

Foreword to the first edition viii

Preface. ix

List of abbreviations xi

1 Fundamental concepts in functional neurology. 1

2 Early developmental events 15

3 Biochemistry and physiology of receptor activation. 29

4 History and examination 53

5 Neurology of sensory and receptor systems 87

6 Neuronal integration and movement 101

7 The spinal cord and peripheral nerves 111

8 The autonomic nervous system 141

9 The cortex 159

10 The thalamus and hypothalamus 187

11 The basal ganglia 199

12 The limbic system 213

13 The brainstem and reticular formation 223

14 The cerebellum and vestibular system 255

Randy W Beck and Matthew D Holmes

15 Neuroimmune functional interactions 277

16 Psychoneurological aspects 295

17 Headaches 315

Matthew D Holmes

18 Fundamental evidence 325

19 Approaches to patient management 333

20 Approaches to treatment 343

Index. 381
