<i>Preface</i>	<i>page</i> xi
<b>Introduction</b>	1
<b>Part I Non-relativistic</b>	3
<b>1 Mathematical prelude</b>	5
1.1 Bounded operators	5
1.2 Unbounded operators	11
1.3 Self-adjoint operators	14
1.4 Compact operators	22
<b>2 Classical mechanics</b>	28
2.1 Hamiltonian mechanics	28
2.2 Examples	29
2.3 Canonical transformations	31
2.4 Symmetries	34
<b>3 Quantum mechanics</b>	38
3.1 Principles of quantum mechanics	38
3.2 Canonical quantization	41
3.3 Symmetries	43
3.4 Perspectives and problems	45
<b>4 Single particle</b>	47
4.1 Free particle	47
4.2 Particle in a potential	48
4.3 Spectrum	51
4.4 The harmonic oscillator	53

4.5 Scattering	55
4.6 Spin	58
<b>5 Many particles</b>	63
5.1 Two particles	63
5.2 Identical particles	66
5.3 $n$ -particles	67
5.4 Fock space	70
<b>6 Statistical mechanics</b>	78
6.1 Mixed states	78
6.2 Equilibrium states	79
6.3 Free boson gas	83
6.4 Free fermion gas	86
6.5 Interacting bosons	88
6.6 Further developments	90
<b>Part II Relativistic</b>	93
<b>7 Relativity</b>	95
7.1 Principles of relativity	95
7.2 Minkowski space	96
7.3 Classical free fields	103
7.4 Interacting classical fields	107
7.5 Fundamental solutions	111
<b>8 Scalar particles and fields</b>	114
8.1 Scalar particles	114
8.2 Scalar fields	118
8.3 Charged scalar field	126
<b>9 Electrons and photons</b>	130
9.1 Spinors	130
9.2 Electrons	132
9.3 Dirac fields	139
9.4 Photons	144
9.5 Electromagnetic field	148
<b>10 Field theory on a manifold</b>	152
10.1 Lorentzian manifolds	152

10.2 Classical fields on a manifold	154
10.3 Quantum fields on a manifold	155
<b>Part III Probabilistic methods</b>	159
<b>11 Path integrals</b>	161
11.1 Probability	161
11.2 Gaussian processes	163
11.3 Brownian motion	165
11.4 The Feynman–Kac formula	168
11.5 Oscillator process	169
11.6 Application: ground states	171
<b>12 Fields as random variables</b>	174
12.1 More on Gaussian processes	174
12.2 The Schrödinger representation	181
12.3 Path integrals – free fields	184
12.4 Vacuum correlation functions	187
12.5 Thermal correlation functions	189
<b>13 A nonlinear field theory</b>	192
13.1 The model	192
13.2 Regularization	193
13.3 Infinite volume	197
13.4 Path integrals – interacting fields	201
13.5 A reformulation	204
<b>Appendix A Normed spaces</b>	208
<b>Appendix B Tensor product</b>	211
<b>Appendix C Distributions</b>	215
<i>References</i>	219
<i>Index</i>	222
