Preface.....	xxxiii
Acknowledgments	xxxv
Author	xxxvii

1. Safety Profession and Preparing for the ASP/CSP Examination	1
Board of Certified Safety Professionals (BCSP)	1
Definitions.....	2
Minimum Qualifications to Sit for the CSP Examination	3
Academic Requirements	3
Professional Safety Experience Requirements	4
Associate Safety Professional Process.....	4
Certified Safety Professional Process.....	4
Safety Fundamentals Examination Blueprint.....	5
Domain 1: Recognizing Safety, Health, and Environmental Hazards (35.4% of examination).....	5
Domain 2: Measuring, Evaluating, and Controlling Safety, Health, and Environmental Hazards (30.9% of examination).....	5
Domain 3: Safety, Health, and Environmental Training and Management (20.6% of examination)	6
Domain 4: Business Principles, Practices, and Metrics in Safety, Health, and Environmental Practice (13.1% of examination).....	8
Comprehensive Practice Examination Blueprint	8
Domain 1: Collecting Safety, Health, Environmental, and Security Risk Information (28.6% of examination)	8
Domain 2: Assessing Safety, Health, Environmental, and Security Risk (36.6% of examination).....	9
Domain 3: Managing Safety, Health, Environmental, and Security Risk	9
Preparing for the ASP/CSP Examinations.....	10
Knowing Your Strengths and Weaknesses	10
Developing an Examination Preparation Plan	10
References and Resources	11
Test Taking Strategy.....	11
Registering for and Taking the ASP/CSP Examinations	13
Locating a Pearson VUE Test Center	13
Purchasing an Examination Authorization.....	14
Receiving Your Examination Authorization Letter.....	14
Scheduling an Examination Appointment.....	14

Taking the Examination	15
Arrival and Preliminary Procedures	15
Presenting Your Identification.....	15
Final Sign-in Procedures	16
Examination Security.....	16
Examination Tutorial	17
Examination Duration.....	17
Examination Format	17
Examination Environment.....	18
Completing the Examination, Getting Your Unofficial Result, and Postexamination Surveys.....	18
Reporting Problems with Your Examination Experience.....	18
Late Arrivals and Missed Appointments	19
Canceling and Rescheduling Examination Appointments.....	19
For Candidates Testing in the United States or Canada Only.....	19
Examination Authorization Extensions (For Candidates Testing in the United States and Canada Only)	19
Retesting.....	20
Other Testing Arrangements.....	20
Taking the Comprehensive Practice Examination for Continuance of Certification Credit.....	20
Key Information to Remember on the Safety Profession and Preparing for the ASP/CSP Examination.....	21
Reference	21
2. Regulations and OSHA Record Keeping.....	23
Occupational Safety and Health Act.....	23
Who Is Covered Under the Occupational Safety and Health Act?	24
Horizontal and Vertical Standards	24
General Duty Clause	24
Employer Rights and Responsibilities.....	25
Employee Rights and Responsibilities.....	25
Communications and Correspondence with OSHA.....	25
OSHA Inspections and Process.....	26
OSHA Citations.....	27
OSHA Citation Penalties.....	27
Appeals.....	29
Employee Appeals	29
Employer Appeals.....	29
Petition for Modification of Abatement.....	30
Notice of Contest.....	30
Review Procedure.....	30

Contents

Hazard Communication Standard (29 CFR 1910.1200).....	31
Purpose.....	31
Scope and Application.....	31
Written Hazardous Communication Program	32
Label and Other Forms of Warning.....	32
Material Safety Data Sheets.....	32
Employee Information and Training.....	33
Training.....	33
Bloodborne Pathogen Standard (29 CFR 1910.1030)	33
Scope, Application, and Definitions.....	33
Exposure Control Plan	34
Record Keeping.....	35
Medical Records	35
Training Records	35
Control of Hazardous Energy Standard (29 CFR 1910.147).....	35
Scope, Application, and Purpose.....	35
Definitions	36
Energy Control Program.....	37
Periodic Inspection	37
Training and Communication	38
Confined Space Entry Standard (29 CFR 1910.146)	38
Scope and Application.....	38
Definitions	38
General Requirements.....	40
Confined Space Entry Program	40
Entry Permits.....	40
Training	41
Personal Protective Equipment (29 CFR 1910.132)	41
Application.....	41
Employee-Owned Equipment	41
Hazard Assessment and Equipment Selection	42
Training	42
Respiratory Protection Standard (29 CFR 1910.134).....	42
Purpose.....	42
Definitions.....	43
Respiratory Protection Program	43
Training and Information	44
Fall Protection Standard (29 CFR 1926.500–503) (Subpart M).....	44
Scope and Application.....	44
Definitions.....	45
Duty to Have Fall Protection.....	46
Training	46
Record Keeping.....	47
OSHA 300, 300-A, and 301 Forms (29 CFR 1910.29)	47

