foreword	8
about this book	9
introduction	10
image gallery	12

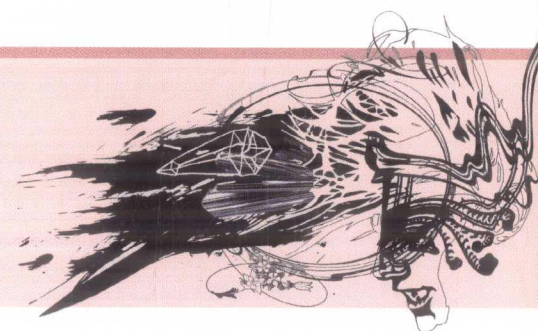

part 1: principles of digital illustration

1. choosing software	22
2. introducing the interface: photoshop	24
3. introducing the interface: illustrator	26
4. all about hardware	28

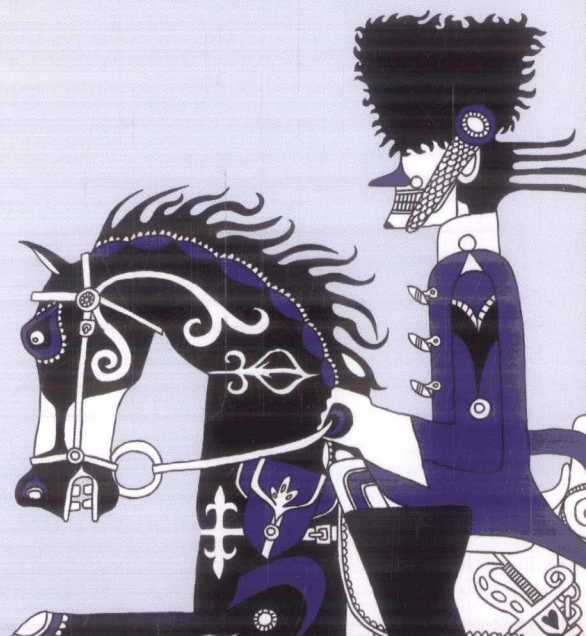

part 2: starting points

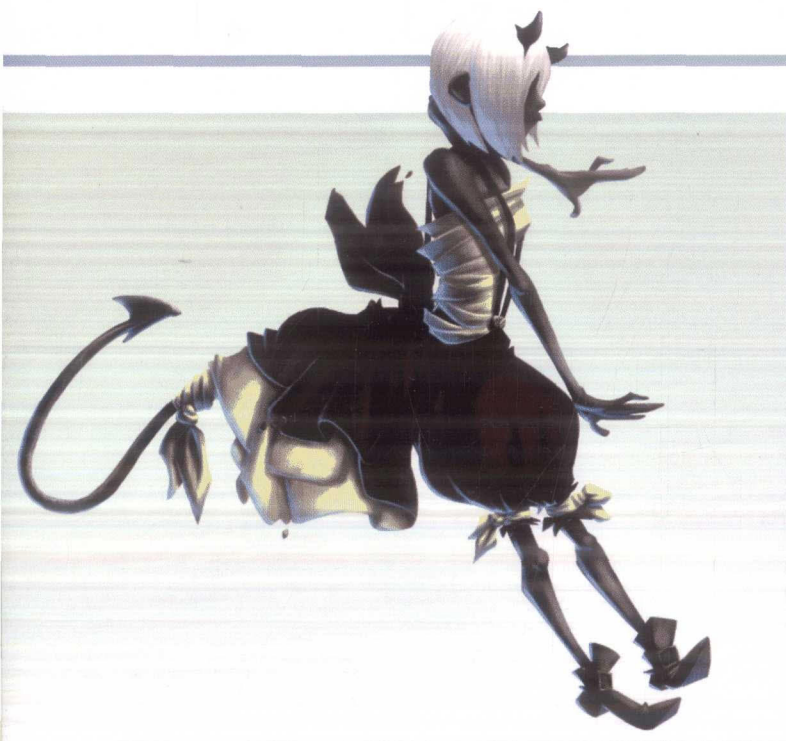

5. art principles	32
6. sketches and roughs	38
7. developing a concept	40
8. using references	42

part 3: image-making techniques

starting a new digital project	46
9. document formats	47
10. file types and output sizes	48
11. scanning a drawing	49
12. scanning unfamiliar objects	51
13. refining a scan	52
14. editing a scan	54
15. drag and drop	55
using layers	56
16. adding fill color	57
17. creating transparency	58
18. blending modes	59
19. using layer masks	62

color and alterations

20. selecting colors	64
21. identifying and altering colors	65
22. adding flat color	66
23. image adjustments	68
24. invert	70
25. adjusting colors	71
26. correcting mistakes	72
27. scale and transformations	74
28. cutout techniques	76
29. cropping and cutting: marquee and lasso	80
30. selecting elements: magic wand	82
31. adding color: magic wand	84
32. quick selection	86
33. cutting out hair	88
34. refining edges	90
35. brush and pencil tool	92
36. create your ideal brush	94
37. layering, blending, and overlapping	95
38. digital montage	96
CASE STUDY: using layers creatively	98
	100

vector art	102
39. basic shapes	103
40. the pen tool	104
41. refining paths	105
42. line weights and styles	106
43. fills and gradients	108
44. introducing the pathfinder tools	110
45. making a logo with the pathfinder tools	112
CASE STUDY: creating vector art	114
46. importing sketches and references	116
47. illustrator layers	117
48. live trace	118
49. custom brushes	122
50. making pattern swatches	126
51. making a patterned image	128
CASE STUDY: patterns and details	130
characters and figures	132
52. references for character development	133
53. creating movement	134
54. figure interaction	136
CASE STUDY: enhancing a figure	138
location, landscape, and architecture	140
55. location and landscape	141
56. understanding lighting	142
57. depth and perspective	144
58. architectural detail	147
CASE STUDY: creating architectural details	150
59. textures: photographing materials	152
60. building an image library	153
CASE STUDY: using texture to build an image	154
61. allowing for imperfections	158
stylistic techniques	160
62. creating texture and grain	161
CASE STUDY: the artist's hand	162
63. stylistic techniques: lino and woodcut	164
64. screen print effects	166
CASE STUDY: retro styles	168

65. filters	170
66. out-of-register duotone	174
67. halftones and offsets	176
68. coloring halftones	178
69. replicating graffiti stencils	180
70. creating spatter effects	183
71. pixel art	184
72. vector-based urban art	188
73. 3D and digital graffiti	190
CASE STUDY: digital graffiti	194
new contexts	196
74. making animated gifs	197
75. saving animations	199
76. stop-motion movies	200
77. rotoscoping	202
78. animating in photoshop	204
79. finalizing your animation	208
80. where to go from here	210

part 4: **professional practice**

81. presentation and promotion	214
82. web sites and online presence	216

glossary	218
resources	221
index	222
acknowledgments	224
