Preface: Why wetlands?	xi	3.4 Physical ground-based methods	48
Acknowledgements	xiv	3.4.1 Surface methods	48
		3.4.2 Subsurface methods	51
Part I		3.5 Flora, fauna and ecological monitoring and survey methods	53
1 Wetland overview	1	3.6 Social science methods and techniques	56
1.1 Introduction	1	3.7 Summary	57
1.2 How much and where	4		
1.3 Wetland trends	8		
1.4 Wetland preservation and protection	10		
1.5 Wetland science	11	Part II	
1.6 Book approach and outline	13	4 Wetland hydrology	58
1.7 Summary	13	4.1 Introduction	58
2 Wetland criteria	15	4.2 Surface and ground water	61
2.1 Definitions	15	4.3 Floods and flooding	64
2.2 Water	16	4.4 Hydrologic functions of streams and wetlands	65
2.3 Soil	18	4.5 Hydrochemistry	68
2.4 Vegetation	20	4.6 Summary	70
2.5 Wetland classification	22	5 Wetland soil	72
2.6 Peatland	24	5.1 Introduction	72
2.7 Anthropogenic dimensions of wetlands	27	5.2 Brief history and soil classification	73
2.8 Summary	28	5.3 Hydric soil criteria	78
3 Methods in wetland research	30	5.4 Mineral and organic hydric soils	79
3.1 Introduction	30	5.5 Submerged wetland substrates	81
3.2 Remote sensing	31	5.6 Summary	82
3.2.1 Image resolution and interpretability	32	6 Wetland vegetation	86
3.2.2 Wetland image interpretation	35	6.1 Plant adaptations	86
3.2.3 Macro-level systems	37	6.1.1 Structural adaptations	86
3.2.4 Meso-level systems	41	6.1.2 Biochemical adaptations	88
3.2.5 Micro-level systems	42	6.2 Ecological categories	89
3.3 Maps and geographic information systems	46	6.2.1 Shoreline plants	90
		6.2.2 Emergent plants	92
		6.2.3 Floating plants	94

6.2.4	Submerged plants	96	9.4.4	Holocene climate and early man	171
6.2.5	Plant zonation	97	9.5	Summary	173
6.3	Indicator categories	99	10	Environmental cycles and feedback	175
6.4	Plant hardiness zones	101	10.1	Biogeochemical cycles	175
6.5	Invasive plant species	102	10.1.1	Wetland elements	175
6.6	Summary	105	10.1.2	Nitrogen	175
7	Wetland wildlife	107	10.1.3	Phosphorus, potassium and sulfur	177
7.1	Introduction	107	10.2	Carbon cycle	179
7.2	Wetland invertebrates	108	10.2.1	Carbon reservoirs	179
7.2.1	Insects	108	10.2.2	Carbon balance	179
7.2.2	Mosquitos	110	10.2.3	Carbon gases and climatic feedback	180
7.2.3	Corals	111	10.3	Fossil fuels	181
7.3	Wetland vertebrates	113	10.3.1	Fossil-fuel consumption	181
7.3.1	Amphibians	113	10.3.2	Coal mining and acid rain	183
7.3.2	Reptiles	115	10.3.3	Estonian oil shale	184
7.3.3	Birds	117	10.4	Human experiment	185
7.3.4	Mammals	125	10.5	Summary	187
7.4	Invasive animal species	130			
7.5	Summary	132			
Part III					
8	Wetland change	135	Part IV		
8.1	Introduction	135	11	Wetland services, resources and valuation	190
8.2	Hydroseral succession	136	11.1	Human use of wetland ecosystems	190
8.3	Sea-level change and crustal movements	139	11.2	Ecosystem services	191
8.3.1	Glacial eustasy	139	11.2.1	Habitats	191
8.3.2	Glacial isostasy	141	11.2.2	Wetlands and biogeochemical cycles	194
8.3.3	Complicated responses	141	11.2.3	Storm surge and coastal flood protection	195
8.3.4	Modern sea-level rise	143	11.3	Hydrological services	196
8.4	Climate change	147	11.3.1	Flood abatement	196
8.4.1	Climate basics	147	11.3.2	Water quality	196
8.4.2	Climate and wetlands	150	11.3.3	Water storage and diversion	197
8.5	Fire	152	11.4	Economic services	199
8.6	Summary	154	11.4.1	Extractive industries	199
9	Wetlands through time	156	11.4.2	Pearl production	204
9.1	Introduction	156	11.4.3	Services industries	207
9.2	Coal	157	11.5	Wetland valuations	211
9.2.1	Paleozoic coal	157	11.5.1	Why value wetlands?	212
9.2.2	Cretaceous–Tertiary coal and lignite	158	11.5.2	Property regimes and externalities in wetland use and valuations	212
9.3	Amber	160			
9.4	Pleistocene and Holocene wetlands	163			
9.4.1	Nordic region	164			
9.4.2	North America	167			
9.4.3	Tropics and Antarctica	171			

17.3	Southern Colorado, United States	340	18.3	Key opportunities in wetland conservation	362
17.3.1	Culebra Range	341	18.4	Future directions	363
17.3.2	San Luis Valley	345			
17.4	The Arctic	350		Glossary of wetland types and terms	364
17.4.1	Arctic Coastal Plain, Alaska	351		References	372
17.4.2	Yukon Delta, Alaska	353		Index	401
17.4.3	Lena River delta, Russia	354			
17.5	Summary	357			
18	Sustainability for wetlands	358			
18.1	Introduction	358			
18.2	Key risks to wetlands	359			

Color Plates are between pages 210 and 211