How Quickly Must Each Injury or Illness Be Recorded?	47
How Do “Privacy Cases” Listed on the Forms?.....	47
Annual Summary	48
Providing Records to Government Representatives.....	48
Reporting Fatalities and Multiple Hospitalizations (29 CFR 1904.39).....	48
Determining Recordable Injuries or Illnesses	49
Calculating Total Case Incident Rates (TCIR).....	49
Calculating Days Away, Restricted, or Transfer Rates.....	50
Calculating Severity Rates	50
Key Information to Remember on Regulations.....	51
References	52
3. Math Review.....	53
Order of Operations.....	53
PEMDAS: “Please Excuse My Dear Aunt Sally”	53
Basic Rules of Positive and Negative Numbers	54
Understanding Exponents.....	54
Scientific Notation.....	55
Multiplication and Division Using Scientific Notation	55
Engineering Notation.....	56
Absolute Values.....	57
Logarithms.....	57
Formula or Equation Transpositions.....	58
Factorials	59
Common Geometric Equations.....	59
Area	60
Distance	60
Volume.....	60
Pythagorean Equation.....	60
Basic Trigonometric Functions.....	61
Sine	62
Cosine	63
Tangent	63
Arcsine, Arccosine, and Arctangent.....	64
Quadratic Equation	65
Calculator.....	66
Summary	67
Key Information to Remember on Math Review	67
4. Particulates and Gases.....	69
Periodic Table of the Elements	69
Atomic Number	69
Atomic Mass	69
Atoms.....	70

Contents

Chemical Bonding.....	71
Moles.....	71
Molecules and Compounds.....	72
Mixtures.....	72
Chemical Formulas.....	73
Atomic Weight of Compounds	73
Percentage of Element in a Compound	74
Acids, Bases, and pH's	74
Gas Laws	75
Boyle's Law	75
Charles' Law	76
Ideal Gas Law	76
Conversion Factors for Converting Pressure Units to Atmospheric Pressure Units	77
Conversion Factors for Converting Units of Volume to Liters	77
Converting Grams to Moles	78
Universal Gas Constant	78
Combined Gas Law	78
Concentrations of Vapors, Gases, and Particulates.....	79
Standard Temperature and Pressure	80
Standards and Regulations.....	80
Time-Weighted Average.....	81
Calculating PELs/TLVs for Periods Greater than 8 h.....	82
Gaseous Mixtures.....	82
Liquid Mixtures.....	83
Percentage of TLV Mixture	84
Calculating PEL/TLV for Silica.....	84
Converting mg/m^3 to ppm	85
Converting ppm to mg/m^3	85
Lower Flammability Limit of Mixtures	86
Referenced Equations.....	87
Boyle's Law	87
Charles' Law	87
Ideal Gas Law	87
Combined Gas Law	88
Time-Weighted Average.....	88
Calculating PELs/TLVs for Periods Greater than 8 h	88
Gaseous Mixtures.....	88
Liquid Mixtures.....	88
Percentage of TLV for Mixtures	89
Calculating PEL/TLV for Silica.....	89
Converting mg/m^3 to ppm	89
Converting ppm to mg/m^3	89
Lower Flammability Limits of Mixtures.....	90

Key Information to Remember on Particulates and Gases.....	90
References	91
5. Toxicology	93
Definitions.....	93
Routes of Entry.....	94
Inhalation	94
Ingestion.....	95
Absorption	95
Percutaneous and Intravenous Injections.....	95
Dose-Response Relationship	96
Exposures to Chemical Combinations.....	96
Stages of Cancer	97
Initiation	98
Latency Period.....	98
Promotion.....	98
Progression.....	98
Types of Poisons.....	98
Ames Testing	98
Cohort Study	99
Advantages	99
Disadvantages	99
Case Control Study.....	99
Cross-Sectional Study.....	100
Common Occupational Diseases and Disorders Caused by a	
Contributing Agent or Substance	100
Asbestosis and Asbestos-Related Illnesses.....	100
Brucellosis	101
Benzene-Related Illnesses	101
Byssinosis	101
Arsenic-Related Illnesses	102
Berylliosis and Beryllium-Related Illnesses	102
Copper-Related Illnesses.....	103
Cadmium-Related Illnesses.....	103
Chromium-Related Illnesses	104
Coal Dust-Related Illnesses	104
Cobalt-Related Illnesses	105
Formaldehyde-Related Illnesses	105
Lead-Related Illnesses	106
Manganese-Related Illnesses.....	107
Mercury-Related Illnesses.....	108
Pneumoconiosis.....	108
Silica-Related Illnesses.....	109
Zinc-Related Illnesses.....	109
Aluminum-Related Illnesses	110

