Preface	xiii
CHAPTER 1 Introduction	1
1.1 Why do Statistical Analysis?	2
Example Analysis	3
1.2 Statistics	5
1.3 Numbers Raise Issues	6
1.4 Behind Every Data Point, There Is a Story	8
1.5 Aggressive Inquisitiveness	9
1.6 Model Building Framework	9
Example Model	10
1.7 Data Sets	10
1.8 Prerequisites	11
CHAPTER 2 Basic Notions	13
2.1 Percent	14
Graphical Displays of Percents	16
2.2 Percent Difference	21
2.3 Compound Interest	23
Future Value	24
Present Value	26
Translating	27
Practice Problems	28
CHAPTER 3 Frequency Distributions and Histograms	31
3.1 Definitions and Construction	41
Rules for Categories	43
3.2 Comparing Distributions	48
Absolute Comparison and Relative Comparison	48
Comparing More Than Two Distributions	50
3.3 Information Loss and Comprehension Gain	51
3.4 Category Selection	51

CONTENTS

3.5	Distribution Shapes	54
	Uniform Distribution	55
	Bell-Shaped Distribution	55
	Normal Distribution	56
	Skewed Distribution	59
	Bimodal Distribution	60
	Practice Problems	62
CHAPTER 4	Measures of Location	67
4.1	Mode	67
4.2	Median	68
4.3	Mean	70
4.4	Trimmed Mean	73
4.5	Overall Example and Comparison	73
	Comparison	75
4.6	Weighted and Unweighted Average	76
	Which Measure to Use?	78
	Application of Weighted Averages to Salary Increase	
	Guidelines	80
4.7	Simpson's Paradox	82
4.8	Percentile	85
	Reverse Percentile	88
4.9	Percentile Bars	90
	Practice Problems	92
CHAPTER 5	Measures of Variability	95
5.1	Importance of Knowing Variability	95
5.2	Population and Sample	96
	Examples of Populations	96
	Examples of Samples and Populations	96
5.3	Types of Samples	97
5.4	Standard Deviation	98
	Interpretations and Applications of Standard Deviation	100
5.5	Coefficient of Variation	107
	Interpretations and Applications of Coefficient of Variation	108
5.6	Range	109
	Interpretations and Applications of Range	109
5.7	P ₉₀ /P ₁₀	110
	Interpretations and Applications of P ₉₀ /P ₁₀	111
5.8	Comparison and Summary	112
	Practice Problems	115

CHAPTER 6 Model Building	119
6.1 Prelude to Models	119
6.2 Introduction	120
6.3 Scientific Method	122
6.4 Models	123
6.5 Model Building Process	126
Plotting Points	128
Functional Forms	132
Method of Least Squares	136
Practice Problems	138
 CHAPTER 7 Linear Model	 141
7.1 Examples	141
7.2 Straight Line Basics	143
Interpretations of Intercept and Slope	144
Using the Equation	145
7.3 Fitting the Line to the Data	147
What We Are Predicting	148
Interpretations of Intercept and Slope	149
7.4 Model Evaluation	149
Appearance	150
Coefficient of Determination	150
Correlation	152
Standard Error of Estimate	154
Common Sense	154
7.5 Summary of Interpretations and Evaluation	155
7.6 Cautions	155
7.7 Digging Deeper	158
7.8 Keep the Horse Before the Cart	160
Practice Problems	164
 CHAPTER 8 Exponential Model	 167
8.1 Examples	167
8.2 Logarithms	168
Antilogs	170
Scales	170
Why Logarithms?	171
8.3 Exponential Model	172
8.4 Model Evaluation	176
Appearance	176
Coefficient of Determination	177
Correlation	177

