

Introduction

What is “The Essentials of Logistics and Management” ?	1
New stakes, new challenges for logistics.....	1
Logistics: a holistic approach	3

Chapter 1

Global Supply Chain Management

1.1 Organization and competition in a globalized economy.....	5
1.2 Global Supply Chain Management	16
1.3 Bibliography.....	30
1.4 The author	31

Chapter 2

The Structure and the Operations of Logistics Systems

2.1 Introduction	33
2.2 Forms and strategies of design	34
2.3 Discovery of stochastic lags and oversized inventories.....	36
2.4 Designing the logistics project's life cycle	39
2.5 Measuring the risk	45
2.6 Simulating the risk profile of the logistics project.....	47
2.7 Designing with multicriteria decision-making tools	51
2.8 Bibliography.....	54
2.9 The author	55

Chapter 3

Designing the Supply Chain

3.1 Supply chain management.....	57
3.2 Managing variety	70
3.3 The supply chain in the digital era	77
3.4 Supply chain management and strategy.....	82
3.5 Turbulent times	89
3.6 The authors	93

Chapter 4

Statistical Forecasting and Demand Analysis

4.1 Introduction	95
4.2 Model application	96
4.3 Characteristics of a chronological series and forecasting basics..	96
4.4 Examples of forecasting models	97
4.5 Forecasting model: application	98

	4.6	Models and forecast results.....	101
	4.7	Quality of a forecast.....	103
	4.8	Interpretation of forecast results.....	106
	4.9	Forecasting approach, application	110
	4.10	Conclusion.....	112
	4.11	Glossary.....	113
	4.12	Bibliography.....	113
	4.13	The author.....	113
Chapter 5		Leading in Service Innovation: Three Perspectives on Customer Service Value Delivery	
	5.1	Understanding the growing importance of innovation in services.....	115
	5.2	Deploying innovation and reinventing service businesses	119
	5.3	Developing cross-functional coordination in service innovation..	124
	5.4	Harnessing technology as an enabling option for strategic value delivery.....	131
	5.5	The author.....	133
Chapter 6		Purchasing and Logistics: Perimeter Overlaps in a Context of Global Sourcing	
	6.1	When survival is the issue, you need to be better than your competitor.....	136
	6.2	Purchasing as the decisive factor of a company's competitiveness	136
	6.3	The sense of "global" sourcing.....	137
	6.4	Successful purchasing is a triangular game.....	138
	6.5	(De)centralization of purchasing	139
	6.6	Long-term partnering with Suppliers (SRM), or iterative re-exposure to competition?.....	140
	6.7	Supplier and product development.....	141
	6.8	Cost/price/value/stakes: four approaches to weigh the impact of a given purchase on business profitability	142
	6.9	Ethics and purchasing	144
	6.10	Buying is a fantastic game!	145
	6.11	The author.....	145
Chapter 7		Production Systems	
	7.1	The Just in Time approach, of misleading simplicity.....	147
	7.2	Computerized approach to production management: MRP (Manufacturing Resources Planning).....	163
	7.3	Interdependence of methods and representations	168
	7.4	Bibliography.....	170
	7.5	The author.....	172
Chapter 8		The Management of Distribution and Operational Logistics	
	8.1	The different levels of logistics maturity.....	173
	8.2	Warehouse conception.....	175
	8.3	Operational warehouse management.....	181
	8.4	Stock management.....	189

	8.5	Transport	195
	8.6	E-business	197
	8.7	The author	199
Chapter 9		Transport Management as a Key Logistics Issue	
	9.1	Introduction	201
	9.2	Production, logistics and transport	201
	9.3	Logistical management of transport	207
	9.4	Conclusions	226
	9.5	First Focus: Rail freight transport in Europe	230
	9.6	Second Focus: Intermodal transportation: a major challenge for seaports	234
	9.7	Third Focus: Urban freight transport	238
	9.8	References	243
	9.9	The authors	244
Chapter 10		Logistics of International Trade	
	10.1	Introduction	247
	10.2	Key logistics options	251
	10.3	Major aspects of an international trade transaction	255
	10.4	The international movement of goods	271
	10.5	Border-crossing issues	287
	10.6	Recommended reading and websites	292
	10.7	The authors	292
Chapter 11		Information Systems	
	11.1	Introduction	293
	11.2	Information Systems (IS) vs Information Technology (IT)	294
	11.3	Information Systems	294
	11.4	Conclusion & Perspectives	306
	11.5	Glossary	308
	11.6	References/Useful Links (as of March 2007)	309
	11.7	The author	310
Chapter 12		Supply Chain Connective Technologies	
	12.1	Introduction: What does supply chain connectives technologies mean?	311
	12.2	General overview and major trends in connective technologies .	311
	12.3	e-Supply chain: from physical to virtual chains	313
	12.4	e-Supply chain: M2A versus A2A	315
	12.5	The costs and benefits of e-supply chain implementation: fast moving consumer goods (FMCG) and other examples in Italy	317
	12.6	Examples of e-supply chain implementation and cooperation	319
	12.7	Tracking systems: RFId	322
	12.8	RFId impact on MIS: centralized versus distributed	323
	12.9	RFId on the product: the supply chain	324
	12.10	RFId on people	326
	12.11	Wireless sensor networks: more than RFId	328
	12.12	Localization: several technologies for performance	329
	12.13	Conclusions	331
	12.14	Bibliography	331
	12.15	The authors	332

