<b>Foreword by Prof. Dr Ing. Jean-Luc Thomas</b>	<b>xiii</b>
<b>Foreword by Dr Abdelkrim Benchaïb</b>	<b>xv</b>
<b>Acknowledgements</b>	<b>xvii</b>
<b>Introduction</b>	<b>xix</b>
<b>1 Induction Machine</b>	<b>1</b>
1.1 Electrical Equations and Equivalent Circuits	1
1.1.1 <i>Definitions and Notation</i>	1
1.1.2 <i>Equivalent Electrical Circuits</i>	2
1.1.3 <i>Differential Equation System</i>	4
1.1.4 <i>Interpretation of Electrical Relations</i>	6
1.2 Working out the State-Space Equation System	9
1.2.1 <i>State-Space Equations in the Fixed Plane</i>	11
1.2.2 <i>State-Space Equations in the Complex Plane</i>	14
1.2.3 <i>Complex State-Space Equation Discretization</i>	15
1.2.4 <i>Evolution Matrix Diagonalization</i>	17
1.2.4.1 <i>Eigenvalues</i>	17
1.2.4.2 <i>Transfer Matrix Algebraic Calculation</i>	18
1.2.4.3 <i>Transfer Matrix Inversion</i>	19
1.2.5 <i>Projection of State-Space Vectors in the Eigenvector Basis</i>	20
1.3 Discretized State-Space Equation Inversion	22
1.3.1 <i>Introduction of the Rotating Frame</i>	22
1.3.2 <i>State-Space Vector Calculations in the Eigenvector Basis</i>	23
1.3.3 <i>Control Calculation – Eigenstate-Space Equation System Inversion</i>	30

1.4	Control	31
1.4.1	<i>Constitution of the Set-Point State-Space Vector</i>	31
1.4.2	<i>Constitution of the Initial State-Space Vector</i>	33
1.4.3	<i>Control Process</i>	33
1.4.3.1	<i>Real-Time Implementation</i>	33
1.4.3.2	<i>Measure Filtering</i>	35
1.4.3.3	<i>Transition and Input Matrix Calculations</i>	36
1.4.3.4	<i>Kalman Filter, Observation and Prediction</i>	36
1.4.3.5	<i>Summary of Measurement, Filtering and Prediction</i>	38
1.4.4	<i>Limitations</i>	41
1.4.4.1	<i>Voltage Limitation</i>	41
1.4.4.2	<i>Current Limitation</i>	44
1.4.4.3	<i>Operating Area and Limits</i>	44
1.4.4.4	<i>Set-Point Limit Algebraic Calculations</i>	44
1.4.5	<i>Example of Implementation</i>	54
1.4.5.1	<i>Adjustment of Flux and Torque – Limitations in Traction Operation</i>	55
1.4.5.2	<i>Adjustment of Flux and Torque – Limitations in Electrical Braking</i>	57
1.4.5.3	<i>Free Evolution – Short-Circuit Torque</i>	59
1.5	Conclusion on the Induction Machine Control	63
<b>2</b>	<b>Surface-Mounted Permanent-Magnet Synchronous Motor</b>	<b>65</b>
2.1	Electrical Equations and Equivalent Circuit	66
2.1.1	<i>Definitions and Notations</i>	66
2.1.2	<i>Equivalent Electrical Circuit</i>	66
2.1.3	<i>Differential Equation System</i>	68
2.2	Working out the State-Space Equation System	69
2.2.1	<i>State-Space Equations in the Fixed Plane</i>	69
2.2.2	<i>State-Space Equations in the Complex Plane</i>	71
2.2.3	<i>Complex State-Space Equation Discretization</i>	72
2.2.4	<i>Evolution Matrix Diagonalization</i>	73
2.2.4.1	<i>Eigenvalues</i>	73
2.2.4.2	<i>Transfer Matrix Calculation</i>	73
2.2.4.3	<i>Transfer Matrix Inversion</i>	74
2.2.5	<i>Projection of State-Space Vectors in the Eigenvector Basis</i>	75
2.3	Discretized State-Space Equation Inversion	76
2.3.1	<i>Introduction of the Rotating Frame</i>	76
2.3.2	<i>State-Space Vector Calculations in the Eigenvector Basis</i>	76
2.3.3	<i>Control Computation – Eigenstate-Space Equation Inversion</i>	82
2.4	Control	84
2.4.1	<i>Constitution of the Set-Point State-Space Vector</i>	84
2.4.2	<i>Constitution of the Initial State-Space Vector</i>	85
2.4.3	<i>Control Process</i>	86

