Preface.....	xi
About the Author	xiii
1. Geospatial Information Technology	1
Remotely Sensed Data.....	1
Instantaneous Field of View (IFOV) at Nadir (Resolution on the Ground).....	3
IKONOS.....	4
Sensor Characteristics	5
IKONOS Specifications.....	5
ORBIMAGE (GeoEye)	5
OrbView-2 Specifications.....	6
OrbView-3 Specifications	6
QuickBird	6
QuickBird Satellite Sensor Characteristics.....	7
The SPOT (System Probatori d’Observation de la Terre).....	7
SPOT-5 Satellite Sensor Characteristics	8
MODIS (Moderate Resolution Imaging Spectroradiometer)	9
MODIS Overview	10
Technical Specifications of MODIS.....	10
MODIS Land Products	10
ASTER (Advanced Spaceborne Thermal Emission and Reflection radiometer)	13
ASTER Uniqueness	13
History of ASTER.....	14
Organizational Framework of ASTER	14
Active Remotely Sensed Data	15
Radar	15
Lidar.....	17
Lidar System Differences	18
How Does Lidar Work?	18
Derived Remotely Sensed Data	19
Vegetation Indices.....	19
The Tasseled Cap Transformation.....	22
Geographic Information Systems (GIS)	25
Thematic Data Layers.....	26
Geospatial Data Conversion.....	27
Using ERDAS-IMAGINE Software	27
Using ARCINFO Software.....	29

Select Area of Interest (Study Site).....	31
Topographic Data.....	31
Global Positioning System (GPS).....	32
GPS Services	33
The GPS Satellite System and Facts.....	33
GPS Applications	34
References	35
2. Data Sampling Methods and Applications.....	39
Data Representation	39
Data Collection and Source of Errors	39
Data Types.....	39
Sampling Methods and Applications	40
Sampling Designs	41
Simple Random Sampling	41
Stratified Random Sampling	42
Systematic Sampling.....	42
Nonaligned Systematic Sample	44
Cluster Sampling.....	44
Multiphase (Double) Sampling	44
Double Sampling and Mapping Accuracy.....	45
Pixel Nested Plot (PNP): Case Study.....	46
Plot Design.....	49
Issues.....	49
Characteristics of Different Plot Shapes	49
Plot Size	51
What to Record	51
Issues.....	51
References	52
3. Spatial Pattern and Correlation Statistics	57
Scale	57
Spatial Sampling	58
Errors in Spatial Analysis.....	58
Spatial Variability and Method of Prediction.....	58
Spatial Pattern	59
Spatial Point Pattern	59
Quadrant Count Method	63
Linear Correlation Statistic.....	63
Case Study.....	64
Statistical Example.....	65
Spatial Correlation Statistics	65
Moran's <i>I</i> and Geary's <i>C</i>	66
Cross-Correlation Statistic.....	67

Inverse Distance Weighting (IDW).....	67
Statistical Example.....	69
1. Develop Inverse Distance Weighting.....	69
2. Develop Moran's <i>I</i>	69
3. Develop Geary's <i>C</i>	71
4. Develop Bi-Moran's <i>I</i>	73
References.....	75
4. Geospatial Analysis and Modeling–Mapping.....	79
Stepwise Regression.....	79
Statistical Example.....	80
Ordinary Least Squares (OLS).....	81
Variogram and Kriging.....	83
Ordinary Kriging.....	85
Simple Kriging.....	86
Universal Kriging.....	87
Developing Variogram Model and Kriging to Predict Plant Diversity at GSENM, Utah.....	87
Model Cross-Validation.....	91
Spatial Autoregressive (SAR).....	91
Statistical Example.....	92
Using Spatial AR Model (without Regression).....	94
Using Spatial AR Model (with Regression, OLS Model) Using R or S-Plus.....	94
Example on How to Develop Plot of Standard Normal Distribution.....	95
Analysis of Residuals for Plant Species Richness (gsenmplant) Data.....	95
Weighted SAR Model.....	96
Binary Classification Tree (BCTs).....	97
Cokriging.....	100
Geospatial Models for Presence and Absence Data.....	104
GARP Model.....	105
Maxent Model.....	106
Logistic Regression.....	106
Classification and Regression Tree (CART).....	107
Envelope Model.....	108
References.....	108
5. R Statistical Package.....	115
Overview of R Statistics (R).....	116
What Is R?.....	116
Strengths of R/S.....	116
The R Environment.....	117

Scripts	118
Working with R on Your COMPUTER	118
Begin to Use R	118
Statistical Analysis Examples Using R	119
Common Statistics	119
Common Graphics	119
Common Programming	120
Create and Examine a Logical Vector	121
Working on Graphical Display of Data (Data Distributions)	121
Develop a Histogram.....	122
Data Comparison between the Data and an Expected Normal Distribution	122
More Statistical Analysis.....	124
Reading New Variable (Enter new data set, WEIGHT).....	124
Plotting Weight and Height.....	126
Test of Association	126
Some Basic Regression Analysis.....	127
Case Study	128
Test for Spatial Autocorrelation Using Moran's <i>I</i>	131
Test for Spatial Autocorrelation Using Geary's <i>C</i>	132
Test for Spatial Cross-Correlation Using Bi-Moran's <i>I</i>	133
Trend Surface Analysis	134
Test for Spatial Autocorrelation of the Residuals	136
Test for Moran's <i>I</i> for Residuals.....	137
Using Spatial AR Model without Regression	138
Using Spatial AR with Regression (Using All Independent Variables as with OLS Model)	138
Analysis of Residuals	140
Develop Variogram Model (Modeling Fine Scale Variability)	140
Plotting Variogram Model.....	143
References	143
6. Working with Geospatial Information Data	145
Exercise 1: Working with Remotely Sensed Data	145
Exercise 2: Derived Remote Sensing Data and Digital Elevation Model (DEM)	145
Deriving Slope and Aspect from DEM Data.....	147
Resample GRID	147
Exercise 3: Geospatial Information Data Extraction.....	148
Deriving SLOPE and ASPECT from DEM Data (ELEVATION).....	149
Resample GRID	149
Select Area of Interest (Study Site).....	150
Data Extraction	150
Steps for Converting the Geospatial Model to a Thematic Map Product.....	152

Contents

Working with Vegetation Indices and Tasseled Cap Transformation.....	154
Vegetation Indices.....	154
Tasseled Cap	155
Develop Thematic Layer in ARCVIEW or ARCMAP.....	157
VIEWS (Working Only with ARCVIEW)	157
Map Layout	159
References	160
Index.....	163