Chapter 13	Operations Research in Logistics	
	13.1 What is operations research?	333
	13.2 Vehicle routing problems.....	334
	13.3 The traveling salesman problem	336
	13.4 Solution methods for the TSP.....	338
	13.5 Solution methods for the vehicle-routing problem.....	344
	13.6 Real-life constraints.....	349
	13.7 Arc-routing problems.....	352
	13.8 Conclusion.....	354
	13.9 References.....	356
	13.10 The author.....	356
Chapter 14	Modeling and Simulation in Logistics	
	14.1 Introduction.....	359
	14.2 Discrete-event simulation	359
	14.3 Mathematical toolbox.....	363
	14.4 Applications.....	388
	14.5 Bibliography.....	397
	14.6 The authors.....	398
Chapter 15	The Lean Supply Chain	
	15.1 Introduction.....	399
	15.2 The roots of lean in the Buddhist Philosophy.....	399
	15.3 Growing product variety: the Toyota response.....	400
	15.4 New product development is the first strategic issue	402
	15.5 Time is critical for everything.....	403
	15.6 Concurrent engineering and Obeya Room: two lean tools of lean new product development.....	405
	15.7 Target costing and lean new product development	408
	15.8 The tools of lean production	411
	15.9 Management Information Systems and Lean	416
	15.10 Culture and lean implementation	419
	15.11 Conclusions.....	420
	15.12 Bibliography.....	421
	15.13 The author.....	421
Chapter 16	Marketing and Innovation Management	
	16.1 Introduction	423
	16.2 Marketing evolution: widening scope and customer focus.....	424
	16.3 Understanding market dynamics	425
	16.4 Market dynamics in action: New products, new services, changes in customers' perceptions (supply-chain contribution)..	433
	16.5 The two major dimensions of marketing: industrial products and consumer goods	438
	16.6 System selling	444
	16.7 Conclusion: new frontiers in marketing	447
	16.8 References.....	449
	16.9 The author.....	449
Chapter 17	Financial Accounting	
	17.1 Introduction.....	451
	17.2 The balance sheet: current assets.....	454

	17.3 The Balance Sheet : Liabilities and shareholder's equity	456
	17.4 The Income Statement	459
	17.5 The Statement of Cash Flows	461
	17.6 Working Capital	463
	17.7 Financial Ratios	463
	17.8 Analyzing the Income-Statement ratios	466
	17.9 Balance sheet standards by Industry	468
	17.10 Additional Disclosures and Audit Reports	468
	17.11 Conclusion.....	469
	17.12 Glossary.....	470
	17.13 Bibliography.....	472
	17.14 The authors	473
Chapter 18	Processing & Controlling	
	18.1 Logistics business processes.....	475
	18.2 Business Process Management	485
	18.3 Controlling.....	489
	18.4 Activity Based Costing.....	497
	18.5 The author.....	503
Chapter 19	Financial elements	
	19.1 Introduction.....	505
	19.2 Principles in corporate finance.....	505
	19.3 The value of money.....	509
	19.4 Project appraisal.....	511
	19.5 Financial choice.....	517
	19.6 Project consequences in accountability.....	522
	19.7 Securitization and structured financing.....	531
	19.8 Conclusion.....	532
	19.9 References	533
	19.10 The author.....	533
Chapter 20	Understanding Global Strategic Dynamics	
	20.1 Introduction.....	535
	20.2 Some fundamental concepts of strategic analysis	536
	20.3 A strategy process.....	538
	20.4 Winning beyond classical strategic perspectives.....	547
	20.5 Conclusion.....	550
	20.6 Bibliography.....	550
	20.7 Acknowledgements	552
	20.8 The authors	552
Chapter 21	Managing Human Resources	
	21.1 Introduction.....	553
	21.2 The context of a project	556
	21.3 The project stakeholders	559
	21.4 Major problems.....	563
	21.5 Team motivation	565
	21.6 Conflicts in projects.....	567
	21.7 The factors of project success.....	572
	21.8 Check-list: do's and don'ts	575
	21.9 Bibliography	576
	21.10 The authors	577