Contents

Antimony-Related Illnesses.....	110
Dust-Related Illnesses	111
Common Environments for Contracting Dust-Related Illnesses.....	111
Thallium-Related Illnesses.....	112
Pesticide-Related Illnesses.....	112
Key Information to Remember on Toxicology	113
References	113
6. Industrial Hygiene	115
Anticipation of Hazards.....	115
Recognition of Hazards.....	116
Evaluation of Hazards.....	116
Control of Hazards	116
Definitions.....	116
Air Sampling.....	117
Sampling Methodology.....	118
Equipment Selection.....	118
Air Sampling Pumps	118
Piston and Bellows Air Pumps	119
Direct-Reading Instruments	119
Cyclones	120
Sampling Media	120
Filters	120
Sorbent Tubes	121
Sample Collection Bags or Canisters.....	121
Passive Samplers.....	122
Sampling Pump Calibration	122
Determining Minimum and Maximum Sample Volumes	125
Determining the Minimum Number of Samples to Collect	126
Sampling Process	126
Key Information to Remember on Industrial Hygiene	128
References	129
7. Ventilation.....	131
Purpose for Using Ventilation.....	131
Types and Selection of Ventilation.....	131
General Ventilation	132
Dilution Ventilation	132
Local (Exhaust) Ventilation.....	132
General Concepts of Ventilation Notes.....	132
Principles of Air Movement	133
Calculating for Volumetric Airflow	133
Calculating Static Pressure, Velocity Pressure, and Total Pressure ...	133
Calculating Velocity of Air.....	134

Contaminant Generation	134
Calculating Purge Rates	136
Steady State Concentration	138
Calculating Rate of Generation for Liquid Solvents	139
Calculating Vapor or Gaseous Concentrations.....	139
Calculating Room Air Changes	140
Calculating Concentration of a Contaminant with Dilution	
Ventilation	141
Local Exhaust Ventilation	142
Canopy Hood	142
Down Draft Hood	142
Enclosure Hood	142
Receiving Hood	143
Openings	143
Calculating Hood Entry Losses	143
Calculating Airflow Velocity	145
Calculating Capture Velocity for Plain Opening Hood.....	146
Ducts	147
Fans	148
Calculating Static Pressure of the Fan.....	148
Air Cleaning Devices.....	148
Ventilation Measurement Equipment.....	148
Pitot Tubes.....	149
Rotating Vane Anemometers.....	149
Thermal Anemometers.....	149
Key Information to Remember on Ventilation	149
Reference	150
8. Noise and OSHA's Hearing Conservation Program	151
OSHA's Hearing Conservation Program	151
Who Is Included in Hearing Conservation Program?	151
Monitoring	152
Sound Measuring Instruments.....	152
Employee Notification.....	152
Audiometric Testing	153
Standard Threshold Shift	153
Training Program	153
Record Keeping	154
Noise-Related Definitions.....	154
Noise	154
Continuous Noise	154
Intermittent Noise.....	154
Sound	154
Frequency	155
Period.....	155

Contents

Speed or Velocity of Sound	155
Wavelength	155
Anatomy and Physiology of the Ear	155
Types of Hearing Loss	156
Major Causes of Hearing Loss	157
OSHA Permissible Noise Exposures	157
Entities of Noise	158
Sound Power	158
Sound Pressure	158
Sound Intensity	158
Noise Calculations	158
Calculating Permissible Noise Exposures	158
Calculating Noise Dosage	159
Converting Noise Dosage into Time-Weighted Average	160
Combining Noise Levels	161
Calculating Sound Levels at Various Distances	162
Calculating Sound Power Levels	163
Calculating Sound Pressure Levels (SPL)	164
Calculating Sound Intensity Levels	164
Calculating Room Absorption	165
Calculating Absorption along a Transmission Path	166
Key Information to Remember on Noise	166
References	167
 9. Biological Hazards	 169
Bacterial Diseases	169
Anthrax	169
Brucellosis	170
Leptospirosis	170
Plague	171
Tetanus	171
Tuberculosis	171
Tularemia	172
Cat Scratch Fever (Cat Scratch Disease)	172
Viral Diseases	173
Hepatitis A	173
Hepatitis B	173
Orf (Sore Mouth Disease)	174
Rabies	175
Rickettsial and Chlamydia Diseases	176
Psittacosis (Ornithosis)	176
Rocky Mountain Spotted Fever	176
Q Fever	177
Fungal Diseases	178
Aspergillosis	178

