
Sparklines	143
Bulletproofing Your Model	147
Customising the Display Settings	151
Form Controls	157
Summary	171
<b>CHAPTER 8</b>	
<b>Tools for Financial Modelling</b>	<b>173</b>
Hiding Sections of a Model	173
Grouping	178

Array Formulas	179
Goal Seeking	184
Pivot Tables	186
Macros	190
User-Defined Functions (UDFs)	198
Summary	200

## **CHAPTER 8**

<b>Common Uses of Tools in Financial Modelling</b>	<b>201</b>
Escalation Methods for Modelling	201
Understanding Nominal and Effective (Real) Rates	206
Calculating Cumulative Totals	209
How to Calculate a Payback Period	210
Weighted Average Cost of Capital (WACC)	214
Building a Tiering Table	216
Modelling Depreciation Methods	219
Break-Even Analysis	227
Summary	233

## **CHAPTER 10**

<b>Model Review</b>	<b>235</b>
Rebuilding an Inherited Model	235
Auditing a Financial Model	245
Appendix 10.1: QA Log	250
Summary	250

## **CHAPTER 11**

<b>Stress-Testing, Scenarios, and Sensitivity Analysis in Financial Modelling</b>	<b>251</b>
What's the Difference between Scenario, Sensitivity, and What-If Analysis?	252
Overview of Scenario Analysis Tools and Methods	253
Advanced Conditional Formatting	261
Comparing Scenario Methods	264
Summary	273

## **CHAPTER 12**

<b>Presenting Model Output</b>	<b>275</b>
Preparing an Oral Presentation for Model Results	275
Preparing a Graphic or Written Presentation for Model Results	276
Chart Types	279
Working with Charts	291
Handy Charting Hints	295
Dynamic Range Names	297
Charting with Two Different Axes and Chart Types	300

Bubble Charts	302
Waterfall Charts	307
Summary	316
