

Contents

List of Figures	xv
List of Tables	xxiii
Introduction	1
<i>Geographic Foundations for Public Health</i>	1
<i>Organization and Scope</i>	12
<i>GIS and Public Health</i>	14
CHAPTER 1. Geographic Information Systems	15
<i>Definitions of GIS</i>	15
<i>GIS Functions</i>	19
<i>Trends in GIS Applications</i>	33
<i>Public Health Applications of GIS</i>	35
<i>GIS and the Internet</i>	38
<i>Conclusion</i>	41
CHAPTER 2. Spatial Data	43
<i>Field and Object Data</i>	44
<i>Tessellation and Vector Data Models</i>	45
<i>Measuring Location</i>	51
<i>Scale, Projection, and Symbols of Cartographic</i> <i>Data Sources</i>	53
<i>Geographic Data Quality</i>	63
<i>The Role of Metadata</i>	67
<i>Conclusion</i>	74

CHAPTER 3. Spatial Databases for Public Health	75
<i>Foundation Spatial Data</i>	75
<i>Population Data</i>	86
<i>Health Data</i>	89
<i>Making Population and Health Data Mappable</i>	99
<i>Database Integration</i>	104
<i>Data Sharing</i>	108
<i>Conclusion</i>	112
CHAPTER 4. Mapping Health Information	113
<i>The Mapping Process</i>	113
<i>Representing Health Information</i>	115
<i>Viewing Health Information</i>	133
<i>GIS and Map Publication</i>	144
<i>Conclusion</i>	149
CHAPTER 5. Analyzing Spatial Clustering of Health Events	150
<i>Mapping Disease Rates: The Small Numbers Problem</i>	153
<i>Spatial Clustering Methods</i>	158
<i>Space–Time Clustering</i>	175
<i>Choosing a Clustering Method</i>	178
<i>Uses of Spatial Clustering Methods</i>	181
<i>Conclusion</i>	182
CHAPTER 6. Analyzing Environmental Hazards	183
<i>How Environmental Agents Are Identified as Hazards</i>	185
<i>GIS Analysis of Source Locations</i>	
<i>of Environmental Hazards</i>	188
<i>Modeling Fate and Transport and Environmental Quality</i>	
<i>in a GIS</i>	198
<i>GIS and Exposure Modeling</i>	210
<i>GIS and Dose</i>	223
<i>GIS and Outcome Surveillance</i>	226
<i>GIS and Environmental Risk Management</i>	230
<i>Issues in Environmental Health Mapping and Analysis</i>	231
<i>Conclusion</i>	232
CHAPTER 7. Analyzing the Risk and Spread of Infectious Diseases	234
<i>Spatial Diffusion</i>	237
<i>Mapping Case Distributions</i>	238
<i>Mapping the Ecology of Risk</i>	245
<i>Analyzing Temporal and Geographic Trends</i>	
<i>in Disease Outbreaks</i>	248
<i>Forecasting Spatial Diffusion</i>	
<i>of Communicable Diseases</i>	253

Planning Public Health Interventions 256
Privacy and Confidentiality 259
Conclusion 262

CHAPTER 8. Exploring the Ecology of Vector-Borne Diseases **263**

The Global Burden of Zoonotic Diseases and the Challenge of Emerging Infectious Diseases 264
Surveillance and Mapping of Vector-Borne Diseases 268
Modeling of Vector-Borne Diseases 284
Environmental Impacts of Controlling Vector-Borne Diseases 297
A Syndemic Perspective on Disease 299
Conclusion 302

CHAPTER 9. Analyzing Access to Health Services **303**

Access 304
Mapping Service Locations 307
Mapping Health Care Needs and Services 308
Assessing Potential Access to Health Services 310
Analyzing Service Utilization 328
Conclusion 337

CHAPTER 10. Locating Health Services **338**

Health Care Shortage Areas 340
Components and Dimensions of Health Service Delivery Systems 342
Client Population Distribution 345
The Meaning of "Centrality" in Health Service Facility Location 346
Normative Models of Facility Location and Service Delivery 349
Incorporating Normative Models of Facility Location and Service Delivery into GIS 361
Spatial Decision Support Systems 369
Health Services Delivery in Response to Disasters 370
Conclusion 375

CHAPTER 11. Health Disparities **377**

Context and Composition 379
Visualizing and Measuring Area Characteristics 381
Defining Neighborhood Contexts 394
Modeling Neighborhood Effects on Health 396
Location Processes and the Link between Location and Well-Being 402
Conclusion 405

CHAPTER 12. Public Participation GIS and Community Health	407
<i>GIS and Society</i> 408	
<i>Public Participation GIS</i> 411	
<i>Conclusion</i> 423	
References	425
Index	485
About the Authors	503
