<i>Preface</i>	ix
<i>Introduction</i>	x
<i>List of Abbreviations</i>	xiii
1 Antioxidants and Radical Scavengers	1
1.1 Chemistry of free radicals and antioxidants	1
1.2 Types of antioxidants	4
1.3 Efficacy of different antioxidants	7
1.4 Action mechanisms of antioxidants	9
1.5 Structure–activity relationship of antioxidants	11
1.6 Factors affecting antioxidant activity	14
1.7 Quality assessment of dietary antioxidants	15
1.8 How safe are food antioxidants?	23
1.9 Summary	25
References	25
Further reading	31
2 Emulsifiers	33
2.1 Mechanisms of food emulsifiers	33
2.2 The role of emulsifiers in foods	35
2.3 Classification of emulsifiers	37
2.4 Types of food emulsifiers	38
2.5 Quality and analysis of food emulsifiers	58
2.6 Foods containing emulsifiers	60
References	62
Further reading	64
3 Stabilisers, Gums, Thickeners and Gelling Agents as Food Additives	67
3.1 Introduction to stabilisers, thickeners and gelling agents	67
3.2 Polysaccharides	68
3.3 Protein-based food stabilisers	77
3.4 Quality control of food stabilisers and thickeners	78
3.5 Analytical methods	78
References	80
Further reading	82
4 Sweeteners	83
4.1 Introduction to sweeteners	83
4.2 Properties of sweeteners	84

4.3	Intense sweeteners in foods	86
4.4	Bulk food sweeteners	92
4.5	Quality assurance and quality control	95
4.6	Analytical methods	98
	References	98
	Further reading	100
5	Fragrances, Flavouring Agents and Enhancers	102
5.1	Introduction to flavours and flavouring agents	102
5.2	Classification of food flavourings	103
5.3	Chemistry of food flavourings	105
5.4	Quality control of flavour compounds	119
5.5	Analytical methods for the analysis of food flavourings	120
	References	121
	Further reading	124
6	Food Acids and Acidity Regulators	125
6.1	What are food acids and acid regulators?	125
6.2	Types of food acids	126
6.3	Uses of food acids	128
	References	129
	Further reading	130
7	Food Colour and Colour Retention Agents	131
7.1	Why add colourants to foods?	131
7.2	Classification of food colourants	131
7.3	Overview of colourants	133
7.4	Chemistry of food colourants	143
7.5	Extraction from natural sources	143
7.6	Quality assurance of food colourants	144
7.7	Analytical methods	145
	References	145
8	Flour Treatment/Improving Agents	148
8.1	What are flour treatment/improving agents?	148
8.2	Flour maturing agents	148
8.3	Flour bleaching agents	151
8.4	Flour processing agents	154
	References	154
9	Anticaking Agents	155
9.1	The caking phenomena	155
9.2	Mechanisms of caking	156
9.3	Classification of anticaking agents	159
9.4	Anticaking agents in use	159
	References	160
	Further reading	161

10	Humectants	162
10.1	Humectants and moisture control	162
10.2	Classification of humectants	162
	References	166
11	Antifoaming Agents	167
11.1	Sources of foam in food processing	167
11.2	Properties of antifoaming agents	168
11.3	Mechanisms of antifoaming and foam destabilisation	168
11.4	Synthetic defoamers	168
11.5	Natural defoamers	170
	References	171
12	Minerals and Mineral Salts	172
12.1	The importance of minerals and mineral salts	172
12.2	Inorganic mineral salts	173
12.3	Organic mineral salts	175
	References	176
13	Dietary Supplements	177
13.1	Introduction to dietary supplements	177
13.2	Classification of vitamins	178
13.3	Vitamin A (retinols)	179
13.4	Vitamin D (calciferol)	189
13.5	Vitamin E	194
13.6	Vitamin K	196
13.7	Vitamin B	199
13.8	Vitamin C (L-ascorbic acid)	210
13.9	Conclusions	212
	References	213
14	Glazing Agents	218
14.1	Introduction to glazing agents	218
14.2	Mineral hydrocarbon glazes	218
14.3	Chemistry of MHCs	220
14.4	Conclusion	222
	References	223
15	Preservatives	224
15.1	Preservatives: Past, present and future	224
15.2	Natural food preservatives	226
15.3	Traditional food preservation methods	231
15.4	Artificial preservative agents	232
15.5	Modern food preservation techniques	235
15.6	Safety concerns of food preservatives	237
15.7	Analytical methods for the determination of preservative residues	238
15.8	Conclusions	238
	References	238
	Further reading	243

16	Nutraceuticals and Functional Foods	244
16.1	What are nutraceuticals?	244
16.2	Classification of nutraceuticals	245
16.3	Mechanisms of action	246
16.4	Conclusion	253
	References	254
	Further reading	257
17	Nutritional Genomics: Nutrigenetics and Nutrigenomics	258
17.1	Nutrition and gene expression	258
17.2	Nutrigenetic areas of application	260
17.3	Analytical methods for nutrigenetical food functions	268
17.4	Conclusion	270
	References	270
18	Probiotic Foods and Dietary Supplements	274
18.1	Microbial gut flora activity	274
18.2	Probiotics and nutrition	275
18.3	Probiotics and health	275
18.4	Safety and stability of probiotics	277
18.5	Suitable dietary carriers for probiotics	278
18.6	Assessment of probiotics in foodstuffs and supplements	279
18.7	Conclusions	280
	References	281
19	Prebiotics	285
19.1	Prebiotics and health	285
19.2	Factors that influence the activity and effectiveness of prebiotics	286
19.3	Types of oligosaccharides	286
19.4	Quality assessment of prebiotics	289
19.5	Conclusions	290
	References	290
20	Synbiotics	291
20.1	Synbiotic foods and health	291
20.2	Health benefits of synbiotics	292
20.3	Mechanism of action of synbiotics	293
20.4	The future of synbiotic foods	294
	References	294
21	Microencapsulation and Bioencapsulation	295
21.1	Introduction to microencapsulation and bioencapsulation	295
21.2	Commonly used food-grade microcapsules	297
21.3	Methods of food microencapsulation	303
21.4	Microencapsulation for food colourants	307
21.5	Bioencapsulation for probiotics	309
21.6	Conclusions	310
	References	310
	<i>General Conclusions</i>	314
	<i>Index</i>	315