Candidiasis.....	179
Coccidioidomycosis.....	180
Histoplasmosis	180
Biological Safety.....	181
Laboratory Practice and Technique.....	181
Safety Equipment.....	181
Class II, Type A.....	182
Class II, Type B1	182
Class II, Type B2.....	182
Class II, Type B3.....	183
Class III (Gas Tight, Negative Pressure)	183
Facility Design and Construction	183
Biosafety Levels.....	183
Biosafety Level I	183
Biosafety Level II.....	184
Biosafety Level III.....	184
Biosafety Level IV	184
Key Information to Remember on Biological Hazards	184
References	185
10. Fire Protection and Prevention	187
Definitions.....	187
Transfer of Heat.....	188
Heat Transfer by Radiation.....	188
Heat Transfer by Convection.....	188
Heat Transfer by Conduction	189
Fire Tetrahedron.....	189
Classification of Fires.....	190
Class A Fires.....	190
Class B Fires	190
Class C Fires.....	190
Class D Fires.....	190
Class K Fires.....	190
Portable Fire Extinguishers	190
Hydrostatic Testing (Portable Fire Extinguishers)	191
Fire Extinguisher Inspections and Service Requirements	192
Automatic Sprinkler Systems.....	193
Dry Pipe Systems	193
Wet Pipe Systems	194
Deluge Systems	194
Preaction Systems	194
Water Spray Systems	195
Foam Water Sprinkler Systems	195
Fire Hydrants.....	195
Fire Detection.....	195

Contents

Heat Detectors	195
Rate-of-Rise Heat Detectors.....	196
Rate-Compensation Detectors.....	196
Smoke Detectors.....	196
Fire Hydrants.....	197
Flammable and Combustible Liquids.....	197
Flash Point.....	198
Vapor Pressure.....	198
Fire Point	198
Flammable and Explosive Limit Ranges	198
Autoignition Temperature	200
Specific Gravity	200
Vapor Density	200
Evaporation Rate.....	200
Water Solubility	201
Boiling Point	201
Storage Requirements for Flammable and Combustible Liquids.....	201
Inside Storage Rooms for Flammable or Combustible Liquids.....	201
Key Information to Remember on Fire Protection and Prevention.....	202
References	203
 11. Thermal Stressors.....	 205
Heat Stress.....	205
Sources of Heat Stress.....	205
Human Body Reaction to Heat	206
Safety-Related Issues of Heat	206
Health-Related Issues of Heat.....	207
Heat Rash	207
Heat Cramps.....	207
Heat Syncope.....	207
Dehydration.....	208
Heat Exhaustion.....	208
Heat Stroke.....	208
Control Methods	209
Engineering Controls.....	209
Administrative and Work Practice Controls	210
Acclimation or Acclimatization	210
Fluid Replacement.....	210
Work/Rest Cycles	210
Personal Protective Equipment.....	214
Training	214
Prevention of Heat Stress Injuries	215
Cold Stress	215

Safety Problems Related to Cold.....	216
Cold-Related Injuries and Illnesses	216
Chilblains	216
Immersion Injuries (Trench Foot)	217
Hypothermia	218
Frostbite.....	218
Wind Chill Factor.....	219
Personal Protective Clothing.....	220
Nutrition and Activity.....	220
Fluid Replacement.....	221
Training and Discipline.....	221
Susceptible Groups.....	221
Treatment of Cold-Related Injuries	221
Key Information to Remember on Thermal Stressors	221
References	222
12. Personal Protective Equipment	223
Hazard Assessment	223
Head Protection (29 CFR 1910.135)	224
Classification.....	224
Proper Fit and Wear of Head Protection	224
Inspection and Maintenance	224
Training	225
Eye and Face Protection (29 CFR 1910.133).....	226
Fitting.....	226
Inspection and Maintenance	226
Hearing Protection (29 CFR 1910.95)	228
Hearing Protector Attenuation	228
Training	229
Respiratory Protection (29 CFR 1910.134)	230
Purpose.....	230
Definitions.....	231
Respiratory Protection Program	231
Training and Information	232
Torso Protection.....	232
Arm and Hand Protection (29 CFR 1910.138).....	233
Glove Selection Chart.....	234
Foot and Leg Protection (29 CFR 1910.136).....	238
Key Information to Remember on Personal Protective Equipment	238
References	239
13. Statistics for the Safety Professional.....	241
Descriptive Statistics.....	241
Mean	241
Mode	242

