Preface xv

1 Basic Weight Training 1

Brief History of Weight Training 2

Weight Training and Your Total Physical
Fitness Program 4

Benefits of Weight Training 4

Improved Sports Performance 8

Emotional and Social Benefits 8

Competitive Outlet 8

Exercise and Disability 8

Weight Training for Children 9

Let's Get Started! 9

Web Sites Dealing with Weight Training
and Fitness 9

2 Weight Training and Your Body 11

Your Body's Responses to Weight Training 11

How Strong Can You Get? 11

Muscles and the Skeleton	13
Skeletal-Muscle Structure	14
The Motor Unit	17
Weight Training and Your Health	18
Weight Training and the Strength of Ligaments, Tendons, Bones, and Joint Surfaces	19
Weight Training, Weight Control, and Coronary Artery Disease	19
Digestion	19
Osteoporosis	20
Are Body-Building and Strength-Building Programs the Same?	21
Weight Training and Aging	21
Kneecap Pain	22
Muscle Soreness	23

3 Weight Training Guidelines 25

Weight Training as Part of the Total Fitness Program	30
Determining Your Goals	30
Developing an Attractive, Healthy-Looking Body	30
Improving Strength for Other Activities	32
Developing Strength and Power for Sports	32
Weight Training as Part of a General Conditioning and Wellness Program	33
Choosing Activities for a Balanced Physical Fitness Program	33

4 How Weight Training Improves Your Body 36

Stress Adaptation	36
Overload	37
Specificity of Training	38
Individual Differences and Genetics	38
Reversibility	39
Types of Weight-Training Exercises	40
Isometric Exercise	40
Dynamic Exercise	41

5 Getting Started: The Basics 44

Medical Checkup	44
------------------------	-----------

What to Wear	45
Shoes	45
Weight-Lifting Belt	45
Lifting Shirts and Suits	46
Wraps	46
Breast Support for Women	47
Gloves	47
Weights and Other Resistive Exercise Equipment	47
Free Weights	47
Weight Machines	48
Other Forms of Resistive Exercise	50
Gravity (Body Weight)	50
Exercise Balls	50
Rubber (Surgical) Tubing and Bands and Chains	50
Medicine Balls, Farmer's Bars, and Lifting Stones	50
Kettlebells	51
Water	51
Other Devices	51
Resistive Exercise without Weights	51
Structure of the Weight-Training Program	51
Number of Training Sessions per Week	52
Warm-Up	53
Cool-Down	53
Choosing the Correct Weight	54
Order of Exercises and Development of Antagonistic Muscle Groups	55
Sets and Repetitions	56
Basic Cycling Techniques	59
Making Progress	60
Training for Body Building, Strength, and Power	62
Combining Weight Training with Other Sports and Exercises	62
Preventing Accidents	62
Spotting	63
Collars	65
Preventing Accidents on Weight Machines	65
Behavior in the Weight Room	65
Medical Concerns	66
Proper Mechanics of Exercise	66
Lifting Techniques	66

Breathing	67
Exercise Movements and Lifting Speed	67
Grips	68
Choosing a Health Club or Weight-Training Class	68
Exercising at Home	72

6 Developing the Lower Body 73

Functional Leg Strength	74
Functional Leg Strength Test	75
Compound Lower-Body Exercises	79
Kettlebell Swings	79
Kettlebell Snatches	81
Squats	81
Power-Rack Squats	83
Squats, Smith Machine	83
Front Squats	83
Wall Squats (Phantom Chair)	84
Lunges	85
Step-Ups	85
Auxiliary Exercises for the Lower Body	86
Knee Extensions (Leg Extensions)	86
Knee Flexions (Leg Curls)	86
Heel Raises	87
Heel Raises, Leg-Press Machines	88
Advanced Lifts	89
The Clean	89
The High Pull	90
The Snatch	90
The Deadlift	94
Functional Training Machines and Equipment	94

