

# Contents

<b>Preface for the Second Edition</b>	<b>xi</b>
<b>1 Logic</b>	<b>1</b>
1.1 Axiomatic Method . . . . .	2
1.2 Tabular Logic . . . . .	3
1.3 Tautology . . . . .	9
1.4 Logical Strategies . . . . .	14
1.5 Implications From Implications . . . . .	17
1.6 Universal Quantifiers . . . . .	20
1.7 Fun With Language and Logic . . . . .	22
<b>2 Sets</b>	<b>29</b>
2.1 Elements and Predicates . . . . .	30
2.2 Equality . . . . .	39
2.3 Cartesian Products . . . . .	46
2.4 Power Sets . . . . .	49
2.5 Something From Nothing . . . . .	51
2.6 Indexed Families of Sets . . . . .	57
<b>3 Functions</b>	<b>67</b>
3.1 Functional Preliminaries . . . . .	68
3.2 Images and Preimages . . . . .	83
3.3 One-to-One and Onto Functions . . . . .	92
3.4 Bijections . . . . .	97
3.5 Inverse Functions . . . . .	99

## CONTENTS

<b>4</b>	<b>Counting Infinite Sets</b>	<b>107</b>
4.1	Finite Sets . . . . .	107
4.2	Hilbert's Infinite Hotel . . . . .	115
4.3	Equivalent Sets and Cardinality . . . . .	130
<b>5</b>	<b>Infinite Cardinals</b>	<b>137</b>
5.1	Countable Sets . . . . .	138
5.2	Uncountable Sets . . . . .	151
5.3	Two Infinities . . . . .	161
5.4	Power Sets . . . . .	168
5.5	The Arithmetic of Cardinals . . . . .	183
<b>6</b>	<b>Well-Ordered Sets</b>	<b>201</b>
6.1	Successors of Elements . . . . .	201
6.2	Constructing Well Ordered Sets . . . . .	210
6.3	Cardinals as Ordinals . . . . .	225
6.4	Magnitude versus Cardinality . . . . .	238
<b>7</b>	<b>Inductions and Numbers</b>	<b>245</b>
7.1	Mathematical Induction . . . . .	245
7.2	Sums of Powers of Integers . . . . .	262
7.3	Transfinite Induction . . . . .	266
7.4	Mathematical Recursion . . . . .	276
7.5	Number Theory . . . . .	281
7.6	The Fundamental Theorem of Arithmetic . . . . .	285
7.7	Perfect Numbers . . . . .	287
<b>8</b>	<b>Prime Numbers</b>	<b>291</b>
8.1	Prime Number Generators . . . . .	291
8.2	The Prime Number Theorem . . . . .	294
8.3	Products of Geometric Series . . . . .	298
8.4	The Riemann Zeta Function . . . . .	304
8.5	Real Numbers . . . . .	309

# *CONTENTS*

<b>9</b>	<b>Logic and Meta-Mathematics</b>	<b>315</b>
9.1	The Collection of All Sets . . . . .	315
9.2	Other Than True or False . . . . .	319
9.3	The Logic of A Theory of Everything . . . . .	327
9.3.1	Gödel's Incompleteness Theorem . . . . .	327
9.3.2	Logically Closed Sets . . . . .	329
9.3.3	Applications . . . . .	330
	<b>Bibliography</b>	<b>333</b>
	<b>Index</b>	<b>335</b>
