Foreword	ix
Preface.....	xi
The Authors	xix
Introduction	xxi
Chapter 1 General requirements for an energy management system	1
1.1 Qualifications	1
1.2 Requirements for organizations.....	2
1.3 EnMS requirements.....	3
Chapter 2 Management responsibility.....	5
2.1 General requirements	5
2.2 Establish, implement, and maintain the energy policy	7
2.3 Management representative and energy management team.....	8
2.4 Provide energy management system resources.....	9
2.5 Defining the energy management system scope and boundaries	10
2.6 Communicating the importance of energy management	12
2.7 Establishing energy performance objectives and targets.....	13
2.8 Energy performance indicators	15
2.9 Including energy considerations in long-term planning.....	16
2.10 Ensure that results are measured and reported	17
2.11 Conduct management reviews	18
2.12 Roles, responsibility, and authority	19
2.13 Establish, implement, maintain, and continually improve the energy management system	20
2.14 Report to top management on the performance of the energy management system.....	21
2.15 Report to top management on changes in energy performance	22
2.16 Forming the energy management team.....	23

2.17 Plan and direct energy management activities designed to support the organization's energy policy	24
2.18 Defining and communicating responsibilities and authorities.....	25
2.19 Determining criteria and methods for effective operation and control of the energy management system.....	26
Chapter 3 Energy policy.....	29
3.1 Commitment to improvement	29
3.2 Criteria.....	30
Chapter 4 Energy planning	37
4.1 General	37
4.2 Legal and other requirements	40
4.3 Energy review	42
4.4 Energy baseline.....	48
4.5 Energy performance indicators.....	51
4.6 Objectives, targets, and action plans	53
Chapter 5 Implementation and operation	59
5.1 General	59
5.2 Competence, training, and awareness	60
5.3 Awareness of the energy policy, the energy management system, and procedures	61
5.4 Roles, responsibilities, and authorities	62
5.5 Benefits of improved energy performance	63
5.6 Individual impacts and contributions to improved energy performance	64
5.7 Documentation requirements.....	65
5.8 Documenting scope and boundaries.....	66
5.9 Documenting the energy policy	67
5.10 Documenting energy objectives, targets, and action plans.....	68
5.11 Maintaining documents considered by the organization to be necessary for ensuring planning, operation, and control	68
5.12 Control of documents.....	69
5.13 Approving documents prior to issue.....	72
5.14 Periodic review and update	72
5.15 Identifying changes and current revision status	73
5.16 Ensuring that relevant versions of applicable documents are available at points of use.....	74
5.17 Ensuring documents are legible and readily identifiable.....	75
5.18 Controlling external documents	76
5.19 Preventing the unintended use of obsolete documents.....	77
5.20 Operational control	78

Contents

5.21 Effectively operating and maintaining significant energy use	81
5.22 Operating and maintaining facilities, processes, systems, and equipment.....	82
5.23 Communicating operational controls to personnel.....	82
5.24 Communications.....	83
5.25 Designing facilities, equipment, systems, and processes	90
5.26 Procurement of energy services, products, and equipment.....	92
5.27 Assessing products' energy use over time	93
5.28 Consider contingency and emergency situations and potential disasters.....	94
5.29 Procurement of energy supply	95
Chapter 6 Checking performance	97
6.1 Monitoring, measurement, and analysis.....	97
6.2 Evaluation of legal and other compliance.....	99
6.3 Internal audit of the EnMS.....	100
6.4 Nonconformities, correction, corrective, and preventive action	104
6.5 Reviewing and determining the causes of nonconformities and potential nonconformities	107
6.6 Evaluating the need for action.....	108
6.7 Implementing corrective and preventive actions	111
6.8 Maintaining records of corrective and preventive actions.....	112
6.9 Reviewing the effectiveness of the corrective or preventive action taken	113
6.10 Control of records.....	114
Endnote.....	116
Chapter 7 Management review.....	117
7.1 Summary of requirements	117
7.2 Input to management review.....	118
7.3 Actions from previous management reviews	119
7.4 Energy policy	120
7.5 Energy performance and energy performance indicators	120
7.6 Legal compliance and requirement changes.....	120
7.7 Energy objectives and targets.....	120
7.8 Energy management system audit results	121
7.9 Corrective and preventive actions	121
7.10 Projected energy performance.....	122
7.11 Recommendations for improvement	122
7.12 Output from management review	123
7.13 Changes in the energy performance of the organization.....	123
7.14 Changes to the energy policy	124

7.15 Changes to the EnPIS	124	
7.16 Continual improvement of the energy management system and its implementation	124	
7.17 Allocation of resources	125	
Bibliography	127	
Appendix A: Energy consumption, generation, sustainability, and energy systems		129
A.1 Energy consumption	129	
A.2 Energy production	134	
A.3 Sustainability	138	
A.4 A survey of energy sources	139	
Endnotes	153	
Appendix B: Perspectives on energy efficiency and conservation		155
B.1 Energy conservation	156	
B.2 Energy use and efficiency around the world	158	
B.3 Energy conservation/energy efficiency issues	160	
Endnotes	161	
Appendix C: Peak oil: The looming oil crisis		163
C.1 King Hubbert's prediction	164	
C.2 Growing oil consumption and lower exports by producers	168	
C.3 Peak oil policy implications	169	
C.4 Concluding thoughts	176	
Endnotes	177	
Appendix D: Sustainability and energy policy		179
D.1 Definitions of sustainability	179	
D.2 Sustainability impact	182	
D.3 Agenda 21	184	
D.4 Common principles of sustainability	184	
D.5 Measuring sustainable development	189	
D.6 Applications of sustainable resource development	193	
D.7 Examples of a sustainable energy policy	196	
Endnotes	203	
Appendix E: Global climate change		207
E.1 The nature of the problem	207	
E.2 Global warming causal factors and research	211	
E.3 Current and future impacts of global warming	219	
E.4 Reducing greenhouse emissions	223	
E.5 Global climate policy	228	
Endnotes	238	

Contents

Appendix F: Selected key ISO 50001 definitions	243
Appendix G: The energy assessment	245
G.1 The assessment process	247
G.2 Performing the energy assessment	250
Endnotes	262
Appendix H: Methods, tools, and techniques	265
Appendix I: Applying the nominal group technique to maximize return on investment	269
I.1 Typical NGT procedure	270
I.2 Advantages and disadvantages	271
Endnotes	271
Appendix J: The Fukushima Daiichi nuclear power plant disaster	273
Index	281