2.4.3.1	<i>Real-Time Implementation</i>	86
2.4.3.2	<i>Measure Filtering</i>	88
2.4.3.3	<i>Transition and Control Matrix Calculations</i>	88
2.4.3.4	<i>Kalman Filter, Observation and Prediction</i>	89
2.4.3.5	<i>Summary of Measurement, Filtering and Prediction</i>	91
2.4.4	<i>Limitations</i>	94
2.4.4.1	<i>Voltage Limitation</i>	95
2.4.4.2	<i>Current Limitation</i>	98
2.4.4.3	<i>Operating Area and Limits</i>	98
2.4.4.4	<i>Set-Point Limit Calculations</i>	98
2.4.5	<i>Example of Implementation</i>	109
2.4.5.1	<i>Adjustment of Torque – Limitations in Traction Operation</i>	110
2.4.5.2	<i>Adjustment of Torque – Limitations in Electrical Braking</i>	112
2.4.5.3	<i>Free Evolution – Short-Circuit Torque</i>	114
2.5	<i>Conclusion on SMPM-SM</i>	118
<b>3</b>	<b>Interior Permanent Magnet Synchronous Motor</b>	<b>121</b>
3.1	<i>Electrical Equations and Equivalent Circuits</i>	122
3.1.1	<i>Definitions and Notations</i>	122
3.1.2	<i>Equivalent Electrical Circuits</i>	123
3.1.3	<i>Differential Equation System</i>	124
3.2	<i>Working out the State-Space Equation System</i>	127
3.2.1	<i>State-Space Equations in the Fixed Plane</i>	128
3.2.2	<i>State-Space Equations in the Complex Plane</i>	129
3.2.3	<i>State-Space Equation Discretization</i>	130
3.2.4	<i>Evolution Matrix Diagonalization</i>	130
3.2.4.1	<i>Eigenvalues</i>	130
3.2.4.2	<i>Transfer Matrix Calculation</i>	132
3.2.4.3	<i>Transfer Matrix Inversion</i>	133
3.2.5	<i>Projection of State-Space Vectors in the Eigenvector Basis</i>	134
3.3	<i>Discretized State-Space Equation Inversion</i>	134
3.3.1	<i>Rotating Reference Frame</i>	134
3.3.2	<i>State-Space Vector Calculations in the Eigenvector Basis</i>	135
3.3.2.1	<i>Calculation of Third and Fourth Coordinates of the State-Space Equation</i>	139
3.3.2.2	<i>Calculation of the First and the Second Coordinate of the State-Space Eigenvector</i>	140
3.3.3	<i>Control Calculation – Eigenstate-Space Equations Inversion</i>	141
3.4	<i>Control</i>	143
3.4.1	<i>Constitution of the Set-Point State-Space Vector</i>	143
3.4.2	<i>Constitution of the Initial State-Space Vector</i>	146
3.4.3	<i>Control Process</i>	147
3.4.3.1	<i>Real-Time Implementation</i>	147
3.4.3.2	<i>Measure Filtering</i>	149
3.4.3.3	<i>Transition and Input Matrix Calculations</i>	151

