

Preface to the second edition page xi

Preface to the first edition xiii

1 Introduction to scientific data analysis 1

1.1 Introduction 1

1.2 Scientific experimentation 2

1.3 The vocabulary of measurement 5

1.4 Units and standards 6

1.5 Picturing experimental data 13

1.6 Key numbers summarise experimental data 21

1.7 Population and sample 26

1.8 Experimental error 33

1.9 Modern tools of data analysis – the computer based spreadsheet 35

1.10 Review 35

End of chapter problems 36

2 Excel and data analysis 40

2.1 Introduction 40

2.2 What is a spreadsheet? 41

2.3 Introduction to Excel 42

2.4 Built in mathematical functions 62

2.5 Built in statistical functions 64

2.6 Presentation options 68

2.7 Charts in Excel 70

- 2.8 Data analysis tools 77
- 2.9 Review 84
 - End of chapter problems 84

3 Data distributions I 90

- 3.1 Introduction 90
- 3.2 Probability 91
- 3.3 Probability distributions 93
- 3.4 Distributions of real data 98
- 3.5 The normal distribution 101
- 3.6 From area under a normal curve to an interval 111
- 3.7 Distribution of sample means 119
- 3.8 The central limit theorem 121
- 3.9 The t distribution 126
- 3.10 The log-normal distribution 133
- 3.11 Assessing the normality of data 135
- 3.12 Population mean and continuous distributions 137
- 3.13 Population mean and expectation value 139
- 3.14 Review 140
 - End of chapter problems 140

4 Data distributions II 146

- 4.1 Introduction 146
- 4.2 The binomial distribution 146
- 4.3 The Poisson distribution 157
- 4.4 Review 165
 - End of chapter problems 165

5 Measurement, error and uncertainty 168

- 5.1 Introduction 168
- 5.2 The process of measurement 171
- 5.3 True value and error 174
- 5.4 Precision and accuracy 176
- 5.5 Random and systematic errors 177
- 5.6 Random errors 178
- 5.7 Uncertainty in measurement 189
- 5.8 Combining uncertainties 199
- 5.9 Expanded uncertainty 208
- 5.10 Relative standard uncertainty 213
- 5.11 Coping with outliers 214
- 5.12 Weighted mean 218

- 5.13 Review 221
- End of chapter problems 221

6 Least squares I 226

- 6.1 Introduction 226
- 6.2 The equation of a straight line 227
- 6.3 Excel's LINEST() function 240
- 6.4 Using the line of best fit 243
- 6.5 Fitting a straight line to data when random errors are confined to the x quantity 252
- 6.6 Linear correlation coefficient, r 253
- 6.7 Residuals 261
- 6.8 Data rejection 266
- 6.9 Transforming data for least squares analysis 270
- 6.10 Weighted least squares 277
- 6.11 Review 284
- End of chapter problems 285

7 Least squares II 297

- 7.1 Introduction 297
- 7.2 Extending linear least squares 298
- 7.3 Formulating equations to solve for parameter estimates 300
- 7.4 Matrices and Excel 302
- 7.5 Fitting equations with more than one independent variable 308
- 7.6 Standard uncertainties in parameter estimates 312
- 7.7 Weighting the fit 316
- 7.8 Coefficients of multiple correlation and multiple determination 318
- 7.9 Estimating more than two parameters using the LINEST() function 320
- 7.10 Choosing equations to fit to data 322
- 7.11 Review 327
- End of chapter problems 328

8 Non-linear least squares 335

- 8.1 Introduction 335
- 8.2 Excel's Solver add-in 338
- 8.3 More on fitting using non-linear least squares 352
- 8.4 Weighted non-linear least squares 358
- 8.5 More on Solver 366
- 8.6 Review 370
- End of chapter problems 371

9	Tests of significance	382
9.1	Introduction	382
9.2	Hypothesis testing	383
9.3	Comparing \bar{x} with μ_0 when sample sizes are small	392
9.4	Significance testing for least squares parameters	394
9.5	Comparison of the means of two samples	397
9.6	Comparing variances using the F test	405
9.7	Comparing expected and observed frequencies using the χ^2 test	410
9.8	Analysis of variance	418
9.9	Review	423
	End of chapter problems	423
10	Data Analysis tools in Excel and the Analysis ToolPak	428
10.1	Introduction	428
10.2	Activating the Data Analysis tools	429
10.3	Anova: Single Factor	431
10.4	Correlation	432
10.5	F -test two-sample for variances	433
10.6	Random Number Generation	434
10.7	Regression	435
10.8	t tests	439
10.9	Other tools	440
10.10	Review	443
	<i>Appendix 1</i>	Statistical tables 444
	<i>Appendix 2</i>	Propagation of uncertainties 453
	<i>Appendix 3</i>	Least squares and the principle of maximum likelihood 455
	<i>Appendix 4</i>	Standard uncertainties in mean, intercept and slope 461
	<i>Appendix 5</i>	Introduction to matrices for least squares analysis 466
	<i>Appendix 6</i>	Useful formulae 471
	<i>Answers to exercises and end of chapter problems</i>	475
	<i>References</i>	502
	<i>Index</i>	506