7 Developing the Back and Neck 97

The Back Muscles	98
Exercises for the Lats (Middle Back)	99
Pull-Ups	100
Pull-Downs on the Lat Machine (Lat Pulls)	100
Dumbbell Pullovers	101
Barbell Pullovers	101

Exercises for the Rhomboids and Teres Major (Middle Back) 102

- One-Arm Dumbbell Rows 102
- Incline Reverse Dumbbell Laterals and Incline Reverse
Dumbbell Rows 103
- Machine Reverse Flys 103
- Machine Rows 103
- Seated Cable Rows 103

Low-Back Pain 104

- Preventing Low-Back Pain 105
- Managing Acute Back Pain 105
- Managing Chronic Back Pain 106

Exercises for the Lower-Back Muscles 106

- Isometric Spine Extension (Bird-Dog Exercise) 107
- Back Extensions 107
- Superman on the Exercise Ball 108
- Deadlifts 108
- Kettlebell Swings and Snatches 109

Building the Trapezius 110

Exercises for the Trapezius (Upper Back) 110

- Barbell Shrugs 110
- Other Exercises That Build the Traps 111

Exercises for the Neck 111

- Manual-Resistance Exercises 112
- Isometric Neck Exercises 112
- Neck-Harness Exercises 113
- Neck-Machine Exercises 113
- Four-Way Neck Machines 113

8 Developing the Abdominal Muscles 114

Abdominal Fat: The Bad and the Ugly 114

The Abdominal Muscles 116

- The Rectus Abdominis 116
- The Internal and External Obliques 116
- The Transversus Abdominis 117

Sit-Ups for Shapely Abs? 117

The Core and the Kinetic Chain 118

Safe, Effective Exercises

for the Abdominal Muscles 118

- Isometric Abdominal Exercise (Abdominal Brace) 119
- Isometric Abdominal Stabilizers 119
- Crunches 119

Crunches on the Exercise Ball	120
Side-Bridges	121
Front Bridges	121
Reverse Crunches on a Bench	122
Bicycle Exercise	123
Abdominal Machines	123
Hanging Knee Raises (Captain's Chair Exercise)	123
Twists	123
Harness Your Metabolism and Fight Abdominal Fat	124
Weight Training	124
Aerobics	124
Interval Training	126
Diet	126
You Can Improve the Appearance of Your Abdomen	126

9 Developing the Chest and Shoulders 127

The Chest Muscles and How to Train Them	128
Exercises for the Chest Muscles	129
Bench Press	129
Incline Press	132
Push-Ups and Modified Push-Ups	133
Dumbbell Flys	134
Machine Flys	135
Cable Crossovers	136
Pullovers	136
Pullover Machines	137
Decline-Bench Press	137
Other Exercises for the Chest	137
Tips on Building the Chest Muscles	137
Exercises to Develop the Shoulders	137
The Deltoid and Rotator-Cuff Muscles	138
Overhead Press	138
Overhead-Press Machines	139
Shoulder Raises	139
Lateral-Raise Machines	142
Incline Reverse Dumbbell Laterals	142
Incline Reverse Dumbbell Rows	142
Upright Rowing	143
Rotator-Cuff Exercises	143
Preventing Rotator-Cuff Injuries	146

10 Developing the Arms 147

Exercises for the Front of the Arm 147

- Standing Barbell Curls 148
- Dumbbell Curls 150
- Preacher Curls 151
- Reverse Curls 151
- Pole Curls with a Partner (Poleates) 152
- Curls, Exercise Machines 153
- Double-Arm Curls, Low Pulley 153
- Other Exercises for the Front of the Arm 154

Exercises for the Back of the Arm 154

- Triceps Extensions on the Lat Machine 155
- Bench Triceps Extensions 156
- Parallel-Bar Dips 156
- Triceps Extensions, Exercise Machines 158

Exercises for the Forearm 158

- Pole Twists (Poleates) 158
- Wrist Curls 158
- Wrist Rollers 159
- Other Exercises for the Forearm and Grip 159