3.4.3.4	<i>Kalman Filter</i>	152
3.4.3.5	<i>Summary of Measurement, Filtering and Prediction</i>	155
3.4.4	<i>Limitations</i>	158
3.4.4.1	<i>Voltage Limitation</i>	159
3.4.4.2	<i>Current Limitation</i>	166
3.4.4.3	<i>Operating Area and Limits</i>	168
3.4.4.4	<i>Set-Point Limit Calculation</i>	168
3.4.5	<i>Example of Implementation</i>	180
3.4.5.1	<i>Adjustment of Torque – Limitations in Traction Mode</i>	180
3.4.5.2	<i>Adjustment of Torque – Limitations in Electrical Braking</i>	182
3.4.5.3	<i>Free Evolution – Short-Circuit Torque</i>	184
3.5	<b>Conclusions on the IPM-SM</b>	189
<b>4</b>	<b>Inverter Supply – LC Filter</b>	<b>191</b>
4.1	<b>Electrical Equations and Equivalent Circuit</b>	191
4.1.1	<i>Definitions and Notations</i>	191
4.1.2	<i>Equivalent Electrical Circuit</i>	192
4.1.3	<i>Differential Equation System</i>	193
4.2	<b>Working out the State-Space Equation System</b>	193
4.2.1	<i>State-Space Equations in a Fixed Frame</i>	194
4.2.2	<i>State-Space Equations in the Complex Plane</i>	195
4.2.3	<i>State-Space Equation Discretization</i>	195
4.2.4	<i>Evolution Matrix Diagonalization</i>	195
4.2.4.1	<i>Eigenvalues</i>	195
4.2.4.2	<i>Transfer Matrix Calculation</i>	197
4.2.4.3	<i>Transfer Matrix Inversion</i>	198
4.3	<b>Discretized State-Space Equation Inversion</b>	198
4.3.1	<i>Evolution Matrix Diagonalization</i>	198
4.3.2	<i>State-Space Equation Discretization</i>	198
4.3.3	<i>State-Space Vector Calculations in the Eigenvector Basis</i>	199
4.4	<b>Control</b>	201
4.4.1	<i>Constitution of the Set-Point State-Space Vector</i>	201
4.4.2	<i>Constitution of the Initial State-Space Vector</i>	202
4.4.3	<i>Inversion – Line Current Control by the Useful Current</i>	202
4.4.4	<i>Inversion – Capacitor Voltage Control by the Useful Current</i>	204
4.4.5	<i>General Case – Control by the Useful Current</i>	206
4.4.6	<i>Example of Implementation</i>	208
4.4.6.1	<i>Lack of Capacitor Voltage Stabilization</i>	208
4.4.6.2	<i>Capacitor Voltage Stabilization</i>	209
4.5	<b>Conclusions on Power LC Filter Stabilization</b>	211
<b>5</b>	<b>Conclusion</b>	<b>213</b>
<b>Appendix A</b>	<b>Calculation of Vector PWM</b>	<b>217</b>
A.1	<b>PWM Types</b>	218
A.2	<b>Working out the Control Voltage Vector</b>	218

## Contents

A.3	Other Examples of Vector PWM	221
A.3.1	<i>Unsymmetrical Vector PWM</i>	221
A.3.2	<i>Symmetrical Triangular Wave Based PWM</i>	222
A.3.3	<i>Synchronous PWM</i>	223
A.4	Sampled Shape of the Voltage and Current Waves	224
<b>Appendix B</b>	<b>Transfer Matrix Calculation</b>	<b>225</b>
B.1	First Eigenvector Calculation	225
B.2	Second Eigenvector Calculation	227
B.3	Third Eigenvector Calculation	228
B.4	Fourth Eigenvector Calculation	230
B.5	Transfer Matrix Calculation	231
<b>Appendix C</b>	<b>Transfer Matrix Inversion</b>	<b>233</b>
C.1	Transfer Matrix Determinant Calculation	234
C.2	First Row, First Column	234
C.3	First Row, Second Column	235
C.4	First Row, Third Column	235
C.5	First Row, Fourth Column	235
C.6	Second Row, First Column	236
C.7	Second Row, Second Column	236
C.8	Second Row, Third Column	236
C.9	Second Row, Fourth Column	237
C.10	Third Row, First Column	237
C.11	Third Row, Second Column	237
C.12	Third Row, Third Column	237
C.13	Third Row, Fourth Column	237
C.14	Fourth Row, First Column	238
C.15	Fourth Row, Second Column	238
C.16	Fourth Row, Third Column	238
C.17	Fourth Row, Fourth Column	238
C.18	Inverse Transfer Matrix Calculation	238
<b>Appendix D</b>	<b>State-Space Eigenvector Calculation</b>	<b>239</b>
<b>Appendix E</b>	<b>F and G Matrix Calculations</b>	<b>245</b>
E.1	Transition Matrix Calculation	245
E.2	Discretized Input Matrix Calculation	249