CONTENTS

	Standard Error of Estimate	177
	Common Sense	178
	Summary of Evaluation	178
	Practice Problems	178
CHAPTER 9	Maturity Curve Model	181
9.1	Maturity Curves	181
9.2	Building the Model	184
	Cubic Model	184
	Cubic Model Evaluation	186
	Spline Model	187
	Spline Model Evaluation	188
9.3	Comparison of Models	190
	Practice Problems	190
CHAPTER 10	Power Model	193
10.1	Building the Model	193
10.2	Model Evaluation	197
	Appearance	197
	Coefficient of Determination	198
	Correlation	198
	Standard Error of Estimate	198
	Common Sense	199
	Summary of Evaluation	199
	Practice Problems	200
CHAPTER 11	Market Models and Salary Survey Analysis	201
11.1	Introduction	201
11.2	Commonalities of Approaches	203
11.3	Final Market-Based Salary Increase Budget	205
	Initial Market-Based Salary Increase Budget	
	and Market Position	205
	Final Market-Based Salary Increase Budget	206
	Raises Given Throughout the Year	206
	Raises Given on a Common Date	208
11.4	Other Factors Influencing the Final Salary Increase	
	Budget Recommendation	210
	Assumptions	211
11.5	Salary Structure	211
	Practice Problems	213
CHAPTER 12	Integrated Market Model: Linear	215
12.1	Gather Market Data	215

12.2	Age Data to a Common Date	217
12.3	Create an Integrated Market Model	217
	Interpretations	219
12.4	Compare Employee Pay with Market Model	222
	Practice Problems	228
CHAPTER 13	Integrated Market Model: Exponential	233
	Practice Problems	246
CHAPTER 14	Integrated Market Model: Maturity Curve	251
	Practice Problems	261
CHAPTER 15	Job Pricing Market Model: Group of Jobs	265
	Practice Problems	272
CHAPTER 16	Job Pricing Market Model: Power Model	277
	Practice Problems	280
CHAPTER 17	Multiple Linear Regression	283
17.1	What It Is	283
17.2	Similarities and Differences with Simple Linear Regression	284
17.3	Building the Model	285
	First x -Variable	292
	Second x -Variable	295
	Standardized Coefficient	298
	Third x -Variable	300
	Multicollinearity	301
17.4	Model Evaluation	305
	Regression Coefficients	305
	Standardized Coefficients	306
	Coefficient of Determination	306
	Standard Error of Estimate	306
	Multicollinearity	306
	Simplicity	307
	Common Sense	307
	Acceptability	307
	Reality	307
	Decision	307
17.5	Mixed Messages in Evaluating A Model	308
	r^2 Versus Common Sense	308
	r^2 Versus Simplicity	308
	Simplicity Versus Acceptability	308
17.6	Summary of Regressions	308

CONTENTS

17.7	Digging Deeper	310
	Summary	315
	Practice Problems	317
	Appendix	319
A.1	Value Exchange Theory	319
	Achieving Organization Goals	319
	Value Exchange	319
	A Fair Value Exchange Is a Good Deal	320
A.2	Factors Determining a Person's Pay	321
	System Factors	322
	Individual Factors	323
A.3	Types of Numbers	324
	Definitions and Properties	324
	Histograms with All Four Types of Measurements	327
A.4	Significant Figures	330
A.5	Scientific Notation	331
A.6	Accuracy and Precision	332
	Which Is More Important?	333
A.7	Compound Interest—Additional	333
	Other Formulas	333
A.8	Rule of 72	334
	Derivation of the Rule of 72	335
A.9	Normal Distribution	336
	Central Limit Theorem	337
	Distribution of Salary Survey Data	338
A.10	Linear Regression Technical Note	338
A.11	Formulas for Regression Terms	340
A.12	Logarithmic Conversion	340
A.13	Range Spread Relationships	340
	Overlap	343
A.14	Statistical Inference in Regression	344
	<i>t</i> -Statistic and Its Probability	347
	<i>F</i> -Statistic and Its Probability	348
	Mixed Messages in Evaluating a Model	349
A.15	Additional Multiple Linear Regression Topics	349
	Adjusted r^2	349
	Coding of Indicator Variables	350
	Interaction Terms	351