11 Exercises to Develop Speed and Power 160

Plyometric and Speed Exercises 160

Injury Risk of Power Exercises 161

Basic Speed and Power Exercises: Lower Body 162

- Calf Jumps 163
- Rope Skipping 163
- Squat Jumps 165
- Mule-Kick Squat Jumps 165
- Double-Leg Tuck Jumps 166
- 360-Degree Squat Jumps 167
- One-Leg Squat Jumps 167
- Ice-Skater Exercise 167
- Lunge Jumps 168

Horizontal Jumps and Hops 170

- Standing Long Jump 170
- Multiple Standing Long Jump 171

CONTENTS

Standing Triple Jump	171
Skiers	171
Four Squares (Dot Drills)	171
Cone Hops	171
Hurdle Hops	172
Bounce Push-Ups	173
Wall Bounce Push-Ups	173
Floor Bounce Push-Ups	173
Box Jumping	175
Step-Downs	175
Standing Long Jumps from a Box	175
Ski Box Jumps	176
Single-Leg Jump-Ups	176
Medicine-Ball Exercises	177
Catch with Yourself	178
Medicine-Ball or Shot-Put Throws	179
Chest Passes with a Partner	180
Overhead Passes with a Partner	180
Medicine-Ball Sit-Ups	180
Other Exercises to Develop Speed and Power	181
Sprint Starts, Running	182
Harness Sprinting	183
Stadium Stairs	183
High Knees, Fast Arms	184
Bounding Strides	185
Additional Lower-Body Speed–Power Exercises	185
Integrating Power Training into Workouts	186
Peak-Power Weight Training	186
Combining Weight-Training and Power Exercises	187
Speed–Power Training Program	187
You Can Develop More Speed and Power!	188

12 Nutrition for Weight Training 189

Planning a Healthy Diet	190
USDA and DHHS Dietary Guidelines for Americans, 2010	190
Fluids	193
Vitamins	193
Iron	194
Calcium	194
Energy Requirements of Active People	195

Developing an Attractive Body: The Role of Exercise and Nutrition	195
Weight Training, Energy Balance, and Body Composition	196
Losing Weight	196
Gaining Weight	197
Eating Disorders	198
Anorexia Nervosa and Anorexia Athletica	198
Bulimia	199
Treating Eating Disorders	200
Diet and Performance	200
The High-Carbohydrate Diet	201
Carbohydrate Drinks During Exercise	201
Avoidance of High-Fat Diets	202
Protein Requirements for Weight Trainers	202
Proteins as an Energy Source	204
Amino Acid and Polypeptide Supplements	205

13 Ergogenic Aids: Drugs and Supplements 206

Anabolic–Androgenic Steroids	209
How Steroids Work in the Body	210
Health Risks of Anabolic Steroids	210
Growth Hormone	211
Insulin-Like Growth Factor (IGF-1)	212
Dehydroepiandrosterone (DHEA) and Androstenedione (Andro)	212
Insulin	213
Clenbuterol	213
Myostatin Blockers	213
Other Substances Taken to Enhance Performance	213
Supplements Taken to Speed Recovery	213
Creatine Monohydrate	214
Hydroxy-beta-methylbutyrate (HMB)	214
Supplements Taken to Increase Aggressiveness and Training Intensity	214
Amphetamines	214
Caffeine	215
Other Agents	215
Supplements Taken to Aid Weight Control	216
Supplements and Your Exercise Program	217

CONTENTS

APPENDIX 1: Muscular System 218

APPENDIX 2: Skeletal System 220

APPENDIX 3: Machine and Free-Weight Exercises for Sports and Activities 221

Weight Training for Sports and Activities 221

Weight-Training Exercises for Selected Machines and Free Weights 222

APPENDIX 4: Norms and Test Procedures for Measuring Strength 225

Norms for Body Composition, Percent Fat 225

Norms for 1-Minute Sit-Ups 226

Norms for 1 Repetition Maximum Bench Press 227

Norms for 1 Repetition Maximum Leg Press 228

Norms for Push-Ups, Men 229

Norms for Modified Push-Ups, Women 229

Norms for Combined Right- and Left-Hand Grip Strength 230

Glossary 231