Contents

Median.....	242
Variance	243
Normal Distribution.....	244
Calculating Correlation Coefficient.....	245
Spearman Rank Coefficient of Correlation	247
Calculating the t-Test for Comparing Means.....	248
Chi-Square (χ^2) Statistic.....	249
Degrees of Freedom.....	250
p-values.....	250
Permutations and Combinations.....	251
Permutations with Repetition.....	251
Permutations without Repetition	251
Combinations	252
Z-Score.....	253
Coefficient of Determination and Coefficient of Correlation	254
Probability Content from $-\infty$ to Z	255
Reliability	256
Component Reliability	256
Probability of Failure (Component)	257
System Reliability	257
Series Reliability	258
Parallel Reliability	258
Probability of Failure (System).....	259
Key Information to Remember for Statistics.....	259
References	260
14. Electrical Safety	261
Electricity Basics.....	261
Voltage	261
Current.....	261
Resistance	261
Series and Parallel Circuits	262
Series Circuits	262
Parallel Circuits	262
Direct and Alternating Currents	263
Direct Currents.....	263
Alternating Currents	263
Calculating Values of Voltage, Current, and Resistance	
(Ohm's Laws).....	263
Calculating Voltage in Direct Current Circuits.....	263
Calculating Voltage in Alternating Current Circuits	263
Calculating Power in Direct Current Circuits.....	264
Calculating Power in Alternating Current Circuits	264
Calculating Resistance in Direct Current Circuits.....	264
Calculating Resistance in Alternating Current Circuits	265

Resistors	265
Calculating the Resistance in a Series Circuit	265
Calculating the Resistance in a Parallel Circuit	266
Capacitors	266
Calculating Capacitance in a Series Circuit.....	267
Calculating Capacitance in a Parallel Circuit.....	267
Inductors	268
Calculating Inductance in a Series Circuit.....	268
Calculating Inductance in a Parallel Circuit	268
Electrical Shock Hazard	269
Burns Caused by Electricity	270
Arc Blasts.....	270
Electrical Fires.....	271
Controlling Electrical Hazards.....	271
Exposed Electrical Parts.....	271
Overhead Power Lines.....	271
Inadequate Wiring	272
Defective or Damaged Cords and Wires	272
Use of Flexible Cords.....	272
Improper Grounding.....	273
Ground Fault Circuit Interrupters.....	273
Assured Equipment Grounding Conductor Program....	273
Overloaded Circuits	274
Safety Related Work Practices.....	274
Planning	274
Training	274
Key Information to Remember on Electrical Safety.....	275
References	275
15. Mechanics.....	277
Energy.....	277
Kinetic Energy	277
Potential Energy	278
Elastic Potential Energy	279
Force.....	280
Contact Forces.....	280
Action-at-a-Distance Forces.....	281
Defining Mass and Weight	281
Amount of Force	281
Frictional Force.....	282
Force and Distance.....	283
Momentum	284
Work	284
Modified Work.....	285
Newton's Laws of Motion	286

Contents

Speed.....	286
Velocity	286
Calculating Final Velocity	287
Calculating Displacement.....	288
Key Information to Remember on Mechanics	288
Reference	289
16. Hydrostatics and Hydraulics.....	291
Water Properties.....	291
Hydrostatic Pressure	292
Torricelli's Law	293
Head Pressure.....	294
Velocity Head	295
Velocity Pressure at Constant Laminar Velocity.....	296
Flow Rates and Pressure Drops	297
Flow Rates and Pressures	299
Calculating Pressure Loss Due to Friction	299
Bernoulli's Principle	300
Key Information to Remember on Hydrostatics and Hydraulics.....	302
References	302
17. Training.....	303
Principles of Adult Learning.....	303
Adult Learners Are Autonomous and Self-Directed	303
Adult Learners Have a Foundation of Life Experiences and Knowledge.....	304
Adult Learners Are Goal Oriented	304
Adult Learners Are Relevancy Oriented	304
Adult Learners Are Practical.....	304
Adult Learners Need to Be Respected	304
Safety Training Program	304
Delivery Methods	305
Instructor-Led Training	306
Self-Paced Learning	306
